Minelco Non-Volatile Avionics Indicators

MI57D Series
M83287/02-Electrical Reset, Panel Mount. Highly visible, internal flag display features magnetic latching for positive indication. Non-volatile memory produces effective warning of system faults. Electrical reset available in 3-28 volt DC versions.

BHG, BGHD Series
M83287/03-Panel Mount Ball. Small and lightweight, this highly reliable unit features excellent visibility and is available in a variety of display color combinations. Positive magnetic latching with single or dual coil construction, from 1.5-28 volts DC.

MI61S, MI61R Series
M83287/01-Panel Mount Flag. Most popular manual resettable unit, with magnetic latching and positive indication. MI61R is designed to withstand high random vibration. Both units are environmentally sealed. Available in a range of DC voltages.

MB25 Series
M83287/05-P.C. Board Mounting. Small and lightweight, features low power 180MW @ 20ms pulse. Non-volatile, wide angle display, dual coil and environmentally sealed construction. Available in 5 and 12 volts DC.

MI51LP Series
M83287/04-Low Power, Dual Drum. Requires only 50 MW pulse power for 25ms for positive latched fault indication. Available from 1.5 to 28 volts DC. Features manual reset and excellent shock and vibration characteristics.

The *only* line of Mil Qualified Fault Indicators.

- Magnetic latching type indicators require only pulse power for fault identification.
- When fault occurs, signal ball, flag or drum positively held in magnetic locked position without further application of power.
- Family of five indicators are manually or electrically resettable, panel mounted or designed for PC mount.
- All indicators available in several types, most at more than one voltage level.
- Operating life up to one million cycles.

Customized Lights
Specialized for Military and Avionic applications. Packaged LED and incandescent indicators in discrete or multiple array annunciators. Available in sunlight readable, secured lighting, NVG compatibility, or custom legend rear projection annunciators.

Custom Applications
Whatever your requirements for fault monitoring systems, Minelco can provide an indicator to meet your needs, illuminated or electromagnetic. Custom interfaces, legends, and colors are available in discrete or integrated modules tailored to your specifications. Standard units can be modified to exceed MIL-STD requirements in many areas such as shock, vibration, EMI-RFI shielding and environmental seals.

Minelco's high standards are reflected in a quality program maintained to MIL-Q-9858A and inspection system to MIL-I-45208A. The military and aerospace industry has relied on Minelco's quality design, production, and service for over 30 years. Minelco's sales and technical staff are ready to handle all indicator needs.

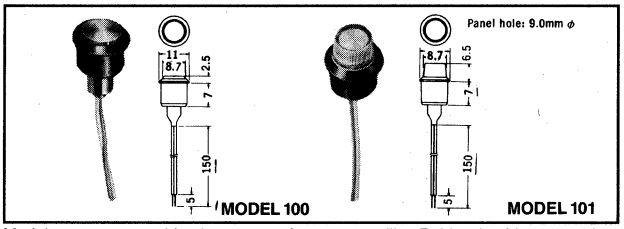
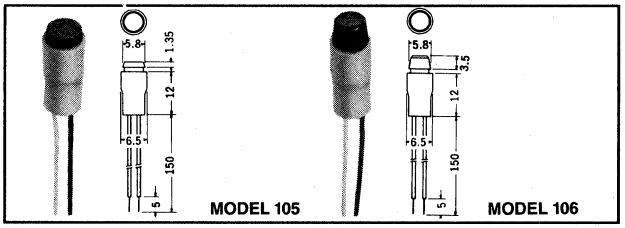
IMLEC INTER-MARKET INCORPORATED
1946 LEHIGH AVENUE, GLENVIEW, ILLINOIS 60025 • (312) 729-5330 • FAX (312) 729-4849

MODULAR INDICATORS

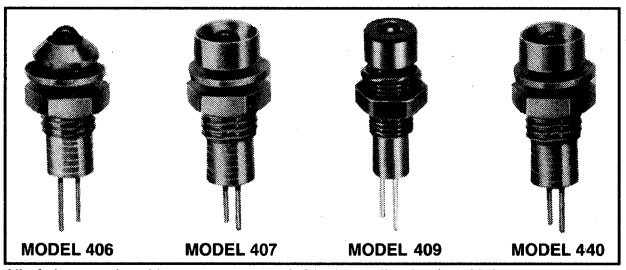


Modular concept provides low cost and great versatility. Rubber bushing snaps into 9mm panel cut out. Lens then snaps into bushing from front while light source fits in from behind.



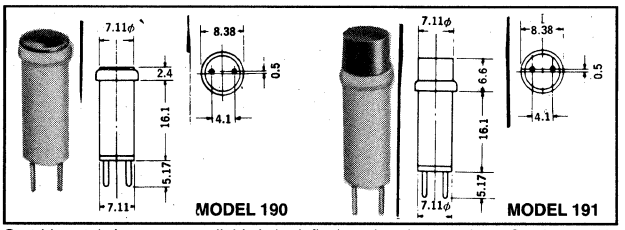
Miniature modular concept requires only 5mm panel hole. They are installed by pressing the lens through the panel from the front into the rubber bushing containing the lamp on the back.

SOLID STATE INDICATORS



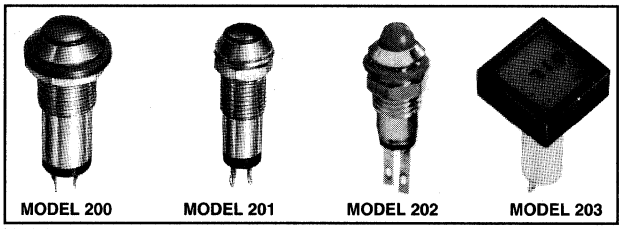
All of chrome plated brass except 409 is black anodized only, with low current LED lamp.

CARTRIDGE LAMPS



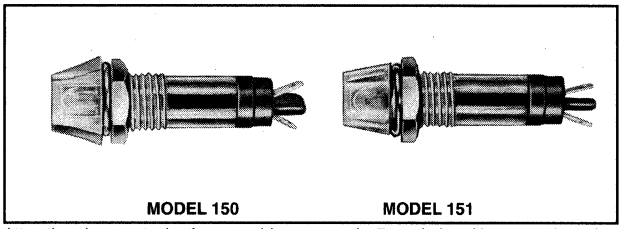
Cartridge style lamps are available in both flush and top hat type lens. Can be used in place of similar types from other manufacturers. Cartridge Lamp holders are also available as black or silver.

INCANDESCENT INDICATORS



Model 200 is rugged chrome plated brass with long life T1 3/4 lamp. Model 201 is smaller version of 200 above. Model 202 is chrome plated brass with removable lens for lamp replacement. Model 203 is designed to accommodate custom legends and is front relampable.

UNIVERSAL INDICATORS



Attractive, low cost plastic assembly, mounts in 7mm hole with nut and washer supplied. Square or round in a variety of light sources and colors.

THUMBWHEEL SWITCHES

MODEL II IMLEC INDEXER PUSHBUTTON FRONT MOUNT The Imlec Indexer is a bi-directional push indexing front mount switch, 5/16" in width. Identical in size to our popular MF switches. With snap together banking and snap-in panel mounting. Pushbuttons above and below the legend allow the user to add or subtract from the count.

These 10- or 16-position switches are available in all popular codes.

MODEL MI MINI INDEXER PUSHBUTTON FRONT MOUNT The Mini Indexer is a bi-directional push indexing front mount switch. 0.30" in width. Similar to our Imlec Indexer but smaller in size. Features snap together banking and snap-in panel mounting. Pushbuttons above and below the legend allow the user to add or subtract from the count.

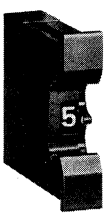
Available in most popular 10-position codes.

MODEL MF MINIATURE FRONT MOUNT The MF is our most popular, low cost, 5/16" wide Thumbwheel Switch. Slim, attractive, snap-in panel mounting requires no panel mounting hardware.

Available in all popular 10- and 16-position codes. Matte black finish on high impact moldings, with white legend on black wheel standard.

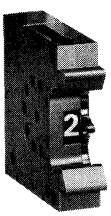
MODEL TR THIN REAR MOUNT For applications that require a lot of switch in a small space, these 5/16" wide TR switches are ideal. Rear mount counterpart to our popular MF front mount switches.

Available in most 10-position codes including Decimal, BCD, BCD plus Complement and Complement only.



MODEL IF INTERMEDIATE FRONT MOUNT A rugged front mount switch with large digits, 1/2" wide module. Snap-in front mounting hardware. Available in most popular 10- and 16-position codes.

Matte black finish with white legends on black wheel standard. Gloss finish, other wheel colors and legends available.

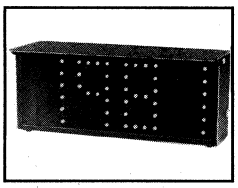


MODEL IR INTERMEDIATE REAR MOUNT Rugged rear mount counterpart to our IF model, with large readable digits, 1/2" wide module. Available in most popular 10- and 16-position codes.

Matte black finish with white legends on black wheel standard. Gray bodies, gloss finish, other wheel colors and legends available.

MODEL MR MINIATURE REAR MOUNT Popular rear mount switch, 1/2" wide module but lower profile than IR model. Available in matte black in most popular 10-position codes including Decimal, BCD, and BCD plus Complements.

Contact us today for free catalogs, including complete specifications and ordering information. Your Fax request will be handled same day.



DIGITAL COUNTER DCL300

The Model DCL300 Digital Counter has four three-inch high digits composed of 18 individual LEDs. Provides exceptional visibility to 60 feet even under high overhead lighting conditions. Accepts your switch closure through miniature jack provided to count up to 9999.
Ideal for any counting applications where results need to be seen from a distance. Eliminates need to be within several feet of counter to monitor production. Creates competition between similar assembly lines to improve output.
Incandescent styles with 4, 6, 9, and 12 inch digit heights to accept BCD or analog input also available.

OXLEY SEALED MILITARY & PROFESSIONAL LED INDICATOR LAMPS

With Sunlight Viewability, NVG Compatibility, EMC, and Secure Lighting Features

Approved for MILITARY APPLICATIONS to DESC Selected Item Drawings 85122 and 87019

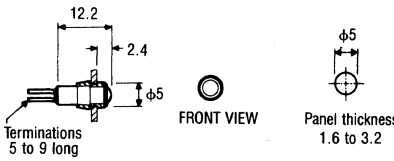
Special Features		Plano-convex lens to provide even illumination over a large area of emission. Special functions available:— Low current (Type—/LC) Flashing (Type—/5/Z) Bi-color (Type 2/—) Integral resistor types for operation from 5, 12, 15, 24 or 28Vd.c. supplies available.	Sunlight viewable up to 100,000 lux. Focused light source for optimum forward viewing. Contrast ring. Optional anti-reflection coating. NVIS/NVG compatible types available.	Sunlight viewable up to 100,000 lux. Pin-point light source for very wide angle viewing. Contrast ring. Optional anti-reflection coating. NVIS/NVG compatible types available.	Multicoloured 2 in 1 and 3 in 1 lamps with segmented display areas. Standard segment colors shown in front views above 2 in 1 lamp has two LED's independently terminated. 3 in 1 has common cathode configuration as standard.	Miniature Lamps, high brightness LEDs (100% screened and burnt-in) in a 7.5 mm diameter aluminum package, similar in construction to the STR/-series lamps, MIL/50 fits a 5mm diameter hole for applications where panel space is limited.	Replacement for obsolescent incandescent types. Integral current limiting resistor and protection diode for operating from 5, 12, 15, 24 or 28 V d.c. supplies. Domed lens fitted as standard to give wide viewing angle.
Electro-magnetic Screening Mesh (Type-/-/-/SES)		Option on STR/LH/8 only	Option on STR/LH/8/RAF only	Option on STR/LH/8/RAPP only	Not Available	Available	Not Available
Standard Features		Rugged construction with sealed glass lenses. Panel sealing to a depth of 20 meters of sea water. High brightness LED's. 100% burnt in to optimize reliability. Black anodized shroud to enhance visual appearance, all metal construction for grounding when panel mounted. Nut mounted. STR/-types have sealed rear terminations. Pigtail terminations available for STR/-types.					

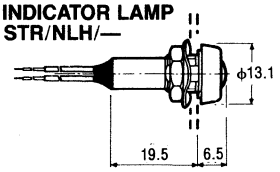
OTHER OXLEY DISPLAY PRODUCTS

MINIATURE LED INDICATOR LAMP, TYPE SSI/5



Barb® Cone-Lock self locking mounting technique for rapid assembly. SSI/5 Black anodized body version available for optimum contrast.

HIGH BRIGHTNESS SEALED NEON INDICATOR LAMP TYPE: STR/NLH/—



Similar packaging to above LED types, these lamps incorporate integral resistor for 110 or 240 Vac. This rugged military style panel seal indicator incorporates a glass lens and can, if required, be fitted with an Electro-magnetic screening mesh.

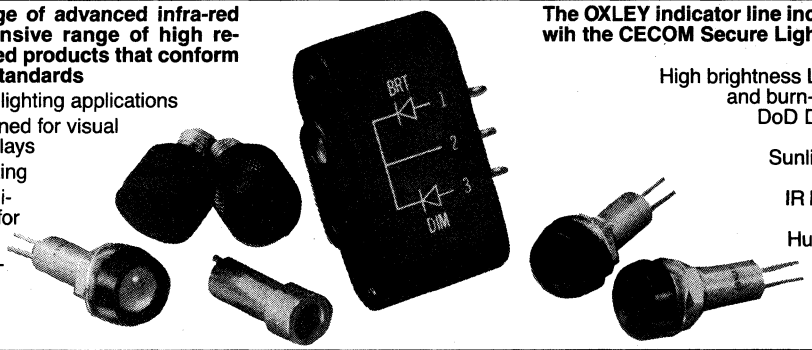
OXLEY SOLID STATE ELAPSED TIME INDICATORS, EVENT COUNTERS AND EQUIPMENT CONDITION MONITORS

FEATURES:
- Non-Volatile Semiconductor Memory
- Accurate Quartz Crystal Timing
- Military Specifications

Oxley meets the challenge of advanced infra-red technology with an extensive range of high reliability and quality assured products that conform to exacting U.S. military standards

- NVIS compatible cockpit lighting applications
- Color discrimination retained for visual warning and caution displays
- NVG Visible Covert Lighting
- Spectoradiometrically calibrated infra-red emitters for avionic formation lights.
- Custom NVG/NVIS Compatible Lighting

NVIS/NVG COMPATIBLE LIGHTING



The OXLEY indicator line includes parts complying wih the CECOM Secure Lighting Program.

High brightness LEDs 100% screening and burn-in to MIL-S-19500 US DoD DESC Selected items. ■

*Soon Available

High luminosity

Sharps's leading-edge opto-electronics technology is incorporated into its LED chips to provide amazingly high light emission. Thanks to our unique assembly technology, these units provide enough luminosity to even be used outdoors.

3 color display capability offers more creative freedom

Allowing you to display red, yellow-green and orange (by mixing the first two) makes the information more colorful and thereby more effective.

Reduced power consumption

Sharp's LED chips have superior luminous efficiency and provide a practical luminosity level at low current, reducing power consumption for the entire system.

Thin and light weight design

A thin and light weight body has been realized through our unique high-density design. It allows flexible unit configuration of just about any size, to best suit the available space in shops, offices, even outdoor locations.

High-speed operation

The response time is fast enough to cope with personal computers or various other forms of communication equipment. Graphics and other complex displays can be also shown, expanding the range of applications as an intelligent message board.

MINIGLOSSARY FIBER OPTICS

Acceptance Angle
The maximum angle within which light will be accepted by an element such as a detector or waveguide. In the latter, it is quantified as half the vertex angle of the cone within which optical power may be coupled into bound modes of a fiber.

Aligned Bundle
An assembly of fibers in which the coordinates of each fiber are the same at the two ends of the bundle, also called *Coherent Bundle*.

Bend Radius
The radius of curvature that an optical fiber can bend without breaking.

Bundle
Multiple optical fibers in a single housing used to transmit light or images.

Cladding
The low refractive index material that surrounds the core of the fiber to contain core light while protecting against surface contaminant scattering. In all-glass fibers, the cladding is glass.

Effective Numerical Aperture
The real numerical aperture of a fiber when the computed NA is not valid due to a change in the glass indices during the drawing and fusion process.

Fiber Bundle
A rigid, or flexible, concentrated assembly of glass or plastic fibers used to transmit optical images or light.

Fiber Optic Light Guide
A bundle of optical fibers arranged randomly for the purpose of transmitting energy, not images.

Fiber Optic Probe
A flexible optical probe having a bundle of glass fiber arranged to transmit an image

Gap Loss
The optical power loss caused by space between axially aligned fibers.

Image Transducer
Any arrangement of a bundle of optical fibers that alters the shape of the image.

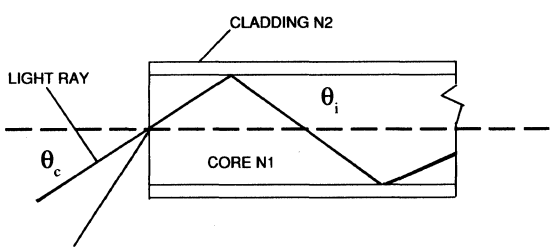
For example, by a systematic regulation of the spacing of the fibers from the entrance end to the exit end, a distortion of the image can occur that may be used to neutralize or compensate for the distortion introduced by the lens, prism or mirror components in an optical system.

Large-Core Fiber
Optical fiber with a large core, often a step-index fiber. "Large" is sometimes defined as greater than 85 μm.

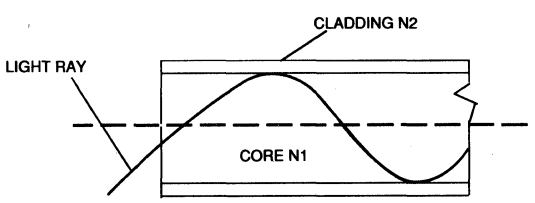
Multifibers
An array of optically distinct fibers that are fused into one strand. They are used to keep the resolution efficiency of the smaller single fibers and eliminate difficulty in handling. Their specific usage is determined by their flexibility or rigidity.

Packing Fraction
The ratio of the active core area of the fiber bundle to the total area at its light emitting or receiving end.

Plastic Fiber
Fiber in which both the core and cladding are made of plastic.



(a) Light propagation in a step index fiber.



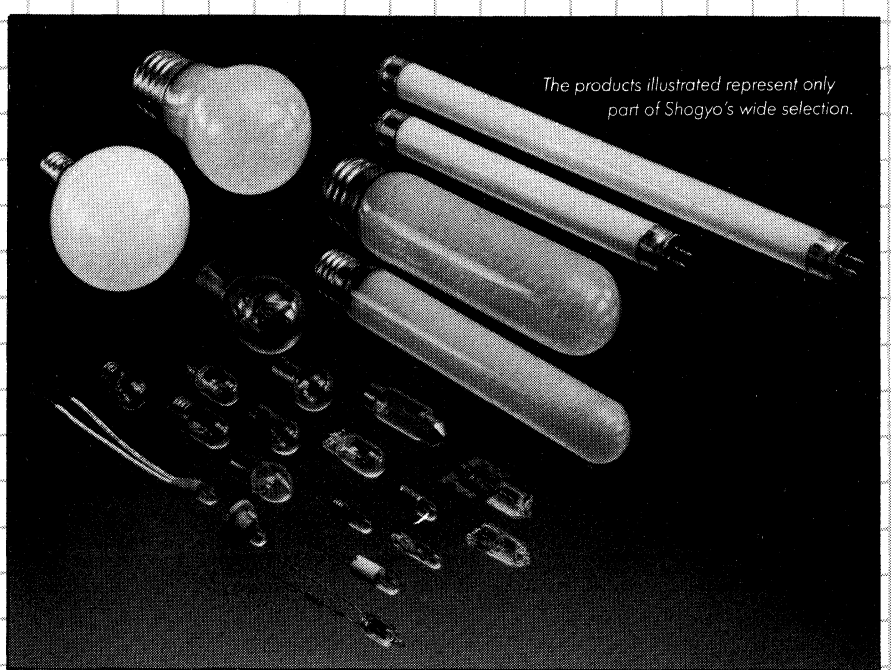
(b) Path of light rays in a graded index fiber.

SHOGYO LAMPS AND BULBS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service...comprehensive, responsive and fast
Shogyo Professionalism...the helpful experience you need
Shogyo Prices...always competitive, usually better
and...
Shogyo Selection...with complete custom design capabilities

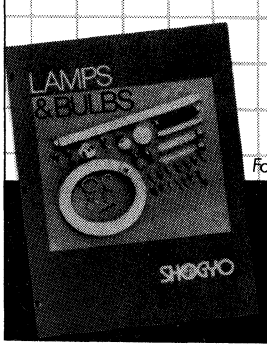
Including a diverse offering of:
- *Incandescent lamps*
- *Standard voltage lamps*
- *Fluorescent lamps*
- *Neon lamps*
- *Xenon flash tubes*
- *Bulbs*
- *Filaments*
- *Bases*

And featuring:
- *A comprehensive variety of styles, sizes, shapes, volts, amps, watts, filament shapes, and terminals (wire, bi-pin, flanged, wedge, knerled, midget grooved, bayonet and slide base).*



The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:
Dial 516-466-0911 or
FAX 516-466-0922



For complete product listings and specifications, request our free catalog.

SPECIFY SHOGYO. ELECTRONIC COMPONENTS AS GOOD AS YOUR DESIGN.

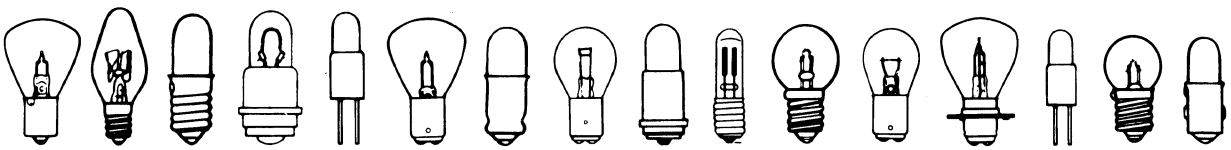
SHOGYO

Miniature, Subminiature, Microminiature, and LED Lamps

SHOKAI GUARANTEED PERFORMANCE AT THE WORLD'S LOWEST PRICES!



- **Engineered and Tested for Longer Lasting, Perfect Performance in Every Project**
- **All Voltages . . . Shapes . . . Sizes—Standard Types or to Your Specifications**
- **On-Time Deliveries—Direct from Our Overseas Factory**
- **Also Available—Halogen, Xenon, Neon, Krypton, Fluorescent, Germicidal, Auto, Aircraft and Telephone Lamps for All Applications**

When you need OEM quality components, specify SHOKAI. The name you can depend on!

Our proven record of reliable customer service and on-time delivery is no accident. We control every aspect in the manufacture of our products. We selectively review and test each category of components. And we consistently ensure the highest standards of production and design. All resulting in an assortment of quality components designed to meet every customer need. That's why more and more component purchasers have turned to SHOKAI.

And even if we don't have exactly what you need, we can custom make it for you, to your exact specifications, in our own facilities.

Insist on SHOKAI. For consistent quality, competitive pricing, and unbeatable values.

We can also furnish other quality components, such as antennas, battery holders, buzzers, cables and cord sets, capacitors, connectors, microphones cartridges, potentiometers, speakers and tape heads.

Give us a call today for all your electronic needs.

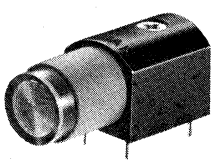
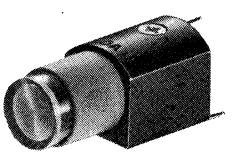
The Sloan Company

Indicator Lights

"The Touch of Brilliance in Panel Design"

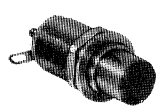
You need a solution!
You need it soon!
We can help you and we will.
You need well packaged LED's.
Standard bright? Super bright?
Ultra bright? Multi chip?





For the last 30 years The Sloan Company has been providing the finest indicator lights available.

For military applications, it's important to know that all of our material and processes meet or exceed military specs.



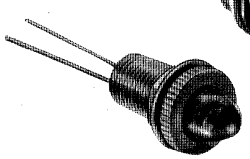
We got'em!

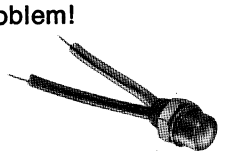
High Rel?

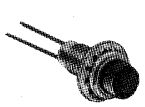
Waterproof?

Oiltight?

No Problem!







Maybe you have a high voltage circuit in a Radio Frequency sensitive environment. We handle that in every shape and size.

In the event that you don't see what you are looking for here, call us, you will find our staff most obliging. You will be pleasantly surprised to find how few you may have to order and how fast you can get them.

Free samples and prototypes available.

We will be glad for the opportunity to help you to find or develop the product you envisioned.

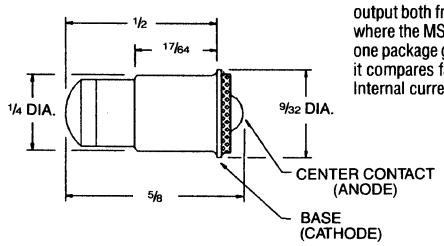
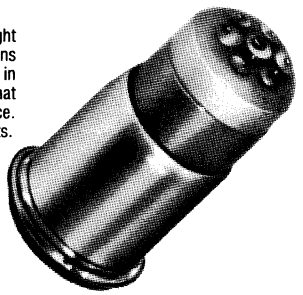
T-1¾ MIDGET FLANGED BASE LED

MODEL 510

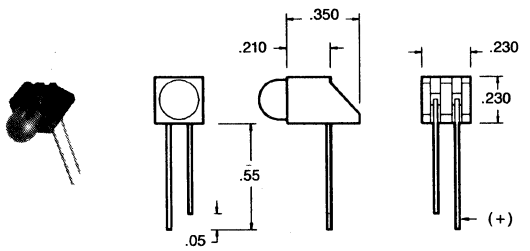


The Model 510 six chip LED T1¾ Midget Flange Base lamp has abundant light output both front and side viewing, for use in indicator lights and other applications where the MS25237 (327, 328, etc.) incandescent lamps are used. The six chips in one package give far greater light output totally than earlier single chip LEDs so that it compares favorably in use with the incandescent lamp it is intended to replace. Internal current limiting resistors allow for supply voltages from 5 up to 28 volts.



CIRCUIT BOARD MOUNT LED

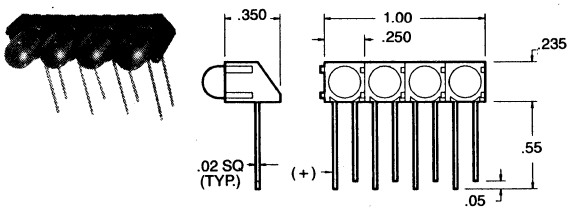
MODEL 210



Designed specifically for parallel mounting to printed circuit boards. Used as single indicator lights mounted in various places along the edge of the printed circuit board on any center-to-center distance.

CIRCUIT BOARD MOUNT LED

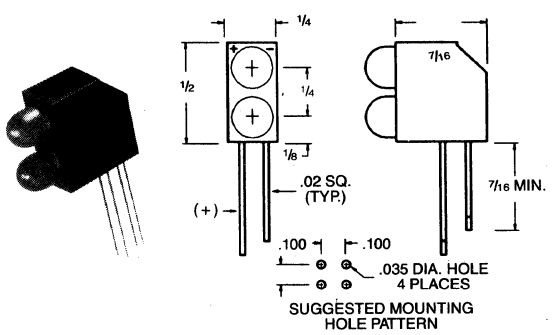
MODEL 211



Designed specifically for parallel mounting to printed circuit boards. Used where two or more indicator lights are needed in arrays of virtually any number. Close tolerance spacing makes assembly of the board with the front panel easy and trouble free.

CIRCUIT BOARD MOUNT LED

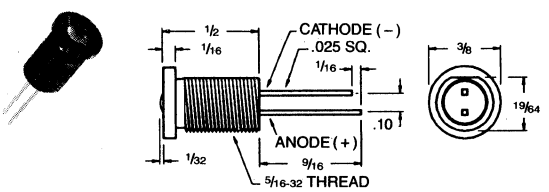
MODEL 220



This is an extremely versatile device for a wide range of applications and space saving status indicator for horizontal mounting in printed circuit boards. The bi-level feature saves board space by cutting space requirements in half. Standard .100 inch center to center distance of the leads make it easy for both assembly and servicing of the circuit board.

PANEL MOUNT LED

MODEL 250



Utilizes hermetically sealed solid state LEDs with high brightness and wide viewing angle. Can be supplied with standard, JAN Qualified, or JANTX LEDs. It can also be supplied with a current limiting resistor depending on your particular requirement. The Model 251 is supplied with an O-ring for proper panel sealing.

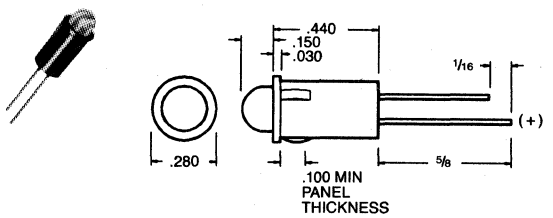
The Sloan Company

"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"

7704 San Fernando Road, P.O. Box 367, Sun Valley, CA 91353
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

PANEL MOUNT LED

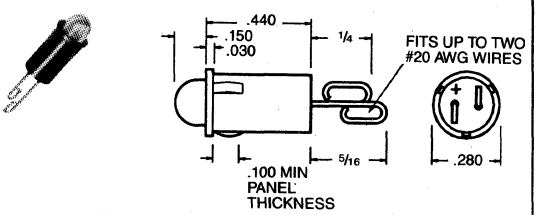
MODEL 240



This model uses high brightness LEDs mounted in easy press to fit bodies. Ideal for fast production, this model presses into place permanently, eliminating the need for mounting hardware. Uses straight terminal leads to which wires can be soldered directly or the leads can be hand soldered into PC boards either vertically or horizontally by bending the leads.

PANEL MOUNT LED

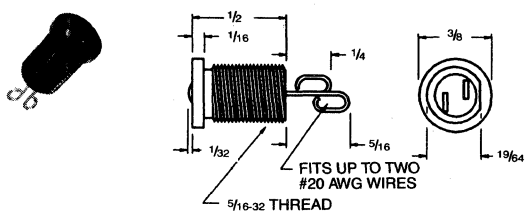
MODEL 241



Identical to Model 240 but has solder loops in the terminal leads to accommodate up to two #20 AWG or smaller wires. Robust terminal leads are formed with the loops in opposite directions to keep the wires apart from each other.

PANEL MOUNT LED

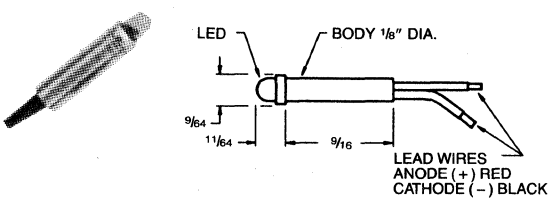
MODEL 252



Identical to the Model 250 except this model incorporates a standard package high bright LED. The Model 253 is supplied with an O-ring for proper panel sealing.

PANEL MOUNT LED

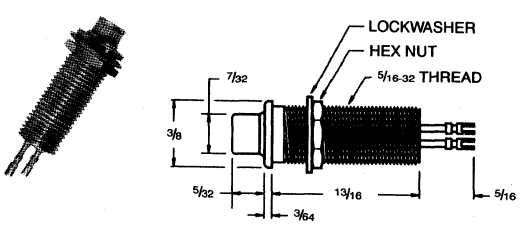
MODEL 5L3



The mini-cartridge provides front panel indication in applications where space is at a premium. The Model 5L3 is one of the smallest panel mount LED on the market. A series resistor is available allowing operation from sources up to 28 volts. Lead wires are color coded for polarity and provide simple solder connections. A speed clip permits easy and positive panel installation.

PANEL MOUNT LED

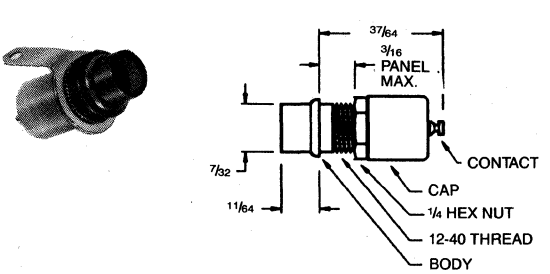
MODEL 3L5



This rugged unit houses high bright T1¾ LEDs in an all metal threaded housing. Termination is by wire wrap posts or solder lugs. Built in current limiting resistors allow these units to be powered from sources up to 28 volts.

PANEL MOUNT REAR RELAMP
INCANDESCENT OR LED

MODEL 107



Designed for rear replacement of T-1 size midget flanged base incandescent or LED lamps. Rugged construction allows operation at severe conditions. Available in different lens configurations. The two terminal version is the 107SI.

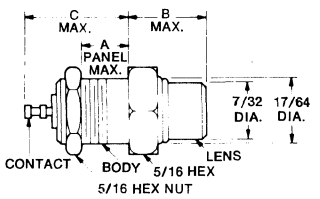
The Sloan Company

"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"

7704 San Fernando Road, P.O. Box 367, Sun Valley, CA 91353
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

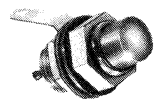
MODEL 102S

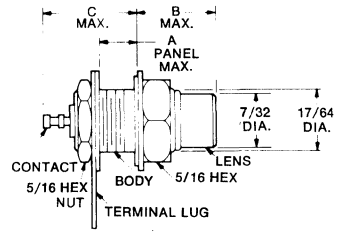


Utilizes the T-1 flanged-based incandescent lamp or LED. An internal silicone rubber pressure pad maintains electrical contact with the lamp and is an effective front-to-back of panel moisture seal.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 Delrin per LP-392
LENS—Lexan LP-393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
HDWE—Brass SAE 72 Nickel Plate QQ-N-290 Phenolic per MIL-P-15035 Nylon MIL-M-20693

MODEL 102SI



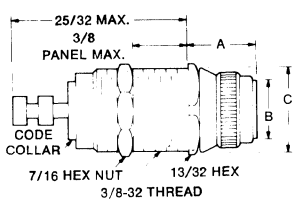


This is the two-terminal version of the basic 102S Model. It is created by the addition of special insulating hardware (above) which includes a solder lug as the second terminal.

NOTE 1—Both the 102S and the 102SI are available in four body styles: S-(above) provides a bright hex flange on the panel, SK-is a knurled flange, SS-a short low-profile hex, and SR-(above left) a small, plain flange.
NOTE 2—The 102S and 102SI are available in several lens styles: Q, QB, DSC, DS, STD. (Contact Factory)
NOTE 3—The 102 series can be furnished in a waterproof version, and can be RF shielded. (Contact Factory)

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

MODEL 855S



Among the features of the 855 Series are • Small Mounting Size • Front Relamping • Interchangeable Lens Assemblies. Contact pressure is maintained by a silicone rubber pressure pad which seals out moisture front to back of panel. Uses T-1¾ Flanged Base lamp, incandescent or LED.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Butyrate LP-349 Lexan LP-393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625 Brass SAE 72 Nickel Plate QQ-N-290

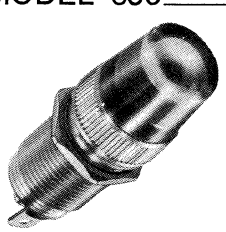
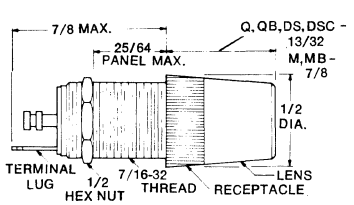
TERMINALS—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

MODEL 856





A two-terminal, front-relampable indicator light designed to use the T-1¾ midget flange based incandescent bulb or LED. An internal silicone-rubber pressure-pad maintains electrical contact inside the lamp body. It also provides an effective moisture seal front to back.
NOTE: Available in lenses styles: Q, QB, DSC, DS, M and MB.

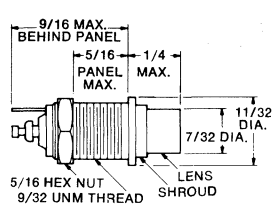
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727

MODELS—121, 122—123, 124



The 121 Model lamp holder is a two terminal, front relampable indicator light specifically designed for use with T-1 Midget Flange Based incandescent or LED lamps. The 122 is a waterproof version of the 121. The Model 123 is the same but with the more conventional ⅜-32 screw body. The 124 is the waterproof version of the 123.
Available in lens styles: STB, STC, DS, DSC, QB, Q.

MATERIAL & PROCESSES

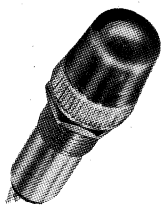
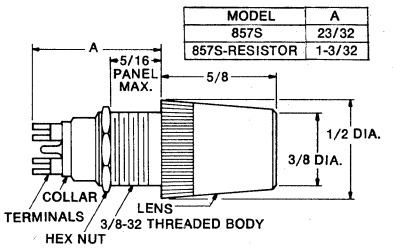
PANEL MOUNT FIXED LAMP

MODEL 857



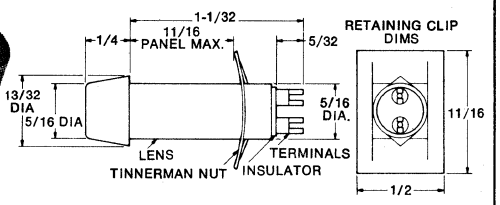


A sub-miniature fixed neon, offering optimum light dispersion and direction. Uses, Hi-Brightness or other NE-2 Series unbased bulb with or without resistors. Mounted in a ⅜ dia. hole with resistor, the Model 857 can be used directly on commercial line currents (115 VAC).

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 General Purpose Phenolic
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate per MIL-T-10727
HARDWARE—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 858



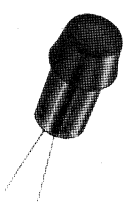
Uses the T-2 unbased neon lamp or can be supplied with the **T-1 or T-1¾** unbased incandescent lamp. It accommodates long neon lamps (C2A Type) without dropping resistor built-in, as well as short neon lamps (A1C Type) with dropping resistor built-in. When resistor is built-in it can be used directly on commercial line current (115 volts A.C.). For LED applications see note below.

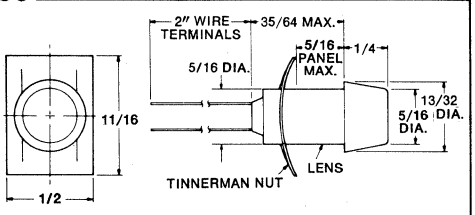
FOR LED APPLICATIONS LED can be supplied as a special in red, green and amber with or without built-in resistor. Voltage up to 28 volts available. (Contact factory).

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish
INSULATOR—General Purpose Phenolic

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 859



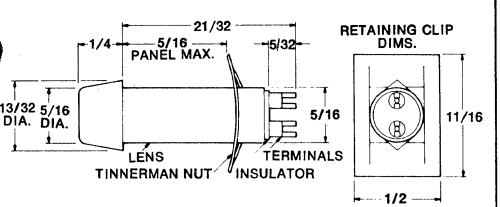


Uses the T-2 unbased neon lamp and long neon lamps without dropping resistor or with dropping resistor. It can also accommodate short neon lamps (A1C type) with or without resistor. With resistor the 859 Series can be used directly with commercial current (115 volts A.C.). Incandescent unbased lamps (T-1 or T-1¾) can also be furnished.

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 862

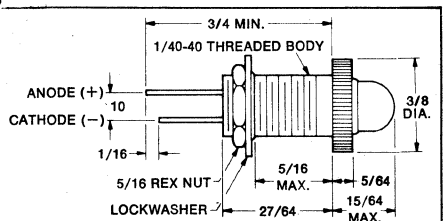


The 862 series accommodates short (A1C) neon lamps only with no resistor built in. Useful where space is limited behind the panel and offers wire wrap™ terminals for soldering.

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
INSULATOR—General Purpose Phenolic
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish

PANEL MOUNT FIXED LAMP
LED

MODEL 1L3

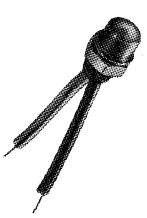


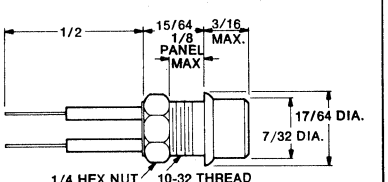
Designed for applications requiring LED indication without a lens. The 1L3 Model provides high brightness in the smallest threaded metal body available in the industry. Termination is by wire leads. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
HDWE—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—.02 Sq. Solid Cu. Tin plated for solderability

PANEL MOUNT FIXED LAMP
INCANDESCENT/LED

MODEL 105S/1L5S





Featuring a T-1 unbased commercial or MIL-Spec. lamp. Standard unit has two ½" long leads. Longer leads furnished upon request. RFI shielding and waterproofed version available. The 1L5S is the LED indicator model.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Lexan LP393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—32 AWG Solid Cu.

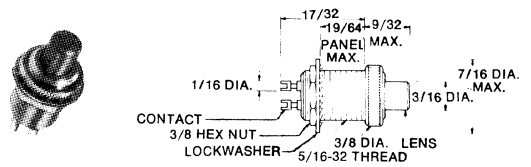
PANEL MOUNT FIXED LAMP
INCANDESCENT/LED

MODEL 106S/1L6



Specifically designed for use with T-1 unbased MIL-Spec., commercial incandescent or LED light source. Can be installed from front or rear of panel.

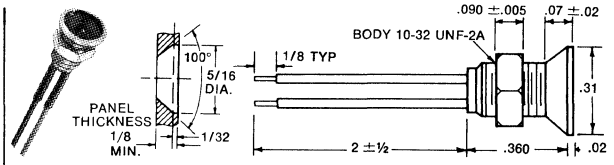
The light source in Model 1L6 is a special high bright T-1¾ LED protruding from a metal body. No lens is provided. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC.

NOTE: The 1L6 is available in red only.

MATERIAL & PROCESSES
BODY/HEX NUT/RD NUT—Brass SAE 72 Nickel Plated QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
LENS—Lexan LP-393 Nylon MIL-M-20693

T-1 UNBASED INCANDESCENT/LED PANEL MOUNT FIXED LAMP

MODEL 109/1L9



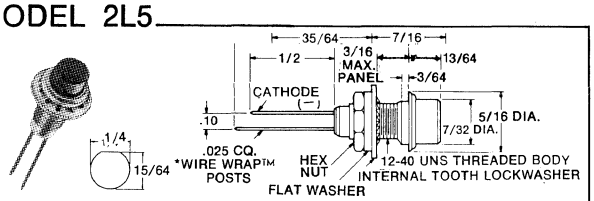
The new flush mount design can be used only with any T-1 size LED or incandescent lamp, including the new super bright LED which gives luminous intensity and color never before possible in the T-1 size. LED colors include red, green and amber with red, green amber, clear and white transparent and translucent lens, and are available with or without a resistor and RFI shielding.

The incandescent models offer the brightness and variety of incandescent colors, including red, green, amber, blue, white and clear with either transparent or translucent lens, and the option of RFI shielding.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Lexan LP-393
TERMINALS—26 AWG Stranded Cu. MIL-W-16878 24 AWG Solid Cu. MIL-W-16878
HARDWARE—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FIXED LAMP
LED

MODEL 2L5



This Series incorporate a red, green or amber T-1 size LED in an all-metal threaded body. Available with wire leads or wire wrap™ terminals. Two kinds of color contrast lenses are provided. When unlit, the white or clear lens material alone is visible. When lit, the color LED shows through plainly, giving the appearance of a lens which changes color.

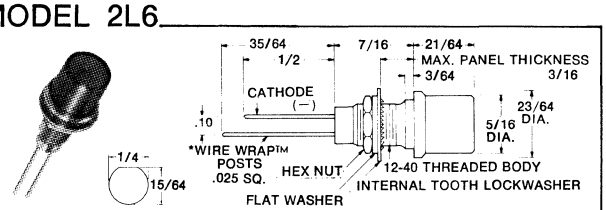
Built-in dropping resistors allow these units to be powered from sources up to 14VDC. Model 2L501 available with superbright LED.

Available with either a round body or flat sided "D" body for consistent terminal location and ease of tightening. *Gardener—Denver

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290
LENS—Lexan LP-393 Nylon MIL-M-20693
TERMINALS—Phosphor Bronze ¾ Hard Tin Plate per MIL-T-10727
Wire per MIL-W-16878 24 AWG Solid Cu. 26 AWG Stranded Cu.
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
LED

MODEL 2L6



The 2L6 Model incorporates a red, green or amber T-1¾ size Hi-Bright LED in an all-metal threaded body, suitable for panel mounting. Large lens permits 180° visibility, up to 50 mcd. Termination is by wire-wrap™ posts, or wire leads. Lenses available in transparent material for head-on viewing or translucent material for side viewing. Built-in dropping resistors allow these units to be powered from sources up to 14 VDC. Bodies come round or in flat sided "D" for ease of tightening and consistent terminal location. *Gardener—Denver

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290
LENS—Nylon per MIL-M-20693 or Lexan per LP-393

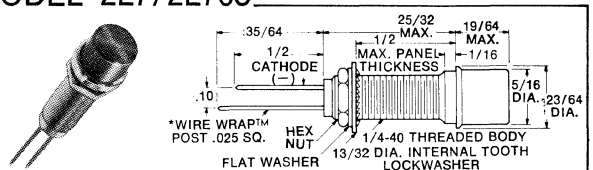
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
HI-BRIGHT LED

MODEL 2L7/2L703



Utilizes a T-1¾ Hi-Bright LED. Permits 180° visibility, up to 50 mcd. The lens incorporates Fresnel rings and flutes which allow maximum distribution of light output. Also available with plain lens (no flutes or rings). Termination is by wire leads or wire-wrap™ post. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. 2L703 is waterproof version. Bodies can be round or "D" type.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290 Nylon per MIL-M-20693
LENS—Lexan per LP-393

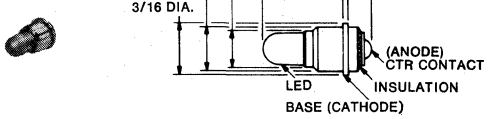
T-1 SUB-MIDGET FLANGED BASE LED

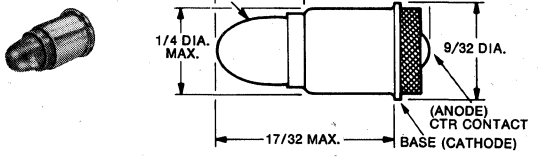
MODEL 4L001



The 4L001, available in diffused lens material is the Sloan T-1 based LED designed to offer diode reliability as a replacement unit in T-1 hardware. When maximum light output is desired using based LEDs in indicator applications, it is recommended that the lens be of transparent material with Fresnel rings. If translucent material is desired, then the lens should be without Fresnel rings.

T-1¾ MIDGET FLANGED BASE LED

MODEL 5L001



The versatile T-1¾ based LED is available in red, green or amber. Viable voltage range is 2.1 volts to 28 volts with power dissipation up to 400mW. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. The higher voltage capability permits the Sloan T-1¾ based LED to be used as direct replacement for incandescent bulbs in applications where light intensity is not critical but diode reliability is required.

GENERAL INFORMATION:

- RFI shielding available with virtually all models.
- It is wise to avoid using blue or green lenses with neon lamps.
- It is also wise to avoid using blue lenses with LED lamps.
- Ultra-bright, multichip and other exotic lamps available.
- All materials meet or exceed applicable military specs.

NEON LAMP ELECTRICAL SPECIFICATIONS

LAMP WITH RESISTOR	VOLTS A.C. OR D.C.	AMPS NOMINAL	WATTS NOMINAL	LIFE	RESISTOR
A1B	105-125	.03	1/25	25,000	220K
A1C	105-125	1.2	1/7	25,000	47K
A9A (NE-2E)	105-125	0.7	1/12	25,000	100K
C2A (NE-2H)	105-125	1.9	1/4	25,000	30K

NOTE: A1C and NE2H are high brightness. Other lamps available. Life figures for A.C—Life at D.C. ½ A.C. (Approx.). 862 Series cannot be supplied with resistor. We suggest that you do not order neon with Green or Blue lenses.

IMPORTANT: The lamps shown represent the most popular types normally requested. MANY OTHER LAMPS ARE AVAILABLE—PLEASE CONTACT FACTORY.

COLOR TABLE

LENS MATERIAL	LEXAN	LEXAN	GENERAL PURPOSE	BUTYRATE
Color	Transparent	Translucent	Translucent	Transparent
Red	RL	RLUC	R	RTP
Green	GL	GLUC	G	GTP
Blue	BL	BLUC	B	BTP
Amber	AL	ALUC	A	ATP
Clear	CL	—	—	CTP
White	—	WLUC	W	W

LED LAMP INFORMATION

We have virtually any LED you want. The two basic sizes are T-1 and T-1¾ with flanged bases. The brightest varies with color, with green lowest to red highest. To order extra or super bright lamps simply add 01 or 04 to the model number. One more suggestion do not order LEDs with blue lenses.

NO.	LAMP TYPE	T-1	T-1¾
—	Standard-Bright	2 mcd	3-8 mcd
01	Extra-Bright	8-18 mcd	15-18 mcd
04	Super-Bright	20 mcd	60-80 mcd

IMPRINTING

Lenses may be hot stamped, engraved, or opaqued and engraved so that the character only is displayed.

The chart below designates type size available for hot stamping. Size of lens determines size of type that can be used.

TYPE	ACTUAL SIZE	
	WIDTH	HEIGHT
2 Pt	.050	.060
6 Pt	.060	.080
8 Pt	.080	.110
10 Pt	.090	.120
12 Pt	.110	.160

NOTE: For other size type, contact factory.

LENS STYLE

STYLE		DESCRIPTION
Q		Clear anodized bezel allows 180° visibility.
QB		Same as Q lens except with black anodized bezel.
DSC		Clear anodized bezel prevents sidelight emission.
DS		Same as DSC lens except with black anodized bezel.
STD		Full 180° visibility. Maximum illumination.
M		Large lens for maximum visibility from all angles. Engineered to offer the most uniform light distribution. Full 180° visibility.
MB		Same as M lens except with black anodized bezel.
D		Skirted lens covers metal parts for neat panel appearance. Large lighted surface assures positive indication.
SE		Edgelight for plastic panels. Small diameter light gasket minimizes wasted panel space.
DDS		DIMMER: Rotating outer collar changes light output from full to minimum. Rotation to dim can be clockwise or counter-clockwise. Easy adjustment with gloved hand.
U		UNLIMITED: Has no lens to diminish light output. Specifically suited to T-1¾ flanged based LED for maximum light output.

120 SERIES

STB		Full 180° visibility. Maximum illumination. Black bezel.
STC		Full 180° visibility. Maximum illumination. Clear bezel.
QB		Black anodized bezel allows 180° visibility.
Q		Same as QB lens except with clear anodized bezel.

STYLES

FLAT		NOTE: Lens style may be flat or domed, plain or lensed, meaning that the lens is provided with internal concentric rings on the inner face and flutes on the sides, thus giving better light distribution.
DOMED

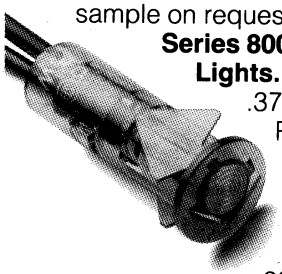
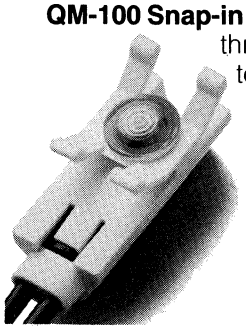
Ask us for solutions to your product lighting needs.

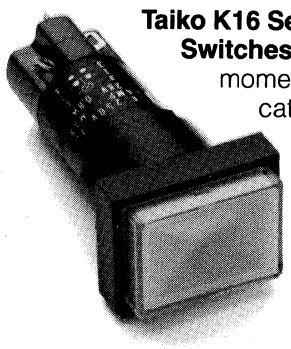
SoLiCo pilot lights, indicator lights and lighted pushbuttons come in a wide variety of styles and sizes for a broad range of products and applications. Give us your panel depth, required hole size, mounting method, lens size and style, material, and termination. Chances are, we'll have an inexpensive standard part for your needs. We'll even send you a free sample on request.



Series 8000 Snap-in Indicator Lights. Real time savers. Snap into .375" hole from front of panel. Pre-wired leads. Red, green, yellow or amber LED's. Red or green neon. Lens bodies domed or flat, translucent or transparent. Bright, quick, easy.



QM-100 Snap-in Indicator Lights. Lens fits through panel front. Lamp snaps to it from back. Pre-wired 6" leads. Standard, blue or green neon lamp. 4 lens shapes, 6 colors. Rated at 125-250V.



Taiko K16 Series Lighted Pushbutton Switches. Incandescent or LED. In momentary, maintained, and indicator styles. Solder lug terminals, independent lamp terminals, and T1 BiPins for durability. Round, square, or rectangular. Lenses clear or in 5 colors. 1, 2, 3, or 4-pole double-make/double-break contacts. Fit 5/8" round hole.

Special items and special assistance, too. Contact our factory sales department for quick solutions to unique lighting demands. Technical aid is always available to help you find the light that's best for your application. To find out just how many ways SoLiCo can help you see the light, call for our full-line brochure—**(203) 527-3092**

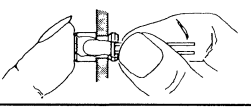
CLIPLITE® LENS/MOUNTS FOR T1 & T1 3/4 LEDs

FEATURES

- Installs with finger pressure — no tools required — takes only six seconds
- Increases viewing angle up to 180 degrees using either diffused or point source LEDs
- Protects LED from being pushed back through panel — LED blackout
- Moisture seals easily to panel with the application of common sealants
- Intensifies apparent brightness up to 125% by the use of striated lines and fresnel rings
- Guards against IC damage by electrostatic discharge transmitted thru exposed LED

SIMPLE TWO-STEP INSTALLATION

1 Snap the CLIPLITE into panel hole.



2 While holding the CLIPLITE tight to the panel with your finger, insert the LED into the CLIPLITE from the back.

SPECIFICATIONS

MATERIAL Lens — Polycarbonate; Spacer — Nylon, (U.L. Listed plastics).

DESIGN Standard and low profile lens using fresnel rings and striated lines.

MOUNTING Mounts thru front of panel. Mounting holes should be deburred but not chamfered.
T1 size (SML 190, SMB 200) mounts in a .171+/-.002 (4.34mm) hole on 1/4" centers. Panel thickness for SML 190, 1/32" to 1/16"; SMB 200, 1/16" to 1/8".
T1 3/4 size (CLF 280, CLB 300) mounts in a .250+/-.002 (6.35mm) hole on 3/8" centers. Panel thickness for CLF 280, 1/16" to 1/8"; CLB 300, 1/32" to 1/4"; (panels less than 3/16", SPC 125 spacer available).
Standard metal or plastic washers can be used to increase panel thickness if necessary.

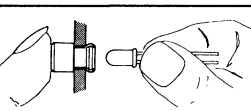
CUBELITE® SQUARE LENS/MOUNTS FOR LEDs

FEATURES

- Enhances aesthetics, square design in both standard and low profile configurations
- Mounts either as a single square lens or stacks in bar configuration
- Increases viewing angle up to 180 degrees using either diffused or point source LEDs
- Intensifies apparent brightness up to 140% by the use of striated lines and fresnel rings
- Installs with finger pressure — no tools required — takes only six seconds
- Guards against IC damage from electrostatic discharge transmitted thru exposed LED

EASY TWO-STEP INSTALLATION

1 Snap CUBELITE in a .250 inch panel hole.



2 Holding CUBELITE firmly to panel, insert LED into CUBELITE from the back. Installs in just 6 seconds.

SPECIFICATIONS

MATERIAL Lens — Polycarbonate; Spacer — Nylon, (U.L. Listed plastics).

DESIGN Square lens, standard and low profile, fresnel rings and striated lines.

MOUNTING Mounts thru front of panel. Mounting holes should be deburred but not chamfered.
T1 size (SMQ 250) mounts in a .171+/-.002 (4.34mm) hole on 1/4" centers. Panel thickness from 1/16" to 1/8".
T1 3/4 size (SQL 360) mounts in a .250+/-.002 (6.35mm) square punched hole on 3/8" centers. Panel thickness from 1/16" to 1/8".
T1 3/4 size (SQB 400) mounts in .250+/-.002 (6.35mm) round hole on 3/8" centers. Panel thickness from 1/32" to 1/4"; (for panels less than 3/16", optional spacer SPC 125 is available).
Standard metal or plastic washers can be used to increase panel thickness if necessary.

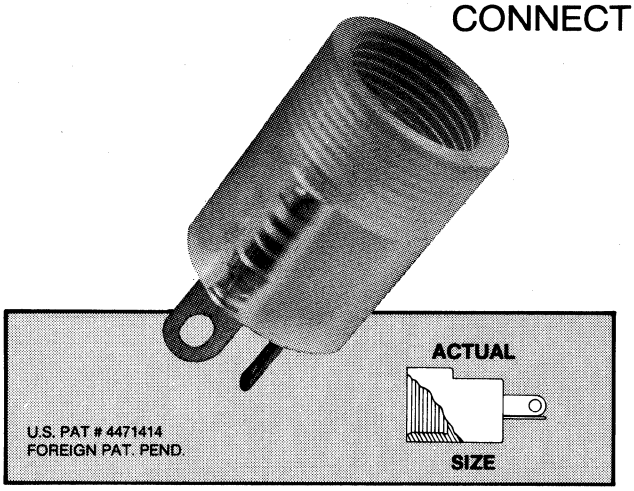
CONXRITE®

SIMPLIFIED METHOD FOR CONNECTING PANEL MOUNTED T1 3/4 LEDs



DESIGN — CONXRITE has a molded plastic body with self-contained 1/4 watt resistor. When an external resistor is required or desired, CONXRITE is available without the built-in resistor.

VERSATILITY — CONXRITE, with or without the ballast resistor, can be used on circuits from 3 to 28 volts. Panel thickness can vary from 1/32 to 1/4 inch. Makes positive connection with either CLIPLITE (CLF 280, CLB 300), CUBELITE (SQB 400) lens/mounts or clip & ring mount.

INSTALLATION — CONXRITE requires no assembly tools and provides a simple, fast, press-fit connection. Eliminates direct hard-wiring with potential heat damage to the LED during final assembly.

COST-EFFECTIVENESS — CONXRITE enables pre-assembly of wiring harness precluding the need for hard-wiring directly to the LEDs. Permits easy replacement of defective LEDs in final test and field service. CONXRITE helps lower labor costs.

SPECIFICATIONS

MATERIAL: Housing - Polypropylene (natural).
Terminals - Phosphor bronze, tin plated.
Resistor - 1/4 watt resistor values provides current limiting to 28 volts.

MOUNTING: Mates with CLF 280 and CLB 300 CLIPLITE, SQB 400.
CUBELITE and the clip portion of the clip and ring mount. See specs on the CLIPLITE and CUBELITE.
Panel Thickness - CLF 280 and clip mount, .110 (2.79mm) max; CLB 300 and SQB 400, .250 (6.35mm) max. (panels less than 3/16", SPC 125 spacer available).
Soldering - Caution, excessive heat applied to contacts may cause damage to the plastic body.
Hole Size - All mounts .250 +/-.002 (6.35mm). Hole should be deburred but not chamfered.
NOTE: Trim LED leads to .275 +/-.010 (6.99mm).

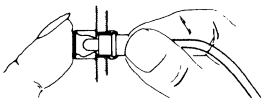
CLIPLITE® ROUND CUBELITE® SQUARE / INCANDESCENT INDICATORS

FEATURES

- Installs with finger pressure — no tools — takes only 6 seconds
- Provides 180 degrees of visibility using transparent lenses
- Bi-Pin or wire lead lamps easily installed or replaced
- Produces a brighter display than LEDs — provides extremely long life

SIMPLE TWO-STEP INSTALLATION

1 Snap lens into panel hole.



2 Holding lens firmly to panel, insert lamp into lens mount from the back. Installs in just 6 seconds.

SPECIFICATIONS

LAMPS Aged and selected, Bi-Pin base or 6" insulated wire leads. Voltages 5v, 14v and 28v. IC compatible lamp also available.

MOUNTING Lamps have special base for use with VCC's lenses, connectors and PCB mounts.

LENSES CLIPLITE (round), CUBELITE (square), standard and low profile, mount in .250 hole, panels from 1/32" to 1/4" thickness.

CONNECTORS CONXRITE, provides a fast press-fit connection to lamps mounted in CLIPLITE & CUBELITE lenses.

PCB MOUNTS/SOCKETS P-C-LITE, methods of attaching lamps vertically and horizontally to PCBs. See CLIPLITE, CUBELITE, CONXRITE and P-C-LITE data.

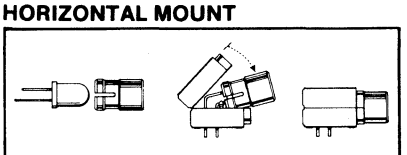
P-C-LITE® PCB MOUNTS FOR T1 & T1 3/4 LEDs

FEATURES:

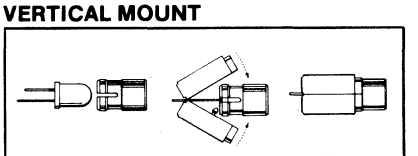
- Wave solders horizontally or vertically without special jigs or fixtures
- Stabilizes LED during packaging and physically protects after assembly
- Mounts flush, recessed or fully extended thru display panel without attachments
- Height compatible with switches and other circuit board mounted components
- Increases LED apparent brightness and viewing angle up to 180 degrees
- Guards against IC damage by electrostatic discharge transmitted thru exposed LED

HORIZONTAL MOUNT



Snap LED into lens — insert LED leads through holes in mount base — close mount, bending leads into position.

VERTICAL MOUNT



Snap LED into lens — insert LED leads through holes in mount — close mount.

SPECIFICATIONS

BODY — General purpose nylon (black).

LENS — Plycarbonate. Flat top design using fresnel rings and striated lines.

MOUNTING — P C Board horizontally or vertically on .100 inch hole centers.

(PCL 490) Panel thickness from 1/64" to 3/16" thru a 7/32" clearance hole.

(PCR 740) Panel thickness from 1/32" to 9/32" thru a 5/16" clearance hole.

Permits full projection to flush mounting of the lens portion thru the panel.

LED Standard LEDs. See Cliplite Lens Data Page for dimensional infomation. No attempt should be made to bend a lead with a stepped thickness.

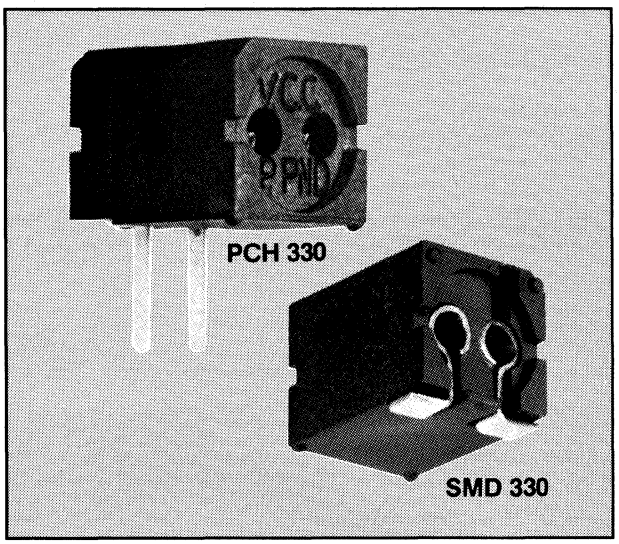
P-C-LITE® CIRCUIT BOARD SOCKETS FOR LEDs



US & FOREIGN PAT. ISSUED & PEND.

APPLICATION — P-C-LITEs are used as circuit board mounting sockets for status, logic, fault, detection lights. Also used for back panel lighting, front panel function lights and mounting of photodetection type devices.

VERSATILITY — P-C-LITEs are relampable, no direct soldering to LED. PCH and SMD series mount horizontally, PCV series mounts vertically. The PCV can be installed on one side of the PCB while the LEDs are inserted from the reverse side of the board.

DESIGN — P-C LITEs are manufactured from UL listed thermoplastics. LEDs can be inserted from either end of these sockets. Unique contact design permits automatic adjustment to the various sizes and shapes of LED leads. Also accommodate IR emitters, phototransistors and incandescent bi-pin lamps.

INSTALLATION — P-C-LITEs are wave soldered (PCH/PCV) or surface mounted (SMD) to PCB along with other components. Sockets are provided with polarity identification. Molded standoffs permit easy board cleaning. Lock-type security for component leads in high vibration and shock environments.

SPECIFICATIONS

MATERIALS: HOUSING - U.L. listed thermoplastic (black).
CONTACTS - Phosphor bronze, tin plated.

MOUNTING: PCH Series - Thru hole, horizontal mounting sockets, .035 (.89mm) holes on .100 (2.54mm) centers.
(see pattern on next page)

SMD Series - Surface mount, horizontal mounting sockets, .060 (1.52mm) X .060 (1.52mm) component pad size.
(see pattern on next page)
SMD 330 available on tape/reel.

PCV Series - Thru hole, vertical mounting sockets, .035 (.89mm) holes on .100 (2.54mm) centers with optional .060 (1.52mm) holes for opposite side mounting. Same side mounting, delete the .060 holes.
(see pattern on next page)

SPACER - Bivar, Series 908 nylon spacers or equal.

LED DATA: Type - T1 or T1 3/4 sizes.
Leads - Min. .017 (.43MM) round or square. Max. .030 (.76mm) thickness - .040 (1.02mm) width.

LED LEAD DIMENSIONS

MINIMUM - .017 (.43mm) round or square shape.
MAXIMUM - .030 (.76mm) thickness - .040 (1.02mm) width

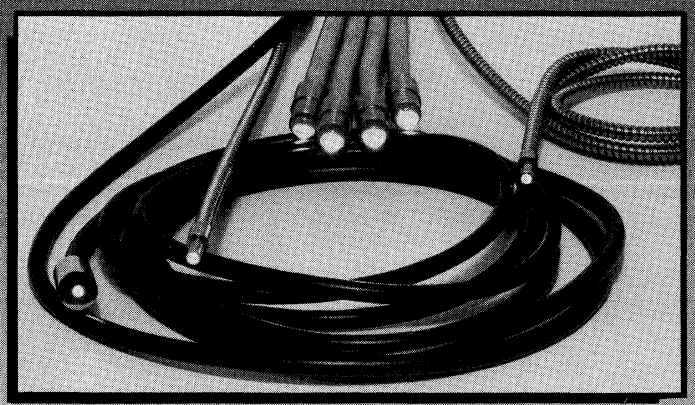
TWENTY YEARS OF EXPERIENCE

Fiberoptic Systems, Inc.

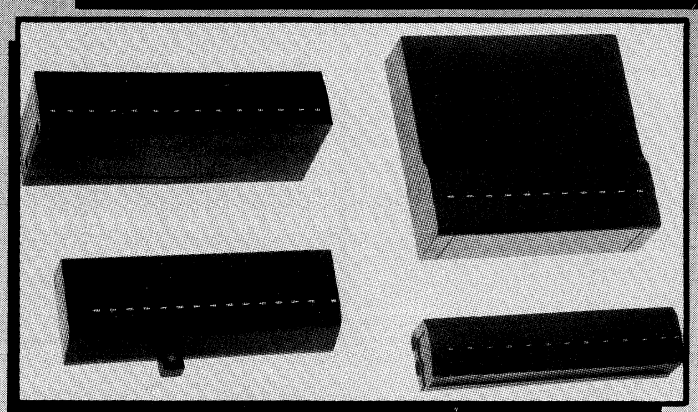
manufactures a broad range of custom-designed, high loss, short distance fiber optics-based products with diverse applications. We will work with you in the concept and design of any device that involves optical sensing or transmission and will manufacture single prototypes or large production runs. Most prototypes are shipped within one week of design completion.

Our sales engineers are available to answer all inquiries immediately.



■ *Randomized Light Guides*

Sophisticated, creative custom light guides and scanning devices for every need...



■ *Reflective Multi-Channel Custom Read Heads*

FREQUENT APPLICATIONS FOR FSI PRODUCTS:

REFLECTIVE READERS
- Single or multichannel
- Bar code readers
- Lottery ticket readers
- Pattern recognition
- Edge detectors

ILLUMINATION
- QC and inspection
- Signalization
- Custom microscope lights
- Optical curing (UV light)
- Surgical illumination

PHOTOELECTRIC CONTROLS
- Microfiche
- Missing parts detection
- Automatic inspection
- Sorting
- Fracture detection

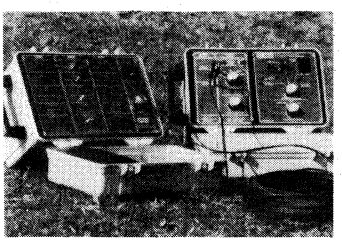
To Solve HV Isolation, EMI/RFI, Follow Our 5 Step Procedure &



It's never been easier to solve system integration and interconnection problems using fiber optic links and modems. With this easy-to-use technology, you can determine what link or modem you need simply from the tables on these pages. This 5 step procedure will lead you to the right model every time. Select:

Analog (Link)
1. Signal Bandwidth (Input)
2. Transmission Distance
3. Usage
4. Power Source
5. Signal Amplitude (Output)

Digital (Modem)
1. Interconnect
2. Data Protocol
3. Transmission Distance
4. Power Source
5. Key Features

If you'd like more information about a specific link or modem, or if you have requirements that are not addressed by one of these products, assistance is only a telephone call away.

Analog Instrumentation Links

1 Signal Bandwidth	2 Transmission Distance	3 Usage
DC to 1MHz	1,000 Meters	Bench/Lab/Stand-alone
		OEM/PC Board Mount
	500 Meters	Field Instrument
DC to 10kHz	1,000 Meters	OEM/PC Board Mount
	500 Meters	OEM/PC Board Mount
		Bench/Lab/Stand-alone
	50 Meters	OEM/PC Board Mount
Current Loop	1,000 Meters	OEM/Industrial

Digital Communication Modems

1 Interconnect	2 Data Protocol	3 Transmission Distance
Computer to Computer Computer to Peripheral SCADA to SCADA Electronic Meter to Processor	RS232C, 485 and others	2,000 Meters
Computer to Telephone Line SCADA to Telephone Line Electronic Meter to Telephone Line	RS232C	1,000 Meters

From Fiber Optic Components to Complete System Engineering Capabilities... We Speak the Language of Light

Building on thirty years of experience in the design and manufacture of precision, miniature electronic assemblies, Litton Poly-Scientific has become a recognized supplier for a broad range of fiber optic components and systems. From simple point-to-point links to complex data bus or LAN networks, our expertise covers a wide variety of digital and analog data transmission systems for military, industrial and commercial applications.

We can work to your specifications or design and manufacture systems or sub-systems to meet your specific requirements.

Our active components include transmitters, receivers, transceivers and repeaters in traditional, hybrid and rack-mounted versions. Passive components include WDMs, low loss couplers, fiber optic rotary joints and extensive experience with various fiber types, cable harnesses and connectors.

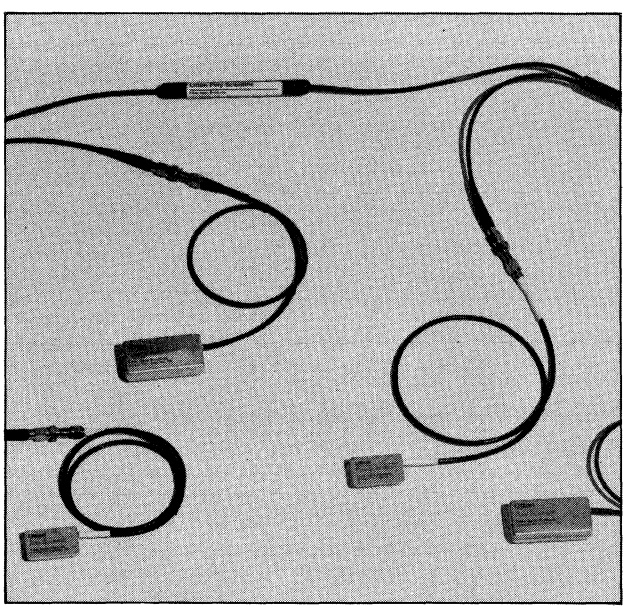
The following pages are designed to give you an overview of our product and systems capabilities.

Fiber Optic Data Bus and Sensor Systems for Land, Sea, Air and Space Applications

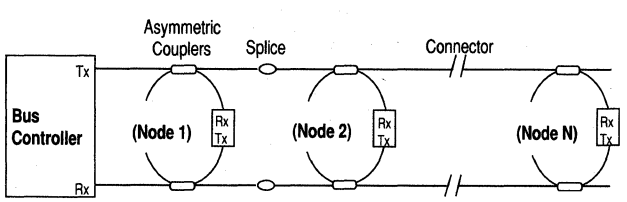
Because of the inherent advantages of fiber when compared to hardwire communication networks, Litton has pioneered the research and development of single and dual fiber linear data bus technology. Recent progress in improving both active and passive components for access on and off the bus has resulted in the viability of this topology for a variety of large system applications. For each node, our hybridized digital transmitters and receivers feature high launch power, superior sensitivity and wide dynamic range. The extremely low excess loss of our bi-directional couplers has dramatically increased the number of system taps.

When compared to token ring or star topologies, a linear bus offers many unique advantages. From the standpoint of installation, modification and future growth, the simple architecture of the linear bus makes it a more cost-effective option. The star requires home-runs of fiber from a central location to each node. If the star is damaged, it is highly probable that a significant portion of the bus will become inoperative. In addition, the star is labor and material intensive. Although the ring (particularly those involving token passing protocols) addresses these concerns, it retains the potential for data transfer problems. These include accumulated jitter, additive effects of error and bypassing failed devices on the bus.

We are familiar with a wide variety of data bus topologies including MIL-STD-1773, ARINC 629 (DATAC), and HSDB. Let us put our experience and expertise to work for your next system application.



MIL-STD-1773 Single Fiber Linear Data Bus



Dual Fiber Linear Data Bus

Miniature, Hybridized Transmitters and Receivers for Point-To-Point and Data Bus Applications

AC or Edge-coupled with data rates up to 50 Mbps Manchester. Transmitters with high launch power, and receivers with superior sensitivity and broad dynamic range. TTL and ECL compatible (interface circuits may be required). Qualifiable to MIL-STD-883. Due to ongoing development, specifications are subject to change.

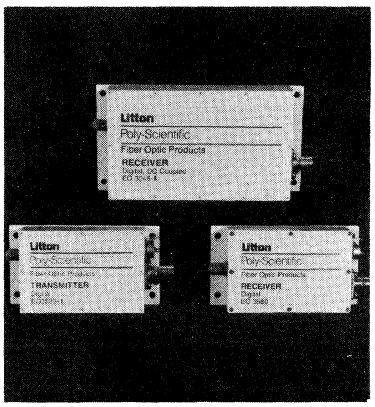
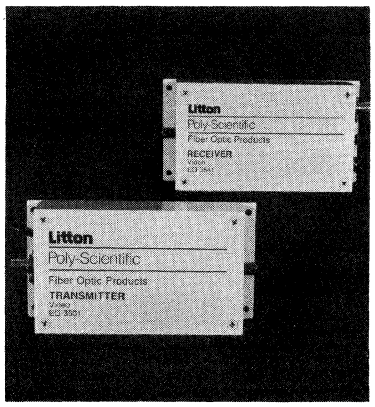
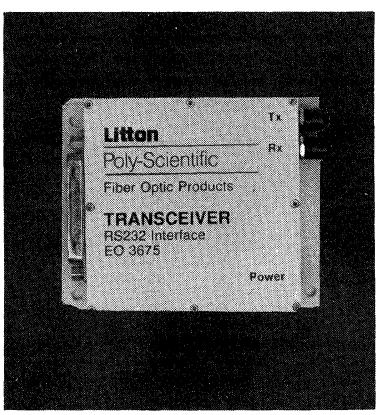
Traditional Transmitters and Receivers for Standard or Custom Applications

Many of our transmitters and receivers are custom-built according to the special needs of our customers. Listed below are representative examples. A variety of packaging and connector options are available. Transmitters and receivers available with 1300nm sources and detectors.

- **Analog systems**
- **Digital systems**
- **Video systems**
- **RS 232 and RS 422**







Type	Data Rate	Part No.	Electrical Interfaces	Dynamic Range (min)	Peak Launch Power Into 100μ Fiber	Peak Rx Sensitivity (min)	Wavelength	Supply Voltage Requirements	Package Dimensions	Special Features
Video Tx	Link Bandwidth 5Hz-10 MHz	EO3501-1	RS 170	N/A	-10dBm Flat Field	N/A	850nm	110 VAC power supply included	1"x5"x3"	For use with EO3541-1
Video Rx		EO3541-1	RS 170	8dB	N/A	-32dBm	850nm	110 VAC power supply included	1"x5"x3"	For use with EO3501-1
Digital Tx	DC-50Mb/s NRZ	EO3520	50 ohm Terminated 3V max	N/A	-10dBm	N/A	850nm	+/- 5	1"x3"x2"	For use with EO3560 or EO3548

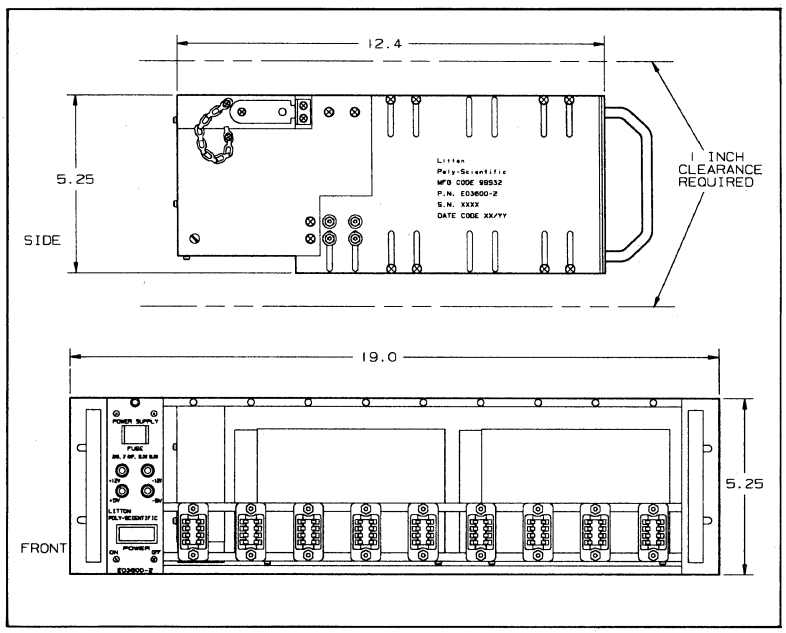
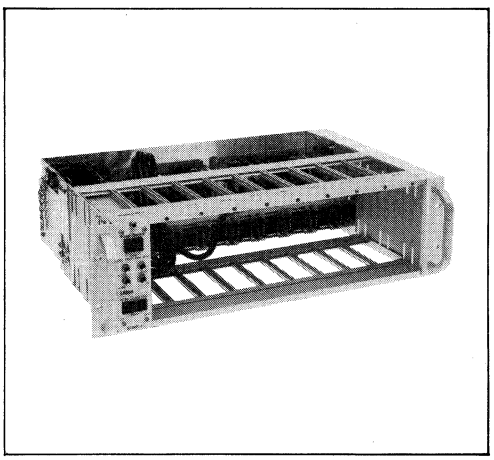
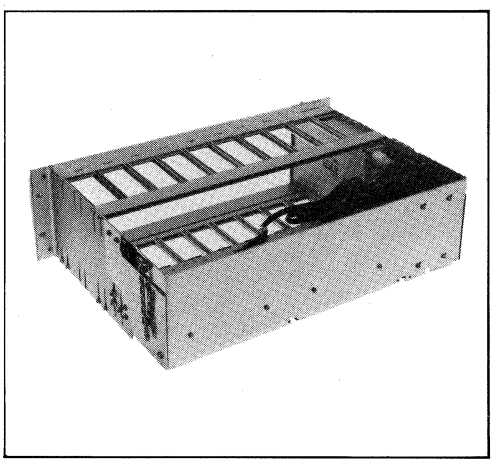
Rack-Mounted Transmitter and Receiver Systems

Many of our traditional components are available in modular, 19" rack-mounted versions.Ten bays can accommodate up to eighteen standard transmitters and receivers plus a common power supply. Connected to a 110 VAC outlet, it has a master on/off switch and a fuse for protection from overloads.

All connections (electrical and optical) are on the backplane of the modules. SMA receptacles for optical interfaces and BNC connectors for the electrical interface are standard. Other connector interfaces are available upon customer request.







Type	Data Rate	Part No.	Electrical Interfaces	Peak Launch Power Into 100μ Fiber	Peak Rx Sensitivity	Dynamic Range	Wavelength	Supply Voltage Requirements	Special Features

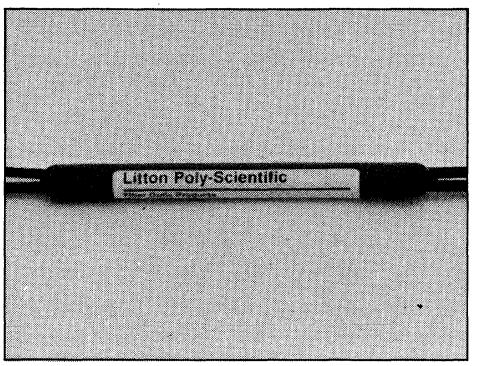
Low-Loss, Bi-Directional Couplers

Our multi-mode symmetric and asymmetric couplers can be used in "stand-alone" or linear data bus applications. Designed for use in harsh environments, couplers without connectors will operate in temperatures ranging from -60° to 200° C. Various fiber sizes and types in a variety of split ratios are available. Single mode couplers available upon request.



Part No.	Type	Pigtail Length	Excess Loss	Split Ratio Tolerance	Package Size	
					Length	Diameter

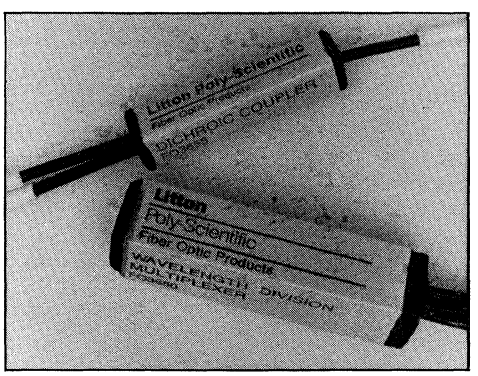
FO3669	Symmetric 90/90	≥ .5 meter	A ≤ .5dB B ≤ 1.0dB	A +/- 3% B +/- 5%	4.0"	.375"
FO3662	Symmetric Custom	Please call for more information.			4.0"	.375"

Wavelength Division Multiplexers

As their name implies, WDMs enable multiple channels of analog and/or digital data to be multiplexed, transmitted over a single fiber and demultiplexed at the other end of the data link. Our standard WDM configurations will perform either as multiplexers or demultiplexers.



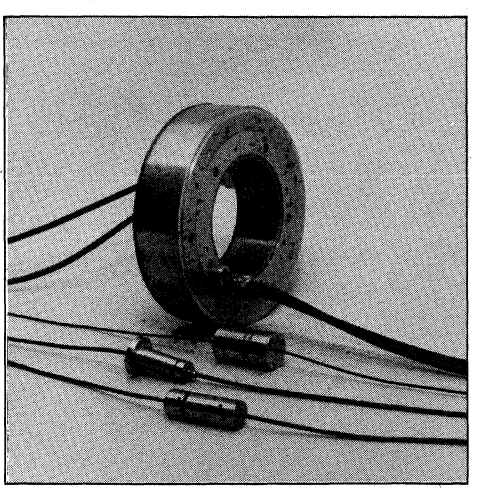
Part No.	Type	Fiber Size	Pigtail Length	Channel Capacity	Wave-length Range	Typical Insertion Loss	Crosstalk Isolation	Operating Temperature Range	Package Size		
									L	W	H
FO3650	Diffraction Grating	100/140 standard; others available	1 meter standard	6	400-1600nm	4dB	-30dB	-60° to 125°C	3.01"	0.75"	0.75"
FO3652	Diffraction Grating	100/140 standard; others available	1 meter standard	15	400-1600nm	4.5dB	-30dB	-60° to 125°C	3.3"	1.5"	1.5"
FO3655	Dichroic Filter	100/140 standard; others available	.5 meter standard	2	850/1300nm	1.5dB	≤30dB	-60° to 125°C	4.0"	Diameter .375"	

Fiber Optic Rotary Joints (FORJ)

A FORJ provides the same unlimited rotational freedom for fiber optic systems that the slip ring has long provided for electrical systems. Custom built and standard FORJs are available in two distinct types:

On-Axis FORJ: a compact totally passive single fiber device which occupies the centerline of rotation.
Off-Axis FORJ: a multi-channel active/passive device with 4" bore. Our ownspecial repeaters are required. Data rate up to 50 MBits/sec.

In addition to the standard parts below Poly-Scientific specializes in custom designs to meet your requirements in fiber size, wavelength, pigtail lengths, connectors and mounting requirements.



FORJ Type	Part No.	Outside Diameter	Length	Fiber Size (μm)	Wavelength (nm)	Pigtail Length Each End (m)	Connec-tion	Insertion Loss
On-Axis Multi-Mode	FO3585-1	.75"	2.16"	50/125	800 - 900	1	None	50/125 is 2.5 ± .5dB

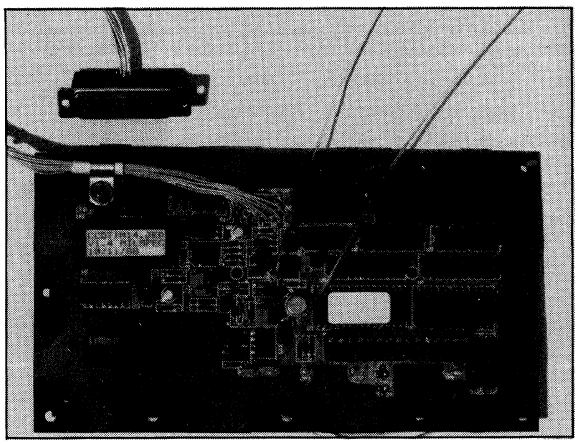
Fiber Optic Sensor Systems Using a Common Sensor Interface

In some cases a data bus represents only a partial solution to the needs of the fiber optic system designer. Our work with data bus and sensor technology gives us the ability to configure a total, turn-key approach to your specific system requirements.

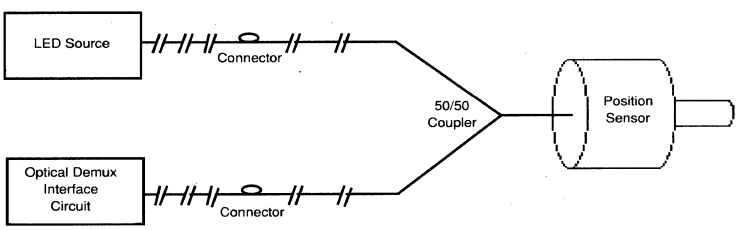
The combination of a common interface for different sensors and the ability to optically multiplex several sensors has system cost, size, weight and maintainability advantages. Utilizing common optical modulation as the foundation, our system uses passive fiber optic sensors based on the principle of wavelength division multiplexing. WDM sensors can be adapted to measure position, pressure, temperature and small displacements.

The system consists of a broadband source, power splitter, sensor(s), optical demultiplexer, and detection and decode electronics. Connected by dual fibers, the interface electronics are usually located some distance from the sensor(s).

As much of our current development efforts focus on aircraft networks, we are familiar with harsh environment and MIL-SPEC system applications.

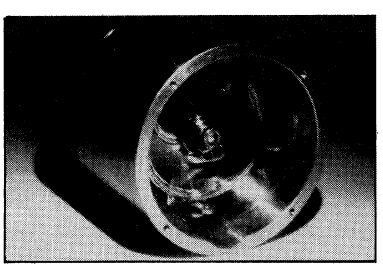


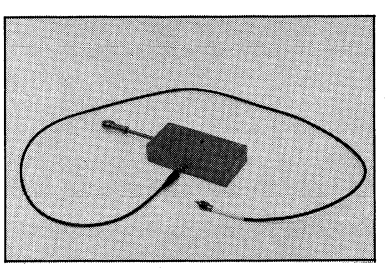
Fiber Optic Sensor System Block Diagram



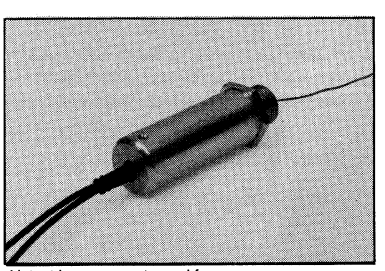
Optical Sensors

Environmental (pressure, temperature, etc.) and position (rotary and linear) sensors are available or can be designed and manufactured to meet your specific needs. Please contact us with your requirements for additional information on components or complete sensor systems.





Part No.	Type	Max Insertion Loss	Min I/O Ratio	* Wavelength Output Range	* Channel Pitch Nominal	* Channel Width Nominal	* Fiber Type	Coding Type	Coding Format	* Resolution/ Travel	* Package Size
FO3571	Linear Position Transducer	11dB	10dB	720-950nm	19nm	9.8nm	50/125 step index NA .22	absolute	Gray Code	Up to 12 bits / Up to 7 inches stooke	2" x 4" x .87"
FO3577	Rotary Position Transducer	11dB	10dB	720-950nm	19nm	9.8nm	50/125 step index NA .22	absolute	Gray Code	Up to 12 bits / Up to 360°	1.645" x 1.86" (OD)



***Note:** Values given for these parameters are application-dependent. Other values are possible. Consult factory for custom designs and latest improvements, and for custom pressure, temperature sensor systems.

INTEROPTICS

ONE OF THE **PURDY** GROUP OF COMPANIES

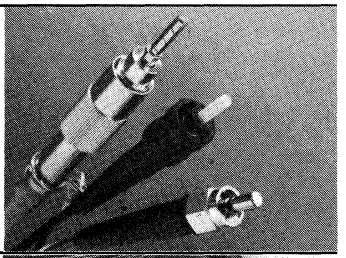
OPTO/LINK

INTEROPTICS offers a wide range of fiber optic products for telecom, datacom, precision instrument, industrial, medical, and military applications.

Here are just some of the products INTEROPTICS can supply for your fiber optic needs:

CONNECTORS, ADAPTERS, AND RECEPTACLES

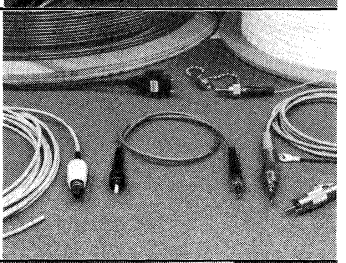
Diamond	DIN-47256
FC/NTT	ST
SMA	Biconic



CABLES AND CABLE ASSEMBLIES

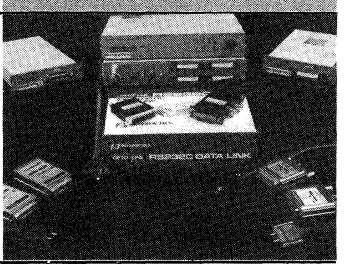
Standard pigtails and patchcords.
Custom versions on cable or fiber.
Special assemblies on customer supplied devices.

Buffered fiber	Multifiber
Simplex	Singlemode
Duplex	Multimode



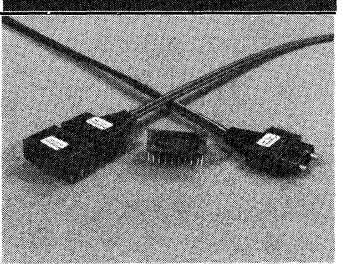
NETWORKING PRODUCTS

RS 232 and RS 422 modems
RS 232 master/slave port expander systems
RS 232 to GPIB converters
GPIB IEEE488 Bus expander systems
Centronics Bus extenders



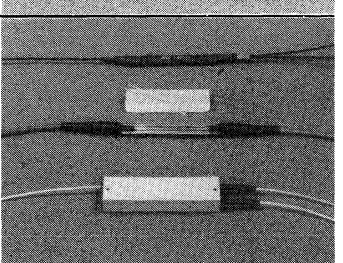
DATA LINKS

TTL transmitters, receivers, and transceivers
Data rates from DC to 20 Mb/s.
Systems from connectorless plastic fiber to connectorized glass cable.
Distances from 5 to 3500 meters.



SPECIALTY PRODUCTS

A complete line of couplers from 1 x 2 to 32 x 32
A complete elastomeric splicing system.
WDM's—wavelength divisional multiplexers (800/1300 nm and 1300/1530 nm).



TERMINATION EQUIPMENT

A complete line of termination tooling.
Available as parts or in a complete kit.
Convex polishing machines and special ferrule viewing systems.

INFORMATION Let us supply you with our expertise in fiber optics.

If you have any comments or questions, or if you just want to know how fiber optics can work for you, please contact us at INTEROPTICS.

FIBER OPTIC COMMUNICATIONS

FROM OPTO-HYBRIDS TO COMPLETE SYSTEMS

MERET, Inc., a leader in optical communications since 1975 offers a wide range of components, subsystem assemblies and complete turnkey systems for fiber optic communications

CCTV

FEATURES:
Small Hybrid Package
Simple Operation
High Density Packaging
Stand Alone AC Packaging

APPLICATIONS:
Surveillance
Security Networking
Robotics
Tele-Conferencing

Model	BW	Wavelength	Loss budget	Distance	SNR
284TV	6Hz-5MHz	820 nm	17 dB	4 km	46 dB
285TV	6Hz-10MHz	820 nm	13 dB	3 km	46 dB
28511TV	6Hz-10MHz	820 nm	20 dB	6 km	46 dB
213511TV	6Hz-10MHz	1300 nm	12 dB	10 km	46 dB
214511TV	6Hz-10MHz	1300 nm	21 dB	<20 km	46 dB

HI-RESOLUTION VIDEO

FEATURES:
Up to 120MHz Bandwidth
RGB on One Card
Automatic Gain Option
820nm or 1300nm Systems

APPLICATIONS:
Computer Graphics
Medical Imaging
Flight Simulation
Tempest Networks

Model	BW	Wavelength	Loss budget	Distance	SNR
288TV	6Hz-35MHz	820 nm	4 dB	1 km	46dB
28811TV	6Hz-35MHz	820 nm	14 dB	4 km	46dB
26811TV	6Hz-50MHz	820 nm	12 dB	3 km	46dB
26911TV	6Hz-120MHz	820 nm	7 dB	0.5km	46dB
213911TV	6Hz-120MHz	1300 nm	9 dB	5 km	46dB

ANALOG SYSTEMS

FEATURES:
Bandwidth to 1 GHz
LED or LASER Sources
Simple Operation
820 or 1300 nm
Rack Mount or Stand Alone Packaging

APPLICATIONS:
IF / RF Communications
Ultra-Hi Resolution Graphics
Instrumentation
EMP Testing
Satellite Entrance / Exit link

Model	BW	Wavelength	Loss budget	Distance	SNR
27020	10Hz-40kHz	820 nm	18 dB	4 km	60 dB
24802	DC-400kHz	820 nm	18 dB	6 km	60 dB
259-20	20Hz-140MHz	820 nm	1 dB	0.5 km	46 dB
2139-20	20Hz-140MHz	1300 nm	5 dB	5 km	44 dB
2149-400	20Hz-400MHz	1300 nm	9 † dB	10 km	48 dB
2149-1000	1kHz-1GHz	1300 nm	5 † dB	5 km	46 dB

DIGITAL SYSTEMS

FEATURES:
Data Rates to 150 MB / s
LED or LASER Sources
RZ or NRZ Capability
820 or 1300 nm
Easy Installation and Operation

APPLICATIONS:
Data Buses
Point to Point Links
Tactical Communications
Peripheral Remoting

Model	Data Rate	Wavelength	Loss Budget	Distance	BER
RS232-LS	DC-19.2 kB/s	820 nm	4dB	1 km	10E -9
481	DC- 5 MB/s	820 nm	8dB	2 km	10E -9
4811	DC-5 MB/s	820 nm	20 dB	5 km	10E -9
485	DC-10 MB/s	820 nm	4dB	1 km	10E -9

Military and Specialty Systems

- Ruggedized / Field Deployable / Hardened Systems
- Multi-Media - Digital & Analog Systems
- Battery Powered Transmitters
- Wavelength Division Multiplexing for Multiple Signals on One Fiber
- High Quality Video Plus Audio or Data on One Fiber (Model FM +1)

† on single mode fiber

all loss budgets are given for 50 μ fiber unless single mode (†) is specified

Turnkey Fiber Optic Systems

MERET can supply complete multi-channel systems in cage rack mount configurations. Using MERET hybrid modules, up to 24 channels of analog, video or digital data can be housed in a single standard 19- inch cage, together with all the necessary decoupling, power supplies, fuses, switches, indicators and alarms. Applications include multi-channel remote surveillance video systems with digital data links for camera control, data communications systems, RGB video with sync for computer graphics and CAD / CAM. MERET turnkey systems are supplied with ruggedized multi-channel cable. Field installation service and customer training are also available.

MERET, inc.

optelecom
The Optical Communication Company

Fiber Optic Communication Products

Optelecom is the complete Fiber Optic equipment source offering total solutions and custom application design for all your needs.

SYSTEM 5000 TIME DIVISION MULTIPLEXER

High performance TDM able to combine multiple channels of full duplex voice and data over dual channel fiber optic cable. Modular 19″ rack mountable chassis. Optional redundant power supply. Choice of standard electrical and optical connectors. 4 km range with 50/125µm fiber at 850nm. 10 km range with 50/125µm fiber at 1300nm.

ECONOMUX

Stand alone multiplexers designed for applications where cost and size must be constrained without sacrificing performance. 4 km range.

Models 4408, 4416, 4432 Economux. Multiplex up to 64 channels of async or sync data. 19″ rack mountable or stand alone. Fiber-In/Fiber-Out version also available. Sub-channel I/O optically compatible with Model 4131 and 4141 modems.

DIGITAL MODEMS

Fiber optic modems for async and sync operation at distances up to 4 km, using DB25 male or female electrical connector.

Model 4131. Single channel. RS232. Up to 56 Kb/s. 2 km range. Powered by EIA control lines. Compatible with Model 4141. TEMPEST accredited version available.

Model 4141. Single channel. RS232. 56 Kb/s. 3 km range. Powered by AC adapter. Compatible with Model 4131.

Model 4260. Async rates up to 64 Kb/s. 3 km range. 12 selectable clock rates to 57.6 Kb/s. Full RS232 handshaking capability. Model 4261 has 4 km range.

HIGH SPEED DIGITAL INTERFACES

Stand alone and 19″ rack mount packaging available for applications requiring high speed digital transmission.

Models 424X and 504X. Models 504X are System 5000 compatible cards. Models 424X are stand alone packages. Available in full duplex configurations. RS422A, TTL, MIL-STD-188-114 formatted versions. Async NRZ data up to 20 Mb/s. Clock and data up to 5 Mb/s encoded over single fiber. 3 km range.

ANALOG VIDEO AND AUDIO INTERFACES

Permit conversion of a variety of analog signals for transmission over fiber optic cables. Handle signal types from voice to high bandwidth RGB video. 1.5 to 3 km range achievable, depending on model.

Models 3250 and 3251. Stand alone package. 6 Hz to 30 MHz, depending on model. BNC electrical connector. Automatic Gain Control (AGC) available. Model 3255 Optimized for voice frequency response.

Models 5050 and 5051. System 5000 compatible cards. 6 Hz to 30 MHz, depending on model. BNC electrical connector. Automatic Gain Control (AGC) available. Model 5055 Optimized for voice frequency response.

Models 3252, 5052. Up to 110 MHz pixel rate RGB video transmission system for use with high resolution video systems. Available in stand alone version and System 5000 compatible card.

Model 3452. Up to 110 MHz pixel rate RGB + multichannel data for keyboard printer, etc.

Fiber Optic Telephone System. Consult factory.

SPECIALTY AND LAN INTERFACES

Optelecom has developed a variety of fiber optic interfaces to address specific industry standards and proprietary Local Area Networks (LANs). Most models available in stand alone version and System 5000 compatible card.

* Most products available in 850nm and 1300nm versions. SMA or ST™ optical parts available.

Optelecom... First for all your Fiber Optic needs.

POWER REQUIREMENTS:

Transmitter:
115V/230V 50/60Hz and 12V DC powered, with integral charger. Optional remote on/off controlled by fiber optic cable.
Standard battery provides 8-15 hours of operation between charges, longer available.
Also isolated power source available for continuous operation without integral battery from power source at ground potential.

Receiver:
115V/230V 50/60Hz or 12V DC powered.

Voltage input range can be extended in 15KV increments to 900KV PK by Ross Engineering Corporation's wide band voltage dividers.

SHARP Optoelectronics

Laser Diodes

Laser Diodes

Sharp's laser diodes use a double hetero junction of gallium, aluminum and arsenide compound (GaAlAs). Long life and high reliability are realized by use of our original VSIS structure (V-channeled Substrate Inner Stripe).

Features

- High power type, low noise type, wide temperature ranges and short wavelength type are included in the scope of products.
- High precision package. PIN photodiodes are built in, and optical power output control is easy.
- The line-up is full, from the ultra compact (ϕ5.6 mm packages) type to the single positive power supply p/w type.
- Long life, high reliability.
- Stable single transverse mode, low threshold current.

Model No.	Wavelength (nm)	Optical power output (mW)		Features	Main applications
		TYP.	MAX.		
LT030 Series	750	3	5	Short wavelength	High-speed laser printers, Bar code readers
LT031 Series		7	10	Short wavelength	High-speed laser printers
LT020MC	780	3	5	General use	Measuring instruments, Bar code readers
LT021 Series		10	15	High power	High-speed laser printers, Medical apparatus
LT022 Series		3	5	Low noise	CD-ROMs, Fiber Optic Communication
LT023 Series		3	5	Low noise (Multi-mode)	VD players, Analog devices, Fiber Optic Communication
LT022/023 WIDE TEMP. Series		3	5	Low noise Wide Temperature (– 30 to 85°C)	Fiber Optic Communication Factory Automation Equipment
LT024 Series		20	30	High power	Optical disk memories, Magneto-optical disk systems
LT026 Series		3	5	Small astigmatism	General use laser printers
LT027 Series		7	10	General use	Medium-speed laser printers
LT080MD		3	5	Stabilized wavelength	Measuring instruments, Laser printers, Bar code readers
LT091MD		14	20	2 channels*	High speed laser printers
LT010 Series	810	3	5	General use	Measuring instruments, Fiber Optic Communications
LT016 Series		30	40	High power	YAG laser excitation, Optical disk memories, Magneto-optical disk systems
LT015 Series	830	30	40	High power	Optical disk memories, Optical memory cards, Medical Apparatus
LT090 Series		80	100	High power (3 channels)	Medical apparatus, Optical range finders
LT011MS	840	3	5	Long wavelength	Fiber Optic communications

Fiber Optic Data Link/ Laser Receptacle/Photodiode Receptacle

Laser diodes with high frequency modulator*

	Model No.	LT015R10	LT024R10
Description	Laser diode	LT015MD (830nm, MAX 40mW)	LT024MD (780nm, MAX 30mW)
	S/N	MIN. 65dB, TYP. 80dB	
	Oscillation frequency	TYP. 250MHz	
	Supply voltage	+5V (High frequency modulator)	
	Power consumption	MAX 50mA (High frequency modulator)	

*For laser noise reduction in optical memory application.

Laser receptacle

	Model No.	GP0F50T
Description	Laser diode	LT022MS (780nm)
	Connector	FC type
	Light output	MAX. 0.25mW (*)

* Initial value. From the end of fiber (GI 50/125, length = 1m, the other end is conneted to this receptacle)

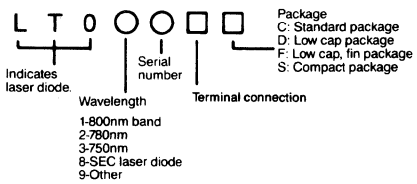
Photodiode receptacle

	Model No.	GP0F50R
Description	Photodiode	PIN photodiode
	Connector	FC type
	Sensitivity	TYP. 0.3mA/mW (*)

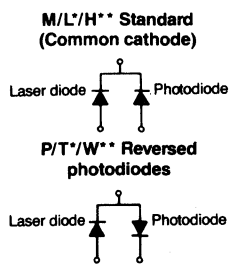
* Initial value. V_R = 5V, P_{IN} = 0.1mW, λ = 780nm.

Relationship of Wavelength, Optical Power Output, and Noise

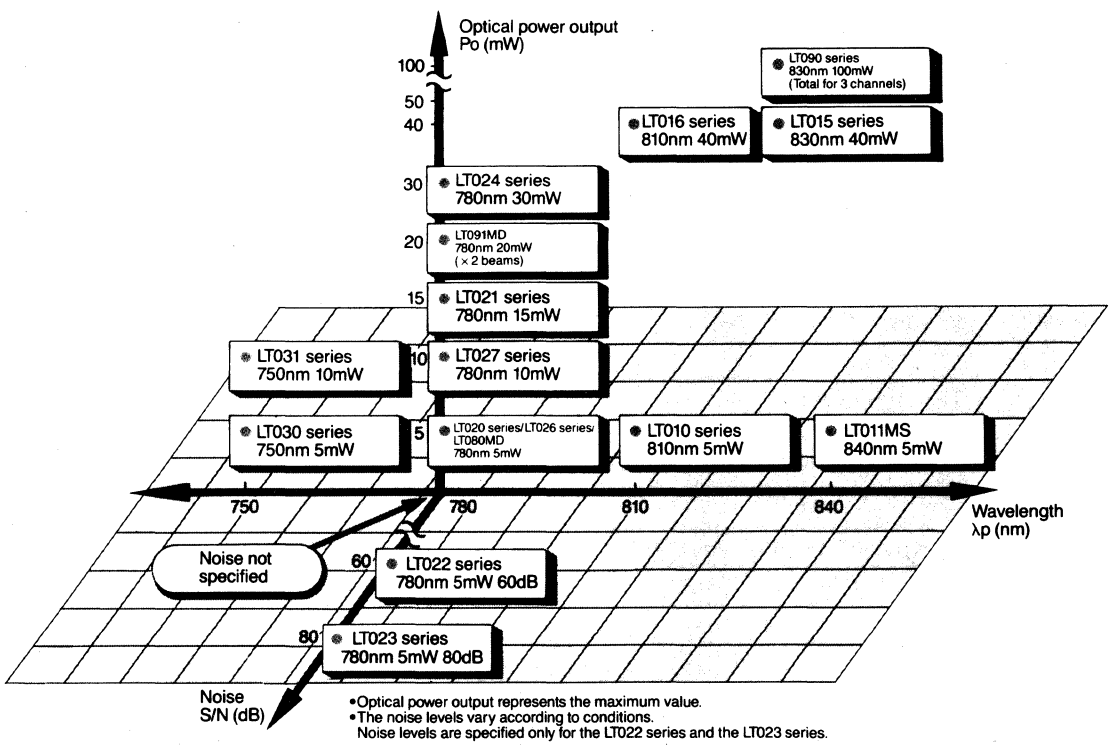
Numbering System



Terminal Connection



*L and T-type are Buried-VSIS laser diodes.
**H and W-type are wide temperature laser diodes.



•Optical power output represents the maximum value.
•The noise levels vary according to conditions. Noise levels are specified only for the LT022 series and the LT023 series.

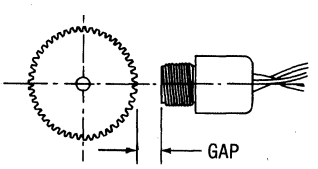
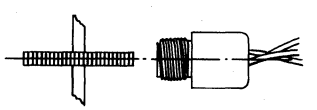
SPEED INDEPENDENT MAGNETIC PICKUPS

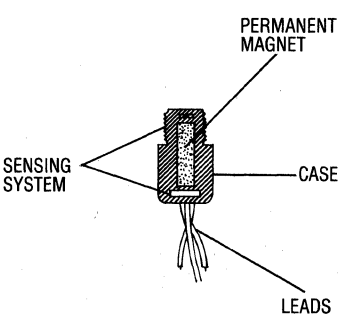
- Contactless Limit Switches
- Velocity and Position Sensing
- Counting, Indexing, and Timing Functions

The Aeroflex Laboratories family of *SPEED INDEPENDENT MAGNETIC PICK-UPS* are devices which have output voltage amplitudes that are independent of the rate of movement of the target. Common magnetic pick-ups have an output amplitude which is a function of the time-rate-of-change of flux; the Aeroflex pick-up is independent of the rate-of-change of the flux. The Aeroflex pick-ups excel in slow target motion applications and often can replace optical systems. The pick-ups' upper frequency limit is approximately 20 Khz for extremely fast target motion.



SENSOR-TARGET POSITIONING





BASIC CONSTRUCTION
B12E SERIES

THEORY OF OPERATION

The unit contains a pair of magnetoresistors and a permanent magnet. Some sensors also have conditioning circuitry encapsulated within the unit. The sensing system differentially compares the magnetic field distribution over the sensitive face of the pick-up. As a magnetic material such as cold rolled steel or the 400 series stainless steels are moved past the pickup a differential field is produced which is sensed by the pickup.

The B12E series has no conditioning circuitry and will give an analog output proportional to the flux seen by each magnetoresistor. If no target is present the differential will be zero as it will if a large target such as a flat piece of steel is placed over the sensor.

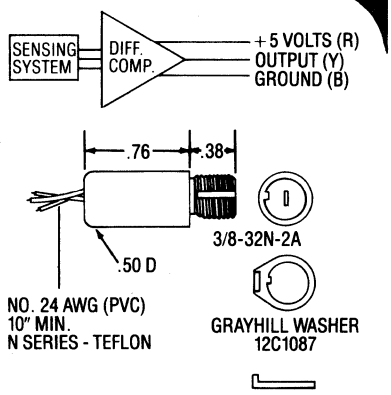
The B12L series has additional self contained circuitry which converts the analog signal to a switched output compatible with logic circuits. These pick-ups eliminate the problems associated with low signal transmission levels in high noise environments. The rise and fall times are approximately 600 and 100 nanoseconds respectively.

TARGETS

Almost any conceivable or convenient shape can be used for a target if it is a magnetic material. The variations can include slots in a disc, screw heads, etched foils, or gear teeth.

Your Complete Source for FLIR Scanners, Stabilization Custom Brushless DC Motors and Controllers,

B12L-5 SERIES



The series B12L-5 pick-ups have self contained conditioning electronics. The output is TTL compatible and normally sits at +4.9 volts in the absence of a target. When the target is near the face of the sensor the output drops to +0.3 volts where it remains until the target is removed. The output is a NPN transistor with a 1.8 K ohm collector resistor.

The pick-up operates with a + 5 volt supply at approximately 15 ma.

The operating temperature of the unit is +5 to +55 degrees C. Operation at 1/2 the gap distance specified in Table I will increase the operating temperature range to −20 to +75 degrees C. A wider operating temperature range unit with a −40 to +120 degrees C range is also available and is designated with an "H" in the part number (B12LH-5).

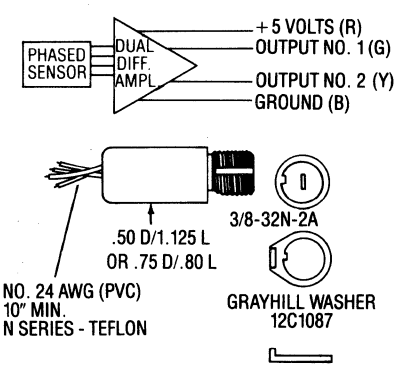
A center tapped version of the pick-up is also available which will allow the use of smaller targets. These are designated by the use of a CT in the part number (B12L-CT).

The housing is an aluminum filled epoxy that is resistant to moisture, oil and most common solvents.

TABLE I: MAXIMUM GAPS AS A FUNCTION OF GEAR

MODEL \ GEAR PITCH	8	16	20	24	32	48	64	72	96	120
B-12L-5	.100	.075	.070	.060	.050					
B-12L-5CT				.045	.035	.025	.015	.012	.010	.004
B-12LH-5	.100	.075	.060	.050	.035					
B-12LH-5CT				.035	.030	.020	.012	.010		

B13L-5 SERIES



The B13L series is a dual version of the B12L series. It is intended for use where two phase related outputs (90 degrees) are required. When coupled to a FlipFlop gate arrangement, directional sensing is possible.

GEAR PITCH	PHASE ACCURACY	MAX GAP	MODEL NUMBER
24	±4°	.025	B13L-5-24
32	±5°	.020	B13L-5-32
48	±8°	.015	B13L-5-48
64	±10°	.012	B13L-5-64

Ordering Information

Aeroflex Torque Motors are most commonly furnished as pancake devices without housings, shafts or bearings. The pancake configuration permits the maximum flexibility in allowing the user to integrate the Torquer into his own housing and bearing system of the load.

Optional mounting configurations such as flange, synchro clamp and complete housing with single or double ended shaft, spring return, detent mechanisms, etc. are available. *When ordering, please indicate the mounting wanted by adding one of the following letters after the basic part number:*

P—Pancake S—Synchro H—Housing F—Flange

For example: The pancake styled TQ18-25 would read TQ18-25P.

These Slip Ring Assemblies have found wide use in gyro gimbal and instrument applications. The fully enclosed and tested assemblies feature fine diameter gold alloy brushes mated to compatible gold alloy rings for excellent noise characteristics at low torque levels. Although miniature in size, the assemblies are surprisingly rugged and are able to withstand most military environmental specifications.

Units have been fully tested to the environmental parameters listed below, proving their ruggedness and reliability. All units are factory tested before shipment and a copy of the test data is available with each unit upon request.

The units shown here are only a sample of those available which include a 50 ring capsule of .685 diameter.

SPECIFICATIONS

MECHANICAL

1. Rings: Gold alloy
2. Brushes: Gold alloy wire, spring temper
3. Ball Bearings: Stainless steel, shielded
4. Shaft: Stainless steel
5. Housing: Anodized aluminum
6. Rotation: Bi-directional

ELECTRICAL

1. Current: Signal level to 1 amp maximum
2. Voltage: Micro-volts to 110 volts rms
3. Dielectric Strength: 500 volts rms (all combinations)
4. Leadwire: #30 AWG teflon insulated, 15″ long minimum
5. Noise: ±5 micro-volts per ma

ENVIRONMENTAL

1. Temperature Shock: +85°C for 1 hour and immediately transferred to −55°C for 1 hour
2. Shock: 18 shocks, 20 "g" with duration of 11 ±1 ms (MIL-E-5272C, Procedure V)
3. Vibration: MIL-STD-202B, Method 204, test condition B
4. Altitude: 50,000 ft. and −55°C
5. Humidity: MIL-E-5272C, Procedure III (95% R.H. @ 120°F for 360 hours)

These assemblies, specially designed for gyro-rate table and centrifuge applications, have found wide use because of their versatility and compact size. The standard assembly, can be supplied (at slight extra cost) with internally shorted rings for double and triple current ratings, and with single, double and triple shielded wire. Featuring gold alloy wire brushes and compatible gold alloy rings, these assemblies are manufactured from proven production tooling at a very nominal cost. Special assemblies with switching circuits and others with non-standard materials for use in severe environments are available.

DAY-705

These slip-rings are built to your order using many standard components which have proven themselves over many years of reliable operation. The "platter-type" design includes one coin silver ring on each side of each molded sub-assembly; and, leaf type silver graphite brushes which are molded in an insulating block and perfectly matched to the face of each ring. Inasmuch as the assemblies are the stack-up type, we are able to custom build them to your specifications—using our standard components—with a very minimum lead time required.

DAY-710

Similar in construction to our DAY-705, this platter type unit features two coin silver rings on each side of each platter for greater package density, and a "through bore" design which can be used for the passage of fluid or gas lines.

SPECIFICATIONS

MECHANICAL

1. Rings: Coin silver
2. Brushes: Spring loaded silver graphite, two per ring
3. Torque: 0.2 in-lbs. per ring
4. Speed: 5000 rpm maximum
5. Life: 1000 hours minimum @ 500 rpm
6. Rotation: Bi-directional

ELECTRICAL

1. Current: 10 amps per circuit with two brushes per ring
2. Voltage: 0-250 Volts AC or DC
3. Dielectric Strength: 500 Volts rms (all combinations)
4. Contact Resistance Variation: 10 milliohms maximum at maximum speed
5. No. of Rings: 30 maximum

ENVIRONMENTAL

1. Operating Temperature: 0° to 200°F
2. Humidity: 85%

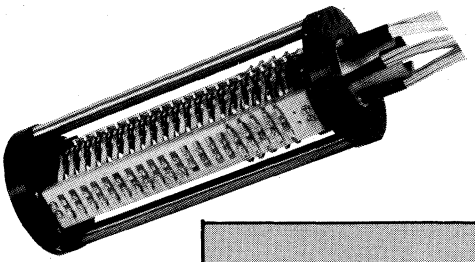
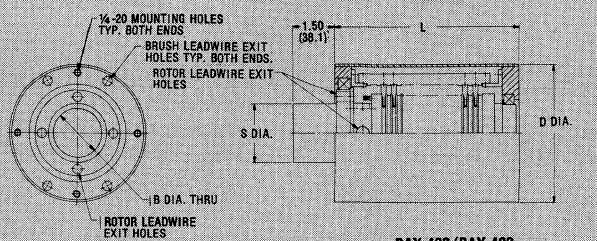
MULTI-PURPOSE SLIP RING ASSEMBLIES



These assemblies, designed for use in commercial equipment, have been used in applications ranging from thermocouples to the transmission of medium power. They feature coin silver rings, silver graphite brushes, convenient terminals on both the slip ring and brush blocks, and a rotor design which allows the leadwires to be exited through the shaft bore, or under the bearing when a shaft clearance hole is required. The wide variety of sizes and configurations available, including "in-between" shaft diameters, allows the designer to select a standard assembly for his application, eliminating time consuming and costly design charges.

... AS AN ASSEMBLY

DAY-490/499
UP TO **50** RINGS

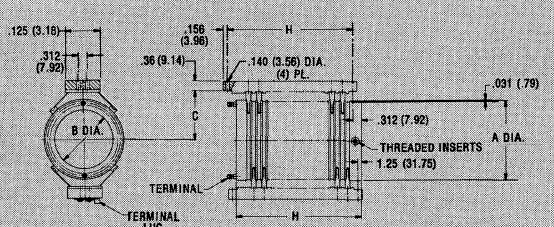


DAY-490/DAY-499

No. of Rings	Inches "L"	Milli-Meters
6-10	4.88	123.95
11-20	6.75	171.45
21-30	8.63	219.2
31-40	10.50	266.7
41-50	12.38	314.45

... OR AS SEPARATES

CAY-731/740
UP TO **50** RINGS



To determine "H" dimension use the following formula:
"H" = .750 + .1875 x (No. of Rings)

SPECIFICATIONS

MECHANICAL

1. Frame: Anodized aluminum (DAY-490/DAY-499 only)
2. Rings: Coin silver
3. Brushes: Silver graphite, two per ring
4. Leafs: Beryllium copper
5. Insulation: Epoy or laminated plastic

ELECTRICAL

1. Current: 10 amperes per circuit (20 amperes available at extra cost)
2. Voltage: 250 Volts maximum AC or DC
3. Dielectric Strength: 750 Volts rms (all combinations)
4. Insulation Resistance: 50 megohms minimum at 500 VDC
5. Contact Resistance Variation: 10 milliohms maximum at maximum speed
6. No. of rings: 50 maximum

ENVIRONMENTAL

1. Operating Temperature: 0 to 250°F
2. Humidity: 95% maximum

For use when bearing mounted assemblies are not practical, the CAY-731/CAY-740 should be specified.

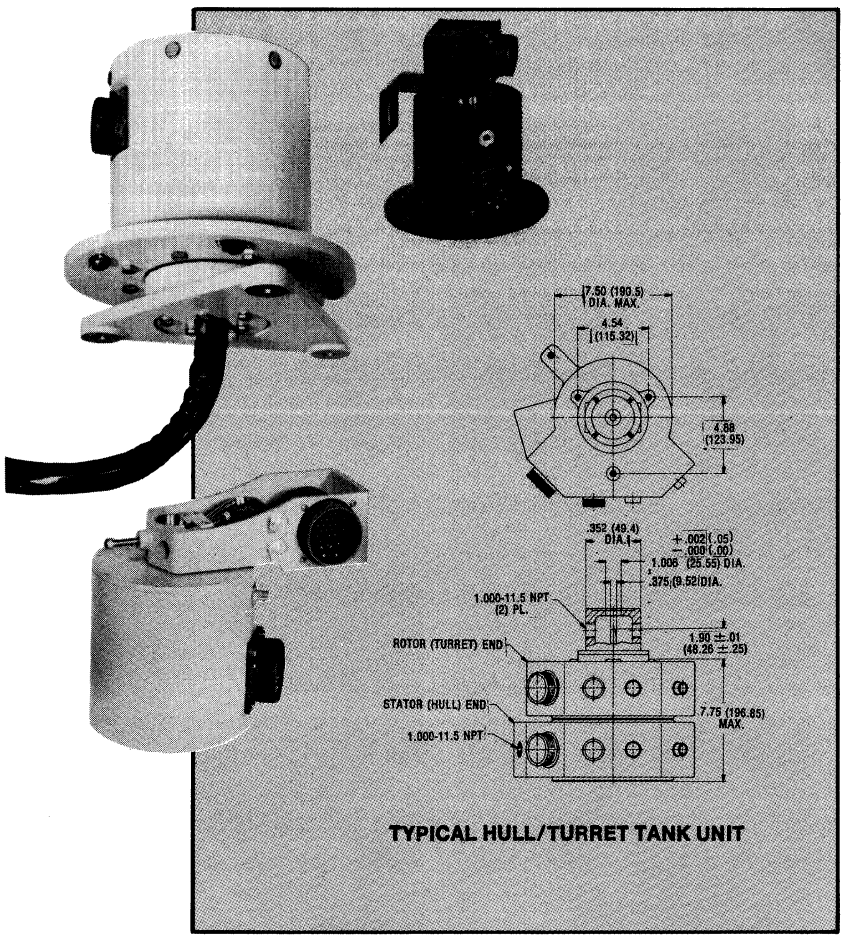
Airflyte ELECTRONICS CO.

VEHICLE SLIP RING ASSEMBLIES



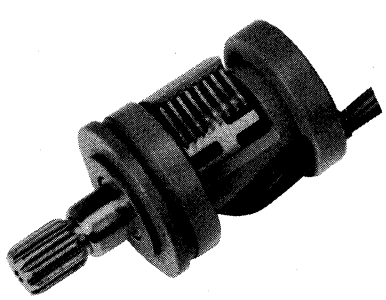
TYPICAL HULL/TURRET TANK UNIT

Airflyte Electronics has experience in the design and manufacture of assemblies for personnel carriers, tanks and other military vehicles. We have built slip rings for periscopes, turrets and commander stations. These assemblies range in size from 6″ or less in outside diameter to slip rings with clearance holes larger than 28″. This type of assembly is characterized by its rugged construction, usually has two high power rings, several low power and up to 50 signal rings. Illustrated are several of the configurations we have built in production quantities.

SPECIFICATIONS

1. Voltage: from 28 VDC to 208 VAC
2. Current: from 1 amp to 600 amps
3. Frequency: DC to 100 MHz
4. Speed: Usually about 20 rpm
5. Noise: Less than 10 mΩ peak to peak
6. Hydraulics: 3000 psi operating
7. Pneumatics: 1500 psi operating
8. Torque: 15 ft.-lb. max. (no hydraulics)
9. Life: 3000 hrs.
10. Environmental: Vibration, shock, etc. per MIL SPEC
11. Terminations: Connectors & fittings customer compatible

ENCODERS & SWITCHES



Airflyte encoders and rotary switches feature drum construction with solid gold alloy conducting segments embedded in epoxy and machined flush. Brushes are multi-strand, spring-temper gold-alloy. As small as ½″ diameter.

ENCODERS

Special encoders with BCD, Gray, True Binary or non-standard codes are available. Units supplied with or without logic circuitry.

SWITCHES

When close accuracy, repeatability and size are important, specify Airflyte rotary switches for timing and positioning applications. Successfully replaces snap action switches and cams. Pre-set to eliminate installation time. Zero hysteresis.

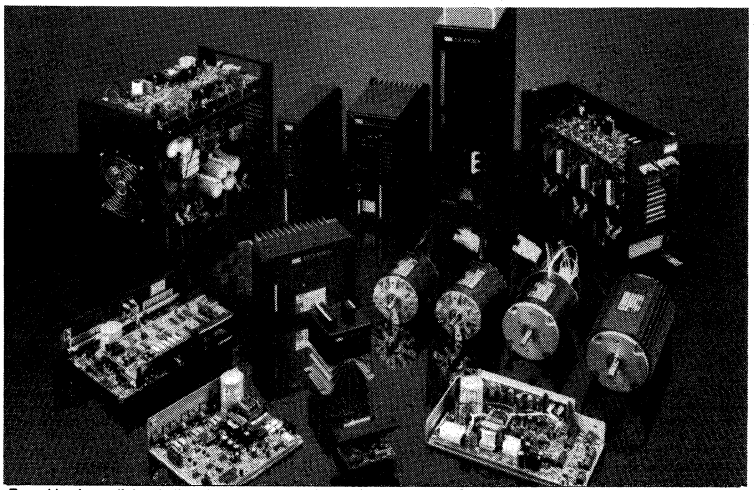
AFFORDABLE BRUSHLESS DC SOLUTIONS



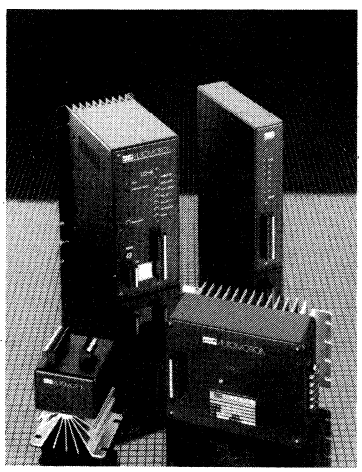
Everything from off-the-shelf packaged motors and controls to ground-up OEM custom solutions. All at affordable prices.

At Automotion, we research, engineer, design, and manufacture DC brushless motor controls. And that's it. Because of our focus, we believe we can provide the best DC brushless motor control available anywhere. And, because of our focus, we can provide these controllers at affordable prices.

Not only is our price tag small, our product is small. The LC family of controllers provides more power and function, in a compact package, because of our advanced design. That means your motor application need not suffer from an oversized or overpriced control.

We are also happy to work with you on a custom basis to design a specific control for your specific needs. And even help you find the right motor for your application.

Because at Automotion, only two things count: our customers and meeting their DC brushless motor control needs.

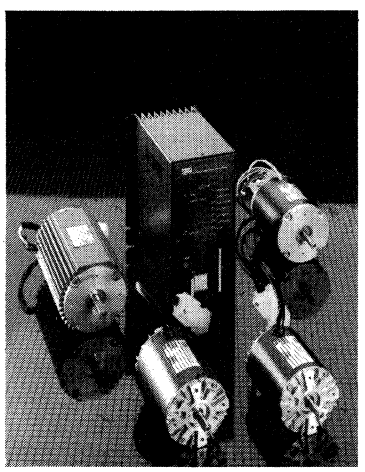


STANDARD PRODUCT

Consider the LC family of controllers from Automotion. They are compatible with any 3-phase WYE or DELTA wound DC brushless motor, and are efficiently designed to fit the tightest space requirements. And they offer some pretty impressive advantages, like instantaneous start/stop and forward/reverse, dynamic braking, and analog or digital PWM speed control in voltage ranges from +7 to 320 DC. At prices starting under $200.

Packaged low voltage versions feature a protective cover, heat sink, and quick disconnect wiring terminations that conform to NEMA type 1 requirements.

Each high voltage model is available as either an open frame unit for OEM use, or packaged in a NEMA 1 rated metal enclosure with integral heat sink, diagnostic LEDs, and quick disconnect terminlals.

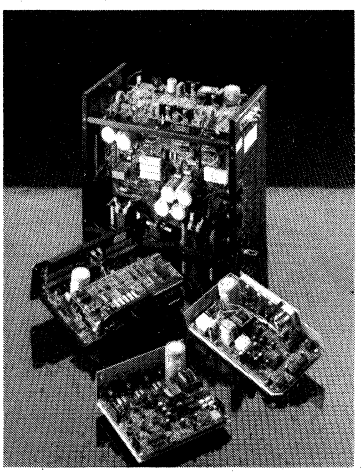


AUTOPAC™ PACKAGE.

The "AUTOPAC", a general purpose industrial grade DC brushless motor and control package, is available in standard, "off-the-shelf" ratings beginning at 1/10 HP @ 1800 RPM. Most units are rated up to 5000 RPM, maximum, with optional higher RPM designs available upon request.

The AUTOPAC family uses our advanced design of PWM drive technology coupled to a precision fractional horsepower PM DC brushless motor to produce a highly efficient, powerful, and very versatile package that is surprisingly affordable.

The DC brushless motors offered, built to Automotion's demanding standards, feature: dynamically balanced rotors, built-in, high-temperature Hall Effect sensors, Class H insulation system, and precision ground shafts.



CUSTOM

Based upon the same proven reliable, advanced PWM drive technology as our standard family, our custom series demonstrates the significant flexibility of Automotion in the design and manufacturing of cost effective custom driver solutions for our OEM customers.

Starting with the basic four quadrant H bridge driver, OEM's can select from a long list of Automotion I/O, operating and protection options to build just as much of a driver solution as the application requires. As a result, OEM customers get the brushless DC control capability they need, at a price and size that their application can justify.

Made with pride in the USA.

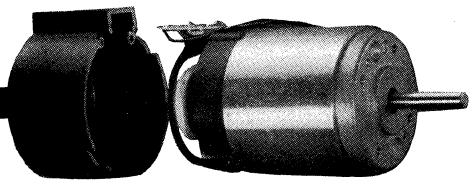
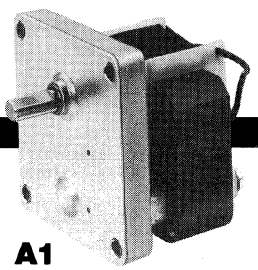
NEW PRODUCTS



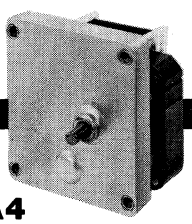
D26
DC gearmotor
6–24 Volts
Low cost plastic gearbox
Torque to 7 lb-in.
Optional features:
- Control circuits
- Limit switches
- Many shaft configurations

MYMM
Long life high torque DC motor
Stall torque to 125 oz-in.
EMI filtering
Optional features:
- Optical encoders
- Gear boxes

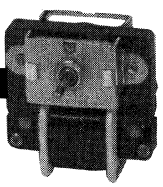
AC MOTORS



A1
Torque to 60 lb-in.
Speed 11–800 RPM

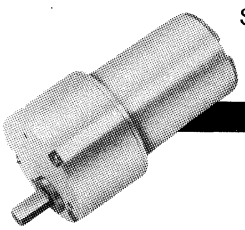


A4
Torque to 60 lb-in.
Speed 1–800 RPM

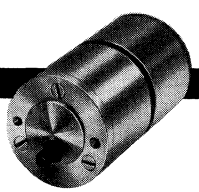


YAA
Rated HP to .005
Small and compact

DC MOTORS

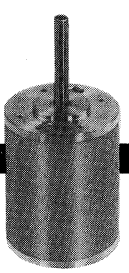


EYQE
Torque to 11 lb-in.
1.5" max. dia.



CYHC
Torque to 15 lb-in.
2.0" max. dia.

EYQM
6–32 VDC
1.18" dia.
2.16" max. length



CYHM
6–36 VDC
2.0" dia.

Our manufacturing experience and engineering content assure consistent quality — from simple drive motors to sophisticated "motion control packages." Our motors are available with multiple types of companion gearheads and may be combined with options like magnetic tachs, optical encoders, ball bearings and electrical filtering for exact start-stop and speed control. *For detail application assistance and pricing, contact our office at the address below.*

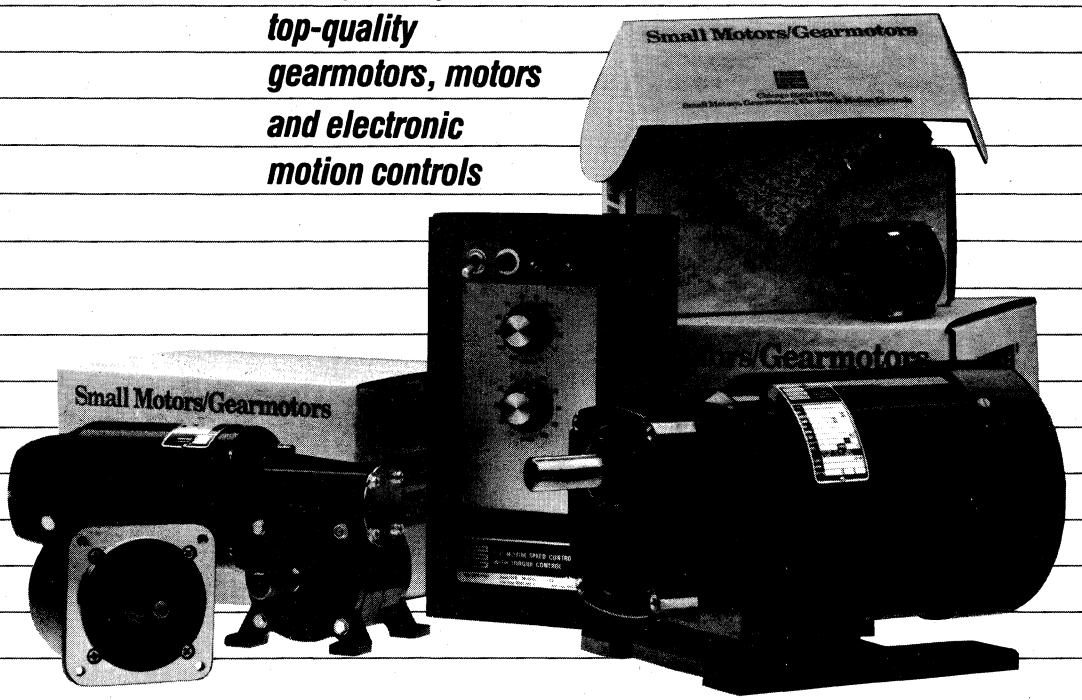
Bodine makes it easy to buy top-quality gearmotors, motors and electronic motion controls



Bodine offers you the industry's widest line of top quality small gearmotors, motors and electronic motion controls available off-the-shelf. And wide selection and local availability are just the start of your Bodine benefits.

Bodine gives you the high reliability you need for critical applications. High-quality components and materials, realistic ratings, and manufacturing excellence produce exceptionally consistent performance and long life. It's most economical to buy products you can rely on!

Bodine gives you all the help you need to select the right gearmotors, motors and motion controls. Comprehensive technical literature is augmented by expert application engineering assistance. Customers both large and small rely on our guidance as well as on our products. It's logical to buy a product you know will perform properly!

Choice. Immediate availability. Dependability. Consistency. Technical assistance. It's the easy buy, because everything you want is built right in.

Bodine top-quality stock gearmotors, motors and electronic motion controls are available through 103 stocking Distributors and Authorized Service Centers in the USA, Canada and Europe. Modifications and specials are available through your local Manufacturer's Representative or from the factory. Ask for Stock Catalog S or European Voltage Stock Catalog SME.

Mini-guide to stock products

- 400 USA/Canadian models, plus 100 European voltage models
- New 24 VDC gearmotors and motors
- Parallel shaft gearmotors: AC, DC; up to 341 Lb.-in. torque
- Right-angle shaft gearmotors: AC, DC; up to 340 Lb.-in. torque
- Motors: 10 and 30 AC, DC, universal; HP 1/2000 to 1/2; dia. 2.27″ to 6.00″
- 1.8° DC stepper; 72 RPM HY-Sync™; instrument, torque, floppy disc motors
- Matched SCR and Thyristor DC speed/torque controls for PM and shunt wound drives; DC stepper controls
- Synchronous and non-synchronous, split phase, permanent split capacitor, shunt wound, PM, series wound
- All stock products U.L. construction recognized, many CSA-certified and VDE-approved
- Other models and modifications available built-to-order in small or large quantities

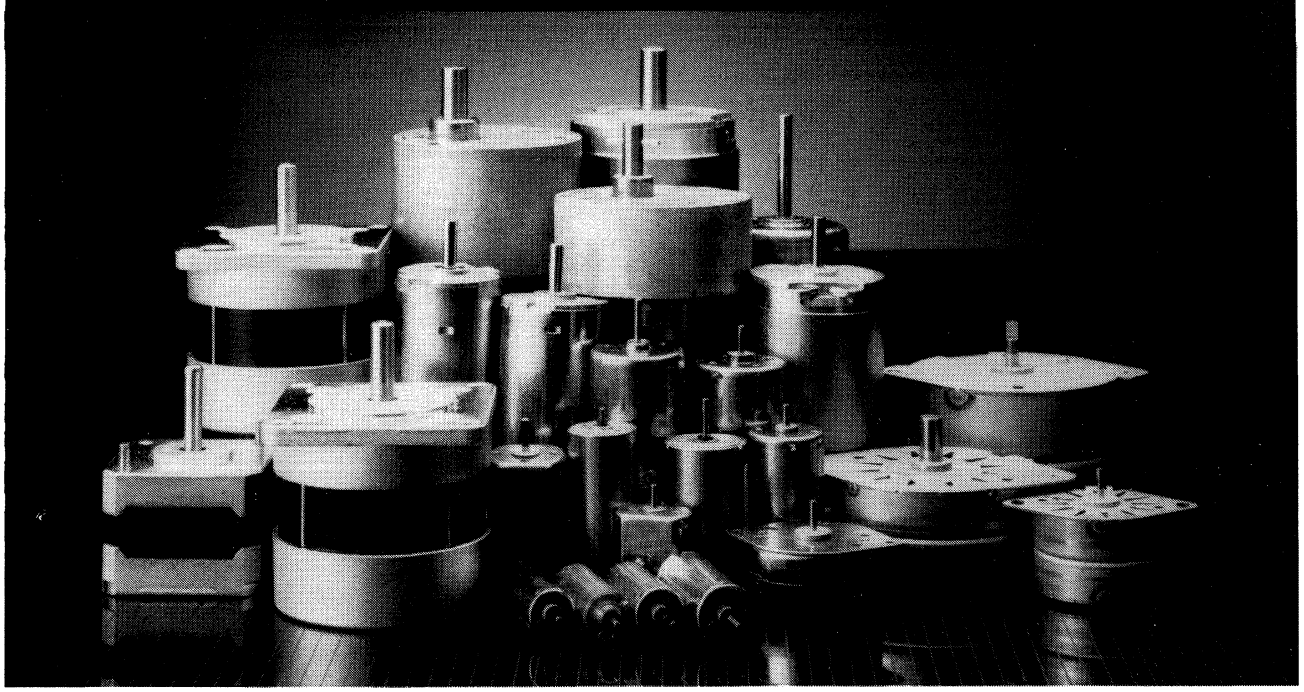
Quality in Motion

Everything in Small DC Motors



Canon. Your one reliable source...

BRUSHLESS

- Inner and outer rotor types
- Axial and radial gap types
- 30mm to 90mm diameter
- 25 to 700 g-cm starting torque

GEARMOTORS

- Over 100 different combinations
- Ratios from 5:1 to 3000:1
- 25 to 20,000 g-cm rated torque
- 1.3 to 830 rpm
- 6 to 24 VDC
- Concentric or offset shaft

IRON CORE

- Over 70 models
- 12mm to 52mm dia.
- 12 g-cm to 9000 g-cm starting torque
- Integral AC tach, optical encoder
- Ball or sleeve bearings on some models

STEPPERS

- Low in cost, high in performance.
- Step angle 0.9, 1.8, 7.5 and 15 degrees
- 35mm to 60mm diameters
- Non grain-oriented, radial grain-oriented, and multi-pole grain-oriented magnets

CORELESS

- 12mm to 40mm dia.
- 28 to 45 g-cm starting torque
- Ball bearings available on some models

BRUSHLESS DC BOX FANS

- Low cost • High air flow
- Long life • Brushless
- Low mechanical noise
- 12 and 24V models
- 40mm to 120mm size
- Ball bearing smoothness and 3-wire systems available.

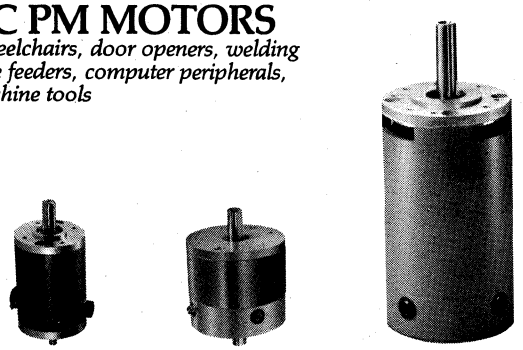
Dependability in Motion... Fractional Horsepower Motors from Clifton Precision

DC PM MOTORS

Wheelchairs, door openers, welding wire feeders, computer peripherals, machine tools



. . . with torques from 90 to 3500 oz-in., 2 inch to 4 inch O.D. Advanced magnetic materials . . . cartridge brushes

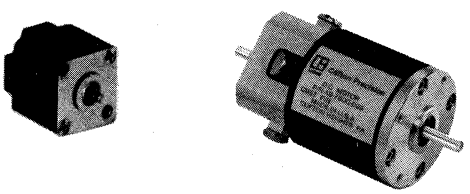
BRUSHLESS DC MOTORS

Floppy and Winchester disk drives, machine tool drives, pumps, fans, robotics

. . .with 40 to 150 mm O.D.; 1, 2, or 3 phase. Specializing in rotor/stator parts sets, with housed units also available. Will customize upon request.

MINIATURE HIGH-TORQUE DC SERVOMOTORS

Computer peripheral drives, instrument recorders, laboratory instruments, medical equipment, robotics

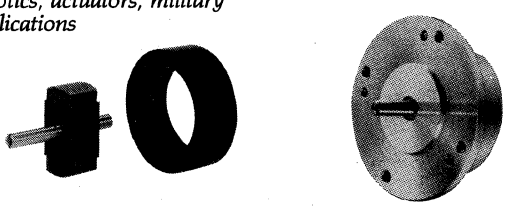


. . . with torques from 2 to 50 oz-in. .75 inch cube to 1.32 inch O.D. Cartridge brushes, Alnico or rare earth magnets

BRUSHLESS DC TOROIDAL MOTORS

— provide ripple free torque over a limited rotation without commutation.

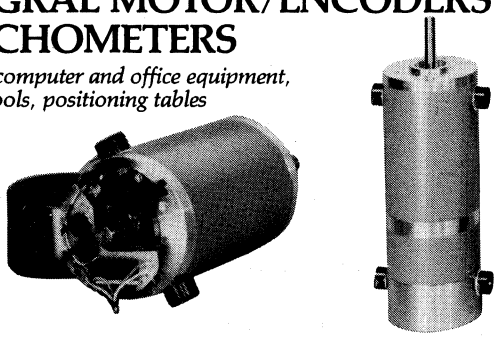
Medical scanners, ultrasound probes, robotics, actuators, military applications



. . . with torques from 2 to 214 oz-in., 1 inch to 8 inch O.D., rare earth magnets. Housed or frameless units.

INTEGRAL MOTOR/ENCODERS & TACHOMETERS

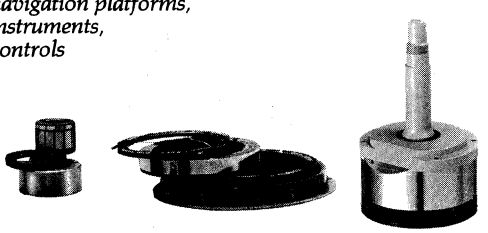
Robotics, computer and office equipment, machine tools, positioning tables



. . .for closed loop feedback: optical encoder resolution to 2500 cycles. Analog tachometers integral to motor. No assembly or alignment necessary.

DC PM HOLLOW SHAFT TORQUE MOTORS

Inertial navigation platforms, aircraft instruments, aircraft controls



. . . with torques from 6 to 2700 oz-in., 1.1 inch to 20 inch O.D. Precision tolerances, gold commutators, high reliability

Clifton specializes in custom designed products.

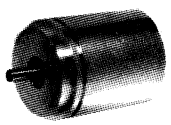
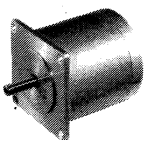
EAD EASTERN AIR DEVICES, INC.

The technological leader and problem solver in motion products

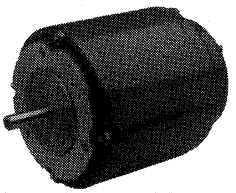
STEPPING MOTORS



Sizes 8 through 20 VR and PM stepping motors, 7.5, 10, 15, 30, 45, and 90 degree step angles with a wide range of voltage and torque ratings. Heat sinks and mechanical dampers available.

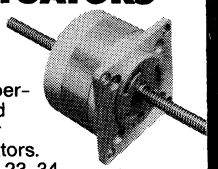


Sizes 23 ($2^{7}/_{32}$" dia.) and size 34 ($3^{3}/_{8}$" dia.) permanent magnet stepping motors with 1.8, 1.875, 5, 7.5, and 15 degree step angles. Torque ratings from 50 to 150 oz in. for size 23, and 150 to 450 oz in. for size 34.



Size 42 ($4^{3}/_{16}$" dia.) PM stepping motors with 1.8° step angles. High holding torques of 650 and 2100 oz in. High positioning accuracy of ± 3% noncumulative. Bidirectional. High speed drivers and other options.

LINEAR ACTUATORS



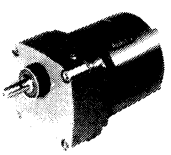
Stepper-based linear actuators. Sizes 23, 34, and 42. Linear force up to 1 ton. Linear resolution down to .000125" travel per 1.8° step. Long strokes.

INSTRUMENT MOTORS AND GEAR MOTORS

Holtzer Cabot Model M instrument motors with ratings up to 1/20 HP. Available as induction, torque, and synchronous motors in either face or foot mount. Only $2^{7}/_{8}$" sq. Popular for floppy disk drive applications.

Holtzer Cabot Model L & S instrument motors with ratings up to 1/100 HP. Available as servo, polarized synchronous, synchronous, torque, induction, and DC motors. Only $2^{5}/_{16}$" square.

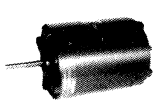
Holtzer Cabot Model L & S instrument gear motors with ratings through 150 oz. in. Available with gear reductions from 3:1 to 3600:1 in either spur or in helical gearing. Only $2^{5}/_{16}$" square.



Size 34 ($3^{3}/_{8}$" dia.) synchronous and non-synchronous gear motors. Speeds from 2 RPM to 150 RPM. Torque output up to 40 lb. in. For applications that require quiet operation and long life.

Holtzer Cabot right angle gear motors. Up to ⅛ HP in a variety of voltages, either AC or DC. Gear ratios from 6:1 to 1140:1 in either single or double reduction gear reducers.

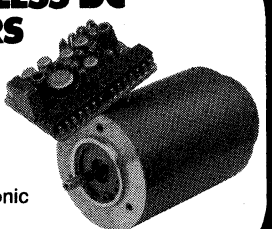
SYNCHRONOUS AND INDUCTION MOTORS



Size 34 ($3^{3}/_{8}$" dia.) and 44 ($4^{3}/_{8}$" dia.) synchronous and induction motors. 1/300 through ½ HP. 600 to 12,000 RPM. Single or dual speeds, single or dual voltage. 50/60 or 400 Hz.

Size 31 ($3^{1}/_{8}$" dia.) and size 39 ($3^{7}/_{8}$" dia.) synchronous and induction motors. 1/200 through ½ HP. 600 to 3600 RPM. Single or dual speeds. 50/60 Hz.

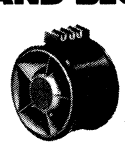
BRUSHLESS DC MOTORS



Motors, fans, blowers. Sub-FHP to ½ HP. To 20,000 rpm. With or without electronic drive circuits.

FANS AND BLOWERS

Propeller and Tubeaxial fans. Up to 12" dia. up to 1500 CFM. The EAD line of axial fans for cooling application is manufactured for continuous duty and efficient air circulation.



Vaneaxial fans. Available in $1^{1}/_{2}$", 2", and $4^{3}/_{4}$" dia. from 3 to 500 CFM at high static pressures. EAD V-Line fans are small and powerful air moving devices particularly suited to high-density electronic packages.

Centrifugal blowers. From 3 to 2000 CFM, static pressures up to 5" of water. These centrifugal squirrel cage blowers have general-purpose performance characteristics for systems with medium back pressures.

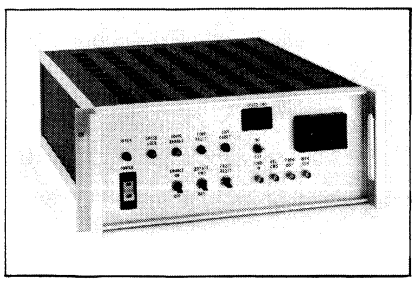
DC SERVO SYSTEMS

For applications requiring closed servo loop performance

MODEL 7-300-030-00
BRUSHLESS D.C. VELOCITY SERVO SYSTEM



The basic system includes the following:
- Brushless DC servo controller
- Brushless DC motor
- Commutation position encoder
- Incremental optical encoder

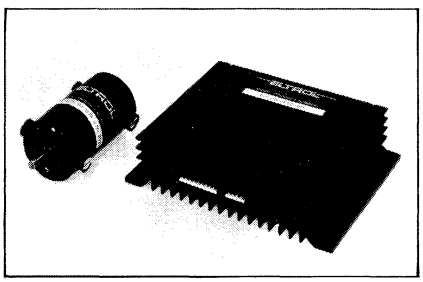
The system provides precise velocity control in a complete package: Internal D.C. power supplies, crystal reference, controls for bidirectional rotation and variable speed, digital speed readout, operating controls and status indicators.
Instantaneous speed regulation to ±.001%
Fault protection: Overtemperature, shorts to ground, shorts across motor
Current loop: High bandwidth with current limiting
Input power: 115/220VAC, 1 ϕ, 50–60 Hz

MODEL 5-156-028-00
BRUSH OR BRUSHLESS D.C. SERVO CONTROLLER

This EUROCARD provides closed loop four quadrant PWM control of motor velocity or torque. It offers maximum flexibility. Many operating features are set by pluggable jumpers. Variable compensation and gain by plug-in component carrier and trim pots simplify set up of closed loop operation.

FEATURES
- Single 24–60 volt P.S.
- Adjustable current 5–15 amps
- High efficiency 24KHZ PWM drive scheme minimizes EMI in noise sensitive applications
- Fault protection for excess temperature, speed, voltage, current, and motor stall
- Digital inputs command enable/reset, brake, and ± travel limits
- Differential amplifier for ± 10V input command
- Velocity F/B from commutation sensors, encoder, or DC tachometer

MODEL 6-120-024-00
BRUSH-TYPE LINEAR D.C. SERVO CONTROLLER



Motion control of position, velocity, or torque.
Simple adjustments for application adaptation
Peak output current: 2–10 amps
Linear operating mode: No switching EMI, high servo stiffness, no torque dead zone
Fault protection: Shorts across motor, shorts to ground, peak and time dependent continuous foldback current limits, external fault indication and reset.

The Eltrol motor-tach shown above is ideally suited to take full advantage of the servo controller's capabilities.

Eltrol Corporation is an engineering oriented firm specializing in D.C. servo systems. We provide standard, modified standard or custom designed systems to your electrical and mechanical specifications.

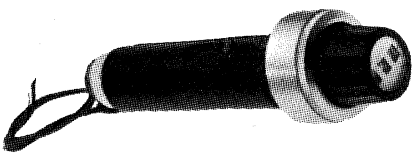
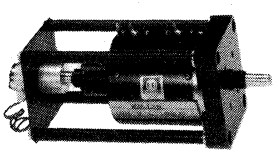
Dual Gang For Fully Fed-Back Systems.

MC20 - 3 WIREWOUND (1- 3/8 dia) 10 turn
RPMS AVAILABLE: ..... 0.16 to 50
RESISTANCE RANGE: ..... 10 to 200k Ω
POWER RATING: ..... 3.0 watt



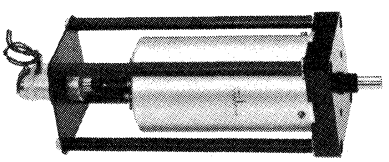
Digital Turns Counting Dial is pre-assembled and calibrated to motorpot at factory.

MC46 -1 WIREWOUND (2" sq.) 10 turn
RPMS AVAILABLE: ..... 0.16 to 65
RESISTANCE RANGE: ..... 2 to 300k Ω
POWER RATING: ..... 5.0 watt



High Resolution, increased power. 20 turns available.

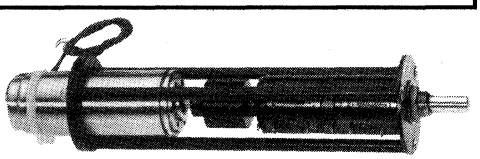
MC46 -2 WIREWOUND (2" sq.) 10 turn
RPMS AVAILABLE: ..... 0.16 to 65
RESISTANCE RANGE: ..... 0.05 to 200k Ω
POWER RATING: ..... 5.0 watt



Limit Switches at one or both ends of travel. 20 or 30 turns available.

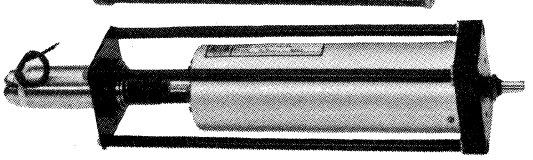
HEAVY DUTY MOTOR & GEAR - 6, 12 or 24 VDC

MC20 - 4 WIREWOUND dual gang (1- 3/8 dia) 10 turn
MC20 - 5 WIREWOUND single gang (1- 3/8 dia)
RPMS AVAILABLE: ..... 0.04 to 276
RESISTANCE RANGE: ..... 10 to 200k Ω
POWER RATING: ..... 3.0 watt



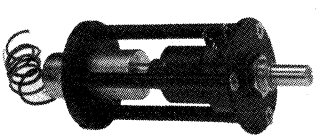
Up to 18 oz. in. torque. Required when attaching the potentiometer output shaft to another gear or mechanism.

MC46 - 4 WIREWOUND dual gang (2" sq) 10 turn
MC46 - 5 WIREWOUND single gang (2" sq.)
RPMS AVAILABLE: ..... 0.4 to 86
RESISTANCE RANGE: ..... 0.5 to 200k Ω
POWER RATING: ..... 5.0 watt



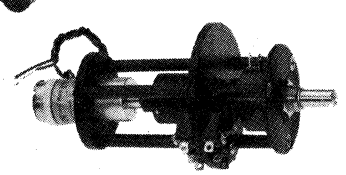
MOTORIZED SINGLE TURNS - 6 or 12 VDC

MC2E - WIREWOUND (1-1/4" dia)
RPMS AVAILABLE: ..... 0.16 to 222
RESISTANCE RANGE: ..... 500 to 100k Ω
POWER RATING: ..... 1.0 watt
Conductive Plastic element for essentially infinite resolution, longer life available.



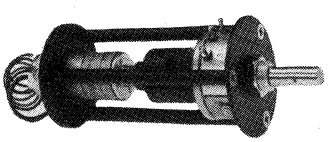
Potentiometer terminals allow *Plug on Connectors, Simplifying Harnessing.*

MC2P - 2 CONDUCTIVE PLASTIC (2" dia)
RPMS AVAILABLE: ..... 0.16 to 222
RESISTANCE RANGE: ..... 500 to 100k Ω
POWER RATING: ..... 1.0 watt



Unit has 5 amp *Snap Action Switches* at both ends of travel.

MC3W - WIREWOUND (1-3/4" dia)
RPMS AVAILABLE: ..... 0.16 to 122
RESISTANCE RANGE: ..... 50 to 50K Ω
POWER RATING: ..... 0.75 watt



Larger units available with higher wattage and conductive plastic elements.

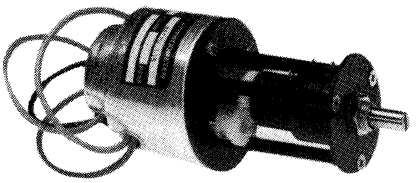
ETI SYSTEMS

A.C. MOTORIZED POTENTIOMETERS

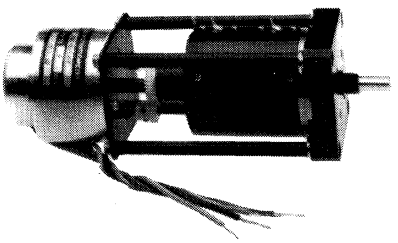
MOTORIZED MULTI - TURNS - 24 or 115 VAC

MAC2W - WIREWOUND (2" dia x 4-1/4" max)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 100 to 100k Ω
POWER RATING: ..... 2.0 watt



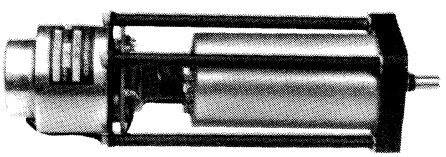
General Purpose 10 turn Wirewound el ment for excellent output stability.

MAC46 - WIREWOUND (2" sq. x 6" max)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 2 to 300k Ω
POWER RATING: ..... 5.0 watt



High Wattage, high resolution.

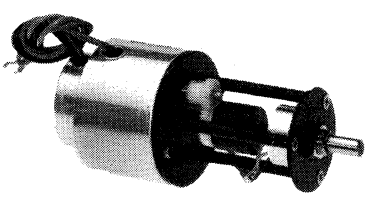
MAC4RC - WIREWOUND (2" sq x 6-13/16" max)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 0.5 to 1M Ω
POWER RATING: ..... 5.0 watt



Limit Switches at one or both ends of travel. High Wattage. *With Circuit Board.*

MOTORIZED SINGLE TURNS - 24 or 115 VAC

MAC22 - WIREWOUND (2" dia. x 3-1/2" max)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 100 to 20k Ω
POWER RATING: ..... 1.0 watt

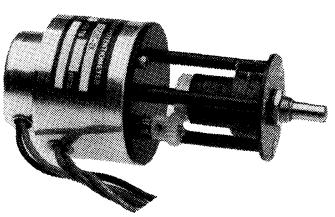


General Purpose. Wirewound element for excellent output stability.

MAC2P - CONDUCTIVE PLASTIC (2" dia. x 3-1/2" max.)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 500 to 100k Ω
POWER RATING: ..... 1.0 watt

Conductive Plastic for long life and essentially infinite resolution.

MAC2E - WIREWOUND (2" dia. x4" max.)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 10 to 20k Ω
POWER RATING: ..... 0.5 watt



Push on Connectors simplify harnessing.

MAC2C - CONDUCTIVE PLASTIC (2" dia. x 4" max.)
RPMS AVAILABLE: ..... 0.5 to 15
RESISTANCE RANGE: ..... 500 to 100k Ω
POWER RATING: ..... 1.0 watt

Push on Terminals simplify Harnessing. Conductive plastic allows greater life, higher wattage.

FEATURES of ETI SYSTEMS Motorized Potentiometers. Slip clutch allows manual adjustment when power is off. Operating Temperature range: -30°C to +65°C. A.C. motors are UL approved, reversible. Circuit board (optional), packages the starting capacitor, balancing resistor and braking diode. Braking diode prevents motor coasting.

ETI SYSTEMS

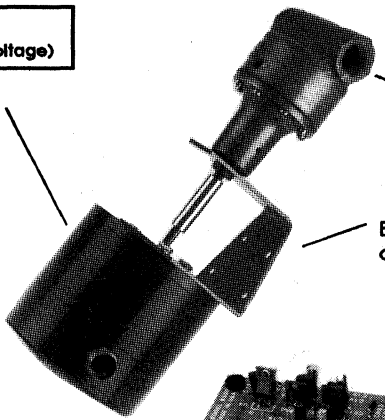
ROTARY ACTUATORS & MOTORIZED COMPONENTS

VALVE POSITIONERS

Patented design addresses safety and downtime, torque concerns, and perhaps most critical, *"styction"*. From 10-turn needle valves to regulators requiring 200 in.lbs. of torque, ETI Systems offers the precision functioning and feedback devices that fit your requirements.

WATER REGULATOR ADJUSTOR
Model VM100 (D.C. or A.C. Motor Voltage)

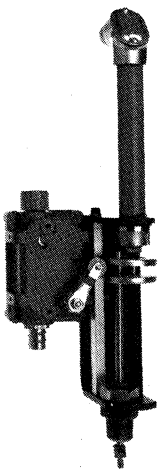
Housing is 5" in Dia. and contains:
- End travel limit switches.
- Feedback position potentiometer.
- Multiple motors (patented), provides higher torque, better load distribution and prevents catastrophic motor failure.
- Energy absorbers (patented) reduces sticking.



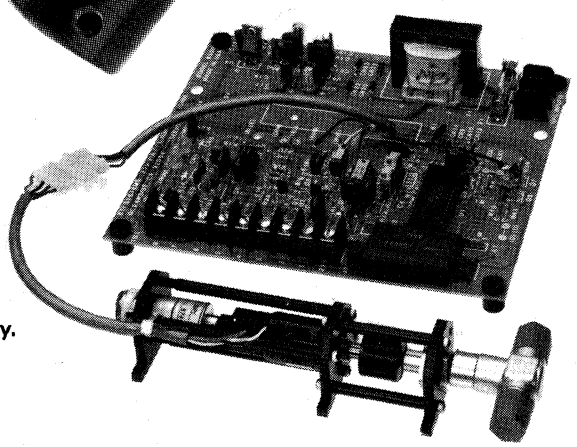
Valve or regulator (customer provided or designated).

Bracket is detachable or custom made.

WATER REGULATOR FEEDBACK
Model VL2350S



VALVE CONTROL
Model VC6500

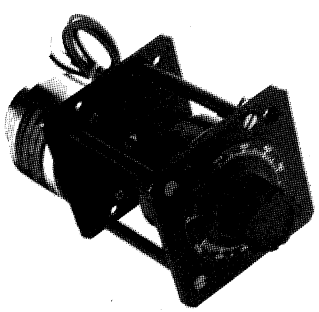


- Servo Control with feedback.
- Inputs to position valves are: 0 to 10VDC, 4 to 20 MA or binary.
- Non-Standards available.

WE WILL DESIGN FOR YOUR APPLICATION. CALL OUR ENGINEERING DEPT. FOR ASSISTANCE.

MOTORIZED RHEOSTATS & VARIABLE TRANSFORMERS

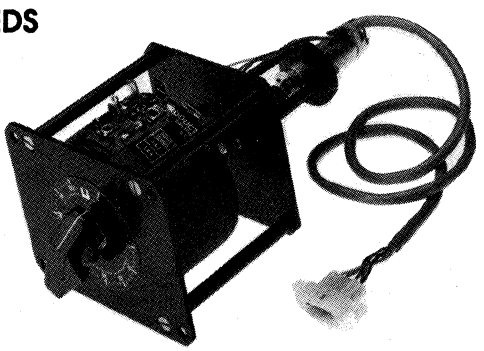
CONTROL YOUR POWER NEEDS



MOTORIZED RHEOSTAT

- Automatically or Remotely control power needs with a Motorized Rheostat or Variable Transformer from ETI Systems.
- Single or Multi gangs Available
- 6, 12 or 24 VDC
- 24 or 115 VAC
- Many RPM Selections

POSITIONING CIRCUITRY AVAILABLE



MOTORIZED VARIABLE TRANSFORMER

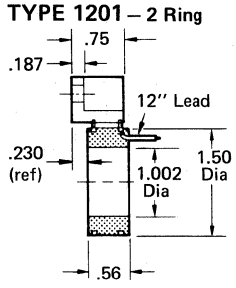
SLIP RING ASSEMBLIES

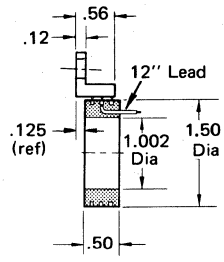
BEST DELIVERY **1**

SEPARATE ROTOR AND BRUSH BLOCK ASSEMBLY — STOCK DELIVERY

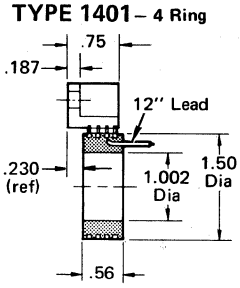
TYPE 1201 – 2 Ring



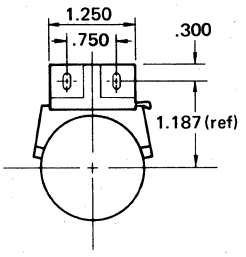
TYPE 1301 – 3 Ring



TYPE 1401 – 4 Ring

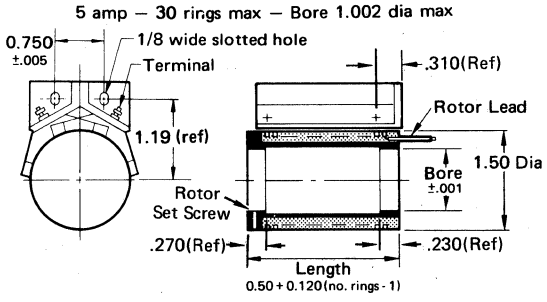


TYPICAL END VIEW



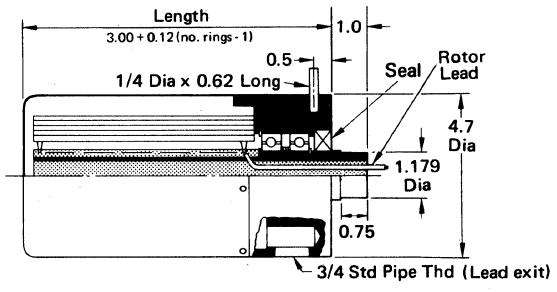
Slip Ring Assembly Type **1057**
Separate Rotor and Brush Block

5 amp — 30 rings max — Bore 1.002 dia max



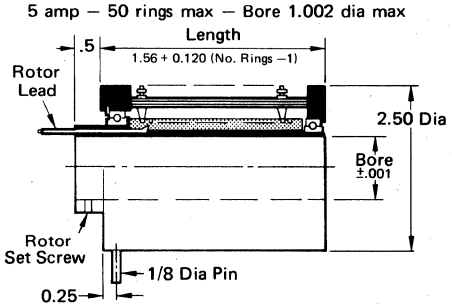
Slip Ring Assembly Type **1302**
Sealed Housing

5 amp — 50 rings max — Solid Bore



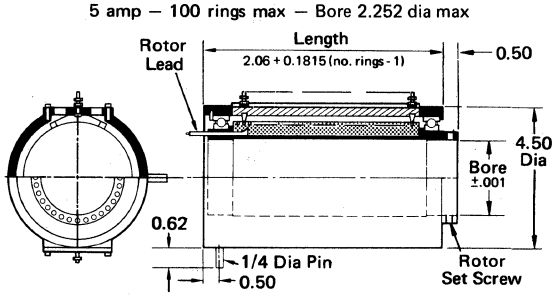
Slip Ring Assembly Type **1186**
Rigid Tube Housing — Exposed Stator Terminals

5 amp — 50 rings max — Bore 1.002 dia max



Slip Ring Assembly Type **1067**
Rigid Tube Housing — Exposed Stator Terminals

5 amp — 100 rings max — Bore 2.252 dia max



CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds.

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

PART NUMBER CODING – Specify fully when ordering

Type	Bore (Inches)	No. Rings	Lead Length (Inches)	Lead Type (Shielded - S, Unshielded - U)

BRUSH ASSY P/N 1092003

BRUSH MATERIAL

- Fabricast grade Fag 180, the universal low noise level grade used for all standard brush assembles.
- Fabricast grade FAG 193, the lowest noise level grade, however, the ring surface speed is limited to 250 SFM.
- Fabricast grade FAG 150, the highest surface speed grade, however, noise levels are compromised.

Grade No.	Composition	Recommended Surface Speed	Carrying Capacity
FAG150	50% silver, 50% graphite	Over 3500 ft. per min.	100 Amps per sq. in.
FAG180	80% silver, 20% graphite	Up to 3500 ft. per min.	250 Amps per sq. in.
FAG193	93% silver, 7% graphite	Up to 250 ft. per min.	300 Amps per sq. in.

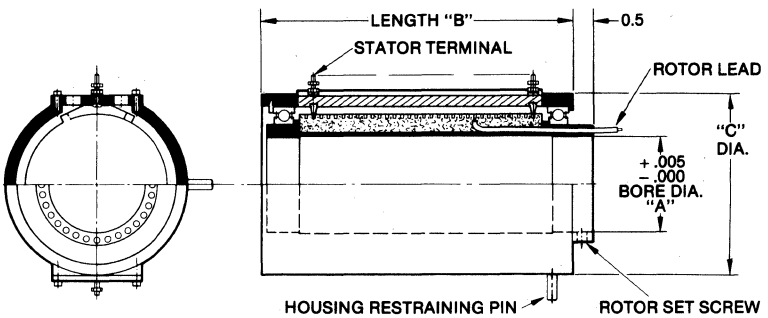
SLIP RING ASSEMBLIES

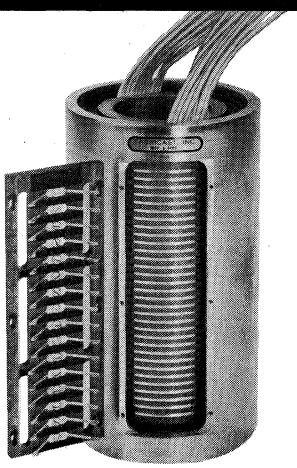
SELF—CONTAINED RIGID TUBE HOUSING

3

DISTINGUISHING CHARACTERISTICS

Rigid one piece housing eliminates bearing alignment problems. Larger section bearings are generally used in these units for a more rugged unit.





TYPE	BORE DIA "A" INCHES		NO. RINGS MAX.	CURRENT AMPS	LENGTH "B" INCHES	HOUSING DIA "C"
	NOMINAL	RANGE				
1230	Solid	—	100		3.50 + .120 (no. rings -1)	2.50
1186	1.000	0 - 1.002	100	5 amp std 2 brushes per ring	1.56 + .120 (no. rings -1)	2.50
1197	1.250	1.0 - 1.252	70		1.56 + .130 (no. rings -1)	3.50
1289	1.500	1.25 - 1.502	100		1.56 + .150 (no. rings -1)	4.00
1067	2.000	1.5 - 2.252	100	10 amp std or lo noise 4 brushes per ring	2.06 + .181 (no. rings -1)	4.50
1420	3.000	2.25 - 3.002	100		1.38 + .181 (no. rings -1)	4.75
1506	3.500	3.0 - 3.502	100		2.88 + .200 (no. rings -1)	6.50
1390	4.000	3.5 - 4.252	100		2.00 + .187 (no. rings -1)	5.75

* RING COMPLEMENT MAY BE LIMITED BY ABILITY TO PASS ROTOR LEADS UNDER BEARINGS.
* FOR 50 AMP STANDARD POWER ASSEMBLIES SEE POWER ASSEMBLY SECTION.
* INSTRUMENT AND 50 AMP POWER CIRCUITS MAY BE CAST ON COMMON SLEEVE.

CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG — 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

CURRENT: Noted in tabulated block
Rating may be doubled with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

ROTOR LEADS: 5 AMP Leads — 20 GA per MIL-W-16878 TYPE "E"
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

HOUSING: One piece tube construction

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

PART NUMBER CODING — Specify fully when ordering

Type	Bore (Inches)	No. Rings	Lead Length (Inches)	Lead Type (Shielded - S / Unshielded - U)

X	X	X	X	X

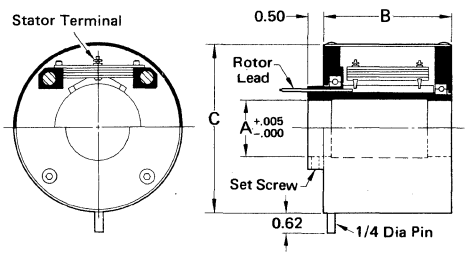
CHARACTERISTICS

RPM: **Rigid one piece housing eliminates bearing alignment problems.**
RINGS: Coin Silver 5 amp rings. Copper 50 amp rings.
BRUSHES: Silver Graphite Fabricast Grade FAG 180 (80% AG — 20% C) Two brushes per ring. Brushes individually removable and replaceable.
NOISE: 10 Milliohms dynamic resistance max 5 Milliohms max with 4 brushes per ckt.
CURRENT: Noted in tabulated block. Rating may be doubled with 4 brushes per ckt.
HI-POT: See table on left.
ROTOR: One piece steel sleeve. Ring complement vacuum cast on sleeve as unit with epoxy dielectric.
ROTOR LEADS: 5 amp Leads — 20 ga per MIL-W-16878 type "E" 50 amp Leads — 8 ga — Teflon.
HOUSING: One piece tube construction.
COVER: Easily removable for brush and ring inspection.
BEARINGS: Shielded or sealed ball bearings.

SELF CONTAINED COVERED STATOR TERMINAL SLIP RING ASSEMBLIES

DISTINGUISHING CHARACTERISTICS
Bearing Bell and space bar type units best suited for larger bore assemblies.



TYPE	BORE DIA "A", inches		NO. RINGS MAX	CURRENT	LENGTH "B", inches	Housing Dia "C"

CHARACTERISTICS

RINGS: Coin Silver AMP Rings.
Copper 50 AMP Rings.

BRUSHES: Silver Graphite.
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable.

NOISE: 10 Milliohms dynamic resistance MAX.
5 Milliohms max with 4 brushes per CKT.

CURRENT: Noted in tabulated block.
Rating may be doubled with 4 brushes per ckt.

HI-POT: 1000 VAC 60 cycle for 15 seconds.

ROTOR: One piece steel sleeve.
Ring complement vacuum cast on sleeve as unit with epoxy dielectric.

ROTOR LEADS: 5 AMP Leads – 20 GA per MIL-W-16878 TYPE "E"
50 AMP Leads – 8 GA – Teflon
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

BRUSH BLOCK: Glass epoxy laminate.
Optional mounting methods shown.

PART NUMBER CODING – Specify fully when ordering.

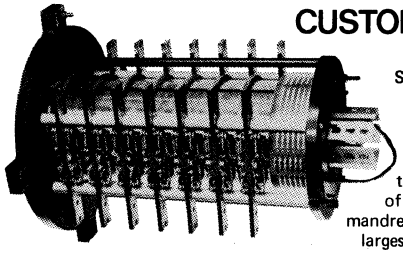
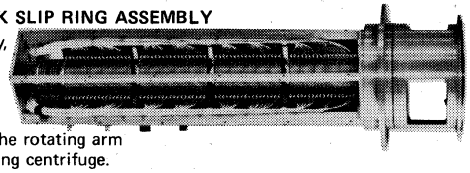
CUSTOM DESIGNED SLIP RING ASSEMBLIES



CUSTOM 7000 AMP SLIP RING ASSEMBLY

This slip ring assembly, as designed and manufactured by Fabricast, Inc., is used to supply 7000 amperes of current to the rotating mandrel of the world's second largest spin forging machine.

CUSTOM 222 TRACK SLIP RING ASSEMBLY



This slip ring assembly, as designed and manufactured by Fabricast, Inc. was used to complete the electrical circuits to the rotating arm of an astronaut carrying centrifuge.

The unit consists of 50 amp. power, 5 amp. instrumentation and 50 megacycle coaxial modules.

FABRICAST WILL ALSO CUSTOM DESIGN SPLIT RING ASSEMBLIES AND SEGMENTED SLIP RING ASSEMBLIES

GRAPHALLOY® SILVER GRAPHALLOY BRUSHES and BRUSH & SLIP-RING ASSEMBLIES...

USED IN **MICROWAVE EQUIPMENT • SERVO SYSTEMS • SYNCHROS • INVERTERS • THERMOCOUPLE and STRAIN GAGE CIRCUITS • PULSE SYSTEMS • COMPUTER GROUNDING CONTACTS • TORQUE INDICATORS • MEDICAL EQUIPMENT • PACKING MACHINERY**

GRAPHALLOY® BRUSHES

Silver-Graphalloy Brushes have been widely used because of low *and* constant contact drop, extremely low electrical noise, *and* long life. Over 100 grades are now serving in a wide variety of applications. Silver-Graphalloy Brushes on ½-inch-diameter coin silver slip rings have operated successfully in highly critical electrical circuits at speeds up to 100,000 r.p.m.

Standard sizes from ⅛"-square to ¾"-square. Many sizes in stock.

Our Engineering Department will assist you in determining the exact grade of GRAPHALLOY for your needs. *Ask for our Brush Inquiry Form 109.*

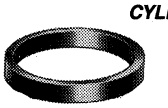
GRAPHALLOY® SLIP RINGS

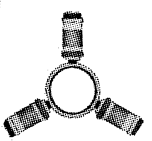
We supply Coin Silver and Bronze Slip Rings, both *cylindrical* and *flat* types ...and recommend three brushes per ring...spaced at 120°...for best contact. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type, or slip-ring assemblies, can be furnished with leads attached.

No. 168 Series FLAT TYPE to 20" O.D.

Standard FLAT Rings have ¼" radial contact surface and ⅛" radial spacing between adjacent rings.

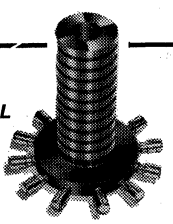
No. 116 Series CYLINDRICAL TYPE to 36" O.D.





Typical Layout

Model 319 CYLINDRICAL SLIP-RING Assembly



SOLID COIN SILVER RINGS

GRAPHALLOY BUSHINGS and PILLOW BLOCKS

Survive unlubricated! Replace oil-lubricated bushings in synchros, instruments, timers and missiles. Advantages:

(1) Lower friction at room temperatures;
(2) No oil to solidify at low temperatures;
(3) No oil to carbonize at prolonged elevated temperatures.
(4) No oil or grease drag.

Ask for Data Sheets 270 and 277 on Miniature Bronze-Graphalloy Bushings.

Ask for the following Data Sheets

GRAPHALLOY BRUSHES, SLIP RINGS & ASSEMBLIES...DS-218
GRAPHALLOY BUSHINGS, PILLOW BLOCKS...DS-117 and DS-1001

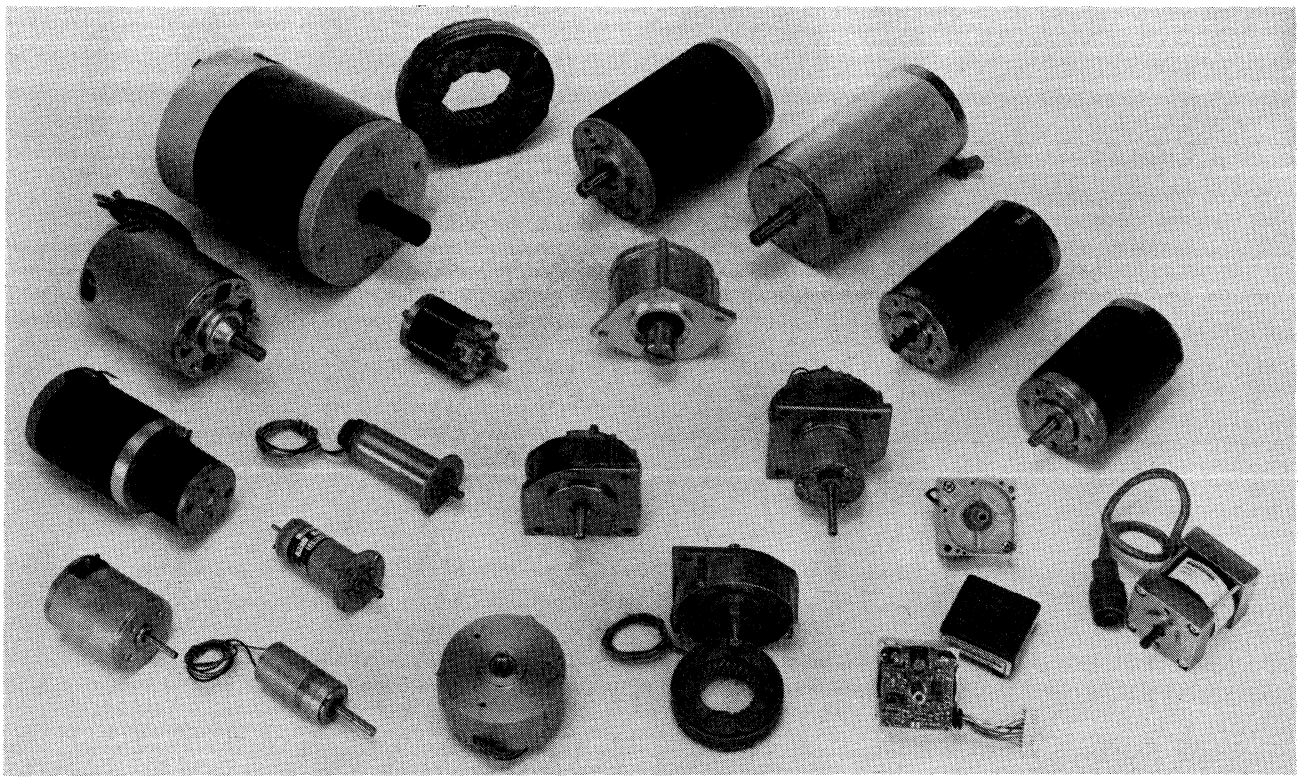
BRUSHLESS AND BRUSH TYPE PMDC MOTORS



HATHAWAY – SPECIALTY MOTION CONTROL

BRUSHLESS DC Housed or Frameless (unhoused) Motor Designs

- 0.85 to 7.10 inches O.D.
- High Torque to Weight and Size Ratios
- Samarium Cobalt or Neodymium Magnets
- Several different lengths in each frame diameter
- Integral Hall Effect Sensors for commutation
- Standard options including brushless tachometers and optical encoders
- Limited Rotation Torque Motors
- Specially Engineered Designs
- MIL-SPEC Qualified

BRUSHLESS MOTOR DRIVES AND POSITION CONTROLS

Several classes of drive electronics are available:

- Commutation Only
- Speed Controllers
- Four Quadrant Servo Amplifiers
- Sine-wave drives
- Intelligent Position Controls: Single and Multi-axis

BRUSH COMMUTATED PMDC MOTORS

HATHAWAY offers over 35 years experience in the design and manufacture of specialized PMDC motors.

- 0.8 to 4.25 inches OD
- MIL-SPEC Motors
- Low Cost Commercial Grade
- Tachometer and Brake Options
- Custom Engineered Designs

TRANSDUCERS

- Rotary Encoders
- Linear Encoders
- Fiber-optic Encoders
- Precision Analog Optical Tachometers (TACHODER)
- Optical Brushless Commutation

APPLICATIONS

- Specialized Industrial Automation Systems
- Military and Aerospace
- Instrumentation
- Medical and Life Support Systems
- Precision Servo Systems

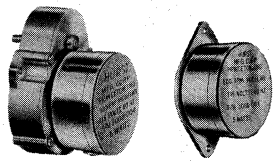
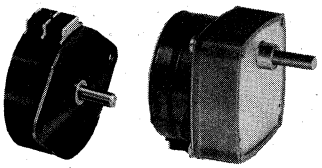
STEPPING AND SYNCHRONOUS MOTORS



A SERIES

Designed for long life at rated loads. Geared models have hardened steel gears and pinions running on steel studs. Hi-Torque rotors available; also voltages other than those shown may be specified. Widely used in applications requiring high quality components.

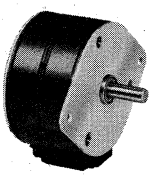
Dim. Geared: 2.81″ H x 1.63″ D
Direct Drive: 1.94″ H x 1.02″ D



S SERIES

Compact direct drive or geared motors for applications where space is limited and precise performance is required. Geared motors have typical torque ratings to 200 oz-in @ 200 p/s (max. gear train loading). Dual-stack motors featuring greater torque are now available. Call or write for complete specifications.

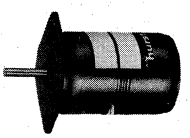
Dim. Geared: 2.45″ H x 1.78″ D
Direct Drive: 2.28″ H x .97″ D



SC SERIES

SC Series stepping motors have approximately 66% greater torque yet are only ⅔″ longer than the popular SAS Series motors. Dual sleeve bearings are standard but ball bearings as well as double ended shafts may be specified.

Dim. Direct Drive: 3.13″ H x 1.41″ D



BA SERIES

This exceptionally small stepping motor — a mere 0.895″ x 1.438″ — has a relatively high torque to inertia ratio. Its design recognizes the demand for small components to fit where space is severely limited. Applications are found in a wide range of medical and scientific instruments and robotics. These stepping motors are also recommended for low duty-cycle, battery operated equipment.

Dim. Direct Drive: .895″ H x 1.438″ D

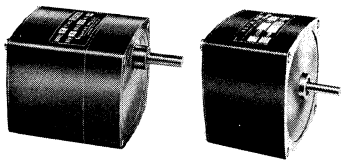
WEIGHT (oz)	11	16	18

*Maximum gear train loading

NOTES
1. Capacitors furnished with most standard synchronous motors.
2. All synchronous motors shown on this page operate on 115 VAC, 60 Hz.

HURST HURST MANUFACTURING DIVISION,
EMERSON ELECTRIC COMPANY, BOX 326, PRINCETON, IN 47670. TELEPHONE (812) 385-2564. FAX (812) 386-7504

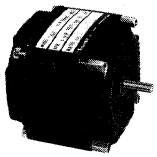
STEPPING AND SYNCHRONOUS MOTORS



T SERIES

Compact, rugged and efficient, TS Series motors are designed for heavy-duty applications. Geared models offer hardened steel gears and pinions with dynamic torque ratings up to 250 ounce-inches. Both geared and direct drive motors have machined die cast housings. Sleeve bearings are standard but ball bearings may be specified on the output shaft.

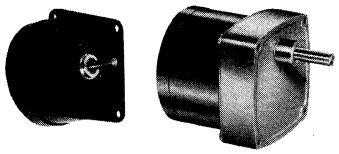
Dim. Geared: 2.38″ H x 2.53″D
Direct Drive: 2.38″ H x 1.75″ D



KVS SERIES

KVS Series motors are hybrid permanent magnet types. The motors are constructed with multitoothed rotors and stators of unequal tooth number so that a vernier effect provides the equivalent of a large number of poles and small step angles without the necessity for gearing. Standard KVS motors are furnished with 6-lead bifilar windings for 12 VDC operation. Other voltages and 2-phase, bipolar windings may be specified.

Dim. Direct Drive: 2.38″ H x 2.44″ D

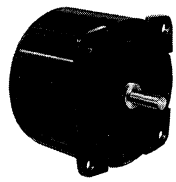


P SERIES

PAS and PBS Series motors provide users with a choice of direct drive or geared models, standard or Hi-Torque rotors and, for direct drive models, a choice of mounting plates. Voltages other than those shown may be specified.

Gearing is scaled to provide a maximum dynamic gear train loading of 200 ounce-inches.

Dim. PAS Geared: 2.38″ H x 2.25″ D
PAS Direct Drive: 2.28″ H x 1.56″ D
PBS Geared: 2.38″ H x 2.13″ D
PBS Direct Drive: 2.28″ H x 1.41″ D



R SERIES

Designed specifically to combine greater torque and small size, RAS and RBS stepping motors meet many industrial and instrument requirements. Standard 7.5° step angle motors have a torque rating at 4-5 p/s of 23 ounce-inches. The Hi-Torque model is rated at 29 ounce-inches. Models with 15° step angles are rated, respectively, 13 and 17 ounce-inches.

Dim. Direct Drive: 2.88″ H x 1.84″ D

INPUT POWER (Watts)	8.5	8, 8.5
WINDING RESISTANCE (Ohms)	31	32 and 35
WEIGHT (oz)	27	18

NOTES
1. (PAS and PBS). Square mounting plate is standard for direct drive motors.
2. (TS, RAS and RBS). Standard motors have 4-phase bifilar windings (6 leads) for 6, 12, or 24 VDC operation.
3. All stepping motors shown here can be driven with Hurst Stepping Motor Controls.

DIRECT DRIVE SYNCHRONOUS MOTORS

	T and TA	PA and PB	RA
SPEED @ OUTPUT SHAFT (rpm)	300 or 360	300 or 600	300
RATED TORQUE (oz-in)	6.6 to 10.25	5.5 to 11	15 or 20
INPUT POWER (Watts)	6 to 9.5	7.5 to 11	11 or 14.5
CAPACITOR VALUE (mfd)	.68 to .85	.68 to 1	1.0 or 1.3
FULL LOAD TEMPERATURE RISE (°C)	27 to 38	31 to 45	37 or 46
WEIGHT (oz)	20	13	26

GEARED SYNCHRONOUS MOTORS

	T and TA	PA and PB
SPEED @ OUTPUT SHAFT (rpm)	1 to 150	1 to 360
RATED TORQUE (oz-in)	13-250*	6 to 200
INPUT POWER (Watts)	7 or 9.5	7.5 to 11
CAPACITOR VALUE (mfd)	.68 or .85	.68 to 1
WEIGHT (oz)	27	18

*Maximum gear train loading

NOTES
1. Capacitors furnished with most standard synchronous motors. (No capacitor furnished with TA or BA Series motors).
2. (PA and PB). Square mounting plate is standard for direct drive models.
3. All motors except some TA Series motors operate on 115 VAC, 60 Hz. Some TA models operate on 115 VAC, 50 Hz.

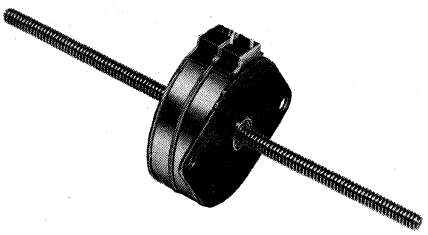
LINEAR ACTUATORS, Stepping or Synchronous



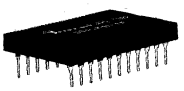
Stepping (SLS Series) or synchronous (SL Series) linear actuators are reversible, permanent magnet rotor types. An integral part of the rotor assembly is a sintered bronze nut for extended life. The nut accepts a ¼" diameter, .048 pitch Acme screw that provides linear motion for pushing, pulling, lifting and positioning applications. Standard 8" lead screws have a maximum travel of 6.75" and a maximum thrust of 25 pounds. Screws of other lengths may be specified. Ball bearings are standard. SL (synchronous) Series motors provide travel of .24 inch per second. SLS (stepping) Series motors have a resolution of .001" per step or 1000 steps per inch.

New 600 rpm versions of these motors are now available. They have all the quality features of the SL and SLS Series. The direct drive model has a linear travel rate of .48"/sec. The stepping version has 500 steps/in. Consult the factory for complete specifications.

CONTROLS FOR STEPPING MOTORS

MODEL 220001

The 220001 is a DIP package containing all the basic circuitry required for operation of a 4-phase, unipolar stepping motor: a pulse generator, bidirectional logic sequencer, and phase drivers. It is fabricated as a thick film hybrid circuit using CMOS and bipolar components for small size and low power consumption.

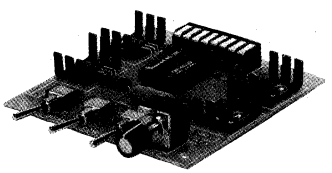


FEATURES:

- 5V logic level control of
  - — rotational direction
  - — run/hold
  - — single step (jog)
  - — phase driver disable
- 2-on, 2-off phase sequencing
- drivers rated at 500 ma per phase
- operation from single 6 to 24 VDC supply

MODEL EPC-016

The EPC-016 is a PC board assembly containing the 220001 hybrid, power drive transistors, and all external components needed for manual control of a stepping motor. A motor, DC power supply, and this board form a complete system.



FEATURES:

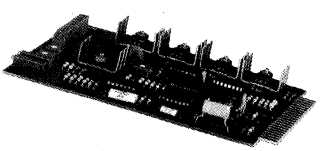
- 3 position switch for operation of motor in continuous step, jog, or hold mode
- CW/CCW rotation selection switch
- phase disable switch
- step frequency adjust potentiometer
- 2 amp per phase drive capability
- operation from single 6 to 24 VDC supply
- Dimensions: 4" x 4"

MODEL EPC-013

The EPC-013 is a PC board assembly with additional stepping motor control capabilities.

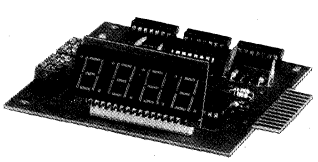
FEATURES:

- sequencing and drivers for 3 or 4 phase unipolar motors
- 3 modes of excitation
  - — full step, 2 phases on
  - — full step, 1 phase on
  - — half step, alternating 1-2 phases
- ramping oscillator for step rate control
- adjustable ramp rates
- linear or exponential ramp profile
- single step (jog) input
- gating for external control of input pulses
- manual or digital interface to control functions
- 2 amps per phase drive capability
- operation from single 6 to 30 volt supply
- 5V regulator output available for external use
- Dimensions: 6.5" x 4.5"



MODEL EPC-014

The EPC-014 is a general purpose presettable counter/display PC board assembly suitable for use with most stepping motor drive systems. In a typical application, it is preset with a number of motor steps, counts and displays the steps as executed, and provides a control signal when the preset count is reached. It is also suitable for count and control applications using input pulses derived from sources other than step commands, e.g., from an external encoder or other sensor.

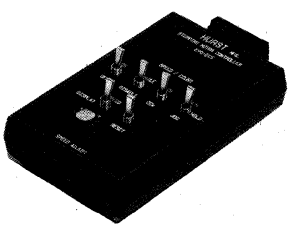


FEATURES:

- 4 decade counter/display
- manual count preset via BCD switches
- optional remote location of count preset switches and display
- manual or digital control of enable input
- 5V logic level output latch
- operation from 5VDC supply
- Dimensions: 4.0" x 4.5"

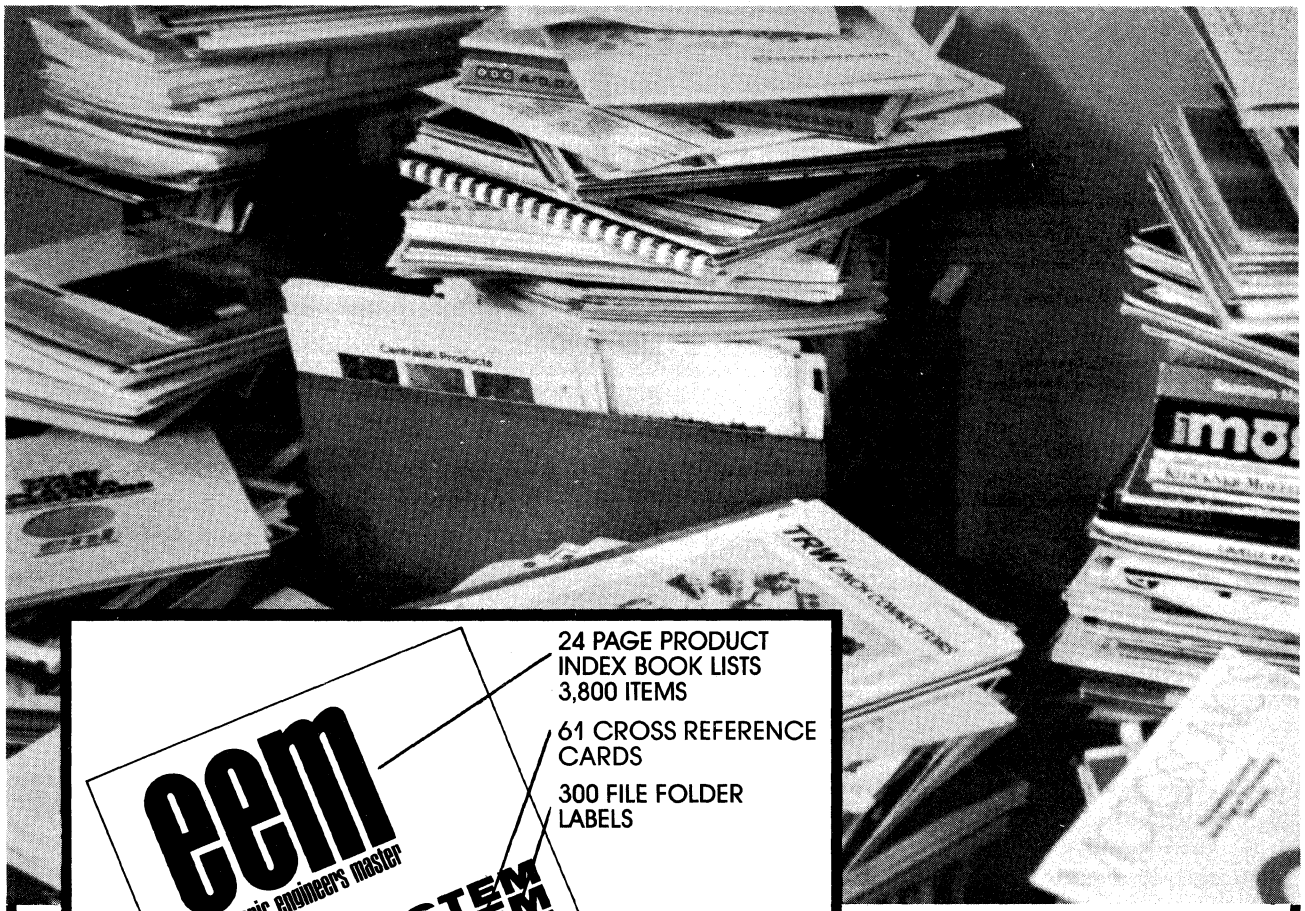
MODEL EPC-015

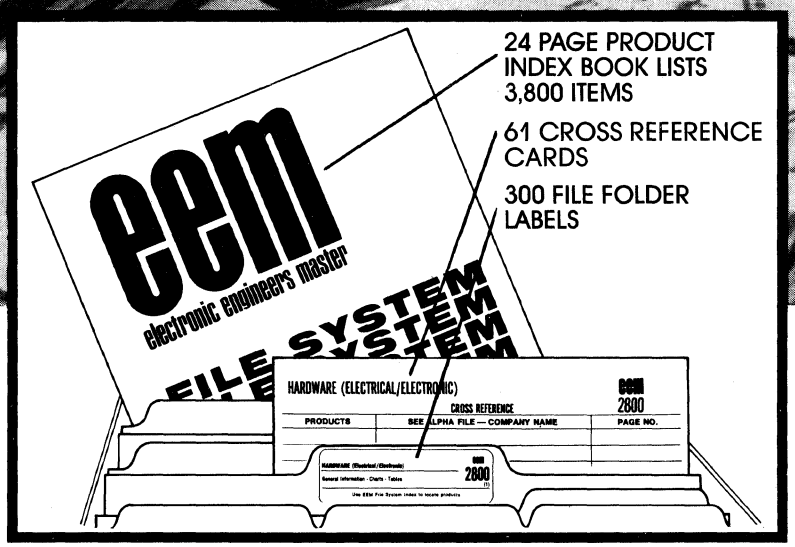
The EPC-015 is a totally encased, hand-held driver containing all the control features of the EPC-016 plus selectable display of step frequency or step count. A motor, DC powder supply, and this controller form a complete control system.



FEATURES:

- 4 decade frequency/count display
- all control features of EPC-016
- 1 amp per phase motor drive capability
- operation from a single 6 to 24 VDC supply
- compact size: 1" x 3.5" x 6"





ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $2.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

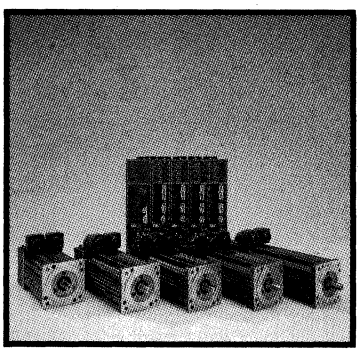
INDUSTRIAL DRIVES

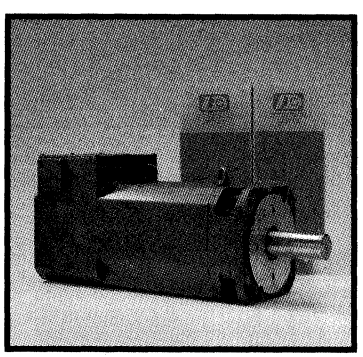
INNOVATIVE PRODUCTS FOR MOTION CONTROL

NEW GOLDLINE SERIES
Unsurpassed Brushless Servo Technology



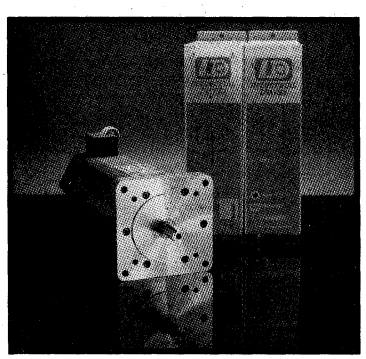
- 1.8 to 84.5 lb.ft of continuous torque—speeds in excess of 5,000 RPM
- Rugged TENV IP65 sealed construction for use in harsh environments
- Highest acceleration and deceleration capabilities
- Class H insulation provides in excess of 9 years of winding life under rated conditions
- Compact single board design minimizing interconnections and vastly increasing reliability and life
- Precise torque and velocity control
- Continuous power ratings to 4 KVA—peak power ratings 8 KVA
- Personality card in the amplifier matches the motor and drive to your application.

NEW GOLDLINE SPINDLE SYSTEMS



- Power ratings from 10 to 35 HP—standard speeds to 6,000 RPM, options to 10,000 RPM and higher
- Permanently lubricated bearings and Class H insulation ensure reliable operation and longest motor life
- Rugged die-cast aluminum rotors with no moving parts, completely brushless design, and integral frameless resolver provide superior operation in harsh environments
- 4-quadrant motor operation with regeneration capabilities for rapid deceleration
- Overcurrent trip protects electronics saving downtime and maintenance expense—no isolation transformer required
- Spindle orient option available

NEW EXPLOSION-PROOF BRUSHLESS SERVOMOTORS



- 5.0 to 11.2 lb.ft of continuous torque—speeds to 5,000 RPM
- Designed to operate in hazardous locations
- Same superior motor design as other brushless motors—utilizes high energy neodymium-iron-boron magnets
- Integral frameless resolver with amplifier options which allow closing a position loop
- Applications including chemical plants; munitions production; paint spraying; gasoline pumping equipment; and process control, and air and hydraulic pumps in hazardous environments
- UL approved

For product information please call 1-800-77-SERVO!

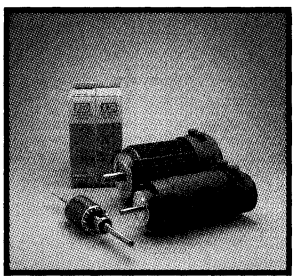
INDUSTRIAL DRIVES

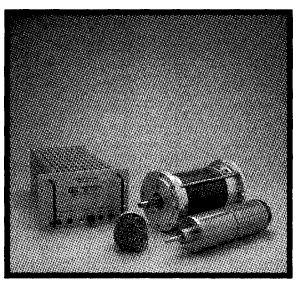
INNOVATIVE PRODUCTS FOR MOTION CONTROL

AC INDUCTION SERVO SYSTEMS



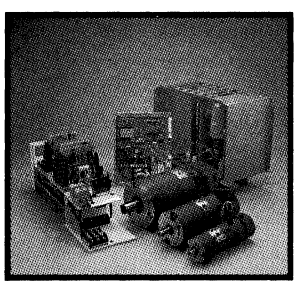
- 1.5 to over 31 lb.ft of continuous torque—speeds to 4,000 RPM
- Microprocessor-based three-phase sine-wave modular drive utilizes proprietary slip control technique optimizing motor performance
- Precise control maintained down-to-zero speed
- Permanently lubricated ABEC3 bearings and Class H insulation provide longest motor life

SUBMERSIBLE MOTORS AND DRIVES



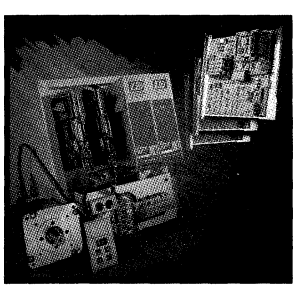
- Power ratings from 0.3 to 20 HP
- Pressure compensated—reliable operation of motors and drives to depths of 20,000 feet (10,000 PSI)
- Integral motor/controller packages
- Special control drives minimize audible noise, EMI, RFI, and structure-bourn vibrations—designed to military specifications

BRUSH-TYPE SERVOMOTORS AND DRIVES



- Permanent magnet DC servomotors—advanced designs
- Wide motor selection 35 oz.in to over 100 lb.ft of continuous torque—speeds to 6,000 RPM
- Patented technology PWM and SCR amplifiers complement motors with features including high bandwidth, commutation current limits, and overspeed shutdown
- Amplifiers 6 to 200 amps continuous

DIGITAL POSITIONING SYSTEMS



- Complete systems—all components premounted on back panel and thoroughly tested
- Menu-driven software tailored to your specific machine's operation sequence
- Built-in diagnostics for simplified troubleshooting
- Standard and custom systems available

For product information please call 1-800-77-SERVO!

INLAND MOTOR

KOLLMORGEN CORPORATION

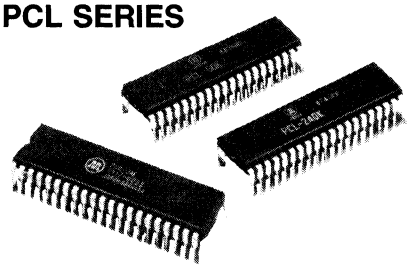
PROGRAMMABLE SINGLE CHIP HIGH-SPEED PULSE GENERATORS

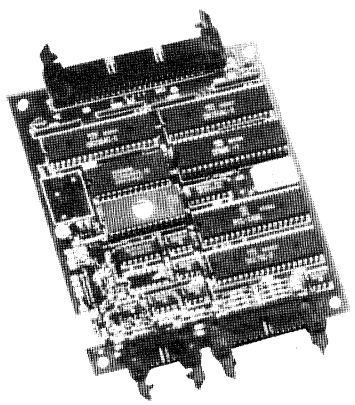
PCL SERIES



The PCL series pulse generators are the motion control ICs, the output frequency of which can be programmed through an external CPU.
This series includes three models: PCL-80K, PCL-240K and PCL-3M. The PCL-80K is designed for general stepper motor control. The PCL-240K is for high-speed stepper motor control and servomotor control. The PCL-3M is a high performance chip which features high speed and high accuracy for controlling servomotors.
The major applications include robots, X-Y-Z-θ tables, automatic assembling machines, winding machines and X-Y plotters.

PCL-EQUIPPED CONTROL BOARDS

ED-9236/AE-0101



The ED-9236 and AE-0101 are the control boards which integrate a CPU, memories, I/O ports, a clock and other functions in one compact package. They provide a pulse output of the desired frequency with good accuracy. IC sockets are used to mount the CPU and ROM, thereby allowing easy program emulation.

ED-9236 for single-shaft control
The ED-9236 has the PCL-240K, 8255's (PIO) and 8279 (KEY, DISP) efficiently arranged on the Z-80's memory map, thereby allowing program execution at an increased speed. The 8279 also allows desired setting of key input (64 points) and display output (16 digits) through software.

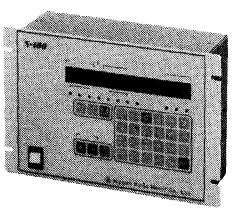
AE-0101 for multi-shaft control
The AE-0101 has PCL-240K's and 8255's (PIO) efficiently arranged on the Z-80 memory map, thereby allowing program execution in an increased speed.
Since the AE-0101 can integrate up to 3 PCL-240K, you can select a desired package to control up to 3 shafts.

Specifications

Items / Models	ED-9236	AE-0101
Input Power	Single +5V	
CPU	Z-80A or the equivalent (4MHz)	
ROM	i2764, i27128 or the equivalent	
RAM	TC5564PL-15 (battery backup optionally available)	
I/O Ports	Two 8255's (PIO) and one 8279 (KEY, DISP)	Two 8255's (PIO)
Clock	4MHz	
Digital Pulse Generator	One PCL-240K	Up to three PCL-240K as required
Board Size (Parts Mounting Area)	4.72 x 5.51 inches (4.25 x 5.43 inches)	4.65 x 6.02 inches (4.25 x 5.04 inches)
Max. Height with Parts Mounted	.59 inches standard (.79 inches with optional device/s)	

PCL-EQUIPPED CONTROLLER

N-100



The N-100 is the microprocessor-based single-shaft controller which incorporates a PCL-equipped pulse generator board and a keyboard in a compact package.
For control of two or more shafts, a corresponding number of the controllers are required.
The N-100 can be conveniently used for X-Y tables, machine tools and industrial machinery.

APPLICATION ENGINEERING; PROTOTYPE SHOP

A fully equipped step motor laboratory and model shop supervised by experienced application engineers is located in Sierra Vista, Arizona. This capability makes Inland/Nippon Pulse stand apart as a knowledgeable supplier of step motors. Prototypes to meet the customer's exact requirements can be made locally and quickly. Responsiveness on prototypes is followed up with dependable high volume manufacturing.

"For additional information on modifications available or a complete catalog of all stepper motor and drive electronic products manufactured by Nippon Pulse Motor Company, contact Inland Motor Sierra Vista, Arizona."

4020 E. INLAND RD. · SIERRA VISTA, ARIZONA 85635 · TEL: 602-459-1150 · TWX: 910-973-9869 · FAX: 602-458-2161

MINIGLOSSARY SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

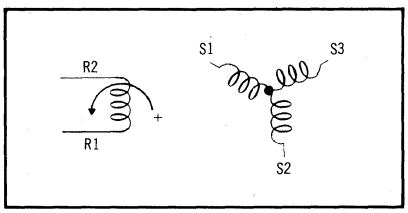
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

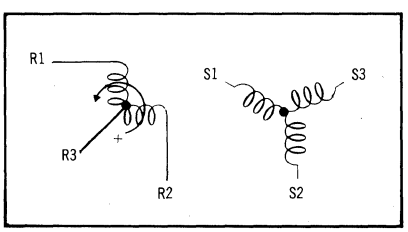
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

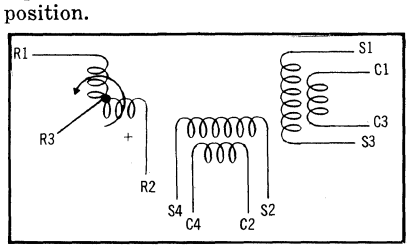
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

HOW TO SPECIFY A SLIP RING

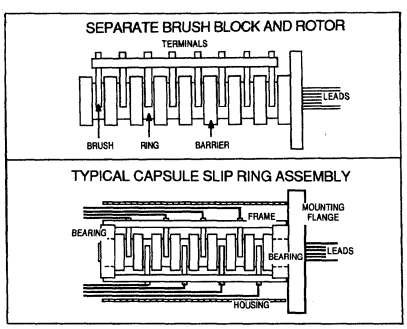
Many of the more than 4,000 Poly-Scientific slip ring designs are available for use in their existing configuration, or they may be modified to meet your specific requirements. New designs can also be created to meet the most demanding specifications.

Our engineers are experienced in a wide range of slip ring applications. We utilize resources such as the Anvil computer-aided design (CAD) system. And, a very active in-house quality circle program solicits the best inputs from all of our many skilled craftspeople, from start to finish.

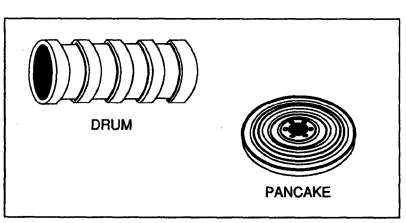
This section is designed to guide you through the process of specifying a slip ring. We've outlined below the major considerations that a slip ring engineer will need to know about your application.

A. Basic Slip Ring Design

Throughout these pages, you will see the terms "slip ring capsule" and "slip ring separates". The term "separate" indicates an individual rotor/brush block combination. The term "capsule" is used to denote a self-contained unit consisting of a rotor, stator and its own integral ball bearings.



There are two basic slip ring configurations to consider based on space allocation in your system: the more common drum approach where each ring is adjacent to the next along the centerline, somewhat like the threads on a bolt, and the pancake approach where the rings are concentric with one another like the grooves on a phonograph record. The pancake approach is used when length is at a premium but diameter is less restrictive.



B. Defining the Mechanical Envelope

The envelope is, of course, largely dictated by the space available in the system. The slip ring engineer should be given the maximum space available in the system so all existing candidate designs can be considered. It is imperative that the space required for the slip ring be specified in the early stages of the system design and that it be consistent with the structural and electrical demands.

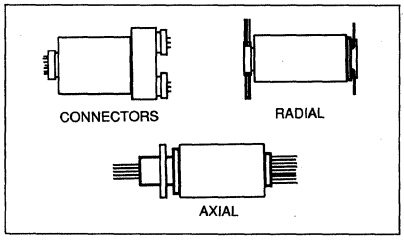
C. Defining System Interface Requirements

The slip ring engineer will need to know these system interface considerations:

1. Is a bore required through the slip ring for routing coolant plumbing, hydraulic lines, pneumatic lines, waveguides, etc? In such applications, the slip ring actually mounts concentric with these lines in the system.

2. How will the slip ring attach to the system? It is never advisable to hard mount both the rotor and the stator to the system since the slip ring bearings may overload if there is any misalignment between them and the system bearings.

3. How should the electrical connections to the slip ring be made? Is it desirable to have connectors integral with the slip ring on both the rotor and stator, or would flying leads on one or the other ends be desireable? And if flying leads are preferred, should they exit the rotor in a radial or axial direction, and what length should the leads be?



D. Defining Electrical Requirements

The current specified enables the slip ring engineer to propose a unit with the appropriate cross-sectional area of the rings, brushes and lead wires. The specified voltage dictates the spacing between adjacent rings and brushes. It is helpful in achieving the most cost effective and smallest practical envelope not to rate all circuits at the maximum level. For example, if you need 20 circuits total, three of which must carry ten amps, designate three for high current. Don't go for 100% functional interchangeability by specifying that all 20 be able to carry ten amps. And, if the ten amps is a surge current with a continuous current of only two amps, tell us that, too. There is no reason for you to pay for ten amps continuous capacity when you only need two.

Be aware that voltage surges and spikes are the major cause of system slip ring failures. Poly-Scientific uses a very conservative approach to circuit design, however, it is not uncommon in some power supply systems to see voltage spikes ten or more times the normal operating voltage. We strongly recommend surge protection on all power supplies.

Most smaller slip rings will satisfactorily conduct signals to 1 MHz or 500 Kilobits. Special slip rings can be used to pass broadband signals from dc to 1 gigahertz and data rates of 500 megabits or even higher. Crosstalk, insertion loss and bit error rate information can be provided if data rates, formats and impedances are defined.

E. Defining Mechanical Requirements

1. Operating speed (rpm's). Almost any slip ring can operate successfully at speeds to 100 RPM although many applications only require operation at a few rpm. But slip rings are also routinely used to instrument jet turbine engines operating at speeds in excess of 20,000 RPM. The operating speed in conjunction with the diameter dictates the surface speed of the brush relative to the ring and hence the internal design approach and material selection.

2. What rotational life is necessary for your application? Will the unit oscillate or rotate at a continuous speed?

F. Defining the Environment

The environment in which the slip ring must survive is a key factor. Operating temperature is important in specifying the proper lubricant. And if the slip ring will operate exposed to the elements or to a hostile environment, integral seals must be included in the design. Any unusual shock or vibration should also be specified.

The next eight pages of the catalog give a brief overview of our slip ring design and production expertise. The last page of our section allows you to list your specific application needs. For specific product information, please contact our sales department at 1-800-336-5917 (in Virginia, call 703-953-4751).

SLIP RING SEPARATES

Sometimes a self contained "capsule" slip ring is not practical due to size constraints or cost limitations. (Don't however, fail to include in this comparison your costs for mating the slip ring and brush block or to consider the risk of damage to the fragile unprotected brushes). If a separate rotor/stator approach is dictated for your application please review the following tabulation of an assortment of candidate designs—or contact us for a custom design.

MINIATURE SLIP RING CAPSULES

These smallest of all slip ring assemblies are widely used in the pitch, roll and yaw axes of inertial navigation systems where there can be no sacrifice in reliability to achieve packaging density.

Very tight pitch controls are maintained on individual ring locations with center-to-center spacings as small as 0.015 inch between adjacent rings.

HIGH SPEED SLIP RINGS

For successful slip ring operations above several thousand RPM, increased structural demands and frictional heating at the sliding contact surface are two concerns that must be addressed. Applications for high speed slip rings include aircraft turbine testing, stressometer feedback in rolling mills, and gasoline or diesel engine testing.

VACUUM AND SPACE CAPSULES

The use of slip rings in a hard vacuum environment focuses special attention on the area of outgassing organics that could interfere with other components in the system and in the area of lubrication for long term operation. Our contact material recommendations are based on a two year continuous life test program that we conducted in a 10^{-7} torr environment and have been proven in numerous space flights.

POLY-TWIST CAPSULES

The Poly-Twist is a reliable slip ring substitute for limited rotation applications. Sometimes called a twist-cap, this device provides a self-contained, no-sliding contact rotary interface using flexible circuit tapes. Typical dimensions and data are tabulated below for a few of our many twist-cap designs. Although the majority of applications for the thousands of units supplied to date have required miniature twist-cap assemblies, some very large designs have also been provided.

HELICOPTER SLIP RINGS

Slip rings that power de-icing and blade folding systems must transfer high current levels to blade systems rotating at high speeds. They must also withstand vibration levels and environmental hazards typical of helicopter operation. The latest de-icing applications include both main and tail rotor slip rings, with main rotor current levels to 60 amperes and tail rotor speeds to 1,500 RPMs.

VEHICULAR SLIP RINGS

Electrical and hydraulic slip rings are used in vehicles such as tanks, retrievers, mobile missile launchers, and armored personnel carriers. A typical armored vehicle might contain slip rings in the turrett, the commander station, and the periscope.

PEDESTAL SLIP RINGS

Typically found in radar, missile and gun fire control systems, Pedestal Slip Rings contain varying combinations of logic, control, and high frequency analog signal and power circuits.

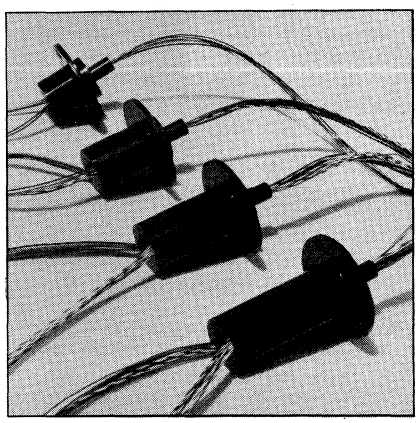
12	4102	.5A	BB 1.05 SR 1.67	.982 .46	Slip ring and brush block set Slip ring bore .196 inch
14	3141	1 ground-150A 1-150A 12-7.5	9.28	11.25	Sealed, rugged construction
16	4019	1A	2.35	1.00	Fiber brush capsule. 3000 RPM

No more than 20% of all rings should be loaded with rated current simultaneously.

Many industrial applications such as continuous-panning CCTV cameras, automated machinery and robotic end-effectors can benefit from the continuous, unrestrained, rotational freedom of a slip ring. Our 4023 Industrial Slip Rings offer the reliability of precious metal contacts at an affordable price. This is made possible by standardizing on four basic models (6, 12, 18, and 24 rings), which are mass produced for volume pricing.



SPECIAL SLIP RINGS

Cable Reel Slip Rings

Cable reel slip rings can be found in a wide range of military and industrial applications including marine/seismic exploration, underwater towed vehicles, remote tele-operated vehicles, construction cranes, and buoyant submarine antennas. These slip rings are designed for a particularly rugged environment while also providing field accessability of the brush block assemblies if repairs are necessary. With access plates in place, sealed bearings, and integral gasketed connectors, the internal portion of the unit is well protected from environmental conditions.

Mooring Slip Rings

Deep water drilling requires a slip ring to allow complete freedom to weathervane for floating power generation stations (SALM type installations). Experience to date in mooring applications include currents to 600 amps, voltages to 35,000 volts (transmission of 36 megawatts of power) in sizes to 8 feet in diameter by 10 feet in length.

Medical Electronics Slip Rings

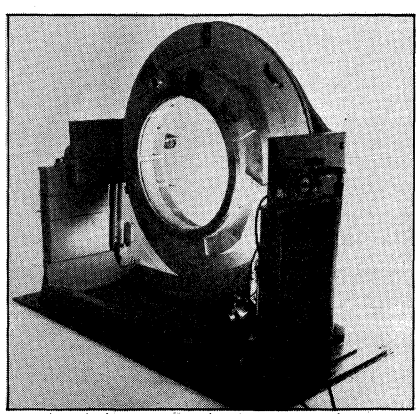
Slip rings are used in various scanner applications, particularly for computed axial tomography (CAT Scanners) which require the need to scan at faster speeds, unencumbered by mechanical stops. These units provide a large through bore for mounting as an integral part of the gantry.

Voltages to 200,000 volts are handled safely with careful attention to gradients, internal surface contours, material selection and debris management.

Our slip rings require minimum inertia for spin-up and braking consistent with structural and electrical safety.

Slip rings for medical scanners are built on a history of reliable low maintenance applications, with reliability levels exceeding a million circuit hours being demonstrated.

Our CT slip ring capsules are typically sealed with static seals and redundant dynamic lip seals at all rotary interfaces. A slip ring with separate mating brush blocks is available in a low cost design for low voltage CT scanners where the X-ray voltage is stepped up on the rotating gantry.



Slip Ring Applications Are Only Limited by Your Imagination

These are just a few of the unique applications of slip ring technology. When you need to pass power and/or data through a rotating interface—turn to Litton.

Many of the designs and manufacturing processes are proprietary and are covered under one or more U.S. or European patents.

Cost effective.

Mabuchi Subfractional-HP motors. Small. Light. Reliable. Efficient. Better than ever.

We're the world's largest manufacturer of subfractional-HP motors — producing over 3 million per day! Shown here is merely a small sampling of the extensive spectrum of our standard motors with average performance characteristics at indicated voltage. So comprehensive is our range of standard models, it's a virtual certainty there's one or more to fit your needs perfectly — that's cost-effectiveness!

Please request or fill out a questionnaire and/or indicate your desired performance: we'll suggest the motors most suited to your needs.

Power curves and 3-view drawings with production tolerances available upon request. Mabuchi Subfractional-HP motors are used for such machine worlds as audio/video equipment, home appliances, personal care, cameras, peripherals, office/medical equipment, automotives, garden tools, hand tools, etc.

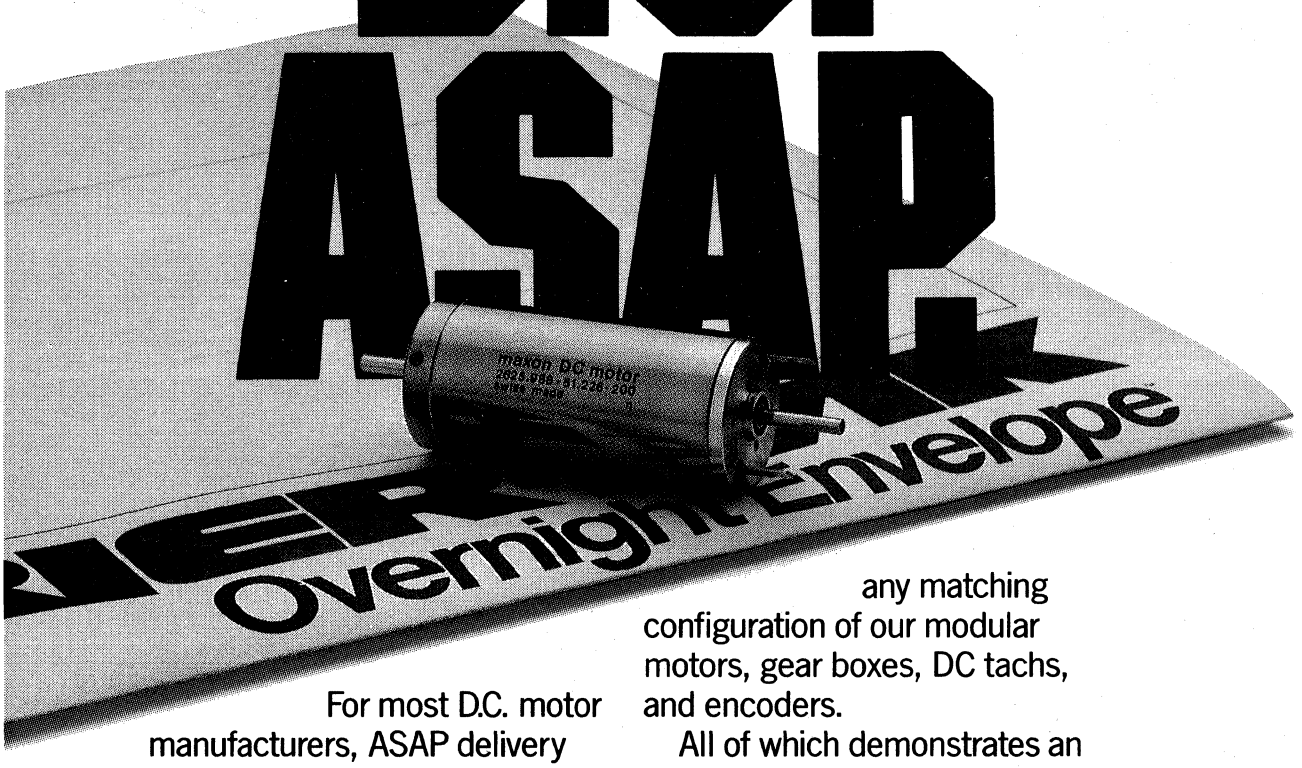
MABUCHI MOTOR

THE BIGGEST NAME IN SUBFRACTIONAL-HP MOTORS

SINCE 1954

Call or write MABUCHI MOTOR AMERICA CORP., 475 Park Avenue South, New York, NY 10016
Dept. EEM89 • 212/686-3622 • FAX: 212/532-4263.

D.C. ASAP.



For most D.C. motor manufacturers, ASAP delivery actually means several weeks.

But when maxon DC motors says ASAP, we truly mean it.

Because we maintain an extensive stock program. So if you choose any motor from our Stock Program Catalog, you'll get a prototype in just days.

Besides a broad selection of ferrite, AlNiCo, and rare earth D.C. motors, our ASAP delivery applies to virtually any matching configuration of our modular motors, gear boxes, DC tachs, and encoders.

All of which demonstrates an important difference about maxon: We understand how important your design schedule is. So, unlike other manufacturers, we don't make you work around ours.

That's why you should send for our Stock Program Catalog. You'll find when it comes to ASAP delivery of D.C. motor prototypes, we're as good as our word.

PRECISION MOTORS

Maxon Precision Motors, 838 Mitten, Burlingame, CA 94010, (415) 697-9614

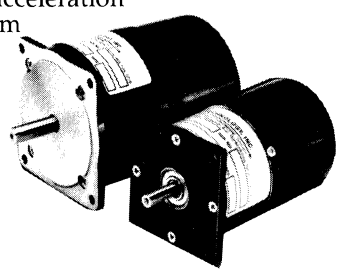
BRUSHLESS SERVO MOTORS & CONTROLLERS

LEADERS IN HIGH PERFORMANCE AND PRECISION MOTION CONTROL

Complete Velocity and Positioning Servo Systems. Interface with User Host Computers and Controllers.

New!...and only from MFM Technology. Brushless NEMA 23 and 34 frame size servo motors replace stepper and DC brush motors. Advantages of these MFM brushless servo motors:

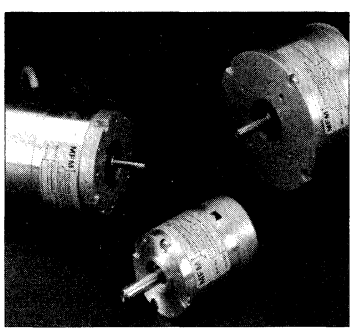
* smooth at all speeds - no cogging!
* instantaneous linear acceleration
* full torque to 6,000 rpm
* no resonance effects
* cool operation



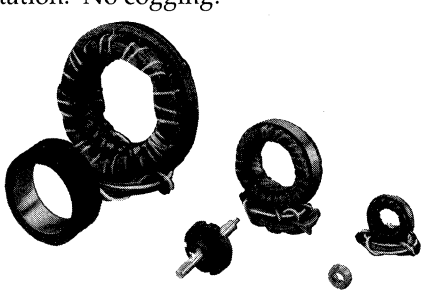
Using samarium-cobalt magnets, MFM brushless DC motors are available in 10 frame sizes from 1.25 inch through 10.0 inch diameter with peak torque ratings from 13.5 oz-in. to 4500 lb-in.

Modular motor components are matched to provide optimum performance using many standard rotor configurations.

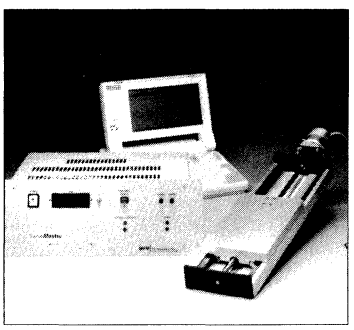
No cogging!



Unhoused motors are supplied as kits for better performance and cost savings for direct mounting onto the driven shaft. Eliminate performance-reducing effects of conventional couplings, belts, or pulleys. Choice of Hall sensor, optical encoder, or resolver commutation. No cogging!

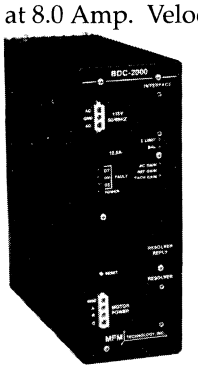


Servo *Master* is a complete brushless servo system consisting of a programmable motion controller, power supply, brushless servo amplifiers, and brushless DC motors with shaft encoder feedback.



This system provides closed loop control of up to three axes, and makes possible micropositioning of mechanical stages, combined with high speeds.

Model BDC 2000 is a four quadrant sine-wave PWM brushless motor drive. Output bus rating is 160 Volt at 8.0 Amp. Velocity or current loop control accepts a ±10 volt analog command signal. Resolver-to-digital conversion provides electronic commutation, absolute shaft position, and velocity control.



Emulated channel A, B and index encoder output is provided for use with a motion controller. Other models offer power ratings to match a broad range of motor speed and torque requirements.

Precision air or ball-bearing spindles with embedded brushless DC motors are available with micro-inch shaft run-out tolerances. Model BDC 0550 linear sine-wave drive offers programmable acceleration/deceleration, virtually no EMI/RFI, closed loop servo control and IEEE-488 or RS-232C digital interface. Speed accuracy > .001% with smooth speed from less than 1 rpm to more than 15,000 rpm.

Immediate Solutions by Phone and FAX

At Motor Technology we solve most applications over the phone lines.

Your call to us goes straight to a competent motor application engineer, never to a clerk, correspondent or some other non-technical person. You discuss your project with a highly qualified engineer who is experienced with motors—motor application problem solving, motor design, and motor related hardware.

For a lot of projects, you won't always know the exact torque or speed you need. Or, maybe there's a voltage variation you're not sure how to cope with. The odds are 100:1 we've had experience with a similar application. So, basically, all you need to do is explain the conditions and what you want the motor to do. We help fill in the blanks, then come up with a design that's cost efficient for you.

If you're ready to talk about a prototype, the same application engineer will give you the price and a firm ship date—all in the span of a single phone call. (We don't shuffle you to other departments or make you wait days for the answers you need.)

Get an immediate solution by phone or FAX from Motor Technology the next time you have an application. And have the prototype on your desk within a few days.

Custom Prototypes in Three to Four Days

Motor Technology is a quick response company.

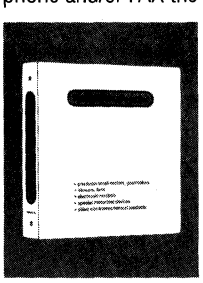
We custom engineer while you're on the phone, then follow-up with your prototype 3-4 days later. A distributor might be able to deliver as fast, but he couldn't match Motor Technology's factory engineering assistance. And our solution comes to you with two important guarantees:

1 We guarantee performance—the torque you need, over the speed range required, at the voltage selected. The motor, motor tachometer or gearmotor will do exactly what we say, or you don't pay for it.

2 We guarantee the prototype to be production feasible. That's assurance you aren't likely to get with a "kludge" assembled by a distributor technician.

Motor Technology is the quick response company that starts you off with a prototype that's engineered to be right for your breadboard and cost efficient in production.

To find out more about us, write or call for our extensive catalog. Or, just phone and/or FAX the problem to us.



The Motor Technology Catalog

Wide range of standards, with complete performance and specification data. Includes short course on how to predict performance when torque, speed or voltage conditions vary. Shipped UPS, same day.

NMB TECHNOLOGIES

PRECISION STEPPING/ SPINDLE MOTORS

Whether design requirements require an existing motor or a custom design, NMB Technologies will fit your exact specifications. Vertically integrated processes assure quality and dependability. Parts and subassemblies are manufactured in-house on automated production lines. Motors from NMB Technologies offer higher torque, lower inertia, greater accuracy and cooler operation at very competitive prices.

FEATURES AND BENEFITS

NMB TECHNOLOGIES INCORPORATED

ASTROSYN STEPPING MOTORS HYBRID AND PERMANENT MAGNETIC MODELS

- Quiet, reliable performance, long life
- Wide range of laminated and press construction models — standard or custom designs

ACCUSTEP PM SERIES MOTORS

- Up to 15% more torque than comparably sized units
- As much as 20% lower operating temperature

BRUSHLESS DC SPINDLE MOTORS

- Smaller and have lower profile than competitive products
- Coreless design with stator sheet coil achieves lower radial run outs
- High precision ball bearings

COMPETITIVE PRICING

- Vertically integrated processing for total quality control
- Precision automated production
- In-line quality control and testing

ASTROSYN MODELS

Notes:

1) First two digits of P/N denote frame diameter size in inches x 10. Example: 23 LM C006 has a frame size of 2.3 inches.
2) Most motors listed are available with single or double-ended shafts.
3) Options available include lead screws, gears and pulleys.
4) Standard drivers are available for all standard motors. For special designs contact NMBT applications engineers.

Typical Torque Characteristics				Driving Conditions

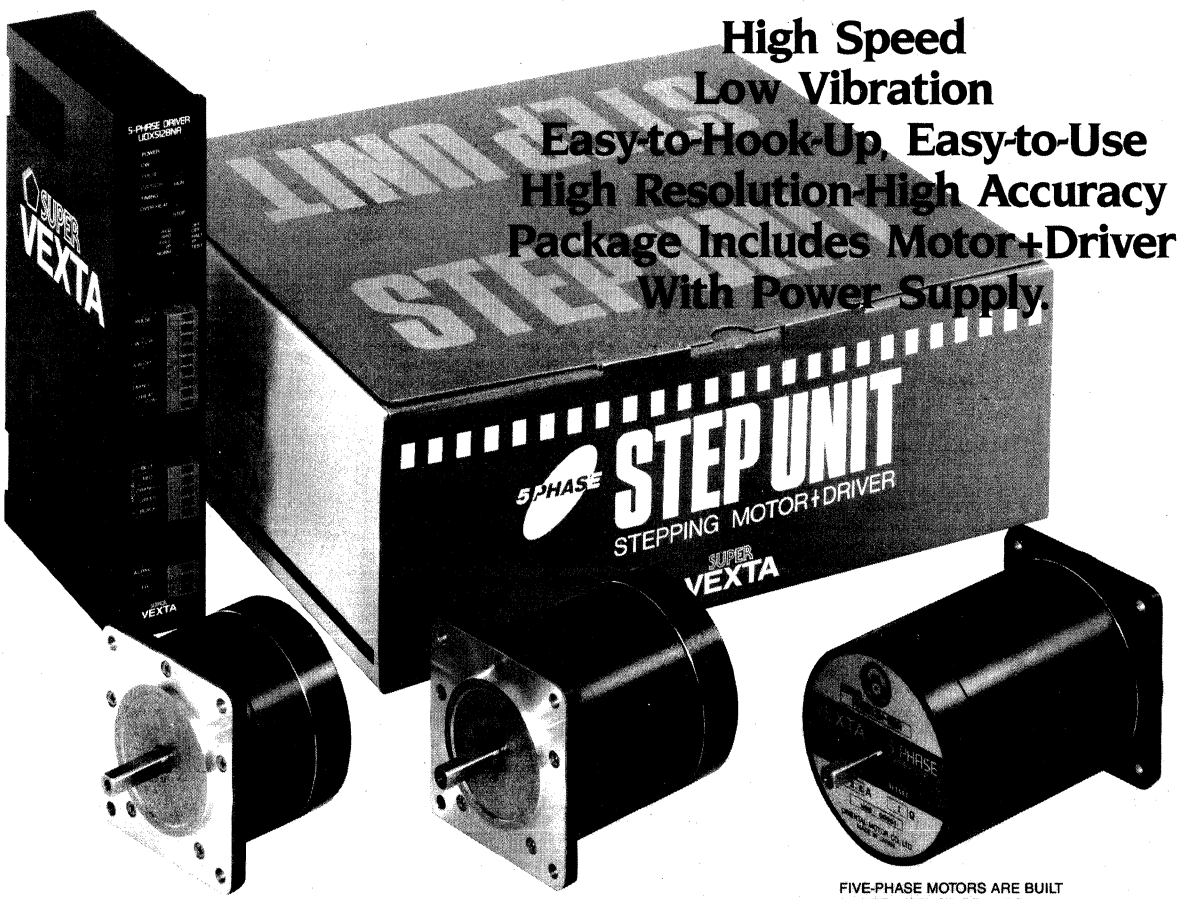
SUPER
VEXTA® BY ORIENTAL MOTOR

The New-Pentagon UPD Five-Phase Step Motor/Driver is a *Mover* not a Shaker.



High Speed
Low Vibration
Easy-to-Hook-Up, Easy-to-Use
High Resolution-High Accuracy
Package Includes Motor+Driver With Power Supply.

FIVE-PHASE MOTORS ARE BUILT UNDER LICENSE OF BERGER-LAHR

Innovative new-pentagon five-phase UPD step motor/driver packages.

A new generation of high performance easy-to-use motion control products.

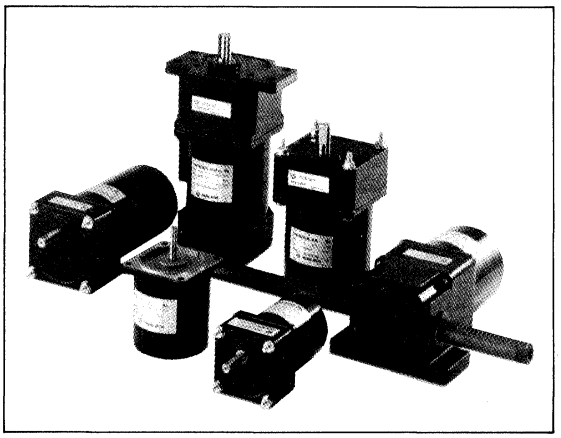
ORIENTAL MOTOR®

HIGH QUALITY FHP ELECTRIC MOTORS



Oriental Motor's reputation for high quality, cost-effective products is well known among automation equipment manufacturers. These motors are used in a variety of products that touch and improve the lives of millions of people. From automating the office in printers, to automating medical and factory automation equipment, **Oriental Motor** is there.

Oriental Motor has over 2000 different standard products that are available in quantities from one, to huge OEM volumes. All **Oriental Motor** products are built with the pride and craftsmanship of a century of manufacturing experience. The engineers at **Oriental Motor** have strived to designed each product to give years of trouble-free service.

Our Product line has 4 different parts: **Oriental Motor** brand AC motors, gearmotors, and speed control motors. **Vexta** Control motors including Step motors and DC brushless motors. **Orix** long life fans, and **SUPER VEXTA** motion control systems.

Features:

Over 2000 standard products available, request our general catalog.
Instrument quality motors at reasonable prices.
Designed with ball bearings for long-life and maintenance-free service.
Available in quantities from one piece to the largest OEM volumes.
Backed by Oriental Motor reputation for award-winning quality.
Standard versions available from stock or with short 3 to 6 week lead times.
Available from our nation-wide stocking distributor network.

Induction Motors

Oriental Motor instrument quality AC motors are available in 5 types:
Induction motors AC PSC Reversible motors for continuous duty applications.
Instantly Reversible AC motors with friction brake for reversing and simple positioning.
Synchronous AC motors for precise speed regardless of load fluctuation.
AC Torque motors for applications requiring continuous stalling.
AC Speed control motors for adjustable speed over a 19:1 range without brushes.
All motors can use our modular gearheads for speed reduction and torque multiplication. Gear ratios from 3:1 to 180:1 and higher are available.

The list above is a partial list of the wide variety of motors that Oriental Motor produces. Our AC motors are also available made-to-order (shaft flats, special shaft lengths, custom windings, special lead wire colors, assembled with connectors, etc.) are available in moderate OEM quantities. Contact your local sales office for details.

VEXTA® STEPPING MOTORS

These Hybrid stepping motors are designed and manufactured by Oriental Motor and are sold under our VEXTA brand name. They are used in a wide variety of applications ranging from Printers for Office Automation, to robots and assembly machines for Factory Automation. Many models are interchangeable with other step motors for improved quality and cost reduction. Oriental Motor is the premier step motor supplier to the world of motion control.

Available in quantities from one piece to the largest OEM volumes.
Backed by Oriental Motor reputation for award-winning quality.
Standard versions are available from stock or with 3 to 6 week lead times.
Step angle error is small and non-accumulative.
Rotating speed proportional to input pulse frequency.
Available from our nation-wide stocking distributor network.

The list above is only a partial list of the wide variety of stepping motors that Oriental Motor produces. Our VEXTA brand of step motors are also available in:

"M" version 0.9° Full step 0.45° Half step versions for 400 and 800 steps per revolution for smoother moves and better accuracy.
8 lead wire versions of the motors listed above are available for maximum flexibility in driver selection.
"L" Lamination versions are available for lower noise and microstepping compatibility.
Step motors that are made-to-order (shaft flats, special shaft lengths, custom windings, special lead wire colors, assembled with connectors, etc.) are available in moderate OEM quantities. Contact your local sales office for details.

And best of all, it's backed by Oriental Motor's award winning quality and century of manufacturing experience. FOR MORE INFORMATION CALL ORIENTAL MOTOR AT (213) 515-2264.

SUPER VEXTA®

A NEW GENERATION OF HIGH PERFORMANCE EASY-TO-USE MOTION CONTROL PRODUCTS

UMD STEP MOTOR DRIVER PACKAGE SERIES

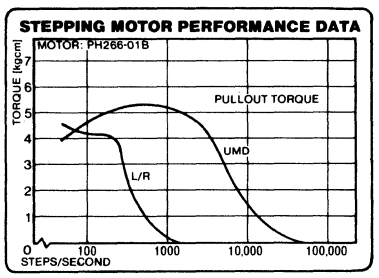
UMD ⟶ Unit=Motor+Driver

Each of the UMD motor/drivers includes a self-contained compact chopper driver and precision stepping motor integrated into one convenient high performance package. The UMD driver is a stepping motor translator, driver and power supply all-in-one, which has been factory adjusted to match the motor included in the package. This all-in-one design and factory motor driver matching makes installation and hook up a snap.

FEATURES:

- Highly efficient chopper driver maintains high torque at high speeds
- UMD Motor/Driver packages come in Holding torques from 25 to 300 ozin.
- User-friendly driver is factory pre-adjusted to match the motor included in the package for fast and easy set up.
- Compact high-tech design uses custom ICs and MOSFET technology for high power from a small package.

Excellent High Speed Performance!



AVAILABLE UMD MOTOR/DRIVER PACKAGES

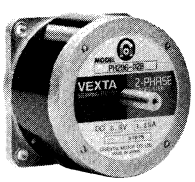
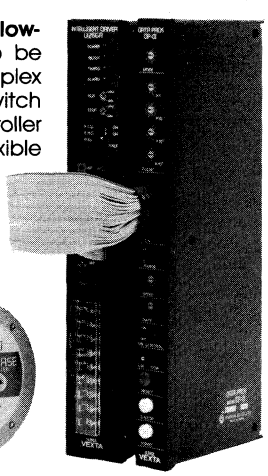
INTELLIGENT DRIVER-UI215GA

The **UI215GA** "INTELLIGENT DRIVER" is a **complete low-cost single-axis motion solution.** Designed to be easy-to-hook up – easy-to-use, there are no complex languages to learn. It is "programmed" by switch closures, which means Programmable Controller compatibility, and yet makes the UI215GA flexible enough to meet a wide variety of motion control applications.

The UI215GA has everything built-in: from the microprocessor for pulse generation to the translator and motor/logic power supplies. Because everything is contained in a single package, the UI215GA and DP-01 can be out of the box and **up and running in minutes.**





The DP-01 Data Pack converts the UI215GA into a preset-indexer, repeating the same movement with each "start" signal. The "start" signals can be issued by a PLC or a switch, or the UI215GA/DP-01 pair can be used as a stand-alone unit.

The UI215GA is probably the best price/performance single-axis motion solution available. It is available from your local member of our nation-wide network of stocking SUPER VEXTA distributors. And best of all, it's backed by Oriental Motor's award winning quality and century of manufacturing experience.

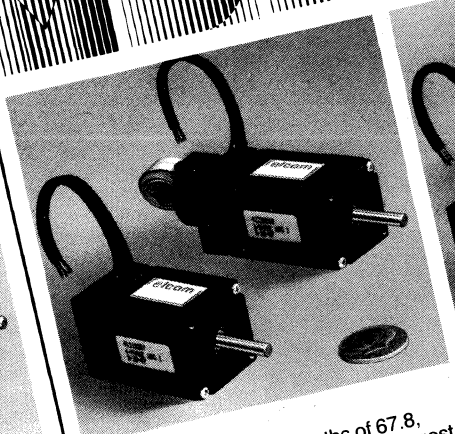
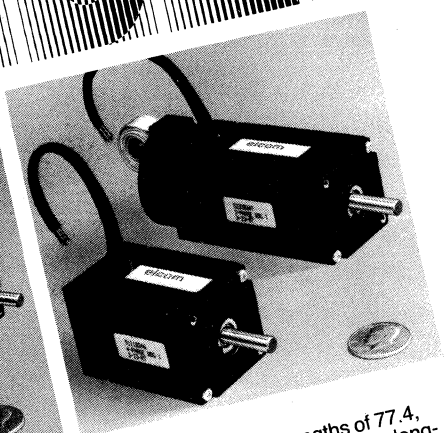
DEMONSTRABLY SUPERIOR BRUSHLESS SERVO MOTORS

Series 3000
30mm sq. frame size; lengths of 55.2 and 65.4mm. At 7,200 rpm, longest motor develops 1/15 hp, continuous duty, with normal heat sink.



Series 4000
40mm sq. frame size; lengths of 67.8, 75.3, and 83.0mm. At 7,200 rpm, longest motor develops 1/6 hp, continuous duty, with normal heat sink.



Series 5000
50mm sq. frame size; lengths of 77.4, 90.1, and 102.8mm. At 7,200 rpm, longest motor develops 1/3 hp, continuous duty, with normal heat sink.

All motors are available with your choice of 3-phase or 4-phase stator winding connections. Options include optical encoders and/or planetary gearheads. Get the whole story on unique Pittman® ELCOM® electronically commutated servo motors by calling (215) 256-6601. TWX: 510-661-8696. FAX: (215) 256-1338.

- **Samarium cobalt rotor construction**
- **Exceptional thermal efficiency**
- **Negligible magnetic cogging**
- **Very low winding inductances**
- **High torque-to-inertia ratios**
- **Low mechanical time constants**
- **Standard motor speeds to 25,000 rpm**
- **Optional patented 12-step drive for minimum commutation torque ripple**

COMPUTER TESTED BRUSH-COMMUTATED

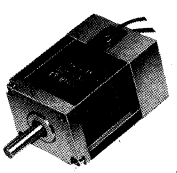
Now all Pittman® motors are available optionally with optical encoders. Every motor is thoroughly tested by a sophisticated computer-controlled instrument array that checks eight vital performance pararneters and records the measured values. And every unit is composed of standardized sub-components pre-assembled to extremely demanding specifications. That's Pittman, applying the latest in mass production techniques to reliable, precision motion control products to assure you of a welcome combination of performance and economy. Choose the motor type you need. Then contact us for complete data and application assistance. Call (215) 256-6601. TWX: 510-661-8696. FAX: 215-256-1338.

Series 8000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.2 in.; 3 lengths to 2.4 in. overall. Stall torques to 12 oz.-in. Mechanical time constants about 21 ms.

Series 9000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in.; 3 lengths to 2.5 overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 14.9 ms. (some models).

Series 9030 Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in. Stall torques to 41 oz.-in. Mechanical time constants as low as 9.2 ms (some models).

Series 14000 Servo Motors. 11-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 2.13 in.; 4 lengths to 5.2 in. overall. Stall torques to 286 oz.-in. Mechanical time constants as low as 6.2 ms. (some models).



Series 7000 Servo Motors. 13-slot armatures. 4 pole, samarium cobalt fields. Voltage inputs to about 40 VDC. 1 in. x 1.25 in. cross section; lengths to 1.85 in. overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 4.8 ms (some models).

GEAR MOTORS

SPUR GEARHEAD

Series GM8700 Gearmotors. Output torques to 100 oz.-in. with standard gearing. Uses selected 8000 Series servo motor plus spur gearbox. Eleven available ratios from 6.3:1 to 1804:1. 1.37″ o.d.; lengths to 3.6″ overall depending on motor and gearbox specification. Optional gearing permits output torques to 160 oz.-in.

Series GM9400 Gearmotors. Torque to 175 oz.-in. with standard gearing. Uses selected 9000 or 9030 Series servo motor plus spur gearbox. Fourteen available ratios from 5.9:1 to 4730:1. 2.0″ o.d.; lengths to 3.96″ overall depending on motor and gearbox specification. Optional gearing permits output torques to 500 oz.-in.

PLANETARY GEARHEAD

This family of planetary gearheads is designed to provide reliable delivery of up to 125 lb.-in. of torque at the output shaft, dependent upon ratio and the thermal characteristics of the selected motor. Any brush-commutated DC motor in PITMO® 9000, 9030, or 14000 Series can be mated with these gearheads or, for exceptional performance in smallest size, choose any ELCOM® brushless servo motor from Series 3000, 4000, or 5000.

Eleven ratios from 4:1 to 31104:1 are available. Gears are precision hobbed from 4140 steel to AGMA 10 tolerances. Output shafts are Fatigue-Proof® steel, running in generously sized, oil-impregnated, sintered bronze bearings. Ball bearings or roller bearings are available optionally.

For a specific recommendation of a gearmotor to suit your application, please contact your local Pittman sales representative or call us at (215) 256-6601. TWX: 510-661-8696. FAX: 215-256-1338.

Fatigue-Proof® is a registered trademark of LaSalle Steel Co., Chicago, Ill.

DC MOTOR CONTROL

Selector Guide

FULL WAVE ONE QUADRANT UNIDIRECTIONAL

MODEL NUMBER	MOTOR VOLTAGE	H.P. RANGE	SPEED INPUT TYPE	OTHER FEATURES
2746	90 180	to 1 HP to 2 HP	Isolated Analog and Digital	Inhibit input; independent ACCEL/DECEL; Dip switch HP select Quick removable barrier block connections
2747	90 180	to 1 HP to 2 HP	External 5 K Potentiometer	Inhibit input; independent ACCEL/DECEL; Dip switch HP select Quick removable barrier block connections
2746-12 **2746-24** **2746-130**	12 24 130	to 1/8 to 1/4 to 1/4	Isolated Analog and Digital	Inhibit input; independent ACCEL/DECEL; Dip switch HP select Quick removable barrier block connections Plug in, external transformer required.
2747-12 **2747-24** **2747-130**	12 24 130	to 1/8 to 1/4 to 1/4	External 5 K Potentiometer	Inhibit input; independent ACCEL/DECEL; Dip switch HP select Quick removable barrier block connections Plug in, external transformer required.

HALF WAVE FOUR QUADRANT REGENERATIVE

100	90	to 1/8 HP	Isolated 8 Bit Parallel Digital	Lowest cost regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; removable ribbon cable/barrier block connections
110	90	to 1/8 HP	Isolated Analog Voltage Ratio	Lowest cost regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; removable ribbon cable/barrier block connections
1015 **1023**	90 180	to 1/2 to 1 HP	Isolated 8 Bit Parallel Digital	Open frame regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; removable barrier block connections
1015-3 **1023-3**	90 180	to 1.5 to 3 HP	Isolated 8 Bit Parallel Digital	Open frame higher power regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; externally fused; barrier block connections
1115 **1123**	90 180	to 1/2 to 1HP	Isolated Analog Selectable range	Open frame regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; removable barrier block connections
1115-3 **1123-3**	90 180	to 1.5 to 3 HP	Isolated Analog Selectable range	Open frame higher power regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; externally fused; barrier block connections
10115 **10230**	90 180	to 1/2 to 1 HP	Isolated 8 Bit Parallel Digital	Enclosed case regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; removable barrier type connections
11115 **11230**	90 180	to 1/2 to 1 HP	Isolated Analog Selectable range	Enclosed case regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; removable barrier type connections
310	90	to 1/2 HP	10 turn adj. pot on unit's panel	LCD display regen; Low profile; Speed/Torque readout; independent CW/CCW torque limit; IR comp, max speed adjust; internal barrier strip

FULL WAVE FOUR QUADRANT REGENERATIVE

2745-DL	90	1/30 to 1/4 HP	Isolated 10 Bit Parallel Digital	Open frame full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; off board transformer may be req.; other voltage options
2745-D	90 180	to 1 HP	Isolated 10 Bit Parallel Digital	Open frame full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; off board transformer may be req.; other voltage options
2745-D3	90 180	to 3 HP	Isolated 10 Bit Parallel Digital	Open frame full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; off board transformer may be req.; other voltage options
2745-AL	90	1/30 to 1/4 HP	Isolated Analog +/– 5 VDC	Open frame full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; off board transformer may be req.; other voltage options
2745-A	90	to 1 HP	Isolated Analog +/– 5 VDC	Open frame full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; off board transformer may be req.; other voltage options
2745-A3	90 180	to 3 HP	Isolated Analog +/– 5 VDC	Open frame full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; off board transformer may be req.; other voltage options
2748	24	to 1/4 HP	Isolated 10 Bit Parallel Digital or +/– 5 VDC	24 VDC output full wave regens; Fail Safe/Inhibit input; independent CW/CCW torque limit; plug in ACCEL/DECEL option; removable barrier block connections; selectable analog/digital input; other voltage options Replace PWM drives in many applications.
2749	90 180	to 1 HP to 2 HP	External 5 K Potentiometer	Lowest cost full wave regen; Inhibit input; ACCEL/DECEL adj.; IR Comp; torque limit; off board transformer may be req. For applications requiring frequent and/or rapid reversals.

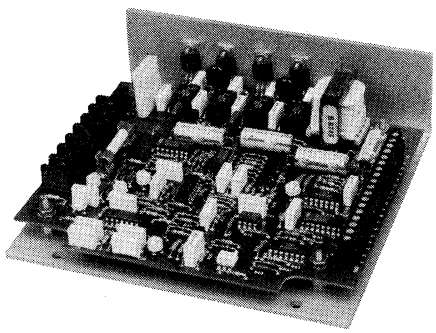
MOTOR CONTROLS

For Industrial and Robotics Applications

SERIES 2745 FULL WAVE FOUR QUADRANT REGENERATIVE DC MOTOR DRIVES



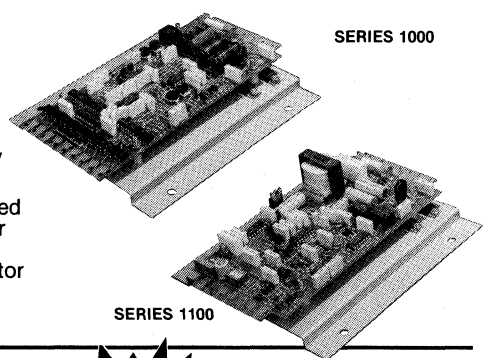
The 2745 series motor controls are full wave, static reversible, regenerative units that control the speed and direction of shunt wound or permanent magnet (PM) DC motors with outputs ranging from 1/6 to 3.0 horsepower.

Digital input controls are designed to be easily interfaced to microprocessors or TTL digital circuitry. Logic input signals are opto-isolated from the motor with a minimum isolation voltage of 1500 VDC. This eliminates the possibility of grounding or noise problems.

A 10 bit parallel command selects motor direction as well as 9 bit (1 part in 512) control of speed. A failsafe circuit de-energizes the motor if the control power is not present. Analog input versions operate from an isolated +/− 5 VDC speed command signal.

Model 2745 is supplied for operation from 115 or 230 VAC 50/60 Hz mains and drives DC motors with 12, 24, 48, 90, 130 and 180 VDC armature ratings.

SERIES 1000/1100 HALF WAVE FOUR QUADRANT REGENERATIVE DC MOTOR CONTROLS



SERIES 1000

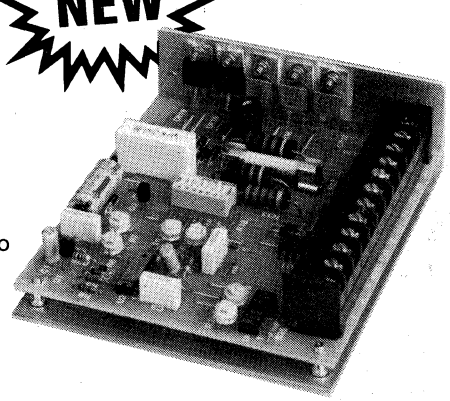
SERIES 1100

Series 1000/1100 controls are rugged, economical half wave reversible regenerative units that control DC motor speed and direction up to 3 horsepower. These units have been constantly refined over many years of satisfactory production experience.

Series 1000/1100 controls feature isolated digital or analog speed inputs and are designed to be easily interfaced to computers or analog voltage sources. Input signals have 1500 VDC isolation from the motor and power lines. A failsafe feature removes motor power if the signal source is not present.

2746/2747 FULL WAVE UNIDIRECTIONAL CONTROLS

NEW



Model 2746 and 2745 motor controls are full wave single quadrant units. Model 2746 has an isolated speed command input and Model 2747 controls use an external 5 K ohm speed command potentiometer. These controls operate 90 and 180 VDC motors, as well as 12, 24 and 130 VDC motors when used with a plug-in auxilliary transformer.

2746 controls are designed to be easily interfaced to low level analog or digital circuitry. Signal input signals are 1500 VDC opto-isolated from the motor and AC line. 2747 controls are similar, except for the external potentiometer input.

Using Model 2746 for analog inputs, motor speed is proportional to the isolated input signal, suitable for precise speed control within a closed loop system or for applications requiring isolation at low cost. Using Model 2746 for digital inputs, the input port may be pulse width modulated with a 1 to 100 kHz logic level signal to control motor speed. The input pulse width vs. motor voltage is very linear. An isolated motor inhibit signal is also provided on both 2746 and 2747 units.

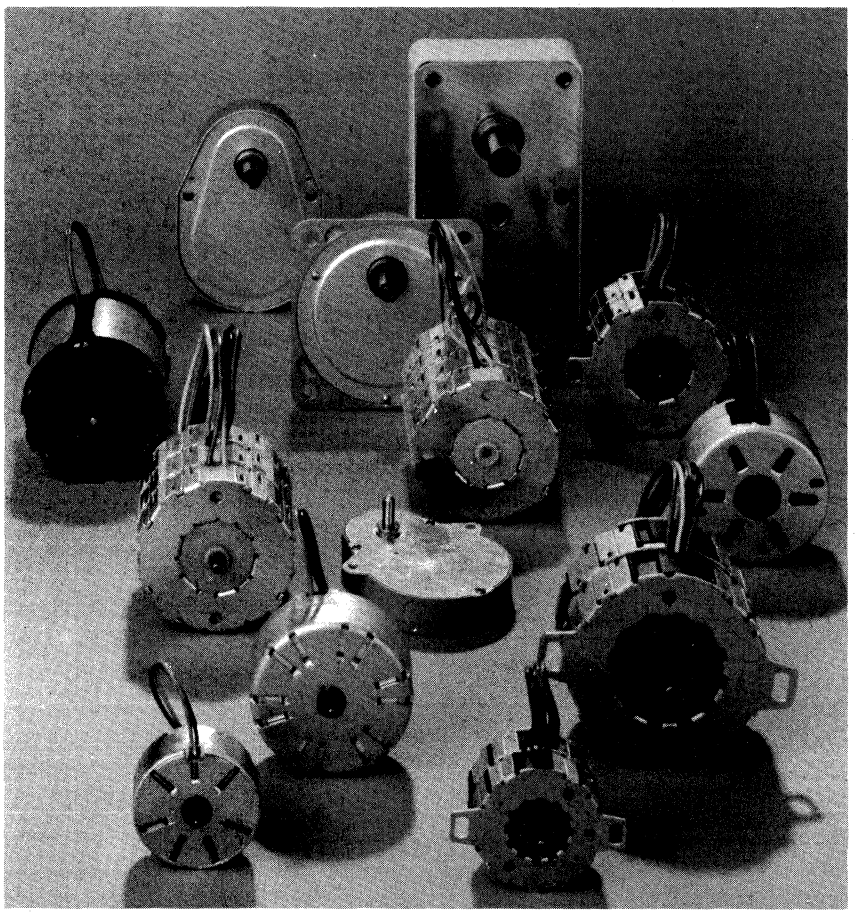
Adjustments for min speed, max speed, current/torque limit, IR compensation (speed regulation), acceleration and deceleration are provided. Horsepower settings are easily set by the user by dip switch selection from 1/30th to 2 HP.

CALL FOR ADDITIONAL INFORMATION

Brookhaven R & D Plaza, One Roned Rd. • Shirley, NY 11967 • 516-345-5700 • 1-800-333-POWR • FAX: 516-345-3106

Stepper & Synchronous Motors

Step'n sync with SAIA



SAIA AG, with factories located in Murten, Switzerland, has developed complementary lines of same-size synchronous and stepper motors with interchangeable gear boxes. That makes for a commonality which means economy for you. But what's uncommon about these economical motors is their versatility: two-phase and four-phase steppers; unidirectional and reversible synchronous. And with "snap-on" reduction gears (with optional clutch) that meet any mechanical and electrical variant, you can be sure of a solution to your particular needs. Manufactured to Swiss standards of precision and quality, you can also be sure of reliability and long life.

Use this short-form catalog to specify your general requirements on the enclosed business reply card. We will send you detailed data sheets and offer engineering assistance in the selection of the right motor for your application.

SYNCHRONOUS MOTORS

UBS 1 (AMY 7)...distinguished by especially silent running and long life, this motor is used in timing relays, registering instruments, sychronous clocks. The direction of running is controlled by means of auxiliary poles.

UDS 1 (AMY 81)...an economically-priced synchronous motor with an effective ratio of size to torque. A reverse-running stop assures rapid starting in the correct direction at high torque.

UDS 5 (AMY 81-W)...a brushless DC motor that is a combination of the AMY 81 unirotational motor and an electronic circuit which enables it to be connected to DC, resulting in a brushless DC motor having the advantages of a synchronous motor--no brush wear, long life, and speed not load-dependent.

UDS 7...totally new design with non-reverse device, high torque and very high efficiency (40%). Features of the new design are the fixed permanent magnets and rotating soft iron armature. Applications include power drive for actuators, valves, flaps, feed systems, domestic appliances, office machinery, and vending machines.

UBR 1...electrically reversible, permanent magnet synchronous motor with 48 stator poles. Motor is fitted with maintenance-free sintered bronze bearings encased in a plastic housing to protect the bearings from dirt and prevents leakage of bearing lubricant by capillary action. Applications include HVAC, and time-synchronized drive in recording, medical, laboratory, and analyzing devices and apparatus.

UDR 1 (AMY 9)...an electrically-reversible motor of heavy duty design and wide running range. Applications include valve actuators, phono-units, copying machines, assembly robots, medical devices, registering instruments.

UFR 1/3/4 (AMY 12/13/14)...these reversible motors are especially suitable for power drives featuring long life and silent running. Applications include actuating valves, ring-type transformers, pumps, label printing machines, medical and optical instruments, electro-pneumatic converters, antenna drives, machine automation, registering instruments, sound devices.

STEPPER MOTORS

UBB 1/2/5/6...two-phase and four-phase motors with 15 degree step angles; holding torque up to 1.5 cNm.

UBD 1/2/5/6...two-phase and four-phase motors with 7.5 degree step angles; holding torque from 1.0 cNm to 1.5 cNm.

UDB 1/2 (AMA 9)...slightly larger motor with 15 degree step angles; holding torque up to 2.3 cNm; two- and four-phase versions available.

UFB 1/2/3/4 (AMA 12/14)...step angles of 15 degrees; holding torque up to 8.2 cNm and external dimensions up to 51.3 x 56 mm.

UFD 1/2 and **UHD 1/2**...largest 7.5 degree step angle motor; two- and four-phase operation with holding torques up to 16.0 cNm.

Typical applications for SAIA stepping motors are recording instruments, facsimile equipment, peristaltic pumps, as well as printers and electronic typewriters.

REDUCTION GEARS

High quality reduction gears, as modular clip-on gearboxes, are constructed for multistage, spur gear reduction. The gear wheels rotate on hardened and highly-polished steel shafts lubricated for life, and are therefore absolutely maintenance free. Internal roller bearing one-way and two-way slipping clutches allow the output shaft to be rotated while the motor is stationary.

DPi 13536

Tachometers, Encoders, Brushless Tach/Commutators.

dc tach generators

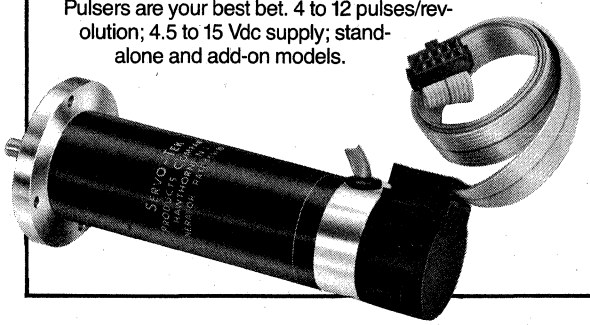
Servo-Tek 1.135″ OD tachometer generators are built to last. With silver-alloy commutators, stainless-steel shafts and bearings, brushes rated for 100,000-hour life, temperature compensation, and full factory run-in, our tachs deliver stable, long-term performance. A complete line with a variety of mechanical and electrical characteristics is available from stock. Output ratings from 1 to 45 V/1000 rpm.

incremental encoders

These high-resolution (100 to 512 pulses/revolution) optical encoders are offered both as options on 1.135″ Servo-Tek rotating components (pictured) and as stand-alone feedback devices. All configurations provide 3-channel (2 in quadrature and 1 index) LSTTL logic output. Combination units give position, speed, and direction feedback.

5 Vdc supply; 3.2 mA output standard; 16 mA with standard amplifier, others available, STTL.

For inexpensive single-pulse-train feedback, Servo-Tek Pulsers are your best bet. 4 to 12 pulses/revolution; 4.5 to 15 Vdc supply; stand-alone and add-on models.



tachsyn® brushless tach/ commutators

Does your brushless dc drive require

- High-accuracy commutation?
- Linear, low-noise tach signal?
- Elevated-temperature operation?
- No electronics in the motor?
- Low-inertia rotor?

The new patented Tachsyn tach/commutator from Servo-Tek may be the ideal transducer for your exacting requirements.

The Tachsyn brushless three-phase transducer is available in 4-, 6-, and 8-pole configurations to match your motor. With remote signal conditioning electronics, it provides accurate 6-step Hall-equivalent or sine-wave signals plus a low-ripple analog dc tachometer output.

The rotor is a low-inertia, passive component suitable for high speeds. Overhung mounting eases addition to your motor–no extra bearings or couplings are required.

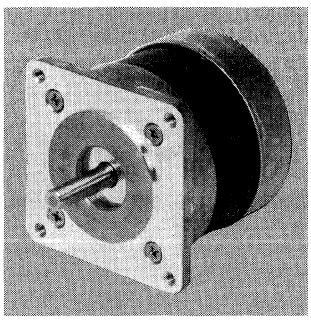
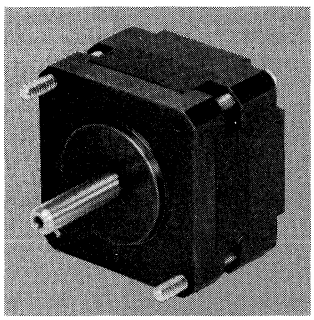
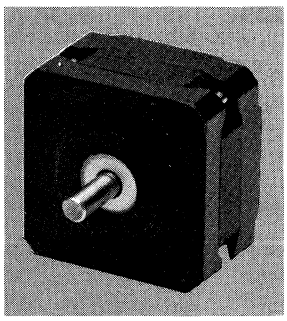
LOOK TO SKC FOR VALUE ENGINEERED MOTORS AND TECHNICAL SUPPORT

STEPPING MOTORS

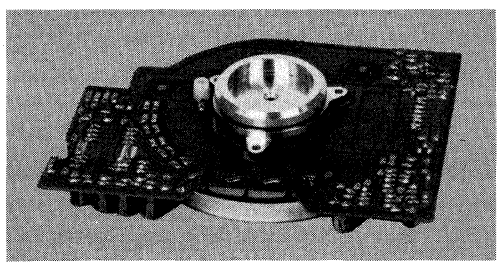
Sizes: 15 (35mm), 17 (39mm), 23 (56mm) & 34 (83mm). **Step Angles:** 0.9°, 1.8°, 3.6° & 3.75°. Hybrid, unipolar or bipolar, precision ball bearings 3% accuracy, state-of-the-art performance. **Applications:** Disk drive, tape streamer, printers, plotters, medical equip., office automation machines.



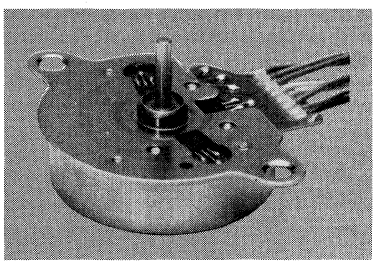




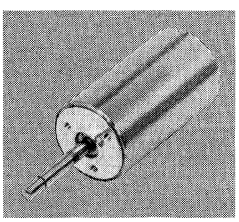
BRUSHLESS DC MOTORS

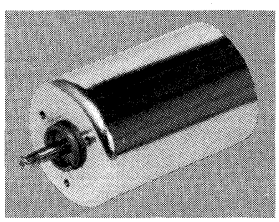


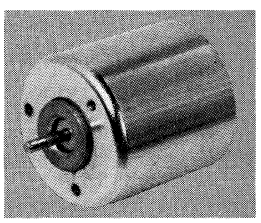
Inner & outer rotor types, 3 phase radial gap types, 42mm to 90mm dia, rare earth magnet, ball bearings, hall sensors. **Options:** Tachometer, encoder, integral driver. **Applications:** Disk drives, streamers, medical equip., computer peripheral equip., fan & blower drives.



CORELESS DC MOTORS

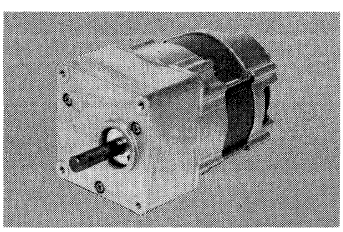






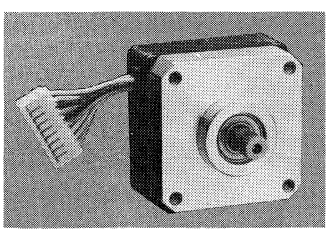
Ironless rotor, 12mm to 50mm dia., 8.5 to 1400 GM-CM starting torque. **Options:** Ball bearings, tachometer, terminals. **Applications:** Medical equip., office equip., recorders, small printers, plotters.

AC & DC GEARED MOTORS



Induction motors, frame sizes of 60 to 100 mm dia. 120 or 220 vac, 50 or 60 HZ, torque ratings up to 70 KG-CM at 70 RPM. DC motors, frame sizes of 50 & 70 mm, various voltage ratings, torque ratings up to 40 KG-CM at 82 RPM.

MOTOR-ENCODER



Brushless DC servo with precision optical encoder. Rare earth magnet, ball bearings, very low cogging, compact (39 mm sq x 21 mm long.) Ideally suited for precision positioning.

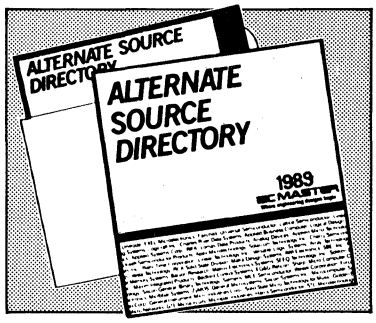
HEARST ENGINEERING SOFTWARE

ICMASD...IC Alternate Source Directory

If you've used the IC MASTER, you know what the Alternate Source Directory is. Engineers tell us that it's one of the most valuable sections of the Master. The Alternate Source Directory...ASD...is now available in floppy disk form.



The electronic ASD is FAST! Just ask a question and the answer pops up in a split second.

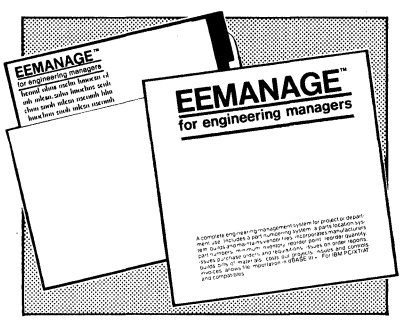
The electronic ASD is FLEXIBLE! You can add ICs and you can add comments.

You can add part numbers, prices, technical notes or anything else you like. You can customize the ASD to fit your needs and the needs of your company.

Order the Alternate Source Directory for your AT, XT or compatible. We'll send you two floppies and a very simple piece of printed documentation. Download the floppies and you're in business. All you need is a hard disk.

EEMANAGE...for engineering managers

Developed by the publishers of EEM/ Electronic Engineers Master, EEMANAGE is a software program designed to make life easier for engineers and engineering managers.



EEMANAGE does many things: 1. Develops Bills of Materials 2. Assigns Part Numbers logically 3. Manages Engineering Inventories 4. Issues Purchase Requisitions 5. Relieves Engineering Inventories 6. Manages a Parts Storage System 7. Issues Engineering Change Notices 8. Interfaces with dBaseIII+ Programs.

EEMANAGE is completely menu driven. It is simple to understand and operate. Any competent secretary can be up and running on EEMANAGE in minutes.

Order EEMANAGE for your AT, XT or compatible. We'll send you one floppy and brief, very user friendly documentation.

The basic price for ICMASD or EEMANAGE is $149.50* each and includes floppy disk(s) and complete program documentation.

For immediate shipment you can order ICMASD or EEMANAGE on your VISA or MasterCard credit card simply by calling Marie Botta at (516) 227-1300.

To order by mail send your purchase order to:

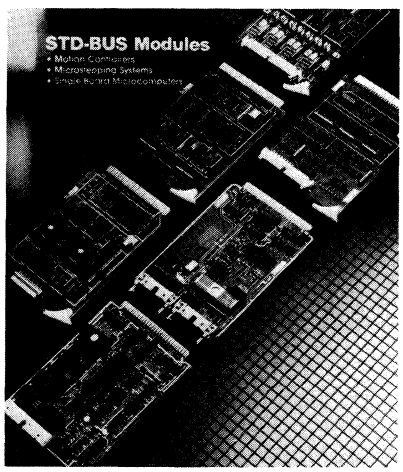
Stock Drive Products—founded by engineers provides unique application assistance in the form of detailed handbooks and catalogs. In keeping with SDP traditions, this material provides very complete details on SDP products to help design engineers choose the products most applicable to their needs. It is an accepted industry fact that SDP product quality is of the highest order as is SDP engineering assistance. Wherever possible, SDP encourages the use of standard products detailed in the catalogs. However, expert advice is available for your special or custom requirements by calling 516/328-0200. Ask for Application Engineering.

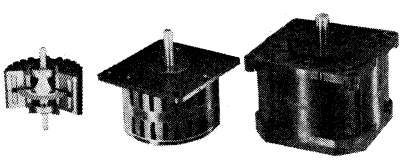
Send for your free copy of the extensive catalog of over 1,000 standard motion control products including DC and AC motors (both direct and reduction drive), steppers, tachometers, gearheads and fans and off-the-shelf STD-BUS cards and motion control modules. Call 516/328-0200 or 328-3300.

STD-BUS MOTION CONTROL MODULES



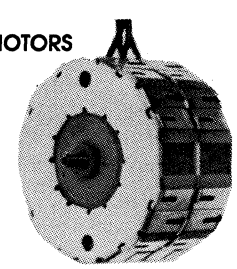
Control motor position, velocity or torque via RS-232, STD-BUS or local switch. Digital filtering. Ideal for robotics/automation. Commands in ASCII. Stepper control, linear or circular interpolation. Microstep to 12,800 steps/rev. 8031 microprocessors. Microstep DAC controls 4 dc motors. A complete family of control modules, cards and boards available off-the-shelf. Catalog TI-822.

THIN DISC PM STEPPER MOTORS



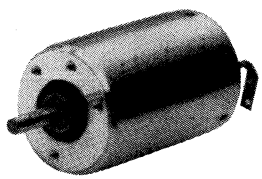
New technology stepper motors with samarium/cobalt permanent disc rotors. Up to 100KW/S power rate in 30, 50 & 70 mm diam. and step angles of 1.8° & 3.6° with peak holding torque up to 90 oz. in. Superior power rate to weight ratio. Weigh 50% less than comparable motors.

"TIN-CAN" PM STEPPER MOTORS



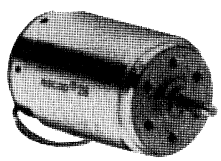
Permanent magnet motors for two and four phase operation. Step angles 7.5° & 15°. Holding torque from 1.0 up to 7.7 Ncm. Operate at 6, 12 or 24 Vdc and from −15°C to +55°C. Mount in any fixed position by means of expandable snap-on clip or screw clip. Available with a wide range of gearheads.

IRONLESS ROTOR DC MOTORS



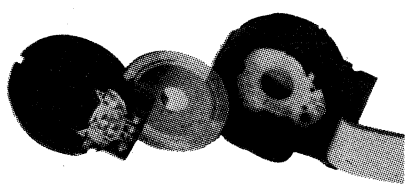
Permanent magnet ironless rotors provide up to 90% efficiency and high power/volume ratios. Many standard models from 16 to 36 mm diam. for 1.2 to 36 Vdc and up to 25.5 oz. in.

DC TACHOMETERS & MOTORS/TACHOMETERS



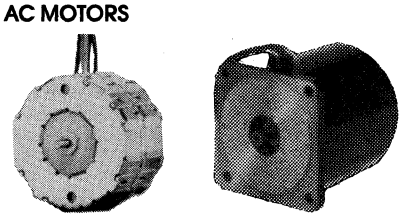
Ironless rotor construction ensures maximum reliability and performance. EMF constant 0.84 to 13.5 V/1000 rpm. Typ. ripple (pk-pk): 6–10%. Linearity & reversion error ±0.1%. Motor/tachs available with speed reducers.

OPTICAL ENCODERS



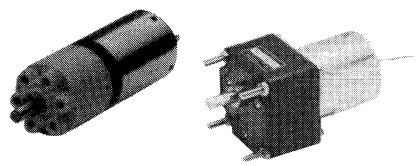
Available in two standard sizes: 28 mm O.D. with 100–512 cycles/rev.; 56 mm O.D. with 192–1024 cycles/rev. Digital output compatible with LSTTL logic, two and three channels. Also available with integral motor.

AC MOTORS



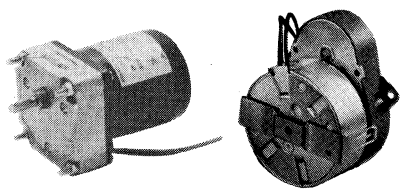
Available as synchronous reversing or unidirectional types. Also hysteresis or induction types. A wide variety of standard sizes and torques up to 1600 Ncm are available. For either 50 or 60 Hz operation and with UL, VDE and CSA approval.

DC GEARMOTORS



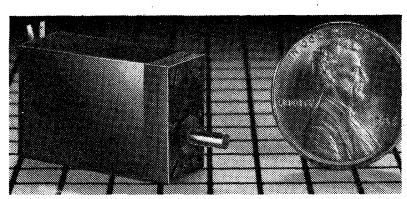
Supplied in either of two basic styles either with integral ironless rotor dc motors and gearheads or as assembled motors and gearbox components. A very wide range of torque and gear ratios.

AC GEARMOTORS



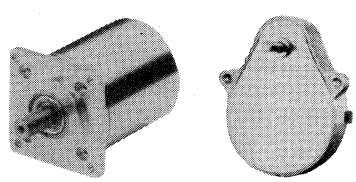
Available in wide range of reduction ratios to fit all standard AC motors and with precision gears and permanently lubricated bearings to ensure quiet long life. With or without one or two way slipping clutches.

MINIATURE DC GEARMOTORS



Tiny precision ironless rotor dc motors with an integral gearbox with a choice of reduction of 3.67 to 2430; 1 of the 7200 rpm 2 or 4 Vdc motors. Motor torque is 0.072 oz. in. @ 2V (0.068 @ 4V). Max. size is 9 mm wide × 15 mm high × 21.8 to 34.7 long. Wt.: 10 to 13 grams.

GEARHEADS/SPEED REDUCERS



Precision construction in a variety of styles and ratios to fit most standard ac or dc motors. Ratios range from as little as 4.0625:1 up to 360,000:1. A wide range of output torques are available. See catalog SDP-823.

SLO-SYN® DC Stepping Motors

Permanent magnet type stepping motors that provide high torque-per-pound and torque-to-inertia ratios. Can be driven to speeds above 20,000 steps/second with low power input. Motors have Class B insulation and can be operated at an ambient temperature range of −40°C to +65°C. Continuous duty temperature is 65°C. Standard 1.8 degree step angle motors can be half-stepped or microstepped with accuracies of ± 5% or ± 3% noncumulative. Holding torque ratings from 53 to 5000 oz-in. To simplify installation and connections, new quick-connect, plug-in types are available. Motors have no brushes, ratches or gear and use shielded ball bearings to ensure reliability and long life.

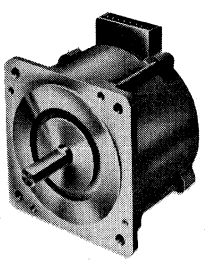
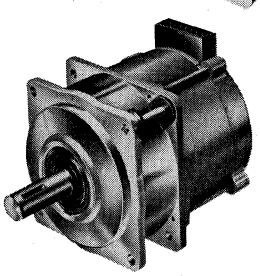
(2) Both windings energized at rated current.
(3) Calculated from holding torque in oz-in and rotor inertia in oz-in-sec² (lb. in²/24).
(5) Values are subject to change without notice. Parameters used as part of a specification should be verified with the factory.
(6) Operation below rated current will reduce torque and may degrade step accuracy.

SLO-SYN® AC Synchronous & Gearmotors





Provide slow basic shaft speed synchronous with line frequency. Allow direct load coupling without gearing. Instantaneous starting, stopping and reversing eliminate clutching and braking. Simple single-pole, 3-position switch provides complete forward, reverse and off control. Will not overheat or be damaged if stalled. Starting and running currents nearly identical. Conventional motors have speeds of 72 and 200 rpm at 60 Hz and torque ratings from 25 to 1800 oz-in.

New **high torque models** provide more power per frame size than any other synchronous motors. Types offered in NEMA frame size 23 and 34 with minimum running torque ranging from 60 to 420 oz-in. Shaft speed is 72 rpm at 60 Hz, 60 rpm at 50 Hz. **AC gearmotor models** offer torque ratings to 5000 oz-in and shaft speeds as low as 0.72 rpm at 60 Hz. All are designed for quick-connect, plug-in connection with optional mating connectors having 36 in. minimum length leads.

Write or call for complete information.

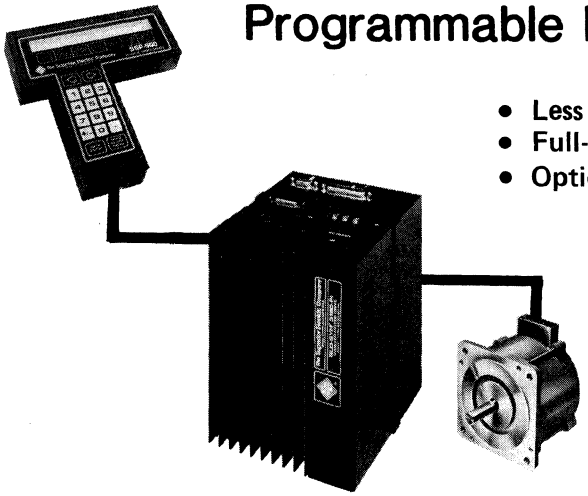
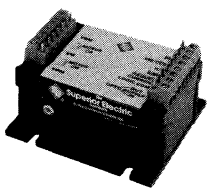
SLO-SYN® Micro Series Step Motor Drives & Programmable Motion Controls

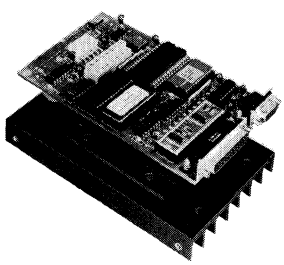


- Less than 1/8 the size of conventional controllers
- Full- or half-stepping plus microstepping in the 3180 Series
- Optional switch interface panels or hand-held programmers
- Full- or half-stepping in the 230 and 430 Series
- Standard pulse and direction interface
- Pulses may be either sourcing or sinking
- Optically isolated inputs protect against noise
- Optional heat sinks for heat dissipation
- Greater performance, increased flexibility

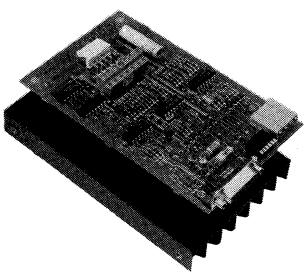
3180 Series Packaged Translators and Indexers — Provide maximum power to SLO-SYN® DC Stepping Motors. Translators have unique, proprietary current control method that improves speed/torque characteristics of many motors. Outperforms existing drives for microstepping, full- or half-stepping. Available with optional oscillator/pulse generator for manual control. Oscillator can be used as a digital pulse source for speed control, manual set-up or final positioning. Indexers are capable of full- or half-step, 1/10 or 1/125 microstep. Store up to 400 lines of program using industry standard motion language (RS274). May be programmed or edited through parallel switch panel ports or RS232 serial ports. Have 2 programmable inputs and outputs, overtravel limit switches and integral power supply.



Drive Modules — Optically isolated 20kHz chopper drives available in 2A and 3.5A per phase, 30VDC types. Can be operated at less than rated current. Use alone or as integral component on a PC board. Also available with heat sinks to dissipate heat and maintain drive integrity or packaged with power supply.

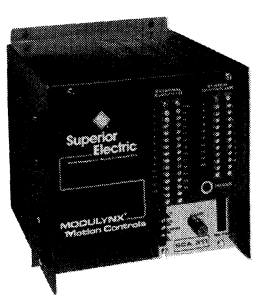


Programmable Indexer/ Drive Modules — Operate applications from single repetitive index to 400 lines. Up to 99 units can be daisy chained. Use industry standard motion language (RS274). Have 2 programmable inputs and outputs, overtravel limit switches. Programmed, edited and manipulated through parallel switch port or RS232 serial port. Also packaged with power supply.

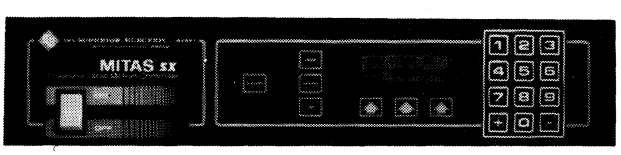


Oscillator/Pulse Generator Drive Modules — Oscillators serve as an alternate pulse source for manual setup and final positioning or as multiple range variable or constant speed drives. Can be remotely operated. All signal inputs optically isolated for maximum protection; have integral heat sinks. Also available as fully enclosed packaged units with integral power supply. Easy connections.

MODULYNX® & MITAS® Motion Controls



MODULYNX® Motion Controls — Permit user to select the appropriate circuit cards suited to individual needs. Up to 6 axes can be operated from each controller with up to 3.5HP available power. Controllers permit SLO-SYN DC Stepping Motors to be run at speeds to 20,000 steps/second with minimum power input. User selectable TTL levels and types of interface needed from RC232C or IEEE488 to simple switches.



MITAS® Programmable Motion Controllers — Available in packaged single- or two-axis systems. Controllers can be operated from the front panel, a remote device or from an RS232 terminal. Units with or without drives are also available housed in enclosures that comply with NEMA 12 specifications for use in industrial environments. Single-axis systems have nonvolatile memory for storage of multiple programmed operations. User controls speed, move distance and acceleration/deceleration rates. Two-axis systems are capable of up to 3.5HP. Controllers have nonvolatile memory that permits programming in feet, inches, meters and degrees and allow storage of multiple programs.

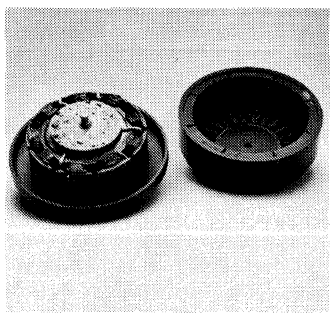
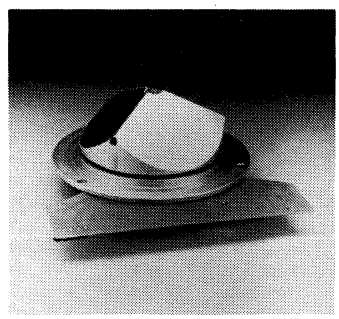
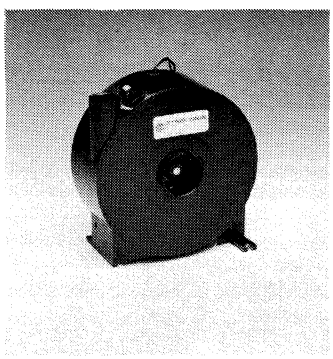
Variable-Speed, Brushless-Motors and Drives



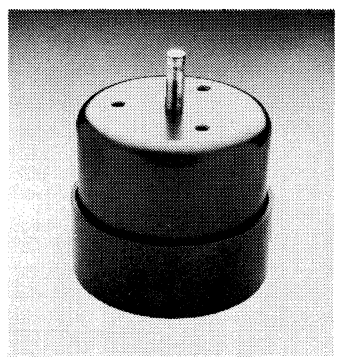
P/N F007



P/N S002



P/N F003



P/N H006

Synektron variable-speed, brushless-motors and drives save valuable space, reduce noise in products while increasing reliability and performance. The control electronics are integrated into the motor package.

A variety of control schemes are available to optimize speed/torque requirements for various applications. Synektron motors feature outer-rotating rotors. This gives a positive means of magnet retention and increases your flexibility in motor design and packaging.

AFFORDABLE AUTOMATION

NEW
- ☐ MasterCAM® 2D and 3D
- ☐ AutoCAD® Interface

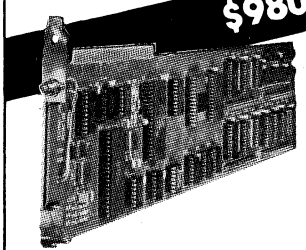
SEE OUR AD IN THOMCAT

Call for your ***FREE*** *64 page Techno catalog TI-832 today.*

516-328-3970

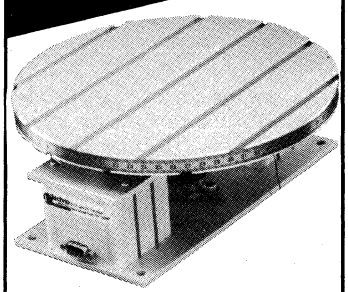
Gantry Type XYZ Table with Patented Linear Bearings
- ☐ Stepper motor and ball screw drives
- ☐ Available in 5 sizes from 9.8" x 15.7" x 4" * to 48" x 49" x 4"
- ☐ Drill and clamping device optional up to 400 lb. cutting thrust

$980.



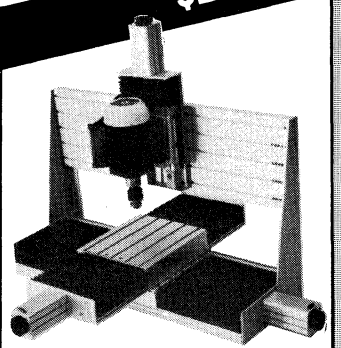
8 Axes Automation Controller Card For IBM-PC®
- ☐ Multitasking - Executes both motion and logic control programs simultaneously
- ☐ 32 inputs and 16 outputs
- ☐ 8 axes linear, 2 axes circular, plus elliptical interpolation
- ☐ User friendly text editor with on-line help screens to assist in writing your own programs.

$533.



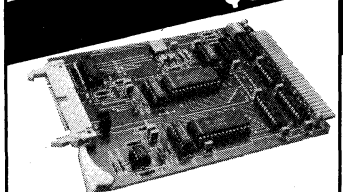
Rotary Table
- ☐ Stepper motor driven with 1:4 timing belt drive ratio
- ☐ Up to 13.5 minutes of arc accuracy per pulse
- ☐ 9.45" dia. top plate with "T" slots

$2654.*



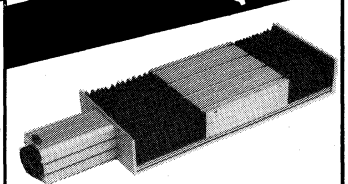
X/Y Table with Bridge Mounted Z Axis
- ☐ Stepper motor and ball screw drives
- ☐ Available in 2 sizes 7.8" x 11.8" x 4" * and 11.8" x 15.75" x 4"
- ☐ Drill and clamping device optional

$385.



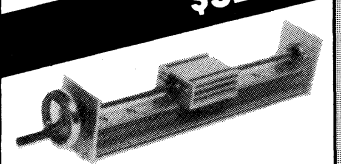
STD-BUS 2 Axes Servo Motor Control Card For IBM-PC®
- ☐ 32 bit resolution linear and circular interpolation
- ☐ Simultaneous motion and logic control

$640.



Single Axis Table with Patented Linear Bearings
- ☐ Available in strokes of 4" to 48"
- ☐ Static load up to 1,000 lbs
- ☐ Slides include stepper motor, ball screw and home sensor

$321.*



Narrow Profile Series Drive Tables
- ☐ Stocked in stroke lengths of 9.8" * to 49"
- ☐ Also available with stepper motor and ball screw drive
- ☐ Maximum static load 200 lbs.
- ☐ Up to 30"/sec. travel with fast helix screw

Prices shown are typical within each product group. Pleated protective covers optional. Repeatability for all tables is .0004". Accuracy is .0004". per inch.

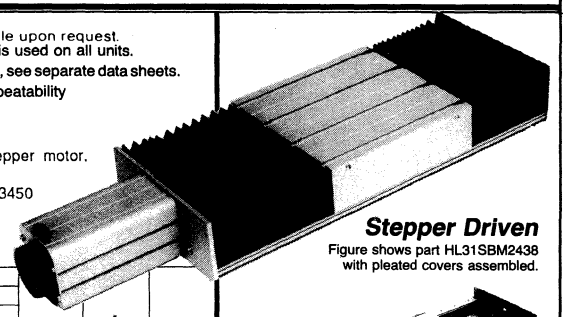
Linear Slides

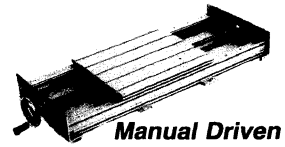
- Longer strokes, up to 1250 mm (49.2) available upon request.
- Patented linear precision guide rail system is used on all units.
- For motor specifications and drive electronics, see separate data sheets.
- Home sensor (switch) is provided with a repeatability better than 1/100 mm (.0004)
- T-slot work surfaces standard on all units.
- Manual or driven with HL2100M3455 stepper motor.

* These slides are driven with HL2100M3450 stepper motor.

- Could be mounted in any orientation



Stepper Driven
Figure shows part HL31SBM2438 with pleated covers assembled.



Manual Driven
Figure shows part HL31MTM2444☐ with hand crank and without pleated cover.

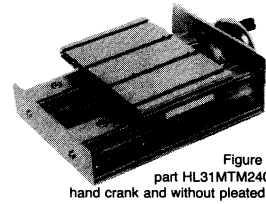


Figure shows part HL31MTM2402 with hand crank and without pleated cover.

Lead Screw Drive Tables

- Patented linear precision guide rail system.
- Double guides with two linear bearings.
- Stainless steel lead screw.
- Two axial bearings.
- Manual or driven with HL2100M3455 stepper motor.
- Home sensor switch provided with a repeatability better than 1/100 mm (.0004).
- T-slot work surfaces standard on all units.

Working Area: 90(3.5) x 75(3.0)

VERNITRON CONTROLS

1601 Precision Park Lane • San Diego, CA 92073 • (619) 428-5581 TWX: 910-322-1862 FAX: 619-428-5090

Vernitron Controls is a leading supplier of Mil-Spec synchros and resolvers, and is a primary source for the more sophisticated, ultra-high-accuracy single, dual and multi-speed pancake-type componentry consistent with today's state of the art.

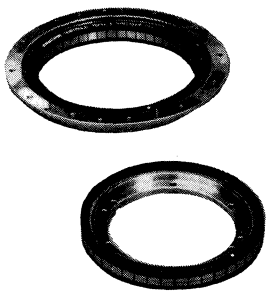
Vernitron Controls operates from a modern 60,000 square foot facility located on 4.6 acres in San Diego, California, specifically designed for the manufacture of electromagnetic devices.

Vernitron Controls has supplied products for such programs as Harpoon, TOW/-Cobra, FVS, A-6, Trident, Phalanx, Leopard II, DD963, CG47, and many more. Vernitron Controls' products are also found in many areas of industrial applications, including robotics, automatic machine tools, and computer disk drives.

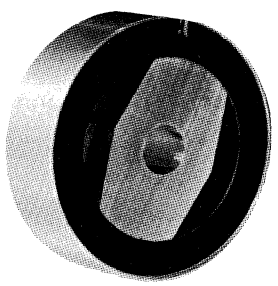
Product Lines from Vernitron Controls

Standard Mil-Spec Synchros and Resolvers Size 8 – Size 45

Hi-Accuracy Multispeed Pancakes

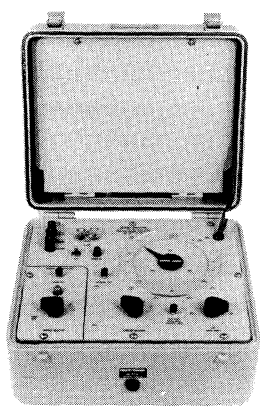


Limited Angle Brushless Torque Motors

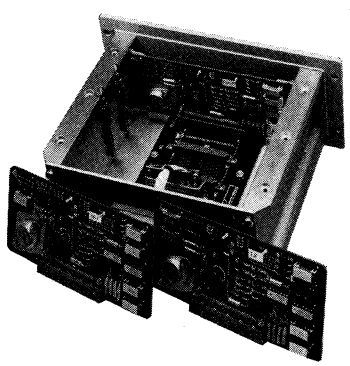


Torqsyn Remote Positioners Analog or Digital Input

Custom Subsystem Designs



Custom Electronics



Other Products:

- Digital Resolver (single turn absolute encoder, 16-bit output)
- 50 VA Solid State Synchro Amplifier
- RVDT
- Segment Resolver
- DC Motors and Tachometers through our Magnetic Technology Division, Canoga Park, California; Tel. (818) 887-7700; FAX (818) 887-9964

PANCAKES:

[1] All units are supplied with hubs and housings to achieve specified performance, unless otherwise noted. Units are without ball bearings. See separate chart for housed and/or brushless pancakes.

Dimensions provided are for rotor and stator only (ref). For exact configuration and more detailed specification information on any part number shown, consult factory for latest drawing.

[2] Units are supplied without hub and housing.

[3] Units supplied with hub, but no housing.

vernitorq™ BRUSHLESS DC TORQUE MOTORS

VERNITORQ™ BRUSHLESS DC TORQUE MOTORS
Brushless, direct drive, limited rotation motors available in two and four pole configurations, frameless or housed, for precise positioning, actuation and infinite control. Available with Alnico or air stabilized samarium cobalt magnets for ease of handling and assembly. All units are toroidally wound and encapsulated in a high temperature medium through a precision transfer molding process.

Vernitorq motors feature:
- Quick response
- Wide angular excursion
- Hi torque, lo input power
- Infinite resolution
- No slot effect

In addition to the above features, "Vernitorq" motors are friction free, explosion-proof, and offer no electrical or mechanical noise. They are ideally suited for such typical applications as:
- Mirror positioning in infra-red/thermal imaging systems
- Tension control on hi speed printers
- Disc drive head positioners
- Open/close valve actuators
- Medical scanning equipment
- Camera control mechanisms

"Vernitorq" motors are optimally designed to enhance system performance.

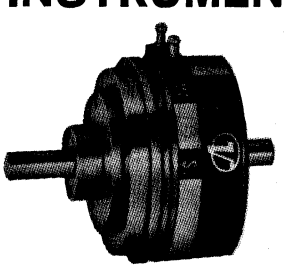
CLUTCHES AND BRAKES

PRECISION INSTRUMENT



These units are manufactured primarily to satisfy the high standards of Military requirements. Their above-standard quality is further emphasized by a high efficiency-to-size ratio. If precision is the need — then these are the instruments for you.

PERMANENT MAGNET HYSTERESIS CLUTCH

PMC Series

Designed for applications requiring repeatable torque and long life. Units can be utilized to comply with OSHA safety regulations and as a fail-safe device to protect other expensive components. In the 1.5 in. diameter frame size—torque is factory adjustable up to 8.5 oz. in. and can be held within 10% max., from unit to unit in speeds up to 10,000 R.P.M. Repeatability of torque level can be maintained within ±1%.

The PMC series will operate over a temperature range of −65°F to 260°F.

FAIL SAFE BRAKES (SBF SERIES)

DESIGN FEATURES

- ☐ Braking action occurs when coil is de-energized, or power fails.
- ☐ Unit is adjustable to compensate for wear.
- ☐ Zero backlash armature with spring release.
- ☐ Clamp-Lock hub for positive retention.
- ☐ Stationary field coil — no slip rings or brushes.
- ☐ Fast response time.

MANY INDUSTRIAL TYPES AVAILABLE

Refer to sections 2440, 4750, 5500 for additional product listings.

*I_F=20mA

NOTE: Each visible LED is also available at Lower Luminous Intensity than specified in the above tables. For these LEDs with no specified luminous intensity, the same type number is used, but with the last two characters left blank. For example, if a PLED-G313A-6 with no specified luminous intensity is required, the type number becomes PLED-G313A.

OPTOELECTRONIC DEVICES

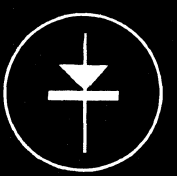
CLAIREX MAKES THEM ALL!

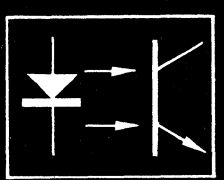
PHOTOCONDUCTIVE CELLS

Clairex offers a complete line of cells with spectral response in the visible and near infrared ranges. Units are available in a variety of sizes, in plastic, metal or glass packages with varying resistance and voltage combinations.

PHOTODIODES

A series of silicon planar photodiodes that may be operated in either the diode or voltaic mode as well as a series of monolithic integrated circuits for use as silicon digital output detectors.



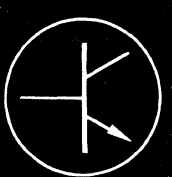


OPTOISOLATORS - OPTOCOUPLERS - PHOTOMODS ®

These three terms are used interchangeably to describe a device that utilizes a high quality, long-life light source with a photodetector in a single, light-tight encapsulated or hermetic package. Variations in output of the light source produce changes in the output of the photodetector. Thus the input and output circuits are isolated from each other electrically. Clairex offers a line of standard units with a variety of electrical characteristics in a variety of packages, as well as engineering assistance to produce custom units.

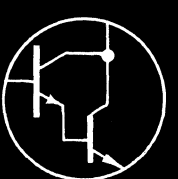
PHOTOTRANSISTORS

Clairex manufacturers several generic series of phototransistors in plastic and hermetically sealed packages that can be produced with or without lenses. In addition, custom units can be produced to meet your specific requirements.



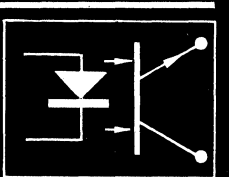
PHOTODARLINGTONS

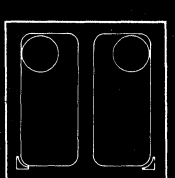
Standard and custom photodarlingtons are also available in the same variety of packages as transistors.



OPTICAL INTERRUPTERS

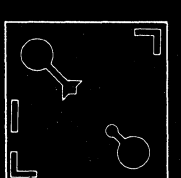
Optical interrupters are similar to optoisolators in that they contain a photodetector and a light source with an air gap between the two so that a light beam can be interrupted by a mechanical device. Clairex offers a wide variety of packages, mountings, and configurations with a variety of electrical characteristics in each package. Custom units available too.





OPTO ARRAYS

Clairex welcomes inquires for custom designed arrays of emitter and sensor chips. We supply arrays positioned in precise patterns or multiple chip patterns designed with close and precise spacing and with multiple lead headers, ceramic or PC board substrate or with molded boards and housings.



OPTO CHIPS

Clairex offers a broad range of standard designs of photovoltaic, photodoide phototransistor, and photodarlington chips. Custom chip design capabilities also exist. All chips have gold backing suitable for either eutectic or conductive epoxy ohmic die attachment.

LIGHT EMITTING DIODES

Clairex supplies a series of LED's that are designed for a variety of optoelectronic applications. Some units are designed to emit light in the visible red spectrum, some at 800 nanometers and others at 940 nanometers. Selection of the proper unit depends upon the application.

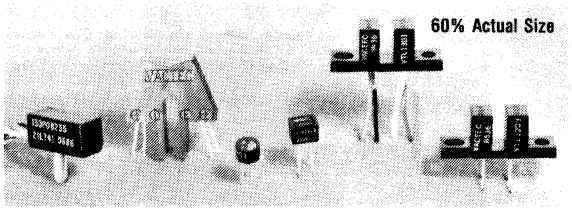
EG&G VACTEC

INDUSTRY'S BROADEST OPTOELECTRONIC LINE

- Standard Silicon and Blue-Enhanced Photovoltaic Cells, Blue-Enhanced Photodiodes, and PIN Photodiodes

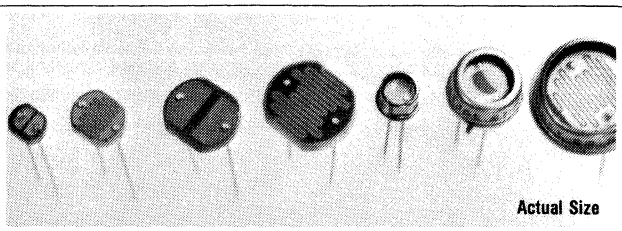
RETROREFLECTIVE & INTERRUPTER SWITCHES (SLOTTED)

Standard and custom optical switches—infrared GaAs LED and silicon phototransistor interrupters available in sealed housing of I-R transmitting plastic or opaque plastic with open apertures. Three retro styles: arrow, TO-18, and cubic.



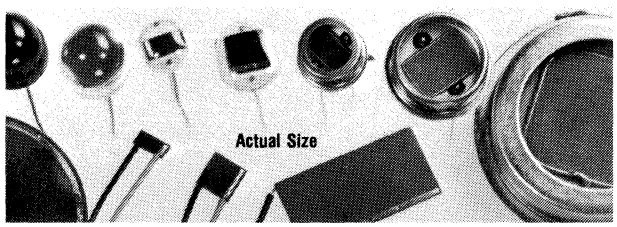
PHOTOCONDUCTIVE CELLS

Vactec light dependent resistors (LDR's) are available in three hermetic enclosures (TO-18, TO-5, TO-8) and 4 ceramic types. Ceramic types have automatically inserted wires which insure perfect contact integrity. Six materials of CdS, CdSe and CdSeS-CdS mixtures with spectral response peaks from 565-735 nm. Each material has a variety of sensitivities to satisfy all requirements.



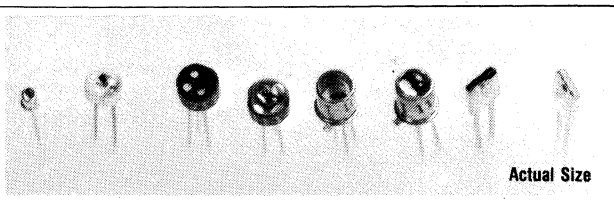
SILICON PHOTOVOLTAIC CELLS

Three processes: BLUE ENHANCED, LOW CAPACITANCE, STANDARD SOLAR. All available in a variety of hermetic, ceramic, as chips, or with flying leads. The BLUE ENHANCED cells are unique large area detectors with high U-V sensitivity to as low as 200 nm. Almost non-existent U-V enhancement effect with stability equivalent to high quality photodiodes. LOW CAPACITANCE cells have fast response less than 15μS with 10KΩ load. The high shunt impedance is desirable for driving amplifiers. SOLAR cells have high V_{OC} at low illumination (typ 200mV at .05mW/cm^2). Linear over wide illumination range.



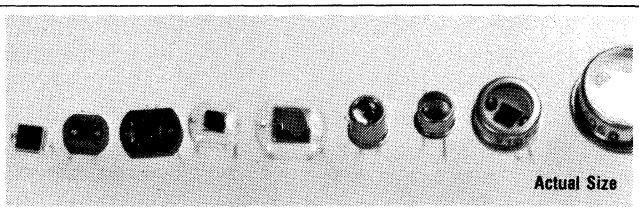
PHOTOTRANSISTORS — LED'S — PHOTODARLINGTONS — LIGHT ACTIVATED SWITCHES (LAS)

Phototransistors and photodarlingtons are NPN passivated—4 chip sizes of 25, 40, 50, and 60, mil square in TO-18, ceramic, coaxial, and lateral (side looking) packages. High light current at very low drive current ideal for instrumentation applications. GaAs I-R LED's with excellent stability in TO-18, T-1, T-1¾, lateral packages. LAS (light activated switches) have high sensitivity with Schmitt Trigger output. New—high power GaAlAs I-R LED's in TO-18, T-1, T-1¾ packages.



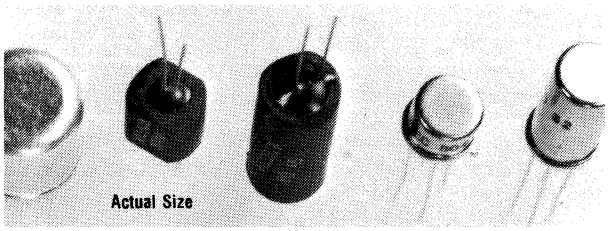
PHOTODIODES

BLUE ENHANCED photodiodes are extremely low dark current devices with excellent response in the U-V. Less than 10pA (I_D) for small chips. Large area diodes (VTB5051) 14.8mm^2 active area with 1.2A/(W/cm^2) at 365nm and I_D of 250pA max. FAST photodiodes have low capacitance. Use with reverse bias for fast response time and excellent linearity. Ideal for remote I-R sensor digital controls.



VACTROLS

Optical couplers using LED's, neons, or incandescent lamps as the emitter and Vactec photoconductive cells (LDR's) as the detector. For noiseless switching and signal monitors for audio. Neon types to sense telephone ring. LED types for triac gate control. Incandescent types for low cost true RMS sensor as voltage regulator or control of constant wattage heater. Five package types include 2 hermetic.



SELENIUM PHOTOVOLTAIC CELLS

Large area detectors for direct meter drive or in conjunction with amplifier. Spectral response peaks at 575 nm and is close to visible response. Available with integral #102 filter to match standard observer curve (CIE). Available in many flat or round cells with or without leads—also in 9 package styles including 2 hermetic.

FAX: 612-443-2668

HEI has been designing and building optical switches and assemblies to the strictest industrial and military standards for 20 years. Today HEI produces standard optical switches in seventeen basic configurations with over 100 variations, including direct replacement parts for most industry standard switches.
The company is also a leader in designing and building custom optical switches for special application requirements. Compact, accurate and dependable HEI optical switches are suitable for any optical switching application.

OPTICAL SWITCH APPLICATIONS

- Optical Encoding
- Limit Switching
- Paper Tape Readers
- Paper Passage Detector
- Rotational Speed Monitoring
- Counter Circuits
- Flow Metering
- Precision Position Detection
- End-of-Tape Detection

OPTICAL SWITCH FEATURES

- Over 100 packaging and electrical variations
- TTL, DTL, CMOS and Analog Outputs
- Pin or Wire Leads (12-in. standard)
- Variety of Gap Sizes
- Special Aperture Designs

CUSTOM OPTICAL SWITCHES

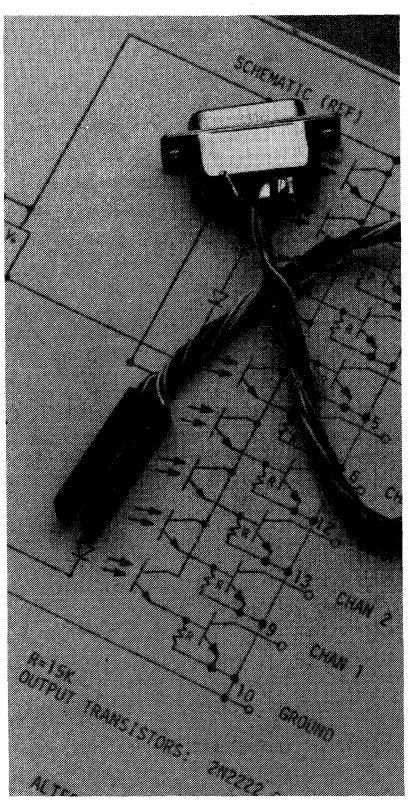
HEI also offers complete custom design and build services. From prototype to final production, HEI engineers assist customers in development of reliable and economical designs. The HEI custom optical switch process offers design options to customers in four categories. HEI engineers assist in setting specifications, and then develop prototypes for application testing.

Mechanical—
selection of housing size and format, mounting detail

Electrical—
signal characteristics, input/output requirements

Optical—
number of channels, light frequency, aperture size, sensor distance

Interface—
lead length-pin, wire or connector



HEI CUSTOM APPLICATION EXPERIENCE

- Photo Arrays
- Vertical Format Readers
- Optical Encoders
- End-of-Tape Sensors
- Ribbon Edge Sensors
- Card and Tape Readers
- Drip Sensors
- Precision Position Sensing
- Indexing
- Linear Measurement

THE HEI QUALITY COMMITMENT

HEI has instituted a statistical process manufacturing control system to insure that each component meets performance specifications dependably and consistently. The company performs 100-percent electrical inspection of every device before shipment. As a result of these quality assurance processes HEI has been qualified as a dock-to-stock supplier by a number of original equipment manufacturers.

OPB826D	I	0.10 (2.54)	100 µA

Slotted optical switches, also known as interrupter assemblies, are designed to provide non-contact sensing of linear or rotary motion as in optical encoders. Devices from Optek Technology consist of an infrared emitting diode and a silicon photosensor mounted on opposite sides of a slot in a molded plastic housing. Switching takes place whenever an opaque object passes through the slot. **All assemblies are available with wire leads. Contact Factory**

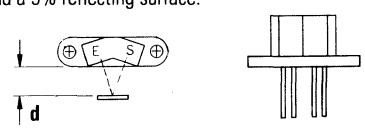
Style G **Style H** **Style I** **Style J**

High Contrast Reflective Assemblies

Part No.	$I_{C(ON)}$	d"	$I_{C(OFF)}$	Contract Ratio
OPB750	500mA	.080	250nA	2000:1
	375mA	.150	250nA	1500:1
	250mA	.220	250nA	1000:1

Designed to decrease low-level gain while not affecting the high-level light gain. Photocurrent is measured using an Eastman Kodak neutral white test card as a reflective surface having a 90% diffuse reflectance. $I_{C(OFF)}$ is photocurrent measured with current to the input diode and a 5% reflecting surface.



Reflective Assemblies

Part No.	Case Style	Max. V_F at Rated I_F	Min. $V_{(BR)CEO}$	Min. $I_{C(ON)}$

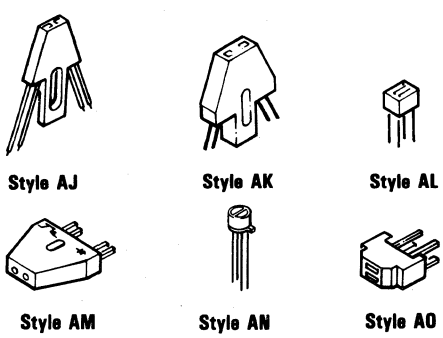
OPB712	AO(2)	1.7V @ 20 mA	15V	20 mA

(1) Phototransistor output
(2) Photodarlington output

Reflective assemblies are designed to provide non-contact sensing of the presence of a reflective surface, or a change in surface reflectivity. Unfocused types, where the emitter and sensor are mounted on parallel optical axes, are best suited for sensing diffuse or rough surfaces. Focused types, where the emitter and sesor are mounted on converging optical axes are best suited for sensing specular or polished surfaces.



Style AJ **Style AK** **Style AL**

Style AM **Style AN** **Style AO**

Custom Assemblies

Designed to meet your exact requirements.

In order to develop new state-of-the-art products, customers often require special optoelectronic devices. In these cases, Optek engineers can design a part to meet the toughest mounting or electrical requirements.

Helping customers meet special design objectives is a specialty at Optek.

Bring your ideas, design proposals and application problems to Optex experienced design engineers. They will work with you to analyze your design objectives and develop a part that meets your needs. And, since Optek has manufacturing capability which extends from silicon chip to custom housings and circuit boards, you can be sure that Optek quality goes into every component and subassembly.

Optek Technology, Inc., 1215 West Crosby Road, Carrollton, TX 75006 (214) 323-2200 TLX 6716032 or 215849 FAX (214) 323-2396

OPTO DIODE CORP.

HIGH POWER GaAlAs INFRARED EMITTING DIODES

Opto Diode is a pioneer in the development and manufacture of high performance and high quality Galluim Aluminum Arsenide (GaAlAs) infrared emitting diodes. Not only is the power efficiency of Opto Diode products the highest in the market but the product's reliability is also the best in the industry. Today, Opto Diode Corporation is a leading supplier of GaAlAs IR emitter chips in the solid state relay market.

SHARP® Optoelectronics

Photocouplers

Photocouplers

Features

Various output methods:
- Single phototransistor
- Darlington phototransistor
- OPIC*
- Bidirectional output transistor
- Phototriac
- Photothyristor

Various package formats:
- Standard dual-in-line package
- Flat package
- Mini-flat package
- Dual-in-line package for long creepage distance

Wide line-up of products approved by overseas safety standards: UL, VDE, TÜV, BS, SEMKO, DEMKO, EI
High isolation voltage: PC100/PC700/PC800 series, etc.

Classification chart

Photocouplers
- PC100 series — VDE approved (long creepage distance type)
- PC200 series — Mini-flat package type
- PC300 series — Opaque mini-flat package type
- PC400 series — Opaque mini-flat package type
- PC700 series — DIP 6-pin, Viso:5kVrms
- PC800 series — Opaque 4-pin x N (N = 1,2,3,4), Viso: 5kVrms
- PC900 series — OPIC*
- 6N series — Standard 6N series (OPIC*)

Phototriac couplers

Photothyristor couplers

*OPIC is a registered trademark of Sharp and stands for Optical IC. It has a light detecting element and peripheral circuits integrated onto one chip
**In PC4N series, PC700 series, and PC800 series, the flat package products are also available in a wide variety.

SHARP Optoelectronics

Photointerrupters

Photointerrupters

Features

- Various output methods
  - Single phototransistor
  - Darlington phototransistor
  - OPIC
    - Single-phase digital output
    - Two-phase digital output (transmissive type)
- Various mounting methods
  - Snap-in mounting type
  - PWB mounting type
  - Both-side mounting type
  - Either-side mounting type (transmissive type)
  - Side-mounting type (transmissive type)
- Transmissive type — Line-up of products with a detecting accuracy of slit width ranging from 0.15 to 2.5mm.
- Reflective type — Line-up of products with detecting distance ranging from 1 to 7mm (optimum).
- Transmissive type — Line-up of products having an object passing width ranging from the light emitter and detector gap of 0.9 to 13.2mm.

Versions with cover case, 3-pin connector terminal, and super-compact products are available to meet a variety of customer needs.

SILICON DETECTOR CORP. **Commercial • Military • O.E.M.**

HIGH PERFORMANCE

CUSTOM SILICON PHOTODETECTORS

Designed by Engineers for Engineers

High Speed
Spectrally Enhanced
UV—Visible—IR
Low Noise
Linear
Photoconductive
Photovoltaic
Low Capacitance
High Voltage Breakdown
Reliable and Low Cost

SD — XXX — XX — XX — XXX

ACTIVE AREA SIZE
(Expressed in inches — effective diameter)
ie: 020 = .020 inch diameter
200 = .200 inch diameter
444 = .444 inch diameter

PRODUCT SERIES
11 Single element, Red IR Enhanced
12 Single element, Blue Enhanced
13 Single element, U.V. Enhanced
21 Single Axis Position Sensing (PSC)
22 Dual Axis Position Sensing (PSC)
23 Quadrant Detector
24 Bi-Cell Detector
31 Photopic Detector
32 Red Photopic Detector
41 Opto Hybrid Red/IR Enhanced
42 Opto Hybrid Blue Enhanced
43 Opto Hybrid U.V. Enhanced

DETECTOR APPLICATION
11- Photovoltaic—Ultra Low Noise/Medium Frequency Red I.R. Enhanced
12- Photovoltaic—Ultra Low Noise/Medium Frequency Blue Enhanced
13- Photovoltaic—Ultra Low Noise/Medium Frequency U.V. Enhanced
21- Photoconductive—High Frequency Red I.R. Enhanced
22- Photoconductive—High Frequency Blue I.R. Enhanced
23- Photoconductive—High Frequency U.V. Enhanced

SURGE PROTECTORS

Widest Range of Protectors Available Anywhere!

Data Line Protectors
MCG provides a sophisticated blend of high speed (less than 5ns) and brute force protection for the sensitive equipment on your data lines.
Protects:
- RS232
- RS422, 423
- Modems
- 20ma loops
- Video lines
- Twisted pair/coaxial cables

See EEM Pages B•1394-1400.

AC Power Line Protectors
MCG AC Power Line Protectors are heavy-duty, bipolar clamping devices that limit lightning and switching transient spikes to safe levels.
Protects:
- 120VAC to 480VAC
- 5A to 5000A
- 1 Phase, Delta, Wye configurations

See EEM Pages B•1388-1393.

MCG ELECTRONICS INC

Specialists in Circuit Protectors, Transients, Lightning & Surges.

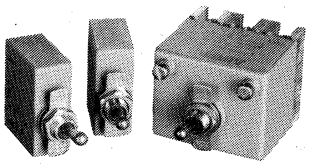
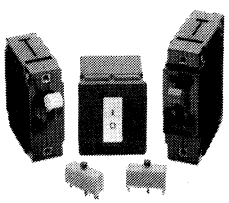
CIRCUIT BREAKERS

Airpax circuit breakers are rated at 50 milliamps to 160 amperes in more than 50 configurations and styles. And we can design one to your exact specifications. Contact Airpax Company, Woods Road, Box 520, Cambridge, MD 21613. (301) 228-4600. Fax (301) 228-8910. Telex 6849138. A division of North American Philips Corporation.



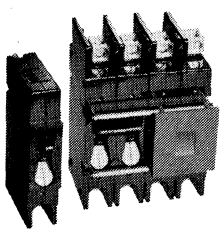
Models AP and UP**

Hermetically sealed. DC, 50/60 Hz or 400 Hz versions. Various delays to meet your needs. UP version has wide glass terminals.
Specifications: 1 to 3 poles. Ratings: 0.05-20A, 240 VAC, 50 VDC. Interrupting capacity: AP MIL 500A @ 120 VAC, 50 VDC; 300A @ 240 VAC. UP 1000A @ 32 VDC, 240 VAC.
Approval: QPL: MIL-C-39019 Lloyds
**(UP, single pole, series only)



Models SNAPAK®, CARDGARD®, IEG and IEL

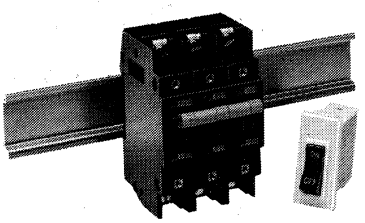
All conform to VDE and IEC spacing requirements. CARDGARD is PC board mountable.
Specifications: SNAPAK: 1 or 2 pole ratings. 7.6 to 15A at 32 VDC/125 VAC, 0.10 to 7.5A at 50 VDC/250 VAC.
2-pole only (2-pole breaking) and ratings: 7.6 to 15A at 125/250 VAC, 32/50 VDC. Interrupting capacity: 1000A at 125 VAC, 250 VAC, 32 VDC and 65 VDC.
Approval: IEC VDE* Lloyds
CARDGARD: 1 pole. Ratings: 1.0-6.0A, 32 VDC, 250 VAC. Interrupting capacity: 10 times rated current, at rated voltage.
Approval:
IEG and IEL Ratings: 0.05-30A, 277 VAC, 65 VDC (Model IEG). 0.05-50A, 277 VAC, 65 VDC (Model IEL). Interrupting capacity: 3500A, 277 VAC max., 2000A, 65 VDC (Model IEG). 5000A, 277 VAC max., 2000A, 65 VDC (Model IEL).
Approval: VDE*



Model 209

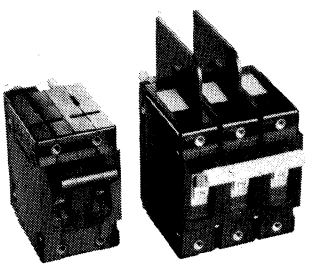
Ideal for branch circuits. Mounts in switch boards, panel enclosures, panel boards, junction boxes. Series includes 219 manual motor controller, 229 appliance controller, 249, 259 and 269 marine power selectors.
Specifications: 1 to 6 poles. Ratings: 0.10-100A, 125 VDC; 0.10-77A, 600 VAC; 0.10-100A, 120, 240, 277 and 480 VAC. Interrupting capacity: 5000A.
Approval: Lloyds

*Limited approvals; consult factory.



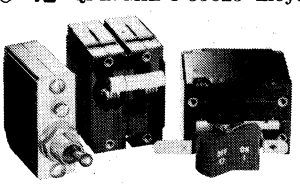
Models 203 and IELHR

203 is a front panel mounting device which combines over-current protection, ON-OFF switching and pilot light. Series, shunt or relay trip.
Specifications: 1 to 3 poles. Ratings: 0.05-10A, 250 VAC, 50 VDC, 10.1-20A, 120 VAC, 32 VDC. Interrupting capacity: 1000A.
Approval: Lloyds
IELHR designed for 35 mm symmetrical DIN rail; quick mounting, easy removal. Handle assembly available in 7 colors.
Specifications: Ratings: 0.05-50A, 65 VDC and 250 VAC. Operating temperature: −40°C to +85°C.



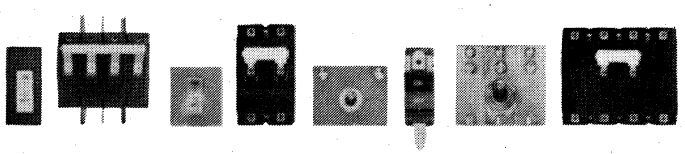
Models APL/UPL and 205

These breakers offer precision operation for critical service. Series, shunt and relay configuration options. Choice of delays, ratings. 205 is dust-sealed for harsh environments.
Specifications: 1 to 9 poles. Model APL/UPL Ratings: 0.05-20A, 277 VAC; 0.05-50A, 250 VAC; 0.05-100A, 65 VDC. Interrupting capacity: 5000A, 120 VAC; 2000A, 65 VDC. Model 205 Ratings: 0.05-20A, 277/480 VAC; 0.05-50A, 250 VAC; 0.05-100A, 32 VDC. Interrupting capacity: 5000A, 277/480 VAC; 5000A, 250 VAC; 2000A, 32 VDC.
Approval: QPL: MIL-C-55629 Lloyds



Models APG/UPG/IPG

Low-cost, precision operation. Multi-pole assemblies, single or multi-handle. For data processing, broadcast equipment, vending machines, controllers, etc.
Specifications: 1 to 4 poles. Ratings: 0.02-30A, 277 VAC, (Model IPG, 250 VAC), 65 VDC, 31-50A, 50 VDC. Interrupting capacity: 1000A, 277 VAC, (Model IPG, 250 VAC), 2000A, 65 VDC, and at 5000A, max. ratings of 30A at 120 VAC, 20A at 250 VAC, 10A at 277 VAC, (Model IPG, 250 VAC).
Approval: QPL: Mil-C-55629 Lloyds Model IPG-VDE*

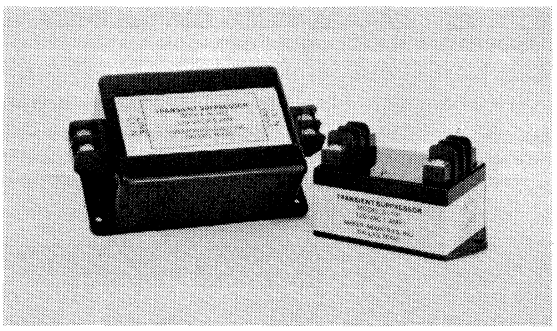


AIRPAX®
CAMBRIDGE DIVISION

AII

AMBER INDUSTRIES, INC.

AC POWERLINE TRANSIENT SUPPRESSORS



OEM Series

Our Most Popular Series

OEM Series

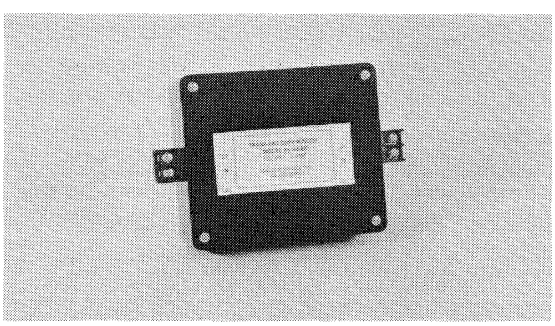
Attenuates spikes and fills notches throughout the full 360 degrees of the AC sinewave. Unlike other suppressors which merely "clamp" a transient above the AC voltage, Amber starts to operate within 1 volt variation both above and below the sinewave. Meets IEEE-587 A & B and is UL 1449 recognized.

CM Series

Add Common Mode Protection

CM Series

All the features of the OEM series plus adds common mode protection as well. Protects for transients between hot and neutral, hot and ground, and neutral and ground. Like the OEM series, the CM series meets IEEE-587 A & B and is UL recognized.

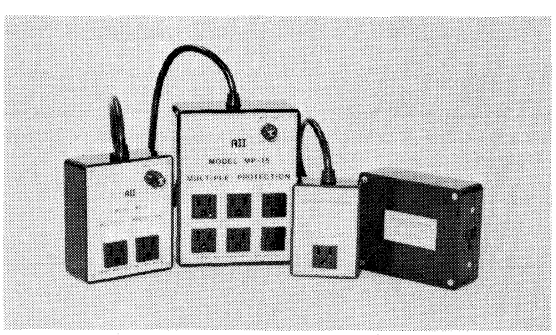


BD Series

Bi-Directional For 2-Way Protection

BD Series

The BD series operates in both directions. It not only keeps transients out of equipment, but also keeps equipment from sourcing transients back onto the AC line. Useful in applications where equipment has motors, solenoids, relays, switches, controllers, SCR's, triacs, etc.



LR and MP Series

Convenience Plus Best Protection

LR and MR Series

For those applications where there is not room in the equipment or control panel being protected. Identical protection as our CM series, plus adds a UL listed line cord and one to six NEMA 5-15 receptacles.

AMBER INDUSTRIES, INC.

14902 Preston Road, #212 • Dallas, Texas 75240 • P.O. Box 790712 • Dallas, Texas 75379 • (214) 490-9801

ATLEE COMPONENT HOLDERS

Atlee component clips are made of spring steel and beryllium copper because they afford the most generally desirable combination of properties. Specific selection of material will depend on conditions of the application. In addition clips can be manufactured to your specification for a variety of uses. Please contact the factory with your questions and special requirements.

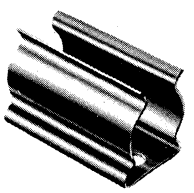
Atlee offers a complete line of MS and NAS component clips.

M24066 **M17160**

MS28136 **MS28137** **NAS1464**

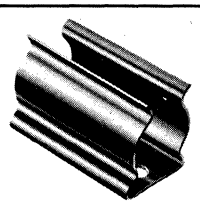
FEATURES

- The design of our component holders, from raw material through the finished product, ensures maximum performance and reliability under extreme usage, insertion, withdrawal force, and shock and vibration.
- Holding power increases as shock and vibration increase, measured by force required to remove component.
- Special contour design acquires closer set to component during shock and vibration, increasing security without localized pressure.
- Slotted design assures firm retention for fragile components without risk of injury.
- As an indication of the spring characteristics of Atlee's component holders, all of which are heat treated after forming, the following data is supplied; beryllium copper will withstand over 500 and spring steel 100 insertion-withdrawals of a slug 1/32" larger than nominal diameter, without metal fatigue.



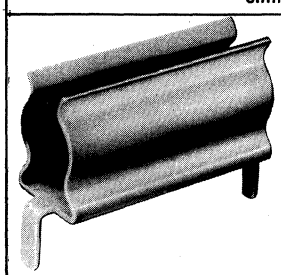
Beryllium Copper, QQ-C-533a

PLATING: cadmium CQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-T-425; nickel, QQ-U-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors and small cylindrical devices. Fastened by means of rivets, eyelets, screws or similar fasteners.



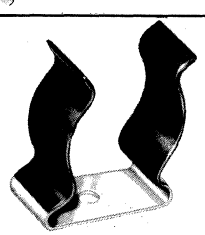
Spring Steel, QQ-S-777a

PLATING: cadmium CQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-T-425; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors and small cylindrical devices. Fastened by means of rivets, eyelets, screws or similar fasteners.



Tab Mounted Clips

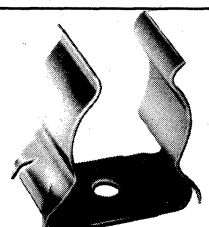
MATERIAL: beryllium copper, QQ-C-533a.
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors, relays and similar cylindrical components. Fastened to a circuit board by tabs.



Industrial Component Holders

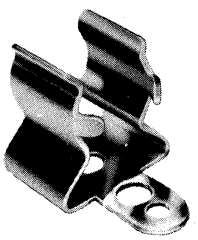
MATERIAL: spring steel S.A.E. 1065, .020 thick.

PLATING: commercial nickel, commercial nickel and vinyl coating
Designed for use in industrial and commercial applications.



No-Twist Clips

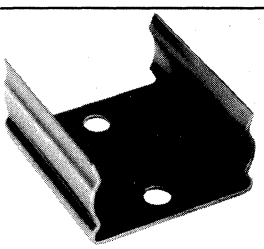
MATERIAL: spring steel, QQ-S-777a.
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed for holding capacitors and similar cylindrical components, without twisting.



Fuse and Resistor Holders

MATERIAL: phosphor bronze, QQ-B-750; beryllium copper, QQ-C-533a.

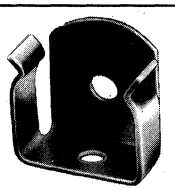
PLATING: silver, QQ-S-365a.
Finishes available silver plate.
Designed to hold fuses and ferrule-type resistors plus reduce heating by providing high contact pressure.



Crystal Clips

MATERIAL: spring steel, QQ-S-777a, spring steel S.A.E. 1065.

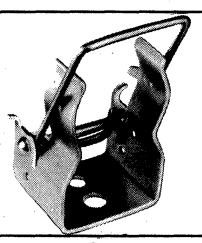
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to provide secure mounting for flattened elliptical components.



Transistor Clips

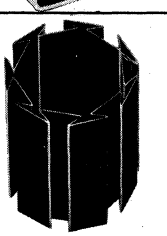
MATERIAL: beryllium copper, QQ-C-533a.

PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold transistors without depending on soldered leads and at the same time act as a heat sink.



Locking Clips

MATERIAL: spring temper phosphor bronze, QQ-B-750.
PLATING: silver, QQ-S-365a; cadmium, QQ-P-416a; nickel, QQ-N-290; Class II, Type VI.
Various finishes available.
Designed to hold a fuse, ferrule-type resistor or similar component against the most severe shock and vibration.



Heat Dissipating Liners

MATERIAL: beryllium copper, .002 thick per QQ-C-533a, heat treated.

FINISH: black matte
Designed to cool many types of components combined with different types of cooling methods.

ATLEE 10 BAYFIELD DRIVE, NORTH ANDOVER BUSINESS PARK, NORTH ANDOVER, MA 01845
(508) 681-1003 • TELEX #928252 • **FAX: (508) 686-2934**

Atlee manufactures a full line of Bus Bars Card Guides and Component Holders. For additional information, please contact the factory.

3SB750	3/4	250	3SB7	7	250
3SB800	8/10	250	3SB8	8	250

Listed by Underwriters' Laboratories through 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 3SB fuses, described as slow blow, are designed to prevent unnecessary blowing in circuits where transient surges are anticipated. Protection against short circuit or continued overload is still maintained. Pigtail leads (Type 3SBP) are available when direct soldering into circuits is desired.

3SF500	.500	250	3SF8	8	60
3SF630	.630	250	3SF10	10	60

Approved by SEMKO from 315 mA through 10 A.

Type 3SF fuses are designed to meet the electrical and mechanical requirements of IEC 127, CEE 4, Standard Sheet IV. They carry the SEMKO mark in the values specified as SEMKO approved. They are mechanically interchangeable with Type 3AG, the 1/4 x 1-1/4 normal blow fuse. However, since the fusing characteristics specified in IEC 127 and UL 198G are different, it is important that the designer carefully compare the blowing curves of the two types before substituting one for the other. They permit manufacturers of equipment built to United States/Canadian standards to substitute a fuse acceptable and available in the European market without changing board layouts or fuse mountings. Pigtail leads (3SFP) are available when direct soldering into circuits is desired.

TYPE 3WO/3WOP SLOW BLOW GLASS TUBE SERIES

5MF800	8/10	250	5MF7	7	125
			5MF8	8	125

Listed by Underwriters' Laboratory from 50 mA to 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 5MF fuses, described as fast acting are manufactured to meet the requirements of UL 198G and CSA 22.2. They permit European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MFP) are available when direct soldering into circuits is desired.

Listed by Underwriters' Laboratories from 50 mA to 5 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 5MT fuses, described as time lag offer additional surge protection for circuits where momentary transients are anticipated. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MTP) are available when direct soldering into circuits is desired.

Approved by SEMKO for 80 mA, 125 mA, and from 250 mA through 6.3A.

Type 5SF fuses, described as quick acting, low breaking capacity, are manufactured to the specifications of IEC 127, CEE 4, Standard Sheet II (Type F). Used throughout Europe, they carry the SEMKO mark in the ratings indicated. They are used for general circuit protection in electrical and electronic equipment where momentary transients are not anticipated. Pigtail leads (5SFP) are available when direct soldering into circuits is desired.

Listed by Underwriters' Laboratories from 50mA to 5 amperes and certified by CSA through 5 amperes.

Type 5TT fuses, described as slow blow, are designed to withstand higher surge currents occurring at switching during the normal life of equipment than the 5MT series. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration.

Pigtail leads (5TTP) are available when direct soldering into circuits is required.

bel BEL FUSE INC. 198 Van Vorst Street/Jersey City, NJ 07302/(201) 432-0463/TWX 710-730-5301/FAX (201) 432-9542

All Bel Fuse clips are manufactured from .020 phosphor bronze stock and specially hardened to assure long life and minimum contact resistance. They are bright tin plated to facilitate soldering and prevent oxidation. In addition to the stock designs illustrated, clips can be quickly tooled to meet customer specifications.

RAIL PACKAGING

CARLINGSWITCH CIRCUIT BREAKERS

VISI-ROCKER® CIRCUIT PROTECTION

Unique molded-in two-color rocker actuator indicates "tripped" mode when breaker is on or off (per illustrations) or series trip. 6-32 threaded mtg. inserts, push on .250 tab terminals. Rated @ 250 VAC/65 VDC. Series trip curve-34 (AC-DC type) trip point is 135%. UL listed and CSA certified.

All "B" and "C" series magnetic circuit breakers are UL listed and CSA certified. "B" series products are also certified by VDE under VDE registration number 2495 when the "product type" part ends in "D". "C" series products are designed in accordance with IEC and VDE requirements and are pending international approvals.

All products are of "A" series trip construction, with 6-32 threaded mounting inserts, dual "I-O/ON-OFF" markings on a black toggle actuator, and come with .250" tab (Q.C.) terminals on the "B" series, and 10-32 threaded stud terminals on the "C" series. All units are supplied with an all purpose medium, AC-DC delay curve #34, rated at 277 VAC/65 VDC with trip times as shown below.

CARLINGSWITCH CIRCUIT BREAKERS

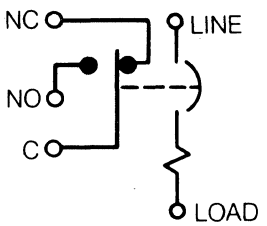
Circuit Options

Series Trip

A basic two (2) terminal device usually used as a combination power switch and overload protector. The contacts and current sensing coil are connected in series with the line and load terminals.

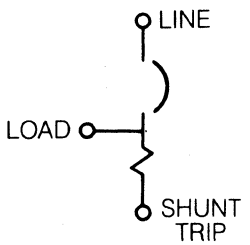
Series Trip with Auxiliary Switch

Same as "Series Trip" except with the addition of a SPDT snap-action switch which is *electrically isolated,* but *mechanically* linked to the movement of the main breaker contacts. Commonly used to remotely signal the status of the breaker (on or off/tripped).



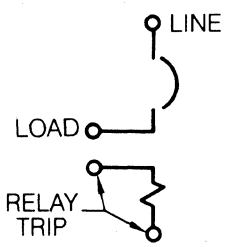
Shunt Trip

A three (3) terminal device similar to a "Series Trip" with the addition of a third terminal between the contacts and coil. This circuit is usually used to control two separate loads from the same power source, while sensing overload current in only one load.



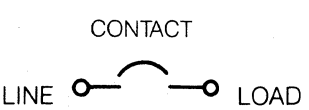
Relay Trip

A four (4) terminal device in which the contact and coil circuits are *electrically isolated* but are still *mechanically* linked to each other. An overload in the coil circuit will cause the contact circuit to open. Both circuits may be of opposite polarity to each other. Commonly used in "dump" circuit or "remote shut down" applications. (Note: World Approval Agencies may require an extra "Series Trip" pole for this function.)



Switch Only

Same as a "Series Trip" device without a sensing coil. Provides low cost, heavy duty switch capability when overload protection is not needed.



Note: The preceding circuits may be mixed on multi-pole units for special application requirements—(consult factory).

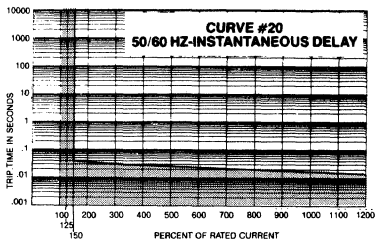
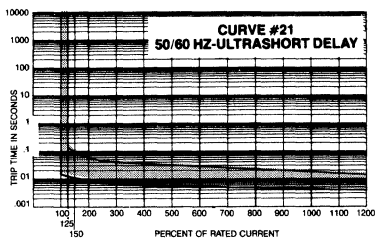
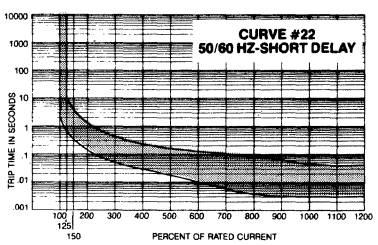
CARLINGSWITCH CIRCUIT BREAKERS

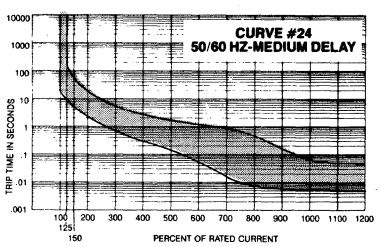
Time Delay Options

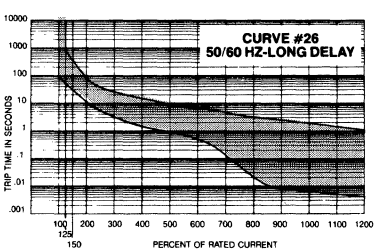
AC



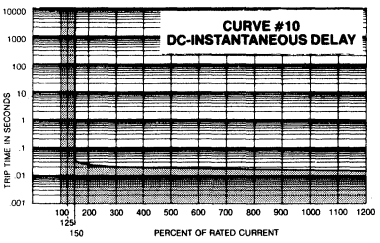


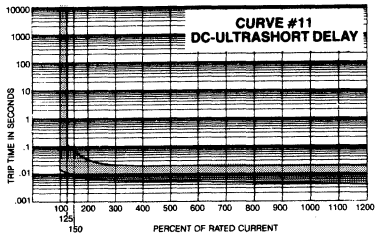


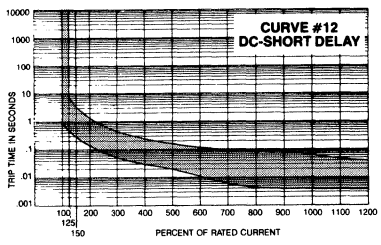


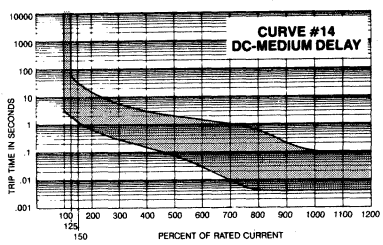


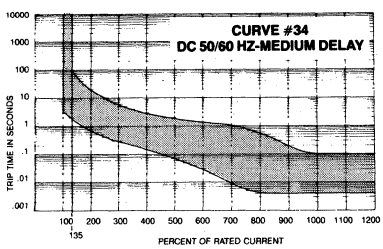
DC











Curve #34 is a combination AC/DC Time Delay Curve.

Notes:

High Inrush Time Delay Curves #42, 44, 46 are also available

Time Delay Curves (#11, 12, 14, 21, 22, 24 & 26):

Breakers must hold 100%, may trip between 101% to 125%, must trip at 125% of rated current and above within time limits shown in curves.

Time Delay Curve (#34):

Breaker must hold 100%, may trip between 101% to 135%, must trip at 135% of rated current and above within time limits shown in curve.

Instantaneous Curves (#10 & 20):

Breakers must hold 100%, may trip between 101% to 150%, must trip at 150% of rated current and above within maximum times shown in curves.

All Curves:

Curve data shown represents breaker response at ambient temperature of 77°F (25°C) with no preloading. Breakers are mounted in standard wall-mount position.

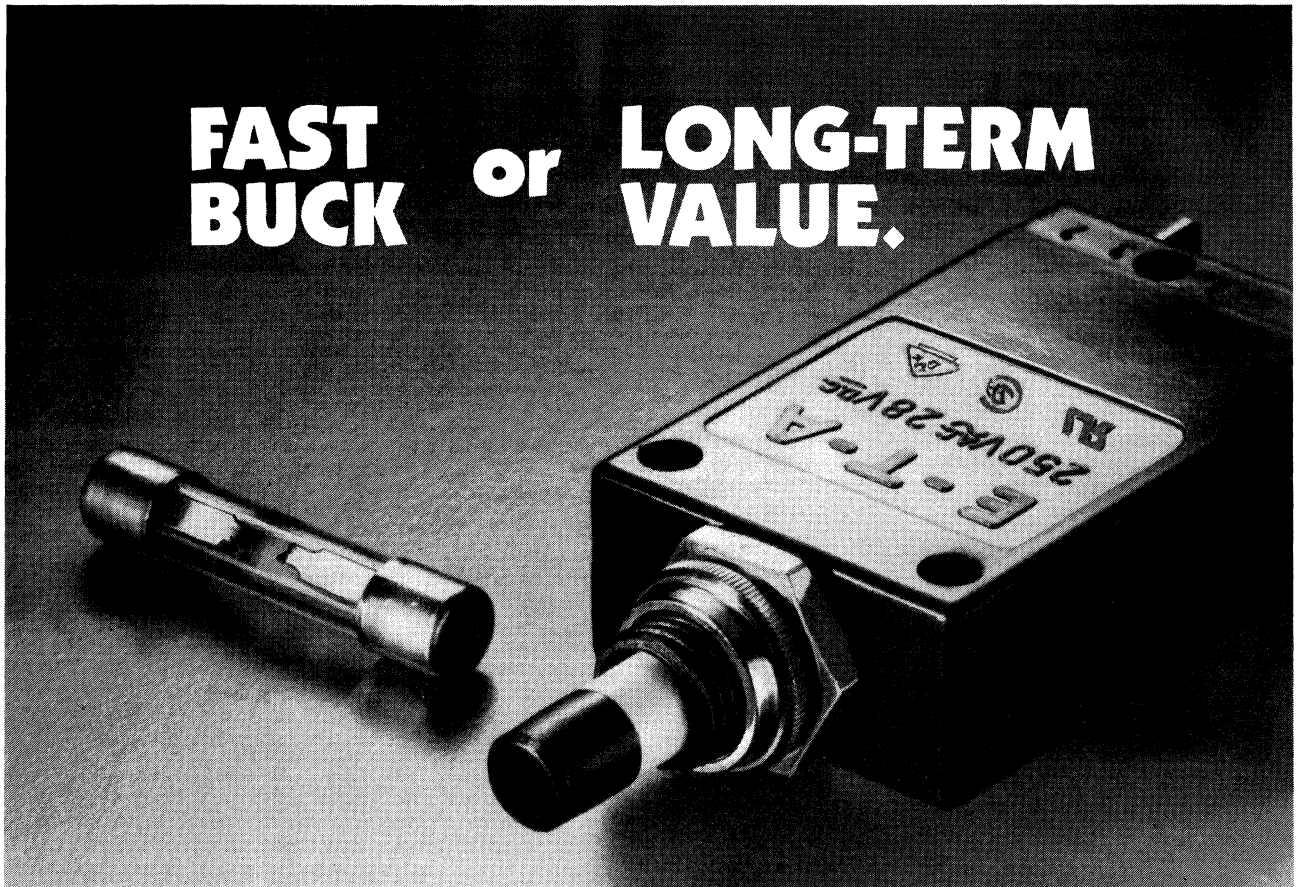
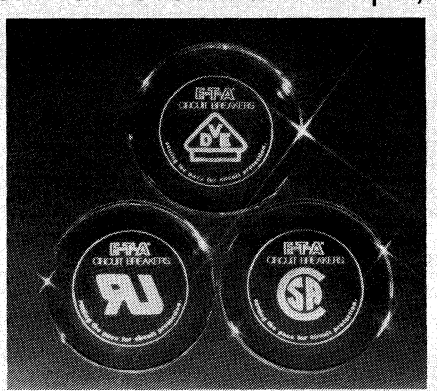
FAST BUCK or LONG-TERM VALUE.



If your only concern is initial cost, then fuses cost less than E-T-A circuit breakers. But beyond initial cost, there's reality. Fuses *blow* and can drive up your cost of warranties, service, replacement, even product liability.

E-T-A circuit breakers, on the other hand, add value to your product. Yet they can lower costs while providing superior circuit protection and better performance characteristics than fuses. For example, they're trip-free, foolproof, 100% tested for quality, and approved for use, worldwide.



So, forget the fast buck. Instead, go for the long-term value of E-T-A circuit breakers. Call today or circle the number below for specification details.

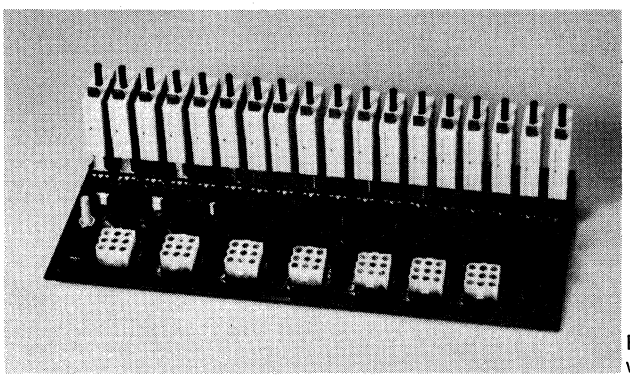
ELECTRICAL DISTRIBUTION CENTERS

E-T-A CIRCUIT BREAKERS and BERIFORS ELECTRONICS AB introduce state-of-the-art Electrical Distribution Centers for use in trucks, buses and construction equipment.

Advantages Offered:

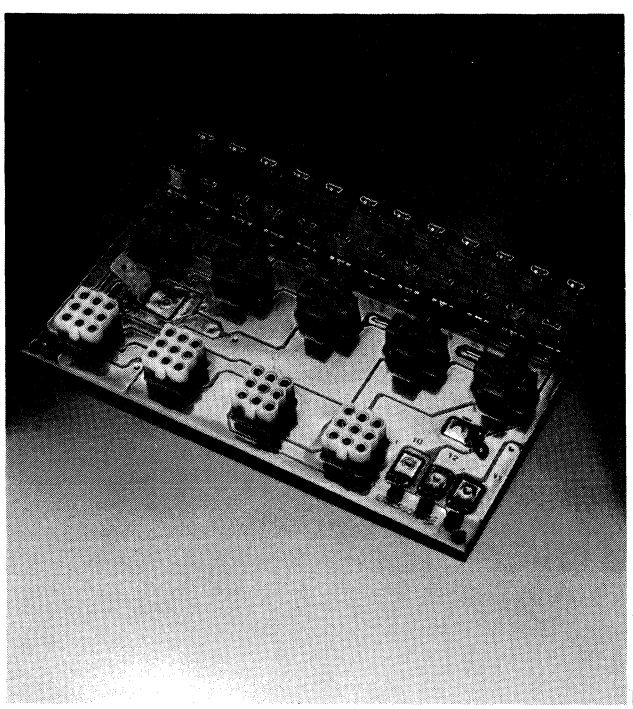
- Simple plug in installation
- ON-OFF switching for maintenance purposes
- 100% Tested
- Manual reset
- Standard versions (fits majority automotive applications)
- CUSTOM design (according to your specifications)
- Space savings
- Easy maintenance
- Proven reliability by design
- Fewer electrical connections
- Low weight
- Considerable cost savings



E-T-A GELC I has the following design specifications:
- 18 E-T-A full feature circuit breakers
- 8 Relays
- 7 9-contact connectors, AMP Mate-N-Lok

Dimensions: 290 mm x 140 mm (11.4 in x 5.5 in)
Weight of PC board: 390 grams (14 oz.)

E-T-A GELC I Distribution Center with E-T-A Circuit Breakers.



E-T-A GELC II has the following design specifications:
- 12 E-T-A full feature circuit breakers
- 5 Relays
- 4 9-contact connectors, AMP Mate-N-Lok

Dimensions: 200 mm x 140 mm (7.9 in. x 5.5 in.)
Weight: 250 grams (9 oz.)

Technical Data: The printed circuit boards are 1.6 mm of reinforced epoxy laminate, both sides of the board having a layer of copper 135μ thick including tin plating. Four-layer boards are used in cases where numerous control functions must be accommodated on relatively small surface areas, thus making the PC board even smaller. Plating extends fully through all drill holes in the boards. Fully automated production methods are in place for quantity runs. All PC boards are fully computer tested before the protective coating is applied. Modern production processes guarantee long-term reliability in most rigorous automotive environments.

E-T-A GELC II Distribution Center.

Commercial & Military Approved Panel Mount Fuseholders

- Superior Clip Design for Solid Fuse Contact
- UL Recognized & C.S.A. Certified
- Most Commercial Models are recognized under the Marine Electrical and Fuel System (PEQZ2) as "Ignition Protected Devices"
- Blown Fuse Indicating & Non-Indicating
- High Impact Plastic for Superior Strength
- Dead-Front, Watertight
- Military Versions Meet MIL-F-19207

Commercial Fuseholders

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $2.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

HEINEMANN® Circuit Breakers First in Features, First in Quality

Heinemann offers the widest choice of styles and current ratings in high-quality, reliable circuit protectors. Ratings range from 0.01A to as high as 700A. Their applications are as diverse as medical equipment, computers, industrial air conditioners, electric locomotives and telecommunications equipment.

Heinemann can also supply circuit breakers that provide auxiliary functions. For example, a heavy-duty relay, an on/off switch and a hydraulic-magnetic circuit breaker, all in one economical and compact unit.

Use this condensed guide to locate the type of circuit breaker that best meets your requirements. Then write or call us for a copy of the appropriate product bulletin containing detailed specifications and ordering information. Or call one of our technical assistance engineers to dicuss your particular application.

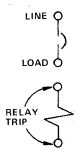
Technical assistance, important features and quality products...three reasons why it pays to look to Heinemann "When your reputation's on the line."

SPECIAL-FUNCTION CIRCUITS

Heinemann circuit breakers (except for PS1, KD, TX and Hector) can be furnished with a number of special-function internal circuits. They permit a single protector to perform the protection and control functions of several components.

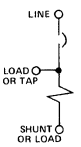
RELAY-TRIP

Permits remote actuation using a separate control circuit. Electrical isolation allows use of a different current or voltage from contact circuit. Both time delay and non-time delay constructions are available.



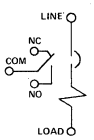
SHUNT/TAP

Use of third terminal permits remote tripping by utilizing line voltage with or without a time delay response. On breakers rated up up to 1A, the trip point may be raised by shunting with an external resistor on the shunt/tap terminal.



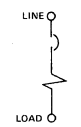
AUXILIARY SWITCH

Used for logic functions, alarms, lights and other circuits. Miniature snap-action SPDT or DPDT switch is mounted on the back of the breaker, mechanically connected to the switching mechanism. Contact capacity: 10A at 125/250 V, 50/60 Hz; 4A resistive at 30 Vdc; 2.5A inductive at 30 Vdc. Minimum operating voltage 6 Vdc or ac, at 3 VA dc or ac.



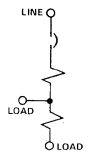
SERIES TRIP (Standard internal circuit)

Ideal for use as both power switch and overload protector. Usually installed in series with line and load terminals to provide circuit interruption in the protected circuit.



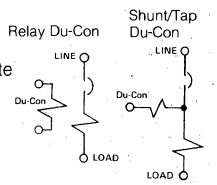
DUAL RATING

Two concentrically-wound sensing coils provide two discrete current ratings in the same breaker. Protects equipment designed to operate at two different current levels or supply voltages within certain limitations.



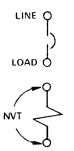
DU-CON™ (DUAL-CONTROL)

Provides sensing of both overcurrent and separate voltage signals in the same pole through a small, non-continuous-duty voltage sensing coil. DU-CON overload and voltage coils must be specified separately.



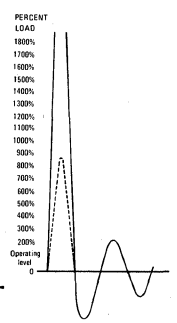
NO-VOLTAGE TRIP

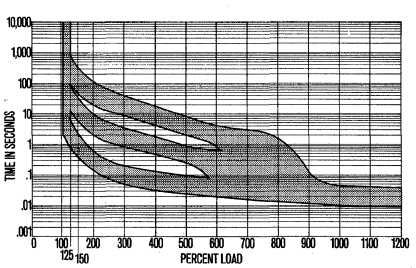
Prevents uncontrolled re-start of equipment after power outage. Used in ground-fault interrupters and other safety applications. Not intended for overload protection without one pole connected in series-trip configuration.



HIGH-INRUSH

Economical protection of high-reactance loads, which draw starting surges often as high as 30 times normal load current in a 50/60 Hz 1/2-cycle pulse, such as ferro-resonant power supplies and distribution transformers. Eliminates nuisance tripping without derating or special circuitry.





Typical Time Delay Curves

Circuit breakers are available in a variety of time-delay curves for applications such as high-inrush, 50/60 Hz and dc as well as with no intentional delay.

When your reputation's on the line

HEINEMANN® Circuit Breakers First in Features, First in Quality

	PS1 FUSE-SWITCH	RE-CIRK-IT® SERIES KD1	TYPE TX	HECTOR
					Fuse-Switch provides ON/OFF control and fuse protection in a single low-cost component. Its use eliminates a hole and interconnecting wiring and makes it easy to re-fuse from the front panel. It accepts standard 1/4-inch diameter by 1¼-inch fuses. An adapter is available for 5 mm x 20 mm fuses. Can be supplied for normally open or normally closed operation.	A low-cost, pushbutton supplementary protector for electrical equipment, designed to fit in a standard 5/8-inch round or "D" fuseholder panel cutout. Resettable at up to 1000% of its rated current from 2.5A through 15A, 500% from 0.25A through 2A. Slide-on retaining ring included.	The attractively designed Type TX circuit protector doubles as an economical ON/OFF switch and with an optional lamp as a power indicator. Rocker arms available in a variety of colors; in one and two pole models. Its trip free design cannot be held closed against a fault. Features quick-connect terminals and snap-in mounting.	A low-cost fuse eliminator for the protection of electronic equipment and high-inrush circuitry from 4A to 20A. Its trip-free design prevents the contacts from being held closed manually during an overload condition. Supplied with mounting nut and faceplate reading "PRESS TO RESET." It has 1/4-inch quick-connect terminals that are also solderable.
APPLICATIONS	Consumer and industrial products that would otherwise use a separate ON/OFF switch and fuse holder.	Consumer and industrial products, office machines, appliances, power supplies, convenience outlets, electronic games.	Commercial and consumer products, power supplies, medical electronic equipment, office and reproduction equipment, data processing equipment.	Consumer and commerical electronic equipment, appliances and high-inrush circuitry.

HEINEMANN® Circuit Breakers First in Features, First in Quality

SERIES HM	SERIES L	SERIES J/S	SERIES AM	SERIES AM-MIL
				Lightweight, subminiature, multi-frequency circuit breaker designed to withstand severe environmental extremes such as shock, vibration and high humidity. Housed in a corrosion-resistant brass case, nickel plated. Meets MIL-C-39019, is explosion- and fungus-resistant, operates in any position. Silver contacts provide good conductivity with low power loss.	This compact hydraulic-magnetic circuit protector provides the same quality, precision and choice of time delays found in larger Heinemann magnetic circuit breaker. Over-the-center, non-teasable mechanism provides snap-action operation that prolongs contact life by reducing arcing. Handles available in seven different colors for decorative or circuit-identification purposes.	Compact, lightweight, moderately-priced circuit breaker for single or multi-pole OEM applications. Also available with snap-in mounting or rocker handles. Sealed mount models are also available, single pole only. Series J/S breakers are suitable for domestic or world-market applications. Models also available for marine applications.	A low-cost, lightweight breaker available in single or multi-pole configurations, the Series AM features rear-connection studs, a high level of moisture resistance, and a current range up to 100A dc or 60A ac. Qualified under MIL-C-55629 to 50A dc and ac.	Heinemann Series AM-MIL breakers are specifically built and tested in accordance with the requirements of MIL-C-55629. Fungus- and moisture-resistance is provided by treating all ferrous parts with a special finish, and by using special springs and inherently fungus-resistant phenolic cases, covers and handles.
Military programs and commercial products, power supplies, mining and medical applications where hermetically-sealed circuit protection is required.	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment).	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment), control panels, marine equipment, field instrumentation.	OEM (data-processing equipment, mobile applications, humid environments).	OEM (data processing equipment, mobile applications, military equipment subject to humid, tropical environments).

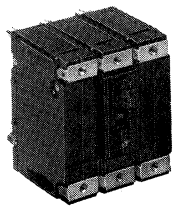
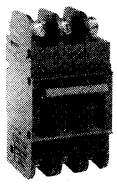
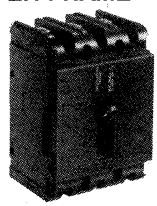
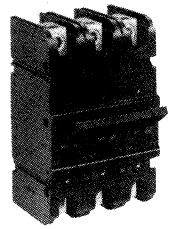
HEINEMANN® Circuit Breakers First in Features, First in Quality

SERIES AM/S	SERIES CF E-FRAME	SERIES GH EH-FRAME	SERIES GJ	SERIES GJ1P
				








Series AM/S "world class" circuit breakers meet International Standard IEC 380 and German Standard VDE 0730. The 8-mm spacing requirement and dielectric-withstand specification are incorporated into the standard AM breaker housing without changes in size, thereby eliminating mounting procedure modifications or the need for adapter plates.	Priced considerably lower than competitive E-frame breakers, the Series CF is the most compact and versatile circuit breaker available for equipment and branch-circuit protection. Single- and multi-pole models are stocked in a wide range of standard ratings for fast, off-the-shelf delivery.	This rugged new EH-frame breaker offers all the advantages of a completely magnetic, three-pole breaker with 14,000A interrupting capacity for less than most thermal units. Compact, environmentally stable and to 100A at 480 Vac and 250 Vdc.	Where space is at a premium and current capacity up to 250A is called for, the Series GJ is the answer. Available in one-, two-, or three-pole models, it is especially suitable for panelboards, service entrances, and electric vehicles.	GJ1P parrallel-pole breakers incorporate Precision Current Equalization (PCE) to automatically distribute current equally through the current-sensing elements. PCE thereby minimizes nuisance tripping which can occur with conventional parallel-pole breakers. An optional shunt permits metering of current. Since shunt output is only 25 mv, light-gauge wiring can be used between shunt and meter.
OEM (data processing equipment, mobile applications, humid environments).	Panelboards, switchboards, branch circuits, EDP equipment, machine tools, environmental systems, single- and three-phase applications.	Motor controls, air conditioning, electric heating, computer main frames, transportation, indoor or outdoor installations.	Commercial, industrial, and residential service — entrance or panelboard applications; lighting, appliance, transformer, electric vehicles, EDP power supplies, heating, air conditioning, and electronic circuit protection.	Telecommunications, transportation, air conditioning, other outdoor "heat-loaded" equipment.

The Lightning Arrester

Special features
- High reliability and maintenance-free
- Fast surge voltage response speed
- Small static capacitance.
- Compact and light weight. Available in various models/types.
- Long life and inexpensive.

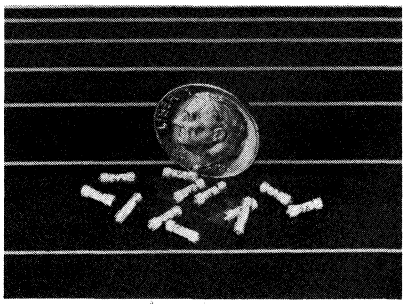
CIRCUIT PROTECTION DEVICES

SUBMINIATURE SURFACE MOUNT NANOFUSE™



- Design compatibility for surface mount applications.
- Reduced subminiature size for compact board layouts.
- Supplied on 12mm tape and reel for use with automatic placement equipment per EIA Standard 481.
- Designed to meet a wide variety of electrical and environmental MIL specifications for more demanding applications.

Opening Time: 100%, 4 hrs. min. 200%, 1 sec. max. (1/16-5A), 5 sec. max. (7-10A), 20 sec. max. (12-15).
Interrupting Rating: 300A D.C. and 50A A.C. at rated voltage.
Approvals: U.L. Recognized and Certified by C.S.A.

PICO II™ SUBMINIATURE FUSES

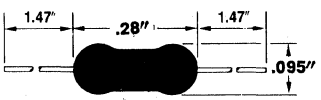
- World's smallest axial lead fuse for use in micro electronic circuits including computer and aerospace applications.
- Available on tape and reel.
- Low resistance values.
- Hi-speed action.
- Epoxy coated body for protection against environmental conditions.
- Withstand axial pull of 7 lbs.
- Available with or without color-coding per I.E.C. standards.
- Interrupting rating of 300A D.C. and 50A A.C. at rated voltage.

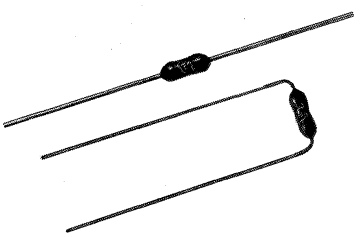
ENVIRONMENTAL CHARACTERISTICS

- Operating ambient temperature range:
  −55°C to 125°C
- Current carrying capacity:
  −55°C = 110% of rating
  25°C = 100% of rating
  125°C = 80% of rating
- Withstand vibrations of 10-55 Hz per method 201 of MIL-STD-202 and vibrations of 55-2000 Hz at 10 G's per method 204 test condition C of MIL-STD-202.
- Withstand shock of 100 G's for 6 milliseconds per method 213 test condition I of MIL-STD-202.

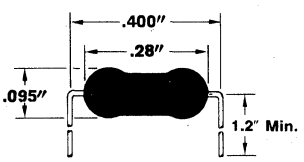
Opening Time: 100%, 4 hrs. min.; 200%, 1 sec. max. (1/16-7A) 3 sec. max. (10A) 10 sec. max. (12-15A).
U.L. Recognized and Certified by C.S.A. through 15 amperes.

251 Series - Axial Leads





252 Series - Radial Leads



Note: Leads are solder-coated copper, .025" diameter for 1/16-10A, .032" diameter for 12-15A.

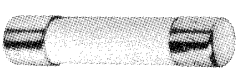
3AB CERAMIC SLO BLO® FUSES (250V or less) ¼" x 1¼"



Similar to 313(000) series above, but have higher interrupting rating.

Opening Time: 110%, 4 hour min.; 135%, 1 hour max.; 200%, 5 sec. min.; 30 sec. max.

U.L. Listed 1/100 - 10 amps.
U.L. Recognized 12-30 amps.
CSA Certified 1/4-10 amps.
Patents: U.S. Patents 4,409,729 and 4,445,106.

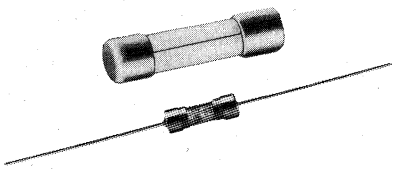
Littelfuse®

CIRCUIT PROTECTION DEVICES

2AG SUBMINIATURE FUSES



Size .177" dia. × .58".

FAST ACTING TYPE

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max.; 200%, 1 sec. max.

Interrupting Rating: 1/10-1 amp — 10,000A (125V); 35A (250V). **1.5-3.5 amp** — 10,000A (125V); 100A (250V). **4-10 amps** — 10,000A (125V).

Approvals: U.L. Listed and Certified by C.S.A.

PATENTS: U.S. Patent 4,636,765

SLO-BLO® TYPE

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max.; 200%, 3 sec. min./20 sec. max.

Interrupting Rating: 1/4-1 amp — 10,000A (125V); 35A (250V). **1.5-3.5 amps** — 10,000A (125V); 100A (250V). **4-7 amps** — 400A (125V).

Approvals: U.L. Listed and Certified by C.S.A. thru 3.5 amps. U.L. Recognized 4-7 amps.

PATENTS: U.S. Patent 4,409,729 and 4,445,106.

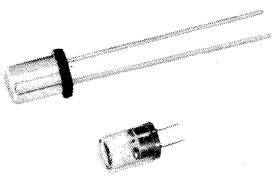
Note: To order fast-acting fuses with axial leads, change **225** to **224**; to order Slo-Blo® fuses with axial leads, change **229** to **230.**

MICROFUSE SUBMINIATURE FUSES (125V)



Designed for applications where space is a critical factor. Ideal for installation on printed circuit boards. Interrupting rating — 125 volts at 10,000 amperes A.C. and D.C.

Opening Time: 100%, 4 hour min.; 200%, 5 sec. max. (1/500-3/10A). 2 sec. max. (4/10-5A).

Size: 1/4" dia. × 11/32" (fuse body).

U.L. Recognized and Certified by C.S.A.

Plug-in, transparent cap type listed. Use prefix **272** for plug-in, metal cap; prefix **279** for radial leaded, transparent cap; prefix **278** for radial leaded, metal cap.

PATENTS: U.S. Patent 3,110,787.

Littelfuse®

CIRCUIT PROTECTION DEVICES

KLK FUSES (600 VAC) 13/32" × 1 1/2"

Fast-acting, current limiting fuses for use in control electronic and other circuits with high fault current capacity. DC version available.

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max. 200%, 2 sec. max. (1/10-4A) 15 sec. max. (5-12A) 2 min. max. (15-30A).
Interrupting Rating: 100,000 amperes AC. Capable of 200,000 amperes A.C.
U.L. Listed 3/10 - 30 amperes.
C.S.A. Certified 3/10 - 30 amperes.
PATENTS: U.S. Patents 4,563,809 and 4,656,453.

BLADE TYPE TERMINAL FUSES (32V) (ATO®)

Low voltage plug-in fuses. Color coded for amperage identification.

Opening Time: 110%, 100 hours min.; 135%, 1800 sec. max.; 200%, 5 sec. max. 350%, .02 sec. min. (1-2A), .08 sec. min. (3-30A) min. **Size:** .75" wide × .75" high × .207" deep.
U.L. Listed 3 - 30 amps.
PATENTS: Sixteen worldwide. U.S. Patent 3,909,767.

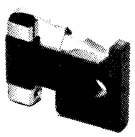
ALARM INDICATING FUSES (125 VAC, 60 VDC)



Plug-in fuses for telecommunications and similar applications. Blown fuse indicating flag can also activate alarm circuit. Flag is color-coded by ampere rating.

Opening Time: 100%, 10 minutes min.; 150%, 5 minutes max.
U.L. Recognized at 60 VDC, 125 VAC

SCREW TERMINAL FUSE BLOCKS

Open type blocks available for 3AG and Midget (13/32" × 1-1/2") fuse sizes from one to twelve poles. Bases are of grade X black laminate with 1/32" insulator sheet cemented to underside. Screw terminal clips.

Mounting Hole: 3AG — .142"/.147" dia. with .295"/.302" by 82°CS. **Midget** — .171"/.176" dia. with .342"/.349" × 82°CS.
Clip Material: 356 Series — Nickel Plated Spring Brass. **359** and **556** Series — Silver plated Beryllium Copper.
Size: Width: 2-3/8" (3AG), 2-3/4" (Midget). See chart for length dimensions. **356 Series and 556 Series are Recognized under the Components Program of Underwriters Laboratories.**

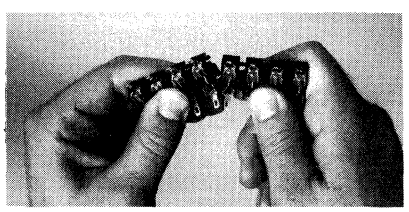
For 3AG block with silver plated beryllium copper, change series number to **359.**

2AG OMNI FUSE BLOCK



ELECTRICAL SPECIFICATIONS:
- 10 amps at 300 volts.
- Minimum dielectric - 1,500 volts RMS

MATERIALS:
Clip Terminals: Solder or Quick-connect, tin-plated, spring brass.
Base: Thermoplastic, glass reinforced. (Black standard) UL94V0 flammability rated.
Approvals: UL Recognized and Certified by CSA.

Catalog Number			
Solder Type Terminals	0.110" Q.C. Terminals	Number of Poles	Overall Width (B)

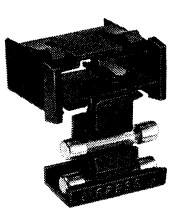
FLIP TOP SHOCK-SAFE PANEL MOUNT FUSEHOLDER #346877 FOR 3AG. (#286377 FOR 2AG, #286677 FOR 5x20mm)

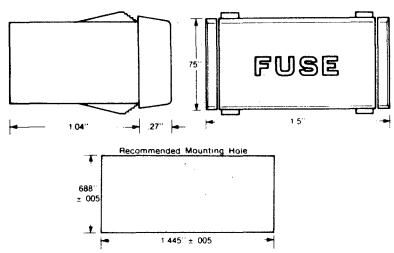
FUSE CARRIER HOLDS SPARE FUSE



Shock-Safe design eliminates any possibility of electrical shock, per IEC Standards 257 and 65. Fuse carrier holds spare fuse for fast, easy fuse replacement and convenient servicing. Low profile design complements modern panels.
APPROVALS: Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

SPECIFICATIONS:
Electrical Rating: See Approvals.
Insulation Resistance: 10,000 megohm minimum at 500 VDC.
Contact Resistance: Less than .01 ohm.
Dielectric Strength: 1,500 volts minimum.
Mounting: Snap-in mounting. No hardware required. Panel thickness = .032"/.125".
Molded Parts: Thermoplastic, 94V0 black standard (other colors available as special).
Fuse Carrier: Springloaded. Unlocks with a press of the finger. Locks into place to prevent accidental circuit interruption. Permanently attached to fuseholder body to prevent loss. Extracts fuse from live terminals.
Terminals: Copper alloy, tin plate. Accept .250" x .032" quick-connect or solder. .072" dia. hole.
Ambient Temperature: −40°C to +85°C.

Vibration: 10-55-10 Hz at .06 double amplitude (Method 201, MIL-STD-202).
PATENTS: U.S. Patent 4,543,557.



Note: Dimensions differ for 2AG and 5x20 styles.

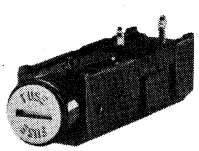
P.C. BOARD SHOCK-SAFE FUSEHOLDERS FOR 3AG OR 5x20MM FUSES



Similar to shock-safe fuseholders shown above but designed for p.c. board mounting. Shock-safe design per IEC Standards 257 and 65. Two different knob styles available for use with ¼" x 1¼" or 5 x 20mm fuses.

SPECIFICATIONS:
Electrical: Rating See APPROVALS.
Insulation Resistance: 10,000 megohm minimum at 500 VDC.
Contact Resistance: Less than .005 ohms average at a current of one ampere.
Dielectric Strength: 4000 volts minimum.

Mounting: Intended for soldering to printed circuit boards.
Molded Parts: Body Material: Black glass-filled thermoplastic. Knob Material: Grey or black glass-filled thermoplastic.
Knob: Screwdriver slot, fuse extractor type with nickel-plated copper alloy insert. Spring-loaded, bayonet style.
Terminals: Brass. Tin-plated.
Ambient Temperature: −40°C to +85°C.

APPROVALS: Recognized under the Components Program of Underwriters Laboratories (16A, 250V)
Certified by CSA (15A, 250V).
SEMKO approved (6.3A, 250V). VDE approved (10A,250V).

L.F. No.	
1/4" x 1-1/4 FUSES	5mm x 20mm FUSES

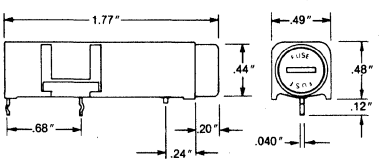
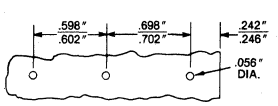
Body only: #345101-010
Knob only: #345101-020 (¼" x 1¼") #345121-020 (5 x 20mm)



Recommended Hole Pattern



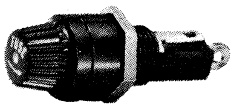
NOTE: Knobs are color-coded; grey for 1/4" x 1-1/4" fuses, black for 5 x 20mm fuses.

Littelfuse® CIRCUIT PROTECTION DEVICES

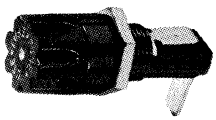
3AG FUSEHOLDERS WITH SOLDER TYPE, 3/16" OR 1/4" QUICK-CONNECT TERMINALS

Extend only 1" behind panel. **UL Recognized and Certified by CSA.**

KNURLED KNOB



FLUTED KNOB



SPECIFICATIONS

Electrical: Rated at 20 amperes for any voltage up to 250V. Dielectric withstanding voltage exceeds 2400 volts.

Mounting: Withstands 15 pound/inch (1.69Nm) mounting torque. Maximum panel thickness 18" (4.8).

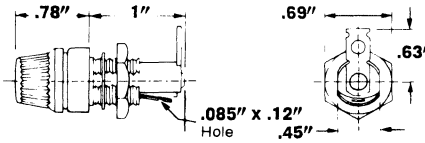
Molded Parts: Black thermoplastic.

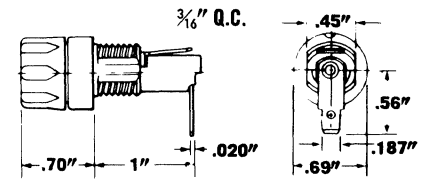
Knob: Bayonet style with white lettering.

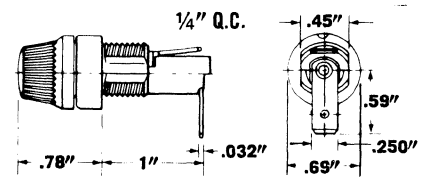
Copper and Copper Alloy Terminals: Tin plated except 1/4" quick connect terminals are nickel plated.

Hardware: Standard fuseholders supplied with a neoprene washer and a hex nut unassembled. Lockwasher (L) and drip-proof seal (P) variations available by adding appropriate suffix letters (L, P or PL) to catalog number.

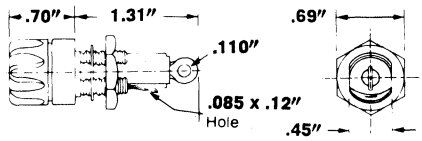
Right Angle Terminal
SOLDER

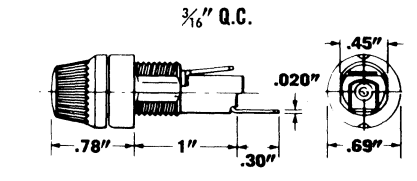


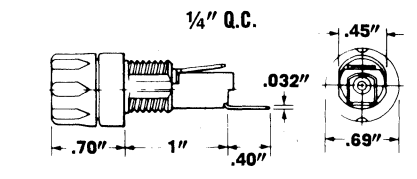




Straight Bottom Terminal
SOLDER







RIGHT ANGLE TERMINAL

Fluted Knob	Knurled Knob	Type of Terminal

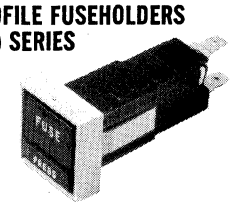
342828	342848	1/4" Q.C.

STRAIGHT BOTTOM TERMINAL

Fluted Knob	Knurled Knob	Type of Terminal
342014	342012	Solder
342038	342058	3/16" Q.C.
342838	342858	1/4" Q.C.

LOW PROFILE FUSEHOLDERS 348 (000) SERIES



Snap into panel. Eliminate need for mounting hardware. Square cap design and choice of cap and bezel colors. 3/16" or 1/4" Q.C. terminals. **U.L. Recognized and Certified by CSA.**

SPECIFICATIONS

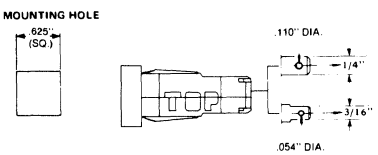
Molded Parts: Body-Black Thermoplastic. Cap-High temperature thermoplastic.

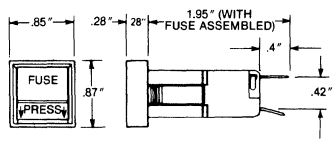
Terminals: One piece-brass-Electro-tin plated.

Electrical Characteristics: Rated at 15 amps for any voltage to 250. Dielectric withstanding voltage between terminals and terminals to ground at room temperature and 90% R.H. exceeds 1,500 volts.

Patents: U.S. Patent 3,659,252.

Mounting: .625" sq. hole in 1/32" through 1/8" thick chassis panel.





Mounting Hole: .625" square

HOW TO ORDER LOW PROFILE FUSEHOLDERS

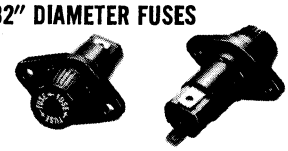
The six digit catalog number is a coded description of the finished unit. To specify type required, select appropriate code numbers from chart below. To order a cap assembly only for 3AG fuses, use **348** series numbers and insert a "0" in the terminal style and bezel color locations. To order a body assembly only, use **348** series number and insert a "0" in the cap color location.

SIX DIGIT CATALOG NUMBERS CONSIST OF

Series No.	Terminal Style	Bezel Color	Cap Color
348 For 3AG Fuses		1 Red	1
		2 Green	2
		3 Yellow	3
		4 Blue	4
	6 3/16" Wide Terminals	5 White	5
	8 1/4" Wide Terminals	7 Black	7
		9 Grey	9

For example: 348615 is a holder with 3/16" terminals, red bezel and white cap.

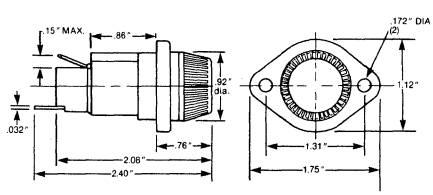
PANEL FUSEHOLDER FOR 13/32" DIAMETER FUSES

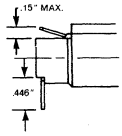


Recessed side terminal for additional shock-safe characteristics. **U.L. Recognized and Certified by CSA.**

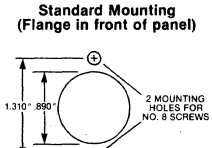
Catalog Number		Bottom Terminal	Fuse Length Range*
Standard	Watertight		
571 027 571 028	571 027P 571 028P	Straight Rt. Angle	$1^{5}/_{16}$" - $1^{3}/_{8}$"
571 007 571 008	571 007P 571 008P	Straight Rt. Angle	$1^{13}/_{32}$" - $1^{1}/_{2}$"

*Fuse diameter is $^{13}/_{32}$"





Standard Mounting (Flange in front of panel)



SPECIFICATIONS

Molded Parts: Black Thermoset.

Knob: Screw type, with engraved markings: Unfilled characters (571007, 571007P, 571008, 571008P), light blue characters (571027, 571027P, 571028, 571028P).

Terminals: Brass, tin plated. Combination solder/1/4" quick-connect. Side terminal has .125" diameter hole. Bottom terminal has .156" x .124" elongated hole.

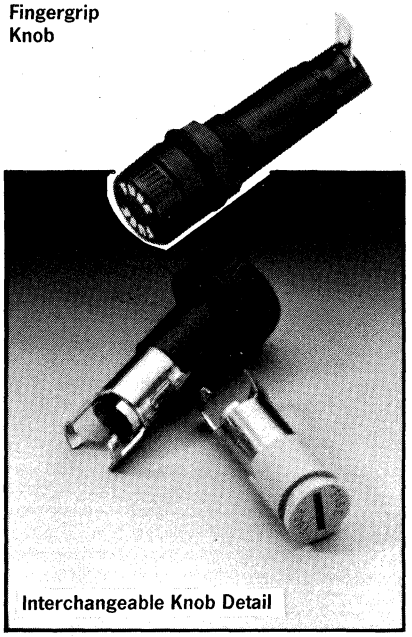
Mounting: Flange mounting either in front of or behind panel. Watertight version must be front panel mounted. Maximum panel thickness is .75".

Electrical Characteristics: Rated at 30 amps for any voltage up to 600. Dielectric withstanding voltage greater than 2400V.

Littelfuse® CIRCUIT PROTECTION DEVICES

INTERNATIONAL SHOCK-SAFE FUSEHOLDER

Low Profile
Fingergrip
Knob



Interchangeable Knob Detail

FEATURES:

- Designed to eliminate the possibility of electrical shock, as defined in IEC standards 65 and 257.
- Universal fuseholder body will accept 3AG, 5 × 20mm, and 2AG fuse sizes depending on knob selected. Permits inventory reduction of bodies and provides knob interchange versatility.
- Available with two knob styles—screwdriver slot or fingergrip. Drip-proof option is available on screwdriver slot knob style.
- Available in three terminal styles—dual-purpose for soldering or 3/16" quick connect; 3/16" NEMA quick connect; and 1/4" NEMA/DIN quick connect.

APPROVALS:

- 1 — 3/16" (Rt. Angle) Dual Purpose Solder/QC
- 2 — 3/16" (Straight) Dual Purpose Solder/QC
- 3 — 3/16" (Rt. Angle) NEMA QC
- 4 — 3/16" (Straight) NEMA QC
- 7 — 1/4" (Rt. Angle) NEMA/DIN QC
- 8 — 1/4" (Straight) NEMA/DIN QC

Options*

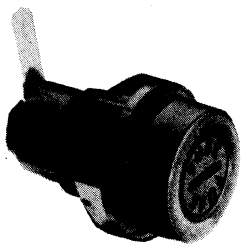
- L — Lockwasher
- N — Neoprene Washer
- P — Drip-Proof "O" Ring**

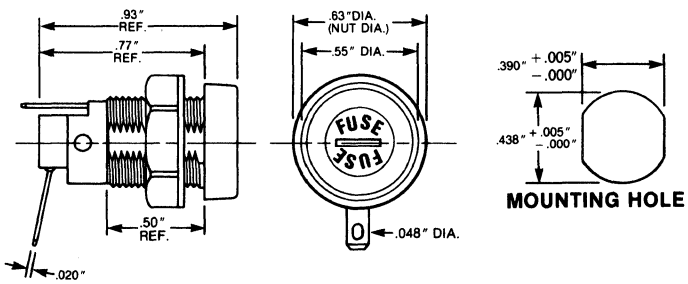
*Options (L,N,P) can be ordered individually or in combination.

**Screwdriver slot knob only.

Littelfuse® CIRCUIT PROTECTION DEVICES

2AG STANDARD PANEL MOUNT SHOCK-SAFE FUSEHOLDER

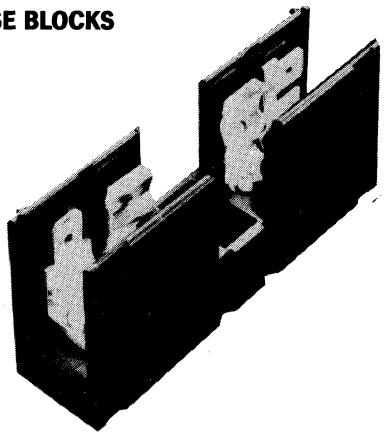


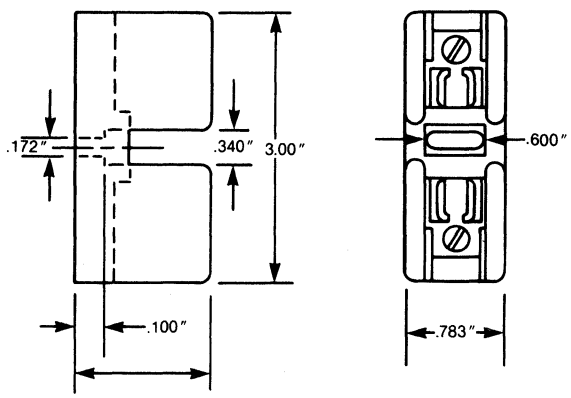


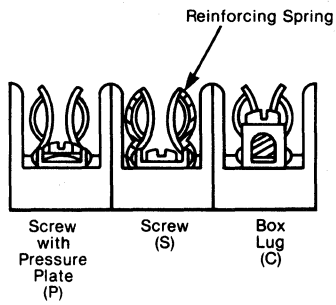
245 001 Solder/Q.C. Terminal
245 002 NEMA Q.C. Terminal

- Shock-safe design eliminates possibility of electrical shock, per IEC standards 65 and 257
- Additional hardware available by adding appropriate suffix to catalog number
- Rated at 10 amperes at any voltage up to 300 volts
- Popular screwdriver slot-knob style provides low profile which complements modern panels
- Dielectric strength of 4,000 volts minimum
- Temperature range of −40°C to +85°C
- Body, knob, and hex nut are glass reinforced thermoplastic with UL-94V0 flammability rating
- Solder type or NEMA quick-connect type terminals made of tin-plated brass
- Recognized under the Components Program of Underwriters Laboratories and Certified by CSA
- Withstands 10 lb.-in. mounting torque
- Patented

MIDGET FUSE BLOCKS







Space-saving, 600 volt, with side barriers for isolation. For use with $^{13}/_{32}$" × $1^{1}/_{2}$" midget fuses which are used in the protection of control devices, lighting circuits, motors and computers. Available in 1, 2, and 3 pole ganged configurations. By sliding and locking blocks together, any number of poles can be achieved.

APPROVALS: Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

SPECIFICATIONS:
Electrical: Screw terminal and box lug terminals rated for 30 amperes. Q.C. terminals rated for 20 amperes.
Dielectric Strength: 1200 volts minimum.
Clip/Terminals: Tin-plated copper alloy.
Box Lug: Copper.
Base: Thermoplastic. UL 94V0 flammability rating.
Ambient Temperature: 105°C maximum.

PATENTS: Patented.

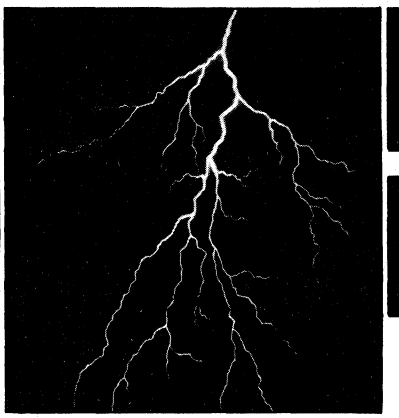
AC POWER LINE PROTECTOR

SPA/SPB/SPC SERIES



PROTECTS SENSITIVE EQUIPMENT FROM DAMAGING TRANSIENT OVERVOLTAGES!

Lightning and power line transients surge along AC power lines producing costly damage to computers, medical equipment and other sensitive electrical devices. Prevent these malfunctions and downtime with a reliable, maintenance-free SP Series AC power line protector.

Operating in nanoseconds, the SP series will vigorously clamp lightning and transient overvoltages on the AC line to safe levels whenever the clamping threshold is exceeded. After each transient, the protector recovers automatically—without power interruption. The use of redundant protection elements virtually guarantees no "downtime."

How to Choose the Proper Protector Size

A surge of voltage running into a facility will dissipate by subdividing throughout the building's power distribution system.

The capability of a surge suppressor is determined by its intended location. At the point of entry, the energy contained in a surge is at maximum. Fanning out on its journey through the system, it will offer less magnitude to each branch panel encountered. Finally, the least amount of damaging potential will be experienced by the local panels and outlets deep in the system.

The SP Series is designed to make the selection of a model not only easy, but also provide the best choice of protection versus cost.

Main Service Panel Protector—SPC Series

To keep damaging overvoltages from entering the building, choose the heavy-duty SPC series. These shunt connected protectors vigorously clamp high energy transients with a sophisticated combination of high speed and brute force MOV's. An SPC installed at the main service panel is your most cost-effective solution to protecting the facility's AC lines.

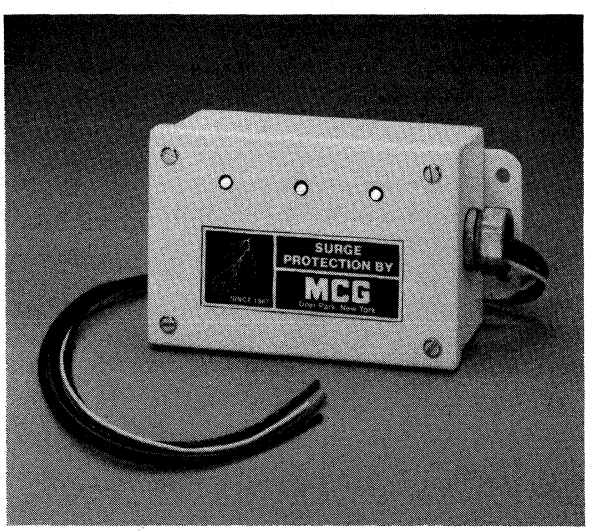
Branch Panel Protector—SPB Series

Installed in shunt at the branch distribution panel, the SPB series provides ideal protection for several rooms or an entire floor of a building. The SPB protectors, when located at the branch panel, also provide transverse protection (i.e., it prevents transients generated from one room being coupled through a common panel into another room).

Local Service Panel Protector—SPA Series

The SPA protectors install in shunt at the local panel or directly at the equipment. These compact units provide very substantial protection for one or more pieces of sophisticated equipment or a small computer room.

SPB/SPC protects branch distribution and main service panels.



SPA protects at the local service panel.

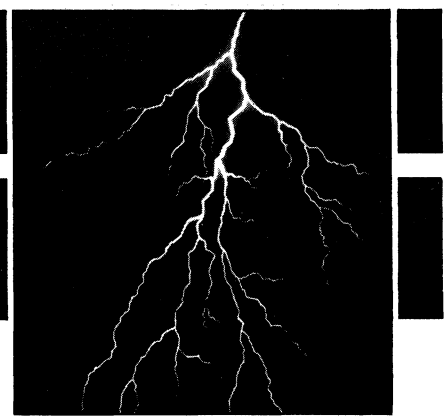
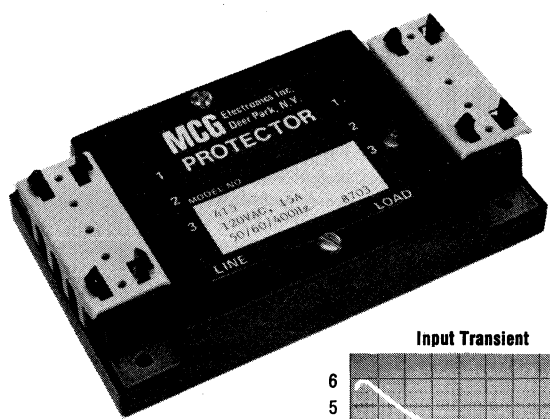
AC POWER LINE SURGE PROTECTOR

415 SERIES to 15A



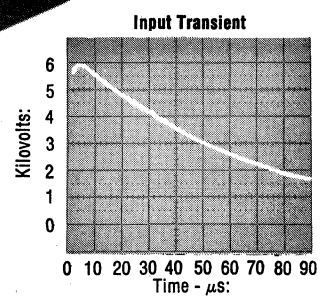
A SOPHISTICATED BLEND OF HIGH SPEED AND BRUTE FORCE PROTECTION

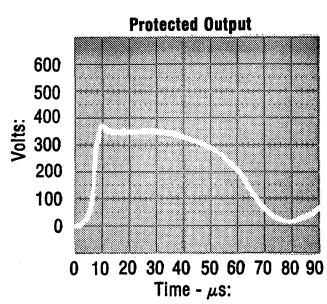
- **480 joule transient absorption**
- **Reliable protection against transients and spikes**
- **Vigorously clamps IEEE 587 ring and impulse waves**
- **1 nanosecond response**
- **Low profile**
- **Brute force EMI/RFI filtering**
- **Field repairable**



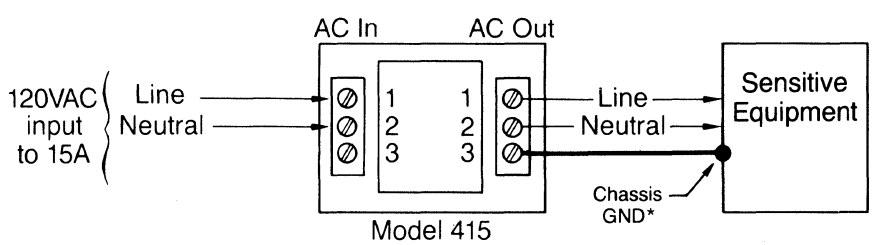
$68.60
(50 pieces)

Equipment level protection installed "within" a piece of equipment. Employs a sophisticated combination of brute force surge protection and impulse filtering to prevent equipment damage or malfunction. Reaction time less than 1 ns with automatic reset after transient has passed. Absorption capability exceeds 480 joules. Provides superior attenuation at the critical lower frequencies. For 120VAC single phase, 50/60/400 Hz power lines handling currents to 15A. Incorporates a green LED that indicates unit is operational and protection is present. Military versions are available.

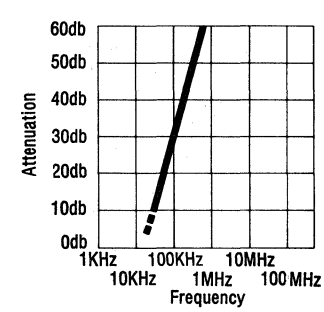




Connection Information



***Installation Note:** Important, connect protector terminal marked "ground" to frame, case or chassis of equipment being protected. Keep lead (#12 AWG) as short as possible, less than 6" is highly preferred.



Also available for 250 VAC single phase, 50/60/400 Hz, power lines handling currents to 30A. Consult factory for details.

Superior Power Protection Against Voltage Surges and Power Line "Noise"

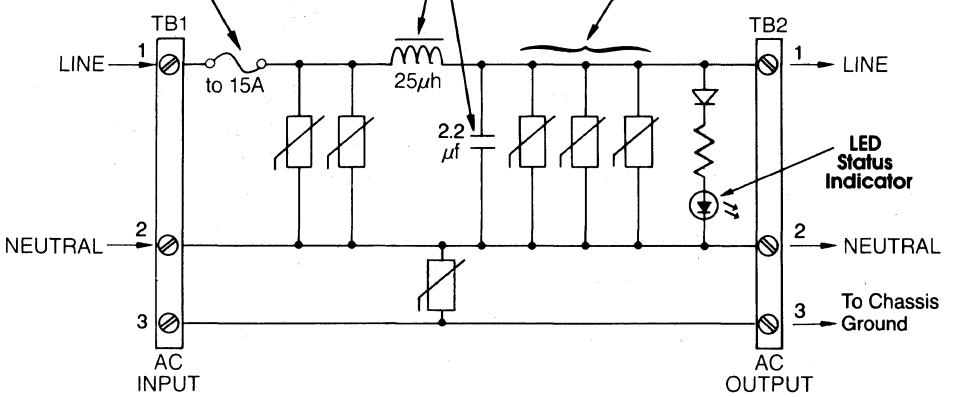
415 SERIES (con't)

The Inside Story . . . Heavy Duty Components . . . Superior Protection

Replaceable fuse
Automatically disconnects unit from power line in the event of serious line current overload.

Heavy duty EMI/RFI filtering
Provides superior attenuation at the lower frequencies (20db/65KHz, 40db/170KHz, 60db/650KHz). Wire wound inductors ensure continued performance under severe transient conditions.

Extraordinary 480 joule protection
- "Brute Force" MOV transient suppressors
- The only protector engineered to provide protection against all possible transient entry conditions.
- 3 line L-G, L-N, N-G protection



General Specifications

Rated voltage	120VAC
Rated current	15A RMS
Frequency/Service	50/60/400Hz, single phase
Energy absorption	480 joules (watt/sec)
Clamp voltage	235V (1ma) Threshold 375V peak 6KV (IEEE 587 Cat. B)
Response time	<1ns
Filter attenuation	65KHz—20db 170KHz—40db 650KHz—60db
Operating temperature	−40 to +85 degrees C
Efficiency	99+%
Size (L x W x H)	4.95″ x 2.8″ x 1.15″
Weight	<1.0 lb.

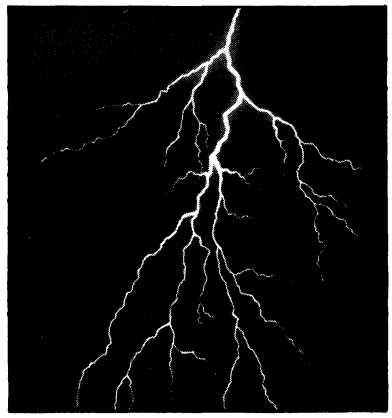
AC POWER LINE PROTECTOR

290 SERIES PLUG-INS AND STRIPS



Plug-in Protection

For sensitive electronic equipment, providing heavy duty clamping and filtering that prevents transients and noise (EMI/RFI) from damaging or disturbing the equipment. Reaction time is less than 1 nanosecond with automatic reset after the transient passes. Absorption capability of 400 joules, for 120V AC, 10/15A. The 290 units provide series fuse protection and green LED's to indicate when the unit is working and protection is present.

Modem and AC Protection

Plugs into protection sensitive computer equipment from damaging transients on telephone lines (tip/ring) and 120V AC power lines. Any transients caused by lightning, disk drives, switching surges, etc. are vigorously and rapidly clamped (in nanoseconds) to safe levels thus preventing damage to sensitive equipment. Installs in minutes with no special tools required. Green LED indicates the unit is working and protection is present.

General Specifications For:	Models 290/293/296	Models 292/294/298
Rated voltage:	120 V Ac	120 V Ac
Rated current:	15A rms	10A rms
Frequency/service:	60Hz/1 phase	60Hz/1 phase
Energy absorption:	640 joules (watt/sec)	720 joules (watt/sec)
Clamp voltage (L-N)	200V peak (1mA)	200V peak (1mA)
Impulse:	410V peak (6kV/3kA)	360V peak (6kV/3kA)
Ringwave:	200V peak (6kV/500A)	165V peak (6kV/500A)
Response time:	Less than 1 ns	Less than 1 ns

(4 wire protection)

General Specifications

Clamp Voltages Available	±6V (RS422, 423) ±10V ±15V (RS232 typ.) ±25V (RS232 max.) ±50V ±200V (dial-up lines)
Series Resistance	25 ohms (standard)
Meets or Exceeds	IEEE 587 CAT. B IEEE Std. 472 (SWC) 1 KV (10 x 1000) μs waveform FCC Docket 68

Ordering Information

Example—to protect a 4 wire RS422 circuit, order **DLP-20-6V-25**

Model
Clamp Volt
Series Resistance

Installation Information

Installs in series with existing data lines. Ground terminal must be connected to cabinet frame by short lead, less than 6″ (#12 AWG) highly preferred.

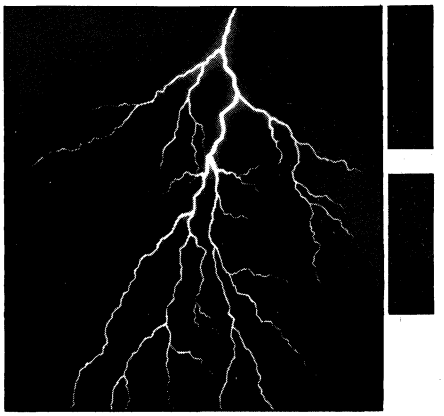
DATA LINE PROTECTORS



DLP-36 SERIES

MIX AND MATCH MODULAR PROTECTION FOR TELEPHONE AND DATA LINES

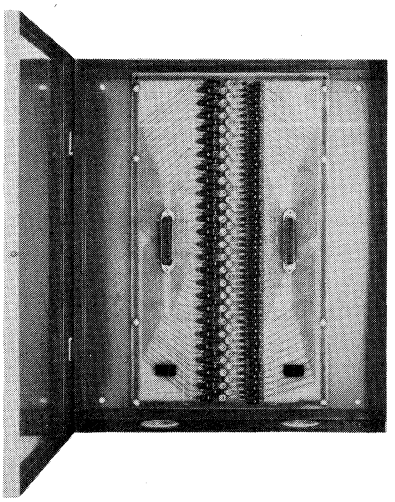
Protects PABX systems, CPU's, key systems, multiplexers, port selectors, etc. from damaging transients.

The DLP-36 is a new 25 pair, point-of-entry transient suppressor. The unit offers high speed protection for PABX systems, CPU's and instrumentation systems that use telephone lines, RS232, 423 and 20 ma loops.

Modular protection elements (25 provided) allow you to mix and match telephone and data lines at different clamping levels. This flexibility offers a convenient "one protector" solution to the varied protection needs in a building. And, if your application changes, simply switch the module to accommodate the new requirement. The plug-in module feature also permits on-site repair or replacement by non-technical personnel.

The unit uses fast-acting Avalanche diodes (1 nanosecond) and brute force gas tubes to ensure continued protection even under severe transient situations.

Utilizing 50 pin telephone industry connectors, the DLP-36 is ideal for termination to 66 blocks. To suit most applications, the unit is available with or without the enclosure.



General Specifications

Clamp voltages available	+/– 6, 10, 15, 25, 50, 200V peak
Energy handling capability	50 joules/line
Gas Discharge Tube	
Life	100 coulombs (amp/sec)
Energy handling	5000 joules (one time)
Current	5000 amps
Series resistance	25 ohms (standard)
Response time	less than 1 nanosecond
Effectively clamps	IEEE 587 Cat. B. 2KV (10/50μs, 8/20μs) IEEE Std. 472 (SWC) 1KV (10 × 1000 μs) waveform
Dimensions	H-18″ W-15″, D-4″
Operating temperature	–55 to + 125 degrees C
Circuit attenuation (db)	– 3db/3MHz (Rs = 25, RL = 1K, Cs = 2000pf)

$880 w/enclosure
$795 w/o enclosure

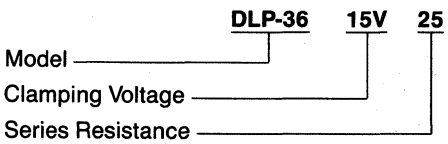
DATA LINE PROTECTORS

DLP-36 SERIES (con't)

To Specify the DLP-36

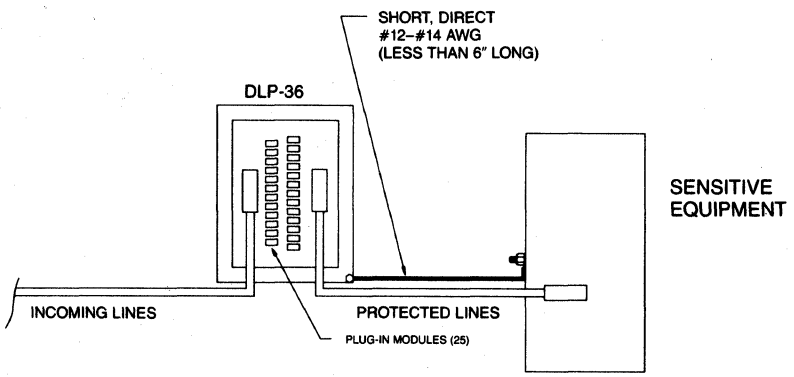
Determine the signal voltage:
a) look in the service manual
b) call your service company
c) use an oscilloscope
The most effective protection will be attained by clamping overvoltages as close to the normal signal voltage as possible (i.e. for a data line with a signal level of 12V, choose a clamping voltage of 15V).



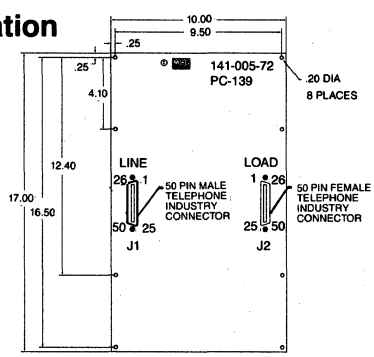
Installation

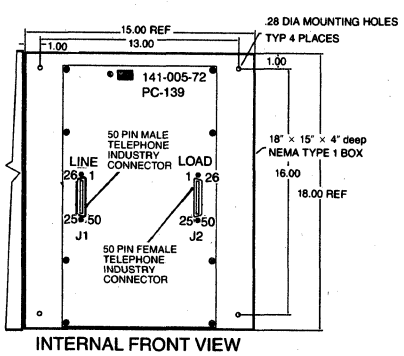
Preferred Installation: Important, connect protector terminal marked "ground" to frame, case or chassis of equipment being protected. Keep lead (#12AWG) as short as possible, less than 6 inches is highly preferred.
Alternate Installation: Locate the protector close to the building's structural steel at the building entry point. The protector terminal marked "ground" must be connected to the structure with a direct, short (less than 6 inches) #12AWG lead. It is essential that the building structure be grounded—verification is vital.

Application



Mounting Information





INTERNAL FRONT VIEW

NOTE: Had the need been for less than 50 wires protected, the user would have the option (because of the modular design) of buying only the number of protection modules required. If the unit is purchased fully-packed, the extra modules may be kept as spares or for expansion. Each module protects 2 wires.

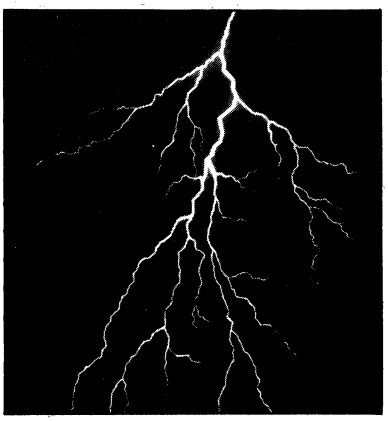
DATA LINE PROTECTORS



DLP-50 SERIES

MULTI-WIRE TRANSIENT PROTECTION FOR OVER 2000 PAIRS!

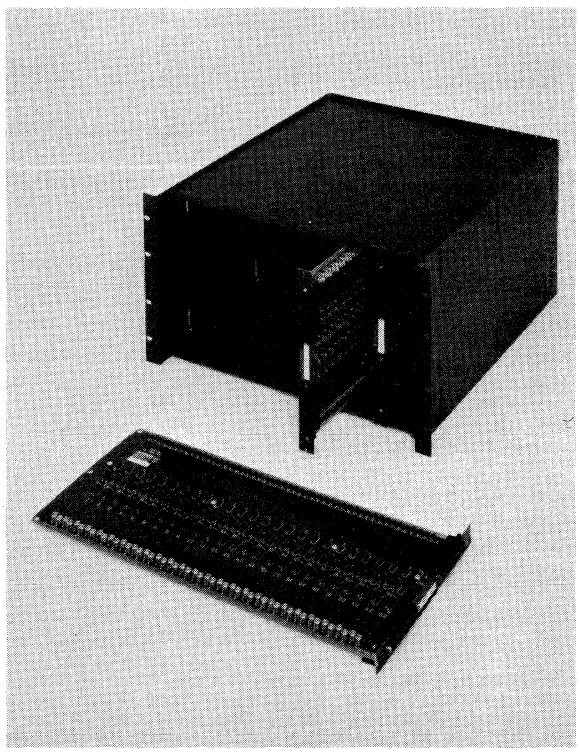
Protects PABX systems, mainframes, multiplexers, CPU's, etc. from damaging transients

Sensitive equipment using dial-up telephone lines, RS232, 423 or 20 ma loops is vulnerable to cumulative damage and serious disruption from high speed transients. The DLP-50 System transient protector offers reliable, cost-effective protection for multiple communication lines.

The DLP-50 System consists of a card cage assembly and protection cards. Each card cage holds up to 17 cards capable of protecting 25 pairs each or 425 pairs total. A fully loaded standard 19″ rack equipped with five DLP-50 systems will protect 2,125 pairs.

Incorporating field proven technology (32 failures in 132,000 wires), the protector combines fast acting Avalanche diodes and brute force gas tubes, ensuring continued protection even under severe transient situations.

The DLP-50 System comes standard with 50 pin telephone industry connectors for easy installation.



General Specifications

Clamp voltages available	+/−6, 10, 15, 25, 50, 200V peak
Energy handling capability	50 joules/line
Gas Discharge Tube	
Life	100 coulombs (amps/sec)
Energy handling	5000 joules (one time)
Current	5000 amps
Series resistance	25 ohms (standard)
Response time	less than 1 nanosecond
Effectively clamps	IEEE 587 Cat. B, 2KV (10/50μs, 8/20μs) IEEE Std. 472 (SWC) 1KV (10 × 1000μs) waveform
Connectors	M/F 50 Pin Telco Connectors
Dimensions	Fits standard 19″ rack 10.5″ (6U) high, 19″ deep.
Operating temperature	−55 to +125 degrees C
Circuit attenuation (db)	−3db/3MHz (Rs = 25, RL = 1K, C_S = 2000pf)

DLP-50 card cage (rack mountable) **$150** each

PICA-50-200V25 protection card **$630** each

All MCG Data Line Protectors come with a two-year, no nonsense warranty. Consult factory for details.

DATA LINE PROTECTORS

DLP-50 SERIES (con't)

To Specify the DLP-50 System

The DLP-50 System includes a card cage plus up to 17 protection cards.

To Specify Protection Cards

Determine the signal voltage of the system:
a) look in the service manual
b) call your service company
c) use an oscilloscope

The most effective protection will be attained by clamping overvoltages as close to the normal signal voltage as possible. If you were protecting dial-up telephone lines, for example, with tip and ring voltages totalling 190V, a 200V clamping is appropriate. For this application, specify protection cards PICA-50-200V25.

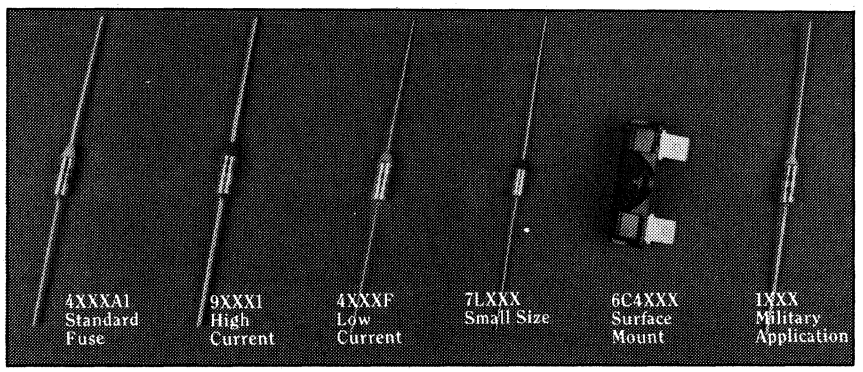
MICROTEMP® Thermal Cutoffs

MICROTEMP Thermal Cutoffs provide permanent over-temperature protection for motors, transformers, appliances, HVAC equipment and electronic equipment. Once a MICROTEMP Thermal Cutoff opens a circuit, it remains open until the fault is corrected and the fuse is replaced.



Thermal Cutoff Series Selection

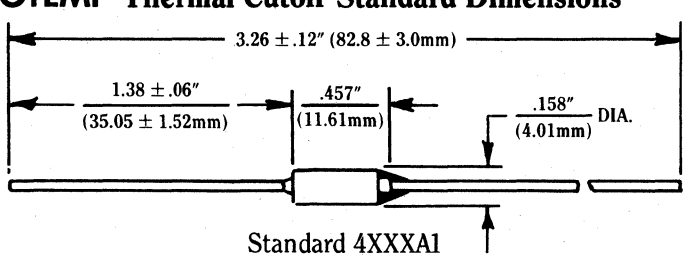
To determine which series is best for your application, remember:

- To consider the normal and abnormal electrical currents and voltages of your product.
- That the current passing through a MICROTEMP Thermal Cutoff can generate I^2R, self heating. This must be considered when selecting the proper series and opening temperature for your application.
- That the outer case of the MICROTEMP Thermal Cutoff is electrically live and may require insulation. Additionally, since insulation can reduce heat transfer, it also must be considered in selecting the final opening temperature.
- That custom configurations and packages are available.
- That a thermocoupled dummy should be installed in the product circuit to determine the correct temperature setting.

MICROTEMP® Thermal Cutoff Types

Type No.	Temp. (°C) Calibration Range	Wire Size AWG	Maximum Recommended Operating Current and Voltage (Resistive)
4XXXA1	60-240	18	15 Amp/240 VAC
9XXX1	60-240	15	25 Amp/240 VAC
4XXXF	60-240	23	5 Amp/240 VAC
7LXXX	72-184	23	6 Amp/240 VAC
6C4XXX	60-184	—	15 Amp/240 VAC
1XXX	60-240	18	15 Amp/240 VAC

MICROTEMP® Thermal Cutoff Standard Dimensions



Standard 4XXXA1

MICROTEMP® Thermal Cutoff Temperature Ratings

Reading the temperature chart.
All MICROTEMP Thermal Cutoffs are identified by their Type No. (4XXXA1, 9XXX1, etc.). The "XXX" digits are determined by the opening temperature you specify. For example: A 4136A1 is a MICROTEMP Thermal Cutoff with an opening temperature of 60°C.

TELE-LINE™ Surge Suppressors

LISTED

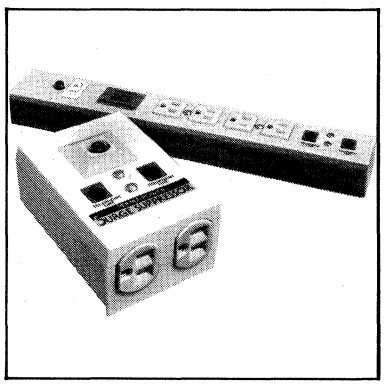
Protection From Surges on the Phone Line and the Power Line

CABLE-LINE™ Surge Suppressor

Protects TV, VCR, Stereo and Satellite from Surges on the Cable or Antenna Line *and* the Power Line

LISTED

MODEL PD 200/PTD 209/RTD 410 **MODEL PTC 209**



These Surge Suppressors protect your FAX and computers with modems or electronic telephone equipment from power surges on your phone lines, even if the primary telephone service entry surge arrestor is non-functional.

They meet FCC Part 68 requirements and are UL listed, Standard 497 (Secondary Protectors for Communications Circuits). Tele-Line™ surge suppression circuit employs a three-element gas tube and three metal-oxide varistors (MOV) in a coordinated two-stage design. Let-through voltage is 300V.Max. An indicator lamp confirms the existence of a positive earth ground connection (PD-200) or Failsafe Shutdown (PTD-209, RTD-410).

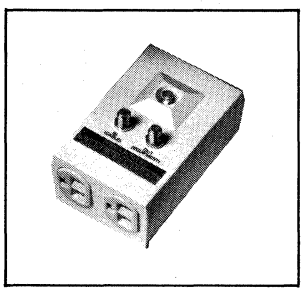
Plug-in Model PD-200 protects the phone line only. Models PTD 209 and RTD 410 also protect against surges on the power line. Model PTD 209 is a wall plug-in unit with two power outlets; Strip Unit Model RTD 410 has 4 outlets.

SPECIFICATIONS—
TELE-LINE™

Connectors Two modular telephone line jacks; 7' jumper wire included
D.C. Breakdown Voltage 140V.
Let-Through Voltage[1] 300V. peak
Response Time 1 nanosecond
Pulse Life[2] 10,000 cycles
WARRANTY
One year

TEST WAVES
1. FCC Docket 19528 (Part 68, Subpart D)
2. 8 x 20 microseconds, 500 Amp

FOR POWER LINE SURGE SUPPRESSOR SPECIFICATIONS, SEE ADJACENT LISTING.



Television sets and VCRs manufactured after 1984 usually incorporate sensitive electronics, which are highly susceptible to damage from transient voltage surges during thunderstorms and electric company switching. Additionally, satellite dish systems are highly vulnerable to damage from power surges and lightning, even several miles away. Such surges can pass through to your equipment from its connection to a cable, antenna, or satellite dish as well as through the power line.

Connecting your electronic equipment to a Perma CABLE-LINE™ Surge Suppressor will protect sensitive equipment from surge damage.

FAILSAFE AUTOMATIC SHUTDOWN
Any power line surge suppressor can wear out or burn out, but Perma Power provides for that eventuality. A patented circuit automatically disconnects the power if suppression is lost. This is the surest way to keep your electronic equipment safe from potentially damaging power line surges that would otherwise pass through. An indicator light goes out to show that power has been disconnected.

UNIQUE LOW-LOSS CABLE-LINE™ FILTER
The Perma Power CABLE-LINE Surge Suppressor is carefully designed to protect against surges without causing loss of picture signal. Typical cable line filters reduce signal strength as much as 90.9%, causing a snowy picture or no picture at all. By incorporating advanced filter technology rather than power line surge suppressor techniques, Perma Power CABLE-LINE filters offer a virtually unlimited lifetime. Yet these Surge Suppressors can be used on antenna or cable lead-in wires without reducing picture quality on any channels, even up to the UHF frequencies.

GOLD CONTACTS ENHANCE SIGNAL QUALITY
Perma Power CABLE-LINE Surge Suppressors incorporate gold-plated connectors to provide better conductivity and resistance to corrosion and carbonization. They thus assure superior signal quality and greater long-term reliability.

CONVENIENCE
The CABLE-LINE Surge Suppressor plugs directly into any standard grounded outlet. Plugged into one of two duplex outlets, it provides two more, for a total of three outlets. The second outlet in the duplex will be surge suppressed but will not automatically shut down if the suppressor fails. To protect additional system components, use the convenience outlets on your equipment.

POWER LINE SURGE SUPPRESSOR SPECIFICATIONS

Dimensions	3½"x 4¾"x 2¼"
Weight	11 ozs.
Case	Ivory Plastic
Electrical Rating	1800 Watts
Energy Dissipation	80 joules each mode, 240 joules total
Response Time[1]	1 nanosecond
Clamping Voltage	156 RMS (220VDC) (Nominal)
Protection Modes	normal (line/neutral) common (line/ground) common (neutral/ground)
Let-Through Voltage[2] (power line surge)	400 Volts
Pulse Life[3]	10^6 cycles
Steady State Power[4]	0.8 watts
Maximum Transient Voltage[5]	Greater than 6,000 volts
Peak Current[6]	4,500 amperes
Noise Filtering	More than 10dB, 5-50 MHz
Warranty	1 year

CABLE-LINE™ SURGE SUPPRESSOR SPECIFICATIONS

Cable-Type	75 Ohm, RG-59U, Gold-plated "F" connectors
Insertion Loss	40 MHz to 890 MHz, 0.1 dB or less
Let-Through[6]	less than 2 volts
Maximum Transient Voltage[7]	greater than 1500V
Response Time[1]	1 picosecond
Input Impedance	75 Ohms
Output Impedance	75 Ohms
Pulse Life[6]	Unlimited

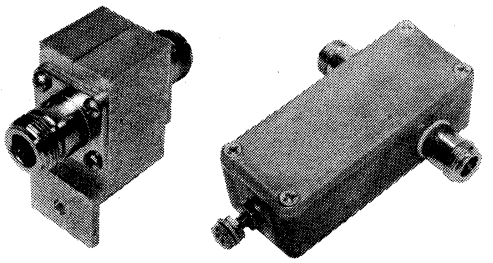
[6]1500V, 8 x 20 microsecond impulse.
[7]Limited in the 75 Ohm distribution system by connector and cable arc-over to 1500 volts peak.

Manufactured in U.S.A. by PERMA POWER® Electronics inc. **5601 West Howard Avenue • Chicago, Illinois 60648 • 312/647-9414**

Nano-Fast Coax Protection from PolyPhaser Corporation



The patented PolyPhaser Impulse Suppressor Family is your best answer for protecting those vital communication links from lightning and static induced impulses (as well as high altitude nuclear blasts-EMP).

With over 44 models of patented Impulse Suppression, PolyPhaser Corporation makes more reliable, longer lasting, faster, better VSWR, lower loss and having less throughput energy to your valuable equipment than air-gap type arrestors. Designed using the time proven controlled gas ionization discharge tube, these family members can handle tens-of-thousands of amperes time after time. They are made from quality, highly conductive aluminum with 18-8 stainless fasteners and weather-coated for marine applications.

No sooner does a fuse go to work than it quits forever. But when a PolySwitch® device stops overcurrent, it can reset itself. And go on protecting your product again and again.

PolySwitch circuit protectors do it with technology so elegant it makes other approaches look burnt out. When a current overload hits its conductive polymer compounds, the PolySwitch PTC (positive temperature coefficient) device heats and turns nonconductive. Lower the current and the device's conductivity resumes. Along with your product's reputation for reliability.

PolySwitch PTCs accomplish all this without manual resetting or replacement. Thereby eliminating any chance of going from a bad fuse to something worse—the wrong fuse.

But solving your product's most common reliability problem is only the start. PolySwitch PTCs are also small, monolithic, board-mountable, and testable. And they're available in hundreds of optimized designs—for everything from rechargeable batteries to telephones to stereo speakers.

Finally, PolySwitch PTCs are from Raychem. Which means they're reliable, and backed by experience and support that never shuts down.

Call for a free sample and more information. Because this is one time your product can clearly benefit from on-again, off-again performance.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

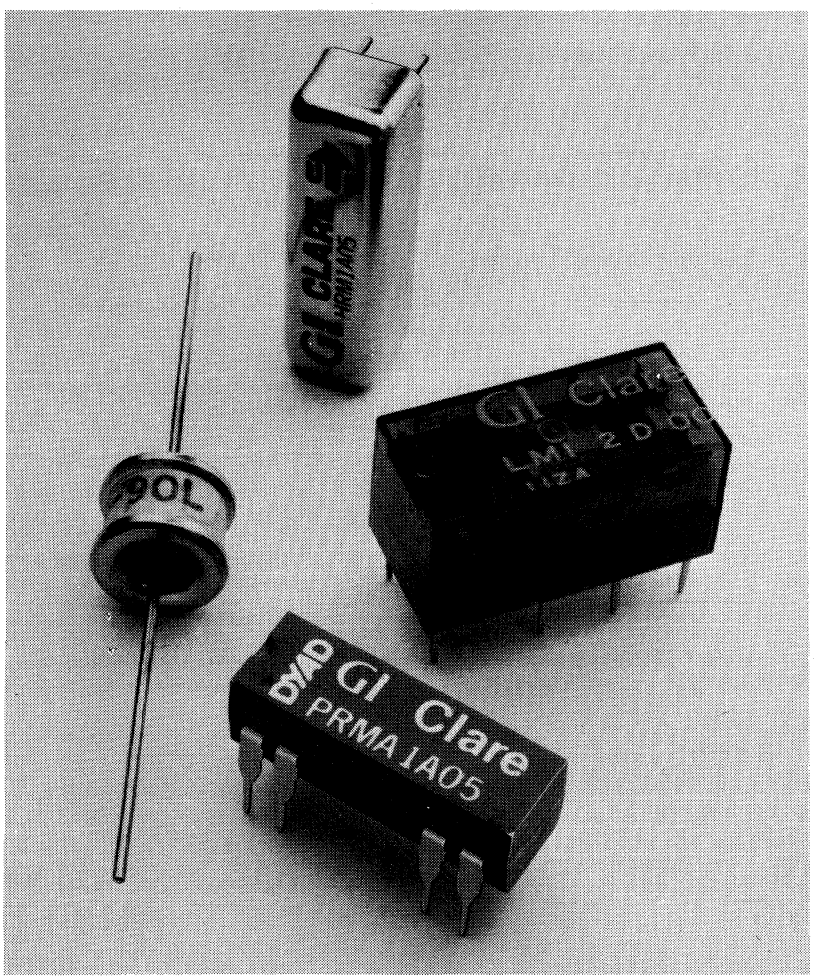
The Clare Division Family Of Quality Products.

Reliability Through Technology.



Quality in the Clare Tradition.

Clare Division has earned the position of being the world's largest supplier of mercury-wetted and dry reed relays.

This leadership position has not come easy, but has come as a result of Clare Division's total commitment to products offering improved technology through innovation . . . and to the quality and performance you expect from the leader in switching technology.

Couple this with high volume manufacturing capabilities, and you get superior quality products, at competitive prices, with fast off-the-shelf delivery.

Call your local Clare Representative or authorized Clare Distributor for more information about:

- Mercury-wetted contact relays
- Dry reed relays
- Electromechanical relays
- Surge arresters

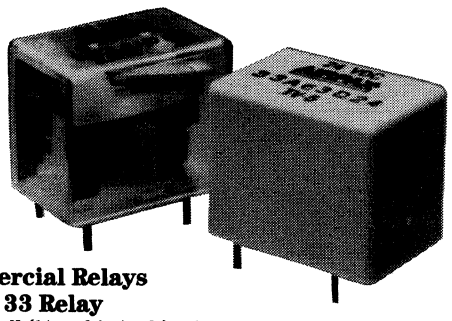
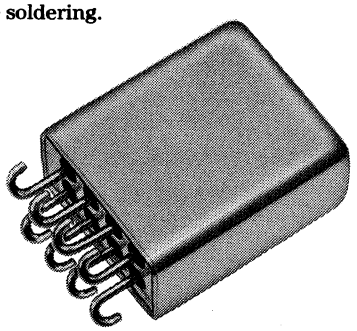
RELAYS AND SOLENOIDS

Airpax relays and solenoids are specified around the world for hundreds of PC board applications. In standard or custom designs. Contact Airpax Company, Husky Park, Frederick, MD 21701. (301) 663-5141. A division of North American Philips Corporation.



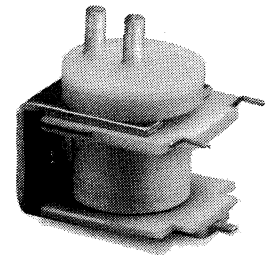
Commercial Relays
Series 33 Relay
This small (1/2 cubic inch) relay is especially suited for use as an output device for remote control and cable television, office equipment, appliances, door openers, automotive controls and various types of instruments. It offers complete isolation from noisy environments and can also handle high-inductive and tungsten filament loads. Coil voltages from 3 VDC to 48 VDC may be specified. Sensitive models, requiring as little as 180 mW of coil power, are available. Terminals are designed for PC board installation.

Features:
- Small size—1/2 cubic inch.
- Sensitive—as little as 180 milliwatts coil power.
- TV 5 rating available.
- Approval—
- Inexpensive—typically under $1.00.
- 4KV Dielectric available.
- Sealed for wave soldering.



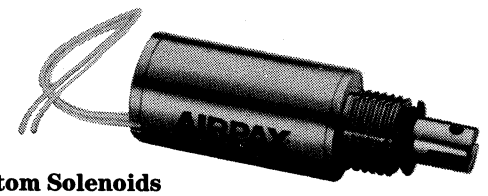
Military Relays
Series 07—Crystal Can
Developed specifically for the aerospace industry. The standard unit features a solder terminal arrangement, 26.5 VDC coil voltage and 10 amp contacts.

Features:
- Qualified to MIL-R-5757, M 5757/23, MS 27245, MS 27247 and MIL-R-6106.
- Withstands severe vibration and shock.
- DPDT Contacts.

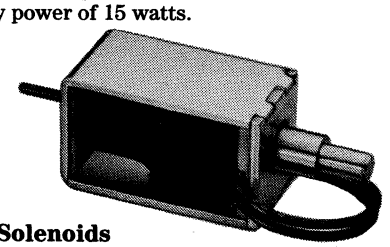


Custom Solenoids
Series 7150—Vacuum Solenoids
Applications for these custom solenoids include control functions for vacuum operated climate control modules and vacuum operated cruise control for the automotive industry. Our designers will work with you to develop a durable low cost package that will meet the requirements of your most difficult applications.

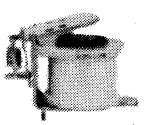
Features:
- PC board mounting available.
- Leakage rate of 10 cc/min. maximum @ 20 in. Hg vacuum to as low as −20°C.
- Sensitive: as little as 85 milliwatts coil power consumption.
- Duty cycle: continuous.
- Ambient temperature range: −40°C (−40°F) to +125°C (+257°F).

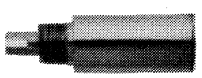


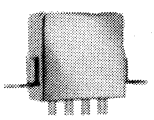
Custom Solenoids
7019 Solenoid
This direct Current Tubular Pull Type Solenoid is designed to provide up to 50 ozs. of force with a maximum stroke of .437". Actual usable force will depend on the stroke and power level. Coils are available from 6 VDC to 115 VDC with a continuous duty power level of 5 watts and an intermittent (25%) duty power of 15 watts.



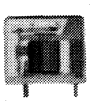
Custom Solenoids
7007ED33-0013 D.C. Box-Frame Push-Type Solenoid
Provides up to 20 ozs. of force with a maximum stroke of .200". Actual usable force will depend on the stroke and power level. Coils are available from 6 to 115 VDC with a continuous duty power level of 3.0 watts and an intermittent (25%) duty power level of 9.0 watts.







AIRPAX®
FREDERICK DIVISION



eem MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

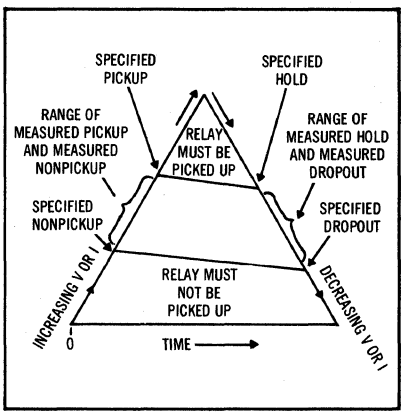
Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.



OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

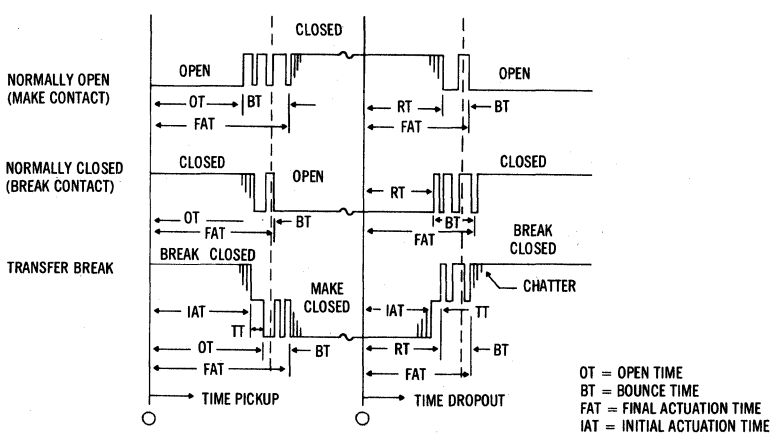


Fig. 2. Typical time vs. current (non-inductive load)

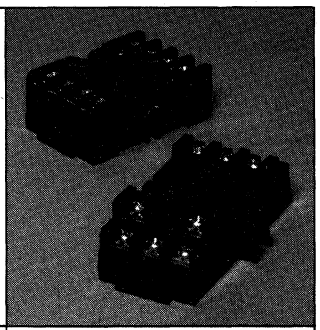
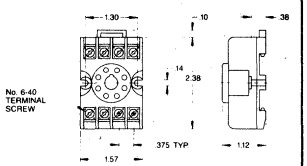
INDUSTRIAL RELAY SOCKETS

SNAP TRACK MOUNTED

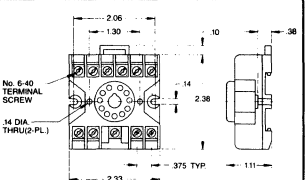


Construction	Self-extinguishing, black polycarbonate body with integral molded barrier.
Terminals	Combination slot/phillips head screws and captive self lifting terminal clamps.

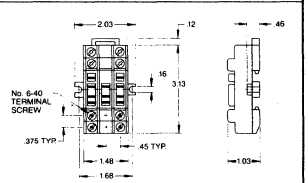
H50SL608S
8-pin octal socket. Rating: U/L and CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw.



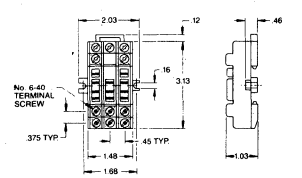
H50SL611S
11-pin magnol socket. Rating: U/L and CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw.



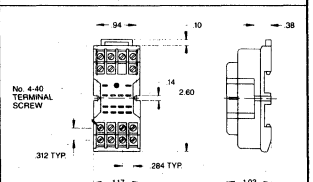
H50SL708S
8-pin blade type socket. Rating: U/L, 15 amperes, 300VAC; CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw. Cascading mounting center 1.74 ± .010.



H50SL711S
11-pin blade type socket. Rating: U/L, 15 amperes, 300VAC; CSA, 10 amperes. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw. Cascading mounting center 1.74 ± .010.



H50SL715S
14-pin blade type socket. Rating: U/L and CSA, 5 amperes, 300VAC. Wire sizes: up to #14 AWG. Terminals: pan head 4-40 slot.



Mounting Track	Standard Track SL601 and SL602 will accept either regular and snap track sockets.

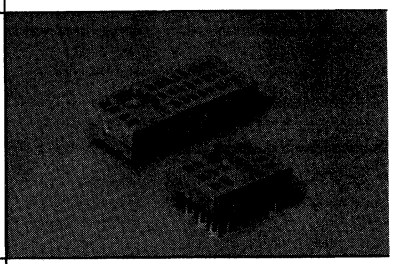
Cradle Socket and Accessories



Construction

Body molded of glass filled flame retardant polyester (PBT). Meets UL94VO and is fungus resistant.
One piece contact/terminal construction of berylium copper.
Selectively plated gold over nickel on contact area. 60/40 Brite-Tin on terminal area.

Arrangement

Number of Poles
2 = 2-pole socket

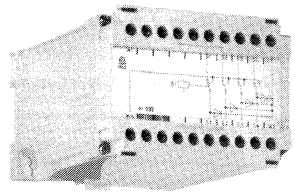
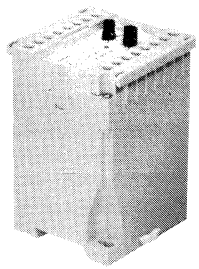
Discover the Altech Advantage...



AI/AN SERIES

SELECT FROM ALTECH'S COMPREHENSIVE RELAY FAMILY

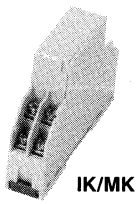
Altech relays meet electrical standards according to IEC, VDE, DIN and other important worldwide standards including UL and CSA. These relays offer various mounting configurations including snap-on DIN rail, panel mount, base mount and plug-in.



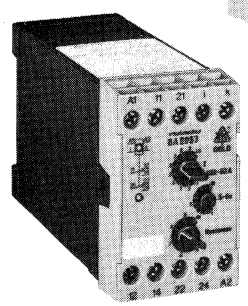
AI/AA SERIES

Altech Sensing Relays...

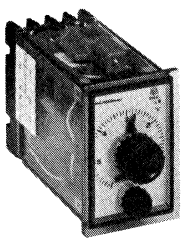
Available in present or user-programmable parameters...Voltage ranges from 15mV to 700V. Current ranges from 2 mA to 150 A. Hysteresis adjustment provides dead band selection of maximum and minimum set points. Consider Altech sensing relays to protect, control and monitor your system or equipment.



IK/MK SERIES



BA SERIES



EC TIMER

Some examples are...

Altech's BA 9054 relays for undervoltage and overvoltage problems.

Altech's AI 941N relays for phase-sequence control.

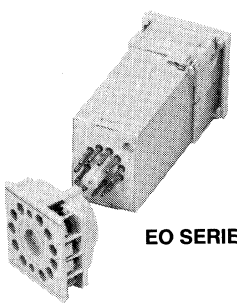
Altech's MK 9052 relays for thermistor monitoring of windings, shaft bearings and various other thermal concerns.

Altech's IK 8715 relays for circuit sharing control of more than one electrical device.

Altech's BA 9055 relays for precise sensing of rotary or linear motion.

Altech's AI 993 relays for early warning of malfunction or failure of your system components.

Altech's BA 7901 relays for on-time functioning of motors, annunciators, relays and contactors in sequencing applications.



EO SERIES

Altech Printed Circuit Board Relays

Predictable and reliable performance is ensured. Miniature sizes with washability offer desirable features for your electronic design. Contacts rated to 16 amperes and 380 volts. Coil power consumption can be less than 125 milliwatts and coil voltages up to 110V.

An example is...
Altech's tiny OW 5691 (0.4″ × 0.8″ × 0.4″) has a contact life up to 100 million operations and an incredible contact rating of 5A and coil voltages of 3–48 VDC.

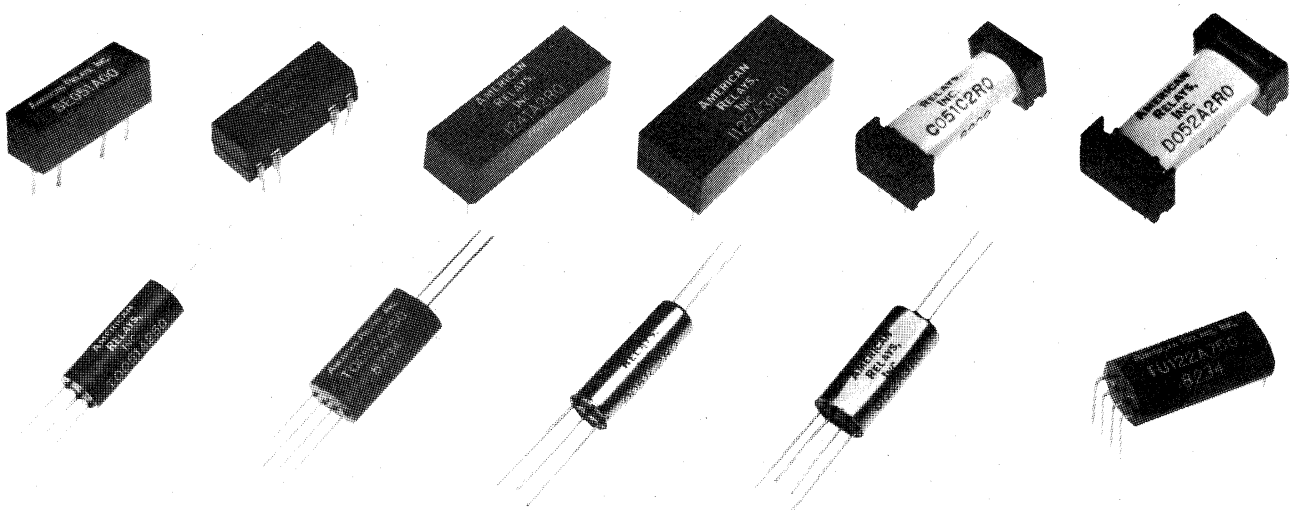
Whether you're looking for a **REED RELAY** that will meet FCC surge requirements, or a sensitive Low-Level **REED RELAY** to switch ATE signal...

AMERICAN RELAYS HAS IT ALL

High Quality — Low Price — On time Delivery

Dry and Mercury Wet contacts
With High Voltage, High Power or Low Level switching

Standard or Specified to YOUR Application,
AMERICAN RELAYS can Build the **REED RELAY** you need.



American Relays, Inc., offers a comprehensive line of super-reliable reed relays. American Relays, Inc., 100% tests all reed switches **AND** 100% final tests all reed relays. We are specialists in **"THE REED RELAY INDUSTRY".**

PACKAGE STYLES

- **Encapsulated**
- **Open Frame**
- **Axial Leeds**
- **DIP**
- **SIP**

SWITCHING TYPE

- **General Purpose Dry Reed**
- **Low Level Switching**
- **High Power**
- **High Voltage**
- **Mercury Wetted Contacts**

- **UL Recognized Relays Available**

10306 Norwalk Blvd., Santa Fe Springs, CA 90670

REED RELAY INDEX

RELAY TYPE	DESCRIPTION	TERMINAL GRID	CONTACT FORMS AVAILABLE POLES	PACKAGE
ENCAPSULATED	Epoxy encapsulated. Total Environmental protection. Wide range of contact forms and coil voltages are available.	1.000 × .100 1.000 × .150	Form A (1 to 6) Form B (1 & 2) Form A/B (1 & 2) Form C (1 to 4) Form A Latching (1 & 2)	
OPEN FRAME	Durable glass filled polyester bobbin construction. Switch and coil leads are securely held with epoxy potting. Cost efficient plug-in type reed relay.	1.000 × .100 1.000 × .150	Form A (1 to 4) Form B (1 & 2) Form C (1, 2, 3) Form A Latching (1)	
AXIAL	Rugged axial lead tubular relay. Nickel plated metal jacket provides magnetic shield. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1) Form C (1 & 2) Form A Latching (1)	T SERIES	Most economical, high performance tubular relay. Completely sealed in a flame retardant plastic tube. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1)	HIGH POWER	50W contact rating. Available with encapsulated, open frame and axial lead packages.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	HIGH VOLTAGE	25W, 1000 VDC switching. 2500 VDC breakdown voltage. Miniature size. Available with encapsulated, open frame and axial lead package.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	MERCURY WETTED	Mercury wetted contact relay. 50W contact rating. Extremely long life expectancy. No contact bounce. Stable low contact resistance.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2) Form C (1 & 2)	DIP RELAYS	Epoxy molded DIP reed relay. Logic compatible. Stable contact resistance. Fits all standard DIP sockets and is automatic insertion compatible.	DIP .300 × .100	Form A (1 & 2) Form B (1) Form C (1)	SIP RELAYS	High quality economical Single-In-Line package reed relays. Epoxy encapsulated package. Various contact ratings are available. UL recognized series available.	SIP .2 × .4 × .2 .2 × .2 × .2	Form A (1) Form B (1) Form C (1)	SPECIAL RELAYS	Let us design reed relays for your application. Special relays are cost competitive with standard relays in most cases. Consult the factory or your local representative with your specific requirements.

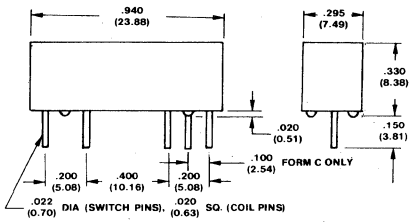
REED RELAYS

SINGLE-IN-LINE SERIES (S SERIES)



- High Quality Low Cost Single-In-Line
- Sturdy Bobbin and Encapsulated in a Polyester Case
- UL Recognized (File #E104383)

GENERAL SPECIFICATIONS

Contact resistance: .150 ohms max.
Operate time: 0.5 ms typ.
Release time: 0.2 ms typ.
Bounce time: (Form A & B) 0.25 ms typ. (form C, NO/NC) 0.5/1.5 ms typ.
Insulation resistance: 10^{10} ohms min. (form A), 10^{9} ohms min. (form C)
Operating temperature: −40° to +85°C
Vibration: 20G (10 — 2000 Hz)
Shock: 50G @ 11 ms duration

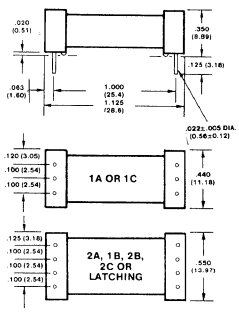
REED RELAYS

OPEN FRAME REED RELAYS (SERIES C AND D)



- High Performance, Low Cost Open Frame, PC Mount Dry Reed Relays
- Popular 1.000″ x .100″ or 1.000″ x .150″ Pin Spacing
- Rigid Polyester Relay Body with Epoxy Filled Ends

Specifications	Form A/B	Form C
Power (Resistive Load)	10 Watts	3 Watts

REED RELAYS

HIGH POWER SERIES

- Miniature High Power Reed Relays. 50W Contact Rating.
- Open Frame, Encapsulated and Axial Lead Packages are Available

HIGH VOLTAGE SERIES

- Miniature High Voltage Reed Relays
- Meets FCC Part 68 Voltage Breakdown Requirement
- Open Frame, Encapsulated and Axial Lead Packages are Available

MERCURY WETTED SERIES

- Miniature Reed Relay with Mercury Wetted Contacts
- No Contact Bounce
- 50 Watts Contact Rating
- Open Frame, Encapsulated and Axial Lead Packages are Available

* Mercury wetted relays should be mounted within ±30° from vertical position.

AXIAL LEAD SERIES

- Encapsulated Axial Lead Reed Relays
- Axial Leads Allows Various Mounting Configurations.
- Total Environmental Protection
- Nickel Plated Metal Tube Provides Magnetic Shielding
- Formed Leads are Also Available
- 1 Form A, 2 Form A, 1 Form B, 1 Form C and 2 Form C Types are Available
- Various Contact Ratings Available
- Contact American Relays, Inc. for Specific Part Numbers and Additional Options

SPECIAL RELAY DESIGN

American Relays, Inc. is a custom relay specialist. Our major objective is to design and build parts that fulfill special requirements for the reed relay user.

Our facility is designed and equipped for prompt, systematic processing of samples, prototype and production orders.

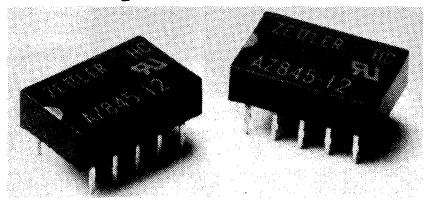
Relays, Call our

Engineering Hotline:

1-800-854-8474

The AZ 845: The Industry's Smallest Relay Sets the Standard in Peformance and Space Economy.

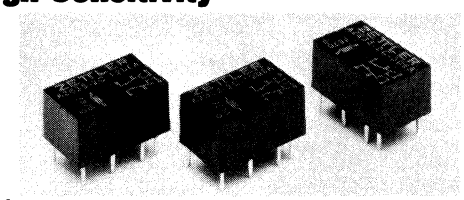


FEATURES

- Micro Miniature Size: .158 inches (4 mm) in height; .551 inches (14 mm) in length; .354 inches (9 mm) in width
- High Sensitivity, 79 mW Pick Up
- Monostable and Bistable (Latching) Two Coil Versions Available
- Meets FCC Part 68.302 1500 V Lightning Surge
- DIL Terminal Layout, Fits 10 Pin IC Socket
- Epoxy Sealed for Automatic Wave Soldering and Cleaning
- UL File E43203; CSA LR 36664

NEW PRODUCT SHOWCASE

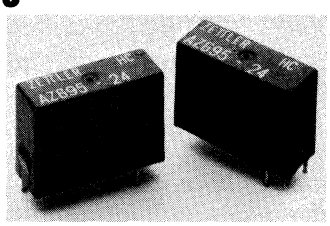
The AZ 835: This Polarized 1 Amp Relay Features Low Profile & High Sensitivity



Features

- Low Profile, 0.32" High
- High Sensitivity, 100mW Pickup
- Non-Latching or Latching, Single or 2 Coil Versions Available
- Bifurcated Crossbar Contacts
- Epoxy Sealed for Automatic Wave Soldering and Cleaning
- 2 Form C Contact with up to 1 Amp Switching Capability
- Meets FCC Part 68.302 1500 V Lightning Surge
- UL File E43203; CSA LR 36664

The AZ 695: This Sensitive 5 Amp Relay Requires Less Space Yet Provides More Performance



Features

- Extremely Small Footprint Utilizing Only 0.18 Square Inch of PCB Area
- Thin Vertical Profile Only 0.256" Wide
- 1 Form A Contact with up to 5 Amp Switching Capability
- High Sensitivity, 100 mW Pickup
- Dielectric Strength 3000 Vrms Contact to Coil
- Coils to 24 VDC
- Epoxy Sealed for Automatic Wave Soldering and Cleaning
- Sockets are also Available
- UL File E44211; CSA LR 36664

Aromat Relay Selector Chart

			Photo-MOS Relay							
			AQV10 Types				AQV20 Types			
			DC Type				AC/DC Type			
• Type of relay										
inch										
• Features			• Low on-resistance • Control with an input current of 10 mA							
• Output	Load voltage*	Peak AC	—	—	—	—	40 V	60 V	250 V	400 V
		DC	40 V	60 V	250 V	400 V	40 V	60 V	250 V	400 V
	Load current	1 A 0.5 A								
	Peak load current		1.8 A	1.5 A	0.6 A	0.5 A	1.8 A	1.5 A	0.6 A	0.5 A
	Power dissipation*		180 mW				180 mW			
	ON resistance	Typical	0.3 Ω	0.37 Ω	2.7 Ω	6.3 Ω	0.6 Ω	0.74 Ω	5.5 Ω	12.4 Ω
		Maximum	0.5 Ω	0.7 Ω	4 Ω	8 Ω	1 Ω	1.4 Ω	8 Ω	16 Ω
	Off state leakage current		1 μA or less				1 μA or less			
• Input	LED continuous forward current*		50 mA				50 mA			
	LED reverse voltage*		6 V				6 V			
	Peak forward current		1 A				1 A			
	Power dissipation*		150 mW				150 mW			
	LED operate current	Typical	2.3 mA				2.4 mA			
		Maximum	5 mA				5 mA			
	LED turn off current	Typical	0.8 mA				0.8 mA			
		Maximum	2.2 mA				2.2 mA			
	LED drop out voltage	Typical	2.3 V				2.3 V			
		Maximum	3 V				3 V			
• Switching speed	Turn on	Typical	0.23 msec.	0.22 msec.	0.13 msec.	0.09 msec.	0.3 msec.	0.41 msec.	0.21 msec.	0.18 msec.
		Maximum	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.
	Turn off	Typical	0.07 msec.	0.07 msec.	0.07 msec.	0.08 msec.	0.08 msec.	0.08 msec.	0.07 msec.	0.07 msec.
		Maximum	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.
• Total power dissipation*			210 mW				210 mW			
• I/O isolation voltage*			1,500 V AC				1,500 V AC			
• Temperature limits	Operating*		−20°C to +80°C −4°F to 176°F				−20°C to +80°C −4°F to 176°F			
	Storage*		−40°C to +100°C −40°F to 212°F				−40°C to +100°C −40°F to 212°F			
• I/O capacitance	Typical		1.3 pF				1.3 pF			
	Maximum		3 pF				3 pF			
• Initial I/O isolation resistance			1,000 MΩ (min.)				1,000 MΩ (min.)			
• Terminal layout (mm, inch grid) Tolerance: ±0.1 ±.004			Through hole terminal (Bottom view) 				Surface mount terminal Mounting pad (Top view) 			

*The values are absolute maximum ratings (25°C 77°F).

Military Grade/Half Size Relays

RELAY	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
 **HFW** **(Standard Sensitivity)**	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Sensitive version available • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/6 level L, M & P (Request Brochure HFW 88)
 **HFW4A** **(4 Amp Rating)**	• Low Level to 4.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure HFW 88)
 **HMS** **(Sensitive Series)**	• Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 36.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Energy-saving 100/125 milliwatt sensitivity • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/44 level L, M & P (Request Brochure HFW 88)
 **HMB** **(Bifilar Coil)**	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Bifilar transient suppression • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/22 level L, M & P (Request Brochure HFW 88)
 **LS** **(2 Pole Latching)**	• Low Level to 2.0 Amps • 2 Form C, (DPDT)	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Single or dual latch version • Excellent RF switching • Qualified to MIL-R-39016/45 level L, M (Request Brochure HFW 88)
 **LR** **(4 Pole Latching)**	• Low Level to 2.0 Amps • 4 Form C (4PDT)	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Four pole design • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure HFW 88)
 **SR** **(4 Pole Version)**	• Low Level to 2.0 Amps • 4 Form C (4PDT)	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Four pole design • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/40 level L, M (Request Brochure HFW 88)
 **SS** **(6 Pole Version)**	• Low Level to 2.0 Amps • 6 Form C, (6PDT)	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Six pole hi-density design • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure HFW 88)
 **C-10 AMP** **(10 Amp Series)**	• Low Level to 10 Amps • 1 Form C, (SPDT)	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Unique hi-current design package • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure HFW 88)

Military Grade/Full Size Relays

RELAY	SIZE (Case Size)	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
 **FW** (3 Amp Series) **FW5A** (5 Amp Version) **LFW** (Latching Series)	Variable	FW & LFW • Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A FW5A • Low Level to 5.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.3 to 110.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Sensitive version available (FW only) • Excellent RF switching • Ambient temp rating -65° to +125°C • One and two coil operation (LFW only) • Qualified to 5757/10 (FW only)

Military Grade/Other Relays

PF 10 Amp Power Relay 	H- 1.300 (33.02)* D- .515 (13.08) W- 1.075 (27.31)	• Low Level to 10.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.0 to 115.0 VDC	• Welded, hermetically sealed enclosures • Very low contact resistance • Package volume .72 cubic inch • Excellent RF switching • Ambient temp rating -65°C to + 125°C • Designed to MIL-R-5757/23 & 28 (Request Data Sheet PF-85)
MFW 1/6th Size Relay 	H- .410 (10.41) D- .230 (5.84) W- .500 (12.70)	• Low Level to 1.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	3.5 to 53.0 VDC	• Hermetically sealed enclosures • Low contact resistance • Total volume only .046 cubic inch • Excellent RF switching • Ambient temp rating -65°C to + 125°C • Qualified to MIL-R-39016/34, L & M level (Request Data Sheet MF-84)
SF 40 MW Sensitive Relay	H- 1.281 (32.54) D- .400 (10.16) W- .800 (20.32)	• Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	1.8 to 40.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • 40 milliwatt sensitivity • Excellent RF switching • Ambient temp rating -65°C to + 125°C • Designed to MIL-R-5757/13 (Request Data Sheet SF-85)
RD 4&6 Pole Relays 	H- 1.34 (34.04) D- 1.14 (28.96) W- 1.06 (26.92)	• Low Level to 2.0 Amps • 4 Form C, 6 Form C	26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Optional all-welded construction • 100 G Shock • Ambient temp rating -65°C to + 125°C • Qualified to MIL-R-5757/1 & 7 (Request Data Sheet RD-83)

Telephone Relays

 **MA** (4 Pole) **MB** (6 Pole) **MC** (12 Pole)	Variable	• Low Level (microwatts) to 2.0 Amps 28 VDC • MA-4 pole MB-6 pole MC-12 pole	6 VDC 12 VDC 24 VDC 48 VDC 60 VDC	• 4, 6 & 12 poles available • Bifurcated contacts • Low cost • PCB or plug-in mounting (Request Data Sheet MA/MB-85)
 **J** **C** **R**	Variable	• Low Level to 10.0 Amps • Contact Arrangements: Long Frame: up to 8 Form C Medium Frame: up to 8 Form C Short Frame: up to 4 Form C	6 to 250.0 VDC	• Optional hermetic sealing • AC or DC operation • Fast operate and fast release times • Variety of accessories • Ambient temp rating -55°C to + 85°C • Custom designs available (Request Catalog 502)
 **20/26** **210/211**	Variable *mm	• Point Variations: 10 to 52 point operation • Contact rating: 0.1 Amp @ 115 VAC or 30 VDC resistive Carry: 3.0 Amps	6 to 110.0 VDC	• Optional sealing • Insulation resistance 10^9 Ω at 500 VDC • Fast operate and fast release times • Variety of switch mounting accessories • Operating temperature -0°C to + 85°C • Custom designs available (Request Catalog 601)

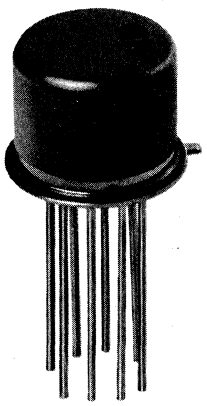
TO-5 Relays



TM & HM Relays

FEATURES:

- Built in accordance with MIL-R-39016/9: other QPL versions pending
- All welded construction, hermetically sealed
- State-of-the-art cleaning techniques and precious metal contact material with gold plating

SIZE:

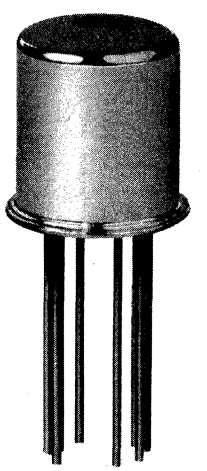
- Diameter
  - Enclosure (max) — .335 inches (8.51)
  - Base (max) — .370 inches (9.40)
- Height (max): .280 (7.11)

CONTACT RATING/ ARRANGEMENT:

- DC Rating:
  - Resistive — low level to 1 amp / 28 VDC
- Contact Resistance:
  - 0.1 ohm max before life
  - 0.2 ohm max after life
- Contact Arrangement:
  - 2 Form C (DPDT)

COIL VOLTAGES:

Coil Voltages (Nominal VDC)	Coil Resistance (ohms +/- 10% at 25°C)
5.0	50
6.0	98
9.0	220
12.0	390
18.0	880
26.5	1560
30.0	2500



TS & HS Relays

FEATURES:

- Built in accordance with MIL-R-39016/11: other QPL versions pending
- All welded construction, hermetically sealed
- State-of-the-art cleaning techniques and precious metal contact material with gold plating

SIZE:

- Diameter
  - Enclosure (max) — .335 inches (8.51)
  - Base (max) — .370 inches (9.40)
- Height (max): .375 (9.53)

CONTACT RATING/ ARRANGEMENT:

- DC Rating:
  - Resistive — low level to 1 amp / 28 VDC
- Contact Resistance:
  - 0.1 ohm max before life
  - 0.2 ohm max after life
- Contact Arrangement:
  - 2 Form C (DPDT)

COIL VOLTAGES:

Coil Voltages (Nominal VDC)	Coil Resistance (ohms +/- 10% at 25°C)
5.0	100
6.0	200
9.0	400
12.0	850
18.0	1600
26.5	3300
36.0	6500
48.0	11000

Options

- Diode Coil Suppression
- Special Coils
- Ground Pins
- Spreader Pads

MERCURY WETTED RELAYS

The largest selection available including all those discontinued by their former manufacturers.

HIGH FREQUENCY SWITCHING

HIGH FREQUENCY SWITCHING

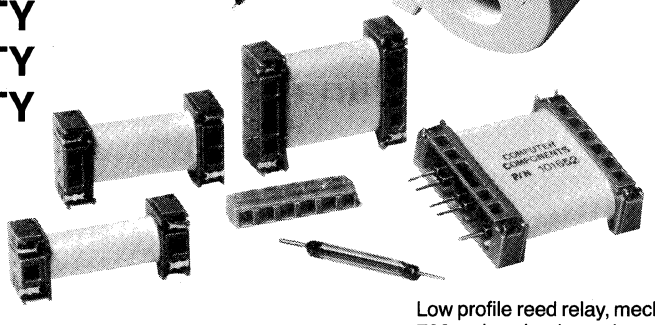
Available in Form A, B, or C contacts for frequencies to 50 MHz.

ENCAPSULATED DIP'S

Your source for the largest selection available up to 6 form or 4 form C contacts.

- Open styles
- High voltage
- Molded IC compatible
- Epoxy or metal housings
- Reed relays to MIL. specs
- Fully or partially encapsulated
- Choice of 5 different Form A & 4 different Form C switches

QUALITY INTEGRITY RELIABILITY

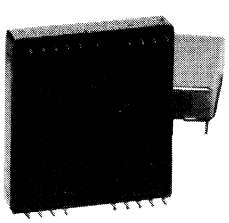


HP (Also 101, 201, 301, & 401 Series)

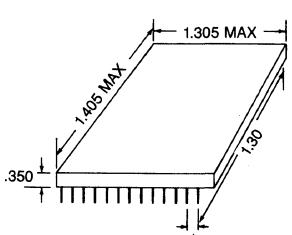
Low profile reed relay, mechanical & electrical replacement for IBM 766 series plug-in, replace reeds, no tools – no soldering

THE MULTI-POLE FLATPACK

The highest density reed relay available – Up to 10 form A or 8 form C or combinations of forms A, B & C



Better Built in the U.S.A.



Why compromise your design using several relays when one compact multi-pole relay can save valuable P.C. board space as well as cost.

SPECIAL DESIGNS

In view of the difficulty in offering a product line that is complete enough to cover every application and physical layout, Computer Components, Inc. maintains special engineering and design facilities to provide the project or design engineer with REED RELAYS specifically tailored to his particular requirements.

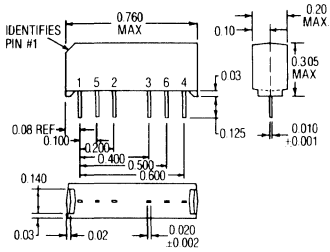
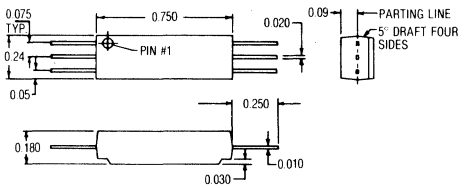
MOLDED REED RELAYS SIP (SERIES 9000) AND SURFACE MOUNT (SERIES 9200)

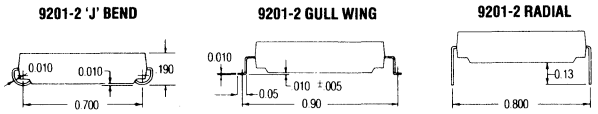
MECHANICAL SPECIFICATIONS





TERMINAL STYLE

LOCATION AND COPLANARITY TOLERANCE ±.003



ORDERING INFORMATION

To order a Coto relay, assemble a part number from the data to describe the desired parameters.

SIP

Model Number — **90XX – XX – XX**

- 01 = SPST, 4 Pin SIP
- 02 = 50Ω Coxial Shield.SPST, 6 Pin SIP
- 03 = SPST, 4 Pin SIP, Recommended For Load Switching

Coil Voltage

- 05 = 5 Volts Nominal
- 12 = 12 Volts Nominal

- 00 = No Option – Omit 0's
- 01 = Internal Diode*

SURFACE MOUNTED

Model Number — **92XX – XX – X0** — Terminal Style

- 01 = SPST, Recommended For Low Level Switching 4 Pin
- 02 = SPST, 50Ω Coaxial Shield 6 Pin

Coil Voltage

- 05 = 5 Volts Nominal
- 12 = 12 Volts Nominal

Terminal Style

- 0 = Gull Wing
- 1 = Axial
- 2 = 'J'
- 3 = Radial

ULTRA-LOW THERMAL EMF REED RELAYS FOR LOW-LEVEL DATA ACQUISITION SYSTEMS

THERMAL EMF

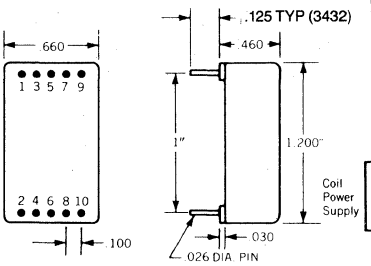
Ratings. Thermal EMF is specified differentially between the two thermal EMF switches (pins 5-6 and 7-8). It is directly proportional to coil power or the square of the applied voltage. When the relays are operated in a scanning mode, the thermal EMF is also proportional to the coil duty cycle.

Coto Series 3600 relays are available with maximum differential thermal EMF ratings of <5μV, <3μV, <1μV, or <0.5μV.

The Mercury wetted 3432 Relay is available with maximum differential thermal EMF ratings of <5μV, <10μV.

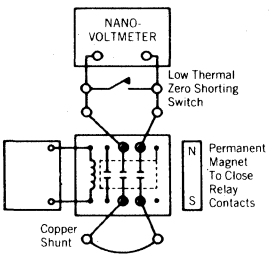
Note: The must operate and must release voltages and the coil resistance are specified at 25°C. These values vary by approximately 0.4%/°C as the ambient temperature varies.
Vibration: 20 G's to 2000Hz Shock: 50 G's

MECHANICAL SPECS



All dimensions are nominal
Pin 9 is the electrostatic shield pin.

Thermal EMF Test Circuit



ORDERING INFORMATION

To order – assemble a part number from the parameters.
Specifications subject to change without notice.

1. Mercury-wetted Relay 3432 must be mounted vertically with the arrow pointing up and shield pin at the top.
2. Consists of 20V Zener-diode and 1N4002 diode in series connected in parallel to coil.
3. For Series 3660, the third non-low thermal switch (9-10) is connected in common with the electrostatic shield at pin 9.

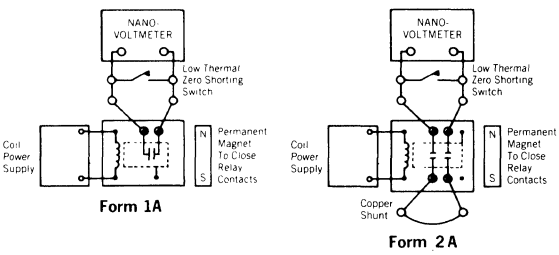
LOW THERMAL EMF REED RELAYS
SERIES 3500

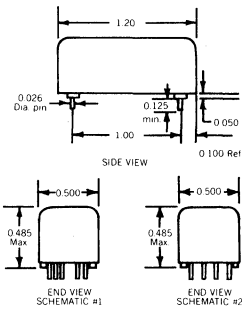
THERMAL EMF

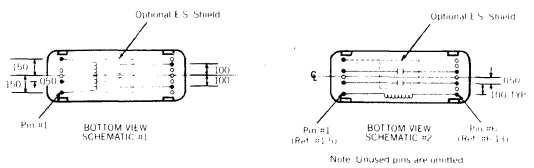
Ratings. The thermal EMF is specified individually for Form 1A relays and differentially between the switches for Form 2A relays. This measurement is made as shown in block diagram. Form 2A relays are measured by shorting pins 2 and 4 with a copper shunt and connecting a nanovolt meter across pins 8 and 10.

The 3500 relays are available with maximum differential thermal EMF ratings of either <10μV, <5μV, <3μV, <1μV or <500nV. The ratings are determined by 100% testing and sorting according to the thermal EMF's measured after the coil has been energized for 5 minutes at its nominal voltage.

Thermal EF Test Circuits:







ORDERING INFORMATION

To order – assemble a part number from the parameters. Specifications subject to change without notice.

35 XX-XX-XXX

- Model No.

1 Must be mounted vertically. Pin #1 is up.
2 The coil resistance & operate & release voltages are specified at 25°C. These values vary by approx. 0.39%/°C as the ambient temperature changes.
3 The life expectancy when switching intermediate voltages and currents may vary widely. Consult the factory for your exact load requirements.
4 Measured after 5 minutes at nominal coil voltage.

High Voltage = 3

Contact Form

Coil Voltage

Options:

Insulation Resistance
0 = 10^{10} Ohms (Form A's)
10^9 Ohms (Form C's)
1 = 10^{12} Ohms (Form A's)
10^{11} Ohms (Form C's)

Coil Termination
0 = End to End
1 = Same End

Electrostatic Shield*
0 = Omit
1 = Include

Diode
0 = Omit
1 = Include

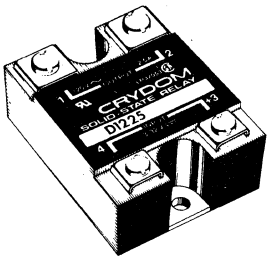
*E-pin indicates electrostatic shield pin.

* Life expectancy at full rated load is dependent upon the combination current/voltage switched. While typical life expectancy is >5 × 10^6. Consult factory for life data at your load levels.
‡ Consists of 20V Zener-Diode and IN4002 Diode in series, connected in parallel to coil.

CRYDOM COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES 1



2.5 TO 90 AMP, 120, 240 AND 480 VAC SCR AC OUTPUT, PANEL MOUNT SOLID-STATE RELAYS

These Crydom SSRs make it possible to switch AC power loads up to 47 kw. Output circuit consists of inverse-parallel (back-to-back) dual SCRs to meet the most demanding requirements. Features include zero voltage switching, phase control and normally closed models available.

AC Control Models — SCR Output

10 TO 75 AMP, 120-240V DC CONTROLLED, AC OUTPUT SSRs FEATURE IC FIRING CIRCUITS TO BOOST RELIABILITY AND PERFORMANCE

Combining integrated circuit technology and the proven Crydom series 1 high power dissipation output system results in superior SSRs. The reduction of control circuit components from 22 to 3 greatly increases life and reliability.

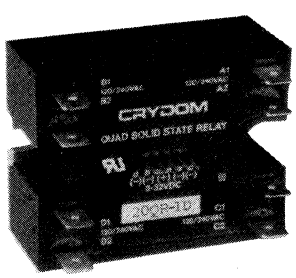
75SST240	180-280	75



These space saving and cost saving "dual" and "quad" series provide two (2) or four (4) totally independent AC output solid state relays in a single Series 1 package. The "dual" types employ inverse parallel SCR outputs and are available in 25 AMP and 40 AMP models. The "quad" types have triac outputs. Protection is provided by an internal dv/dt snubber network across the output switch which restricts the rate of rise of most voltage transients to within acceptable limits. Features include 2500 VRMS optical isolation, zero voltage turn-on and zero current turn-off of the the load. Random voltage turn-on units (–10 suffix) are also available for phase control applications.

These series are ideal when multiple SSR's are required for interfacing between the logic output of TTL, HTL, MOS or microprocessor circuits and AC loads such as motors, heaters, lamps, solenoids and transformers.

25, 40 AMP Dual-SCR Output 20 AMP Quad-Triac Output

General Specifications

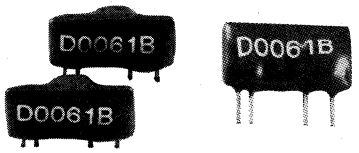
SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES DO 061



Crydom Model No.	Line Voltage VDC	Max. I @ 60°C A (RMS)	Control Voltage Range	Must Operate Voltage, Max.	Must Release Voltage, Min.	Surge Current 1 Sec.
DO 061A	3-60	1.0	3.0-9.0 VDC	3.0 VDC	1.0 VDC	5A
DO 061B	3-60	1.0	1.7-9.0 VDC	1.7 VDC	0.8 VDC	5A

The DO 061 are miniature DC output modules in a conformally coated SIP package, measuring only 0.46 × 0.9 × 0.4 in. with pinouts on the popular 100-mil grid. The input-to-output isolation is 4000 VRMS with an isolation resistance of 1×10^9 ohms. The units are derated 10mA per degree C above 60°C ambient temperature. Operating temperature range is – 30°C to + 80°C. When used for inductive loads, diode suppression across the load is recommended.

SERIES 2

8 AMPS, 120 AND 240 VAC AC OUTPUT, PANEL MOUNT SOLID-STATE RELAYS

The Crydom Series 2 solid-state relays combine small size, zero voltage switching and high current rating in a package designed for heat sink or panel mounting. Standard 0.187″ push-on terminals allow quick connection and are positioned to provide maximum isolation between control and power circuits.

SOLID-STATE RELAY HANDBOOK
WITH APPLICATIONS BY ANTHONY BISHOP

This comprehensive 223 page reference to the use and applications of Solid-State Relays (SSRs) incorporates a detailed tutorial on what SSRs are and why they are used in various industrial applications. In its pages you will find:

- A thorough introduction to solid-state relays
- Descriptions of various coupling methods
- SSR operation and parameters
- Coverage of different drive methods
- Thermal considerations
- Applications of SSRs in microprocessor-based equipment for industrial machine control
- A cross reference of types and manufacturers
- A handy glossary of terms

CRYDOM COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

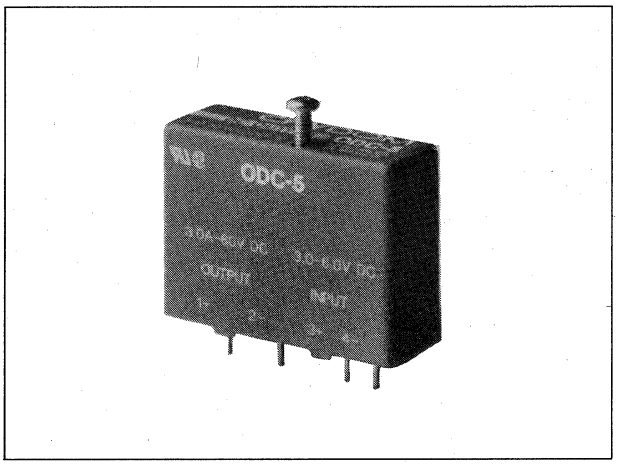
IAC/IDC/OAC/ODC SERIES

Industrial environments can subject sensitive microelectronic circuits to undesirable stresses in the form of voltage transients, electrical noise, shock, vibration, etc. These can result in permanent damage, spurious operations or false indications. Crydom's I/O modules are designed to provide an electrically clean, photo-isolated, noise-free "output" interface from logic level control systems to external loads such as motors, valves, solenoids, etc., or, an "input" interface from the load or sensors to microprocessor or computer-based logic level systems. Used with Crydom's I/O mounting boards, these solid-state modules exhibit long, reliable life in industrial environments.

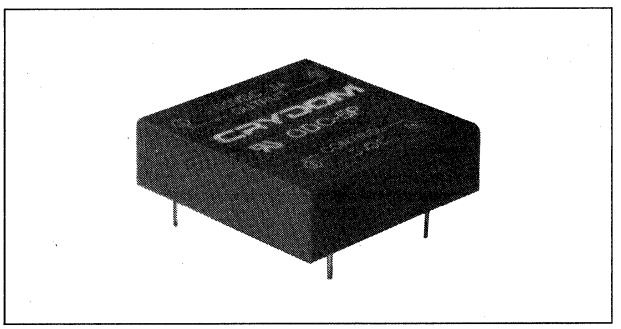


FEATURES

- Color-coded by Function
- 4000 Vrms Optical Isolation
- Industry Standard Package and Pin-out
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified, SEV Approved Types Available

IACP/IDCP/OACP/ODCP SERIES

These flat pack modules offer reliable input-output interfacing in a low profile package outline that permits PC board spacing on half-inch centers.

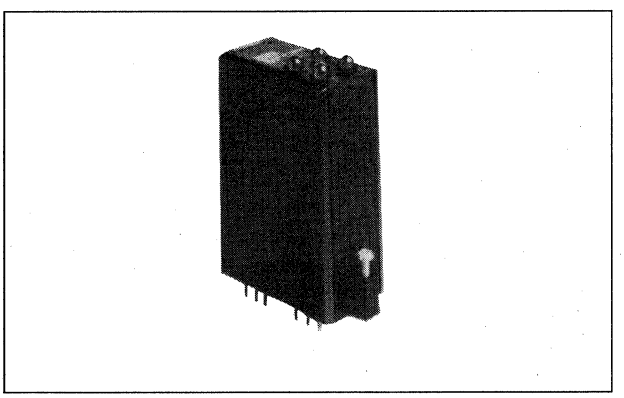


FEATURES

- Low Profile Permits 0.50 inch (12.70mm) PC Board Spacing
- Industry Standard Footprint
- Color-Coded by Function
- 4,000 Vrms Optical Isolation
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified

IACQ/IDCQ/OACQ/ODCQ SERIES

Each quad module has four I/O channels of the same type. They provide a high packaging density means of reliably interfacing logic level control systems with external loads such as motors, valves, solenoids, etc., or as an interface from the load or sensors to microprocessor or computer-based logic level control systems.

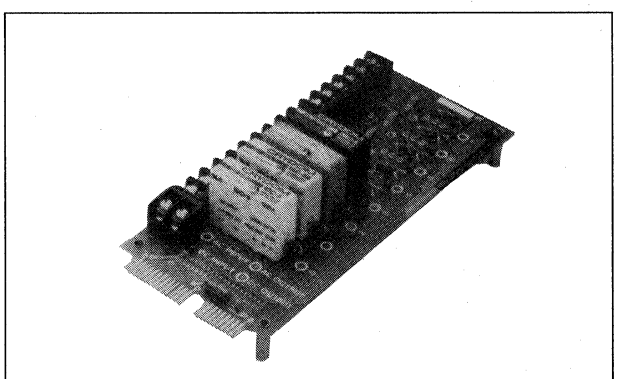


FEATURES

- Industry Standard Plug-in Package
- Input Modules Have Reverse Voltage Feedback Protection
- Output Modules Can Be Controlled By Sinking Logic
- Color Coded By Function
- 4,000 Vrms Optical Isolation
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified Types Available

PB SERIES

These mounting boards will accept input/output modules in any combination of input or output types of the same style (single or quad channel). Modules can be easily and quickly inserted, without disturbing field wiring. The single channel models provide an LED status indicator, plug-in 5 amp fuse and 3.3 Kohm pull-up resistor for each module.



FEATURES

- LED Status Indicators
- Plug-in Fuses
- Pull-up Resistors
- Barrier Strip Screw Terminals for Field Wiring
- Card Edge Logic Connections Available
- Screw Terminal Logic Connections Available
- UL Recognized Types
- CSA Certified Types

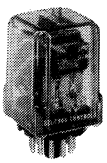
DELTROL RELAYS

MADE IN U.S.A.

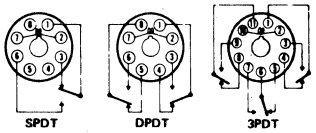
SEE SECTION 4550 FOR SOLENOIDS



105 Series

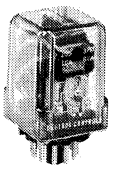
L = 1-3/8
W = 1-3/8
H = 2

General purpose plug-in relay for continuous duty operation. Plastic cover. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).



BASE DIAGRAMS FOR 105 SERIES

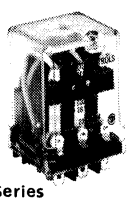
B-3 HOLD DOWN SPRING S/N 20171-00



105A Series

L = 1-3/8
W = 1-3/8
H = 2

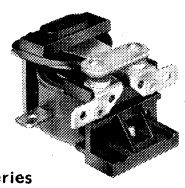
General purpose plug-in relay with a lamp connected across relay coil; indicates voltage applied to coil. Recognized under the components Program of Underwriters Laboratories, Inc. (File No. E37066).



165/166 Series

L = 1-13/32
W = 1-1/2
H = 2-3/16

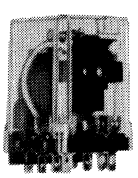
Plastic covered general purpose plug-in relay. Molded nylon coil. Continuous duty operation. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). Also CSA Recognized.



170 Series

L = 1-7/8
W = 1-5/8
H = 1-1/4

High current relays for industrial control applications. Molded nylon encapsulated coil is resistant to fungus and moisture. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).



268 Series

W = 1-1/2
D = 1-7/16
H = 2-1/2

Plastic covered general purpose plug-in relay. Molded nylon coil. Continuous duty operation. .187 quick connect terminals. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). Also CSA recognized.

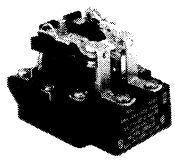
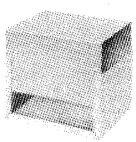
Single Pole
L = 2-1/2
W = 2-1/2
H = 2-3/16



Double Pole
L = 3-11/32
W = 2-1/2
H = 2-3/8

Heavy duty power relay for industrial control applications. Particularly suited for motor controls, heater loads, welder loads, and other power switching applications. Molded nylon coil resists fungus and moisture. Long life, rugged construction. Rating: 30 amps, 1-1/2 hp, 120/240 VAC. Heavy duty screw-type terminals. Mounting: two 3/16" holes on 1-7/8" centers. Listed under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). CSA listed (File No. 20690).



B-5 DUST COVER

L = 5
W = 4
H = 3

S/N 20257-80

Sealed knock-out holes for standard conduit fittings. Relay mounts on pre-drilled base. Constructed of Aluminum. Snap action cover release. Accommodates relay series 900.

900 SERIES

Auxiliary Switch Models are Also Available.

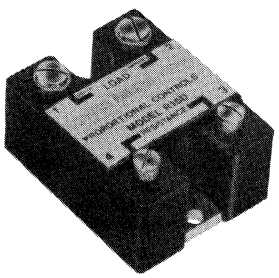
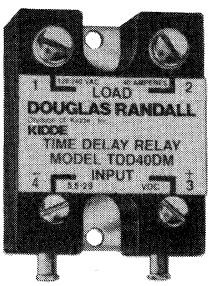
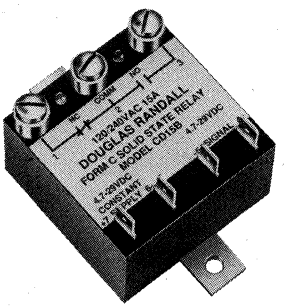
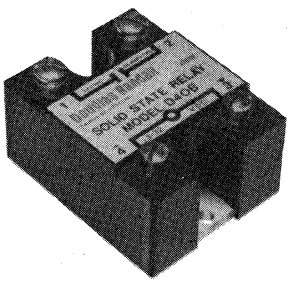
RELAYS









PROPORTIONAL CONTROL

- R series for variable AC control with variable resistor input
- An additional module to provide variable AC control with 0-10 VDC input
- RD series for variable AC control with 0-10 VDC input in one module

See EEM page **B•1467**

TIME DELAY

- Up to 40 amp operation
- Total solid state unit
- Timing set by external resistor from 300 ms to 23 min. duration on standard units
- Full opto-isolation, zero crossover, integral heat sink features

See EEM page **B•1467**

FORM C RELAY

- True Form C Function
- Full Solid State Design Incorporates Opto Isolation, 0-Voltage Switching, Integral Heat Sink
- LED Indicators of Switching Status
- Models Available for Both AC and DC Loads

See EEM page **B•1466**

SOLID STATE RELAY

- Full line of standard AC output relays UL recognized
- DC output relays to 8 amp and 500V
- Opto isolation, zero voltage switching

See EEM page **B•1466**

- True Form C Function
- Full Solid State Design Incorporates Opto Isolation, O-Voltage Switching, Integral Heat Sink
- LED Indicators of Switching Status
- Models Available for Both AC and DC Loads

OPERATION

DC INPUT

The relay requires a constant supply of DC voltage independent of the switching signal or output load function. In order for the relay to operate, both DC constant supply and AC load must be connected to the appropriate terminals (see schematic). At this point, the NC load will conduct while the NO load will remain open. In order to switch the relay, the signal terminals are activated by a DC signal of 4.7-29 VDC. At this time the normally closed contacts will open and the normally open contacts will close. LED on indication shows the conducting side at all times. Removal of the DC signal voltage switches the relay to its initial conducting position. If the constant supply is not applied, both sides will be open and both LEDs will be off. Constant supply can be used as an on-off switch on the normally closed side.

INPUT DATA-AC LOAD RELAYS

	DC SIGNAL	CONSTANT SUPPLY	AC SIGNAL	CONSTANT SUPPLY
Range	4.7-29 VDC	4.7-29 VDC	Dry Closure	90-140 VAC
Must Operate	4.7 VDC	4.7-29 VDC		90 VAC
Must Release	1.0 VDC	1.0 VDC		10 VAC

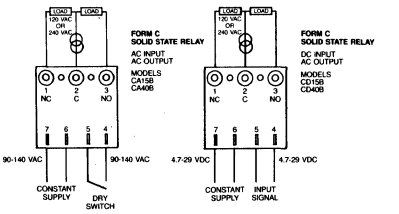
Off-State Leakage Current	5MA	5MA	10MA	10MA
Isolation Output to Base	2500V	2500V	2500V	2500V

AC INPUT

The Form C relay with AC input requires a 90-140 VAC constant supply and a dry closure for the switch signal. The operation of the relay and indication of the LEDs are the same as for the DC input models.

O-CROSSING AND TRANSFER TIME

The Form C relay incorporates a O-crossing feature to minimize switching transients. To assure break-before-make between output terminals, a 10ms. minimum transfer time is designed into the unit. Due to O-crossing variations, the maximum transfer time could be as much as 18ms.



The relay is a seven terminal device. Terminals 1, 2, and 3 are output terminals. Terminals 4 and 5 are signal terminals, and 6 and 7 are constant supply terminals.

FORM C DC SWITCHING RELAYS

The Douglas Randall Form C DC solid state relay is a true break-before-make device. LEDs indicate the conducting side of the relay. Opto isolation and integral heat sink are standard in a fully epoxy encapsulated unit.

Response Time	150 m sec @ 10 VDC (typical)	300 m sec @ 10 VDC
Isolation (Input to Output)	500 VRMS	500 VRMS

Notes: 1. All data is measured at 25°C.
2. The input is not polarity sensitive, but must be protected against voltages above 10 VDC.

TIME DELAY RELAY SWITCHING

Series TD relays are available in delayed make or delayed break models, with DC or AC input, and switching capability up to 40 amps at 120/240 VAC. They incorporate leading edge R/C micro circuit technology and retain the desirable characteristics of our standard solid-state relays, such as opto-isolation, zero cross-over, and integral heat sink. Time delay is set by applying an external resistor to the terminals provided.

SOLID STATE RELAYS SERIES K

DC OUTPUT/DC CONTROL SIGNAL

NEW OUTPUT TO 300 VDC

Douglas Randall Series K are SPST (NO) or (NC) relays which will switch loads of 4, 8 or 12 Amps to 250 VDC. They provide rapid switching and opto-isolation between input and output. The sensitive inputs are compatible with DTL or TTL logic. Arc-free switching makes these relays suitable for hazardous atmospheres.

MECHANICAL ARRANGEMENT

See AC output relays on page **B•1466**

MODEL NUMBERS

Output Voltage	Current	Model
2-32 VDC	4 Amp	K04A
	8 Amp	K08A
	12 Amp	K12A
2-55 VDC	4 Amp	K04B
	8 Amp	K08B
	12 Amp	K12B
2-250 VDC	6 Amp	K06D

*Inductive loads must be diode suppressed.
†Normally closed add—(NC) K04A-NC.

INPUT SIGNAL DATA

Range	3-32VDC
Must Operate	3VDC
Must Release	1VDC
Input Impedance	1000Ω Min.
Isolation	
Signal to Load	1500V
Signal to Base	1500V
Temperature	−30°C to +80°C

OUTPUT DATA

Continuous Current	4A, 8A, or 12A
DC Line Voltage	2-32VDC or 2-55VDC
Off State Leakage	2mA DC
Turn On Time	50 Micro Sec.
Turn Off Time	500 Micro Sec.
Voltage Drop @ Rate Current	1.5VDC Max.
Isolation Load to Base	1500V

SIZE:
2¼L x 1¾W x 1⅛H Max.

WEIGHT:
4 Ounces Max.

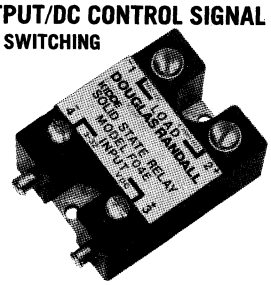
TERMINATION:
Standard Models—
Control Signal:
6-32 Screws
Output:
8-32 Screws

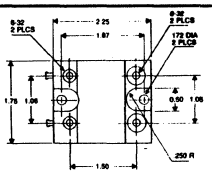
Special Models can be provided with lead wires or other types of termination in OEM quantities. Consult the factory.

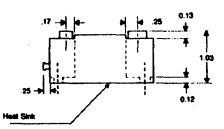
SOLID STATE RELAYS SERIES F

DC OUTPUT/DC CONTROL SIGNAL

500 VDC SWITCHING







Series F Relays are available SPST (NO) or SPST (NC). They provide rapid switching of loads up to 8 amperes DC. Inputs are opto-isolated and compatible with DTL or TTL logic signals. Arc-free switching makes them suitable for hazardous atmospheres as well as machine tool process control equipment.

MODEL	CURRENT	OUTPUT VOLTAGE	SURGE CURRENT (MAX.) 100µs @ 2% DUTY CYCLE
F04E	4 Amp	25-500 VDC	30 Amp
F08E	8 Amp	25-500 VDC	60 Amp

Note: To designate normally closed relays, add suffix "NC"; e.g., F04E-NC.

300	The ultimate in high current DC load switching. The load is switched with power semiconductors short term, and carried by the relay hard contacts long term, preventing the semiconductors from overheating. The Arcless™ uses a SPST heavy duty mechanical relay. In addition to switching 70 AMP loads, the Arcless will withstand a 180 AMP inrush current from motor or lamp load. Applications for arcless relays should include all high current DC switching where reliability and long life are important design criteria. **No** arc between contact points–**No** electro-magnetic interference. This non-arcing feature is useful for switching where EMI or RFI might cause damage to equipment, software, or quality of radio signals.

EICHHOFF

The leading European manufacturer since 1948.
Pioneer in EMI/RFI suppression.
Resin sealed, high performance, high reliability power line filters.
Precise performance within product specifications.
Complete engineering capability for application assistance.

eem SI UNITS

RELATIVE QUANTITY SYMBOLS

$\neq$	not equal to
$\approx$	approximately equal to
$\propto$	proportional to
$<$	smaller than
$\leq$	smaller than or equal to
$\ll$	much smaller than
$>$	larger than
$\geq$	larger than or equal to
$\gg$	much larger than
$\equiv$	identical to or equivalent
$\uparrow$	increases
$\downarrow$	decreases

PREFIXES FOR SI UNITS

Multiple	Prefix	Symbol
10^{12}	tera	T
10^{9}	giga	G
10^{6}	mega	M
10^{3}	kilo	k
10^{-3}	milli	m
10^{-6}	micro	μ
10^{-9}	nano	n
10^{-12}	pico	p

Quantity	Symbol	SI Unit	Symbol	Derivation
acceleration	a	m s^{-2}	—	velocity/time
acceleration due to gravity	g	m s^{-2}	—	velocity/time
amount of substance	n	mole	mol	mole fraction (n) used
amplification factor	μ	*a ratio*	—	—
angle	$\theta_1, \varphi_1, \alpha_1$	—	—	—
angle of incidence	i	degree or radian	°	—
angle of refraction	r	degree or radian	°	—
angle, Bragg	θ	number	—	—
angle, critical	c	degree or radian	°	—
anode slope resistance	R_A	ohm	Ω	$\Delta V_a / \Delta I_a$
area	A	metres squared	m^2	$l \times b$
atomic number	Z	a number	—	number of protons
Avogadro constant	L, N_A	number	—	—
breadth	b	metre	m	fundamental unit
capacitance	C	farad	F	charge/p.d.
charge, electric	Q	coulomb	C	current × time
charge on electron	e	coulomb	C	$1{\cdot}6 \times 10^{-19}$ C
conductance	G	ohm^{-1}	Ω^{-1}	reciprocal of resistance
current, electric	I	ampere	A	fundamental unit
decay constant	λ	*a ratio*	—	—
density	ρ	kg m^{-3}	—	m/V
distance along path	s	metre	m	fundamental unit
efficiency	η	*a ratio*	—	work output/work input
electrochemical equiv.	z	g C^{-1}	—	mass/charge
electromotive force	E	volt	V	energy/charge
electron	e	—	—	—
energy	E	joule	J	N m
energy, kinetic	E_k	joule	J	N m. $E_k = 1/2mv^2$
energy, potential	E_p	joule	J	N m. $E_p = mgh$
Faraday constant	F	coulomb mol^{-1}	C mol^{-1}	96,500 C mol^{-1}
field strength, electric	E	V m^{-1}	—	potential gradient: p.d./dist.
field-strength magnetic	H	ampere-turns	—	current × no. of turns
flux, magnetic	Φ	weber	Wb	e.m.f/rate of change of flux
flux density	B	tesla	T	flux/area
focal length	f	metre	m	—
force	F	newton	N	kg m s^{-2}
free energy	ΔG	joule	J	—
frequency	f	hertz	Hz	oscillations/time
gas constant	r	joule	J	energy
half-life,radioactivity	$t_{1/2}$	second	s	fundamental unit
heat capacity	C	J K^{-1}	—	quantity of heat/temp. rise
heat of reaction	ΔH	joule	J	heat energy
heat capacity, specific	c	J K^{-1} kg^{-1}	—	heat capacity/mass
heat, quantity of	q	joule	J	energy

SI UNITS

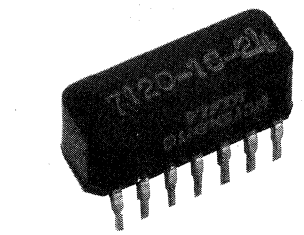
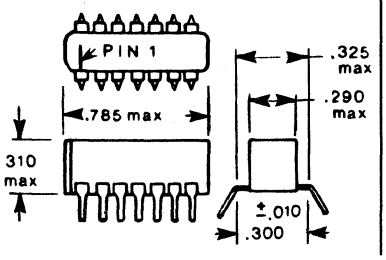
Mercury Relays That Operate in any Position

DIP Relays

- Position-insensitive, bounce-free LCI sealed capsule
- 100% run-in @ 10 VDC-100 mA for 2.5 x 10^6 operations
- 5, 12 and 24 VDC-700 Mw coil drives
- Life expectancy over 50 x 10^6 operations
- Latching or non-latching operation
- Molded diallyl phthalate case





- Operate Time (max.) — 2.5 ms
- Release Time (max.) — 3.0 ms
- Contact Resistance — 75 milliohms

7000 Series (DC to 10 MHz)

- Rated Contact Load — 1.0 amp 4 VDC to 0.3 amp @ 200 VDC

2000 Series (DC to 100 MHz)

(Specifications at 100 MHz)

- Rated Contact Load — 10 watts CW
- Insertion Loss (Typical) — 0.2 dB
- Isolation (Typical) — 40 dB
- VSWR (Typical) — 1.5

FIFTH DIMENSION INC.

Mercury Relays That Operate in any Position

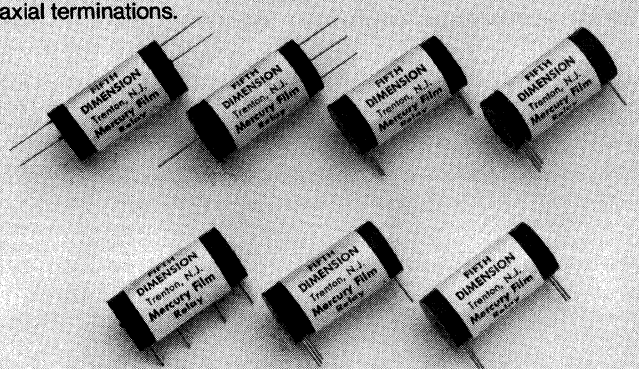
- **No Contact Bounce** — Produce clean square-wave pulses
- **Position Insensitive** — No pool of mercury
- **Self-Healing Contacts** — Always wetted with fresh mercury
- **Rugged Construction** — Welded steel switching capsule
- **Sealed Package** — High density polyethylene (WK Series)

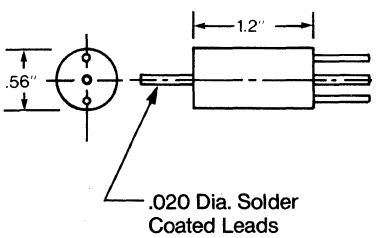
Specifications

Meet Lightning Surge Standards — 2500 volts coil-to-contact breakdown meets FCC standards (WK Series only)
Contact Type: Form A (SPST) mercury film
Contact Bounce: None at 80% of rated voltage or higher
Load Current to 52 VDC: 0.24 amps
Load Current to 200 VDC: 0.10 amps
Contact Resistance: 150 milliohms (max.)
Contact Resistance Stability: ±15 milliohms
Contact Breakdown Voltage: 800 volts DC or AC (rms)
Coil-to-Contact Breakdown: 2500 VAC
Operate Time: 4.0 milliseconds (max.)
Release Time: 4.0 milliseconds (max.)

Molded Case Series WK. Relay can be submerged in appropriate cleaning solvents during board assembly.

Series WK Mercury Relays are available in a wide variety of footprints including 0.1, 0.15 and 0.2-inch PCB spacing as well as with in-line and axial terminations.

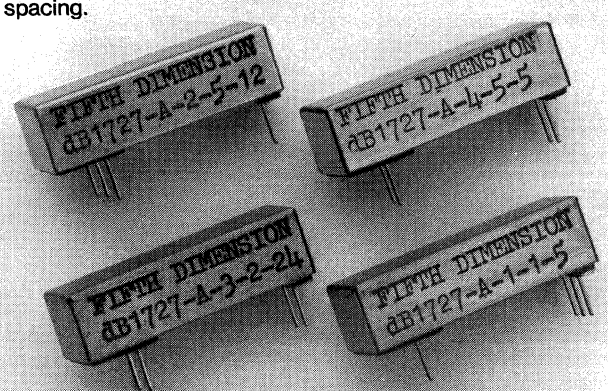


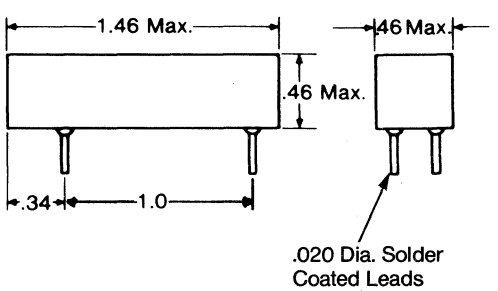


Nominal Coil Volts	Coil Resistance (± 10%) Ohms			Must Operate Volts	Must Release Volts
	250 MW	375 MW	500 MW		
5	100	67	50	4.0	0.5
12	575	384	288	9.6	1.2
24	2300	1536	1150	19.2	2.4

Shielded Series dB. Open-frame magnetically shielded.

Series dB Mercury Relays are available with 0.1, 0.15 or 0.2-inch PCB spacing.





Nominal Coil Voltage	Coil Resistance (± 10%) Ohms			Must Operate Volts	Must Release Volts
	125 MW	250 MW	500 MW		
5	200	100	50	4.0	0.5
12	1150	575	288	9.6	1.2
24	4608	2300	1150	19.2	2.4

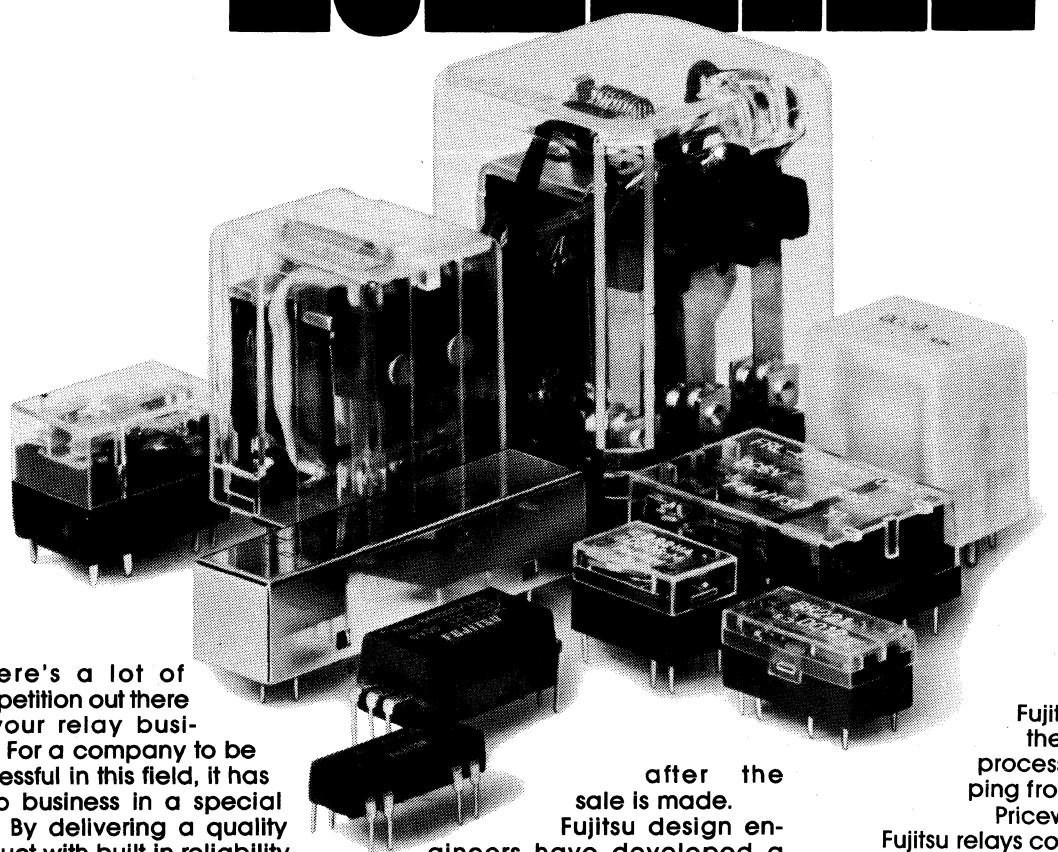
FUJITSU: RELAYS



There's a lot of competition out there for your relay business. For a company to be successful in this field, it has to do business in a special way. By delivering a quality product with built-in reliability, price and service.

Fujitsu relays have it all. Our relays meet or surpass the quality of those made by the competition. They're built to do a job and do it right. And Fujitsu relays are compatible with most relays on the market.

As far as service, Fujitsu considers it a point of pride, as well as good business to cater to your company's needs before, during and after the sale is made.

Fujitsu design engineers have developed a complete line of all the most popular relays in use today. A supply of these standard relays is always readily available. We also offer a customizing service where we work with your engineers to design relays tailored specifically to your needs.

Our warehouse is stocked to supply your company with samples of our fine products. Quantity orders come directly from the factory. And Fujitsu can match the lead time for processing and shipping from any source.

Pricewise, you'll find Fujitsu relays cost the same or less than the competition, leaving little reason not to try us.

For general purpose industrial relays to special application telecommunications relays, from fiery fractional horsepower motor loads to low-level logic circuits, it pays to switch to Fujitsu where quality, reliability and service are part of our product.

For more information on our superior components, call or write your local FCA rep or distributor today.

FUJITSU

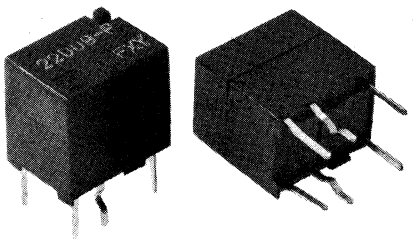
RELAYS

MICROMINIATURE RELAYS FOR P.C. BOARDS

FBR20 SERIES

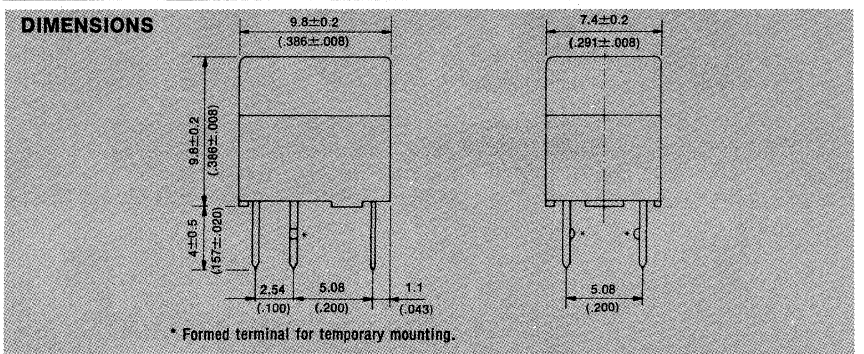


Fujitsu FBR20 series relays are designed for PC board mounting with 1A contact ratings — perfect for microminiature applications.

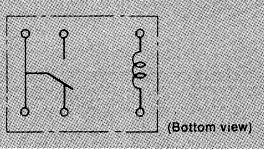
FEATURES

- **Microminiature size**
  Two FBR20 series relays can be mounted in the space now required for a single FBR210 series relay.
- **1A contact rating**
  Despite their microminiature size, FBR20 series relays have contact rating of 1A at 24 VDC for convenient installation.
- **Gold overlay single or bifurcated contact**
  Contact reliability is assured in low level applications by contact shapes and materials especially designed for signal switching applications.
- **Low power consumption**
  With a rated power consumption of only 0.3W, today's expensive energy costs can be reduced significantly.
- **Wide range of drive voltages**
  Drive voltages from 1.5 VDC to 24 VDC are available for a wide range of applications.
- **Strong shock resistance**
  Even with a 50G shock, FBR20 series relays never miss a switch.
- **Easy to pattern-design**
  Separate terminal connection with drive and output sections allow easy pattern design.
- **Formed terminal available for temporary lock**
  The unique design of the forming terminal allows FBR20 series relays to be temporary mounted for greater design flexibility.
- **Automatic soldering provision**
  The terminal is sealed to prevent flux from entering during automatic soldering.
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.

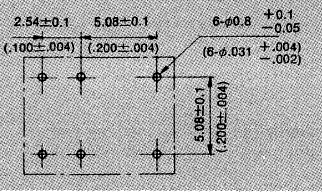
DIMENSIONS



SCHEMATIC



MOUNTING HOLE LAYOUT



ENGINEERING DATA

Item	Specifications
Contact Arrangement	SPDT (1 Form C)
Contact Shape	Single contact (FBR21), Bifurcated contact (FBR22)
Contact Material	Gold overlay silver, Gold overlay silver-palladium alloy (—P)
Contact Rating	24 VDC-1A, 120 VAC-0.5A (resistive load)
Maximum Carrying Current	2A
Maximum Switching Voltage	125 VDC, 125 VAC
Maximum Switching Power	24 WDC, 60 VA AC (resistive load)
Initial Contact Resistance	100mΩ max. (measured at 6V DC-0.1A)
Coil Power	0.3W (at rated voltage, 20°C)
Coil Temperature Rise	45°C (at rated voltage, 20°C)
Insulation Resistance	1,000MΩ min. (at 500 VDC)
Withstanding Voltage	Between contacts: 500 VAC for 1 minute Between contact and coil: 750 VAC for 1 minute
Vibration	20G, 10 ~ 300 Hz (dual amplitude, maximum 3.0 mm). No contact chatter longer than 1.0 ms.
Shock	Operation error: 50G (sine half-wave of 11 ms). No contact chatter longer than 1.0 ms.
Operate Time	5 ms max. (at rated voltage)
Release Time	3 ms max. (after rated operation)
Life Expectancy	Mechanical: 5 x 10^6 cps. min. Electrical: Gold-overlay silver contacts: 100 x 10^3 ops. min. Gold-overlay silver-palladium alloy contacts: 200 x 10^3 ops. min. (at rated contact load)
Maximum Switching Frequency	Mechanical: 18,000 operations/hour Electrical: 1,800 operations/hour (at contact rated load)
Ambient Temperature	−30°C ~ +65°C (at rated operation)
Ambient Humidity	45 ~ 85% RH
Weight	1.7 g (approx.)

SELECTION TABLE

Type	Voltage Specifications	Coil Rated Voltage	Coil resistance (±10%)	Coil Current (at Rated Voltage)	Pick-Up Voltage	Drop-Out Voltage	Maximum Voltage Allowance	Rated Power Consumption	Coil Temperature Rise	FBR21D01		RFBR21D01P

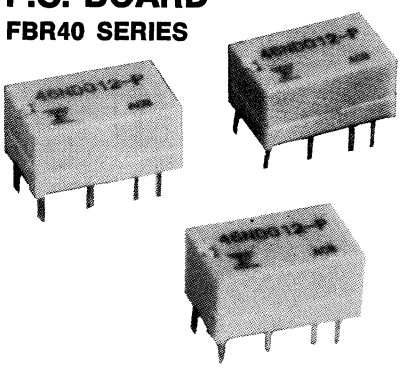
ULTRA-MINIATURE RELAYS FOR P.C. BOARD

FBR40 SERIES



The Fujitsu FBR40 Series relay with a pick-up power consumption reduced to 85 mW is an extremely small DPDT CONTACT relay designed for PC board mounting.

FEATURES

- **Ultra-miniature low-profile design**
  At half the size of the conventional FBR240 relay and requiring only three quarters of the board area, a drastic reduction is size has been achieved in the design of the FBR40.
  15.8 (L) x 9.7 (W) x 7.8 (H) mm.
- **High dielectric strength**
  Dielectric withstanding voltage between contacts and coil is over 1,000 VAC and with the ability to withstand a surge voltage of over 1,500 V, it conforms to FCC 68.302 standard.
- **High-shockproof type**
  Even a shock force of 30 G will not result in a malfunction.
- **Low power consumption**
  With a high efficiency built-in permanent magnet, operating power consumption is only 85 mW. (Rated power consumption is 150 mW.)
- **Formed terminal for temporary lock**
  The terminals of the FBR40 are specially formed so that they can be temporarily attached to the PC board.
- **Pattern design is easy**
  The terminal connections are designed so that the drive portion (coil) and the output portion (contacts) are isolated, which simplifies pattern design.
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.

DIMENSIONS Unit: mm (inch)

(bottom view)

Note 1. This relay is polarized. Please refer to the schematic when designing a circuit.
Note 2. An abbreviated designation is marked on the top surface of the dust cover as follows:
(Ex.) Designation: FBR46D012-P
Marking: 46D012-P
Note 3. Terminal numbers are not shown on the relay.

ENGINEERING DATA

Item	Specifications
Contact Arrangement	DPDT (2 Form C) bifurcated contact
Contact Material	Gold overlay silver-palladium alloy
Initial Contact Resistance	100 mΩ max. measured at 6V DC, 0.1A
Insulation Resistance	100 mΩ min. at 500V DC
Dielectric Withstanding Voltage	Between open contacts 500V AC for 1 min. Between contact and coil and between adjacent contacts 1,000V AC for 1 min.
Surge Voltage (FCC 68.302)	1,500V/10μsec/700μsec 1,500V 750V Between coil and contact Between adjacent contacts 10μsec 700μsec
Electrostatic Capacitance Between Contacts (Reference)	Between open contacts approx. 1 pF Between coil and contact approx. 2 pF
Vibration	Operation malfunction 10-55 Hz (Dual amplitude 1.5 mm) Durability 10-55 Hz (Dual amplitude 1.5 mm)
Shock	Operation malfunction 30 G (11 msec) Durability 100 G (11 msec)
Operate Time	5 msec max. (bounce time not included)
Release Time	5 msec max. (bounce time not included)
Life Expectancy	Mechanical: 10 x 10^6 ops. min. Electrical: 100 x 10^3 ops. min. (At contact rated load)
Maximum Switching Frequency	Mechanical: 18 x 10^3 times/hour Electrical: 1,800 times/hour (At contact rated load)
Operating Temperature Range	−30°C-+70°C (See Figure 2)
Operating Humidity Range	45-85% RH
Weight	3 g approx.

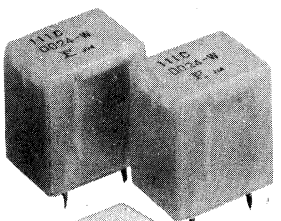
RELAYS

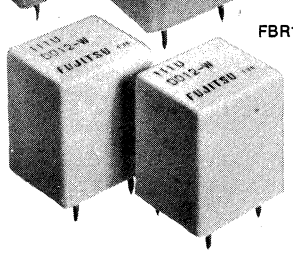
MINIATURE RELAYS FOR P.C. BOARDS

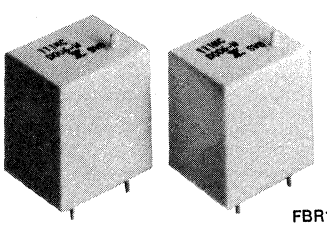
FBR100 SERIES

SPDT 3A-28V DC/120V AC, 6A-28V DC/120V AC



FBR111





FBR111N

The Fujitsu FBR111 and FBR111N Series are low cost SPDT relays with a versatile switching capability. The contact is rated 3A, 28V DC; 3A 120V AC for standard contact, or up to 6A, 28V DC; 6A, 120V AC for special heavy duty contact.

These small size, sensitive relays, designed to be mounted on printed circuit boards, feature simplified construction and a low power dissipation.

It is ideal for use in audio equipment, business machines, vending machines, security systems, game machines and automotive applications.

The FBR111N Series is the immersion cleanable version where printed circuit board cleaning is required.

The relay specified FBR111U is UL recognized for office equipment and business machines. (File No. E63615.) CSA certified.

SCHEMATICS

Notes:
1. Cut-off nib must be removed after relay soldering and board cleaning.
2. Although the plastic cover is bonded to the relay base, it is not hermetically sealed. Therefore, when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning (water temperature is less than 50°C).

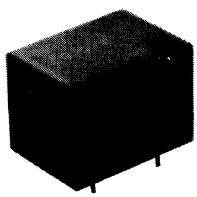
Note 1. 48V rated voltage relays are available on special order.
2. Each product bears its own designation on the top of the cover, but initial code 'FBR' is omitted.
* Add $0.07 to price for –K, $0.28 for –M, $0.14 for –W.
For CSA certified relays, –CSA suffix must be added to part number of UL type. Price is same as UL type.

SMALL CONTROL RELAYS FOR P.C. BOARDS

FBR160 SERIES



Fujitsu FBR160 series small control relays are PC board mounted and have excellent cost performance.

FEATURES

- **Same terminal array as FBR100**
  These relays have the same foot print as Fujitsu's conventional FBR100 series.
- **Lower profile**
  Since their profile is 7 mm lower than that of the FBR100 series relays, they can be used in smaller equipment.
- **Flux-prevention structure**
  The contacts are located on the top of the relay to protect them from solder flux from the terminals.
- **Meets major safety standards**
  The relays structure is designed to meet the Japan Electric Appliance Control Law (150V or less) and UL standards (114).
- **Choices of contact materials**
  Two different kinds of contact materials can be specified according to the load.
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.
- **Contact Ratings**
  • Standard (Silver)
  3A 28V DC 120V AC
  • –K (Silver-Cadmium Oxide)
  3A 28V DC 120V AC
  • –H (Silver-Cadmium Oxide)

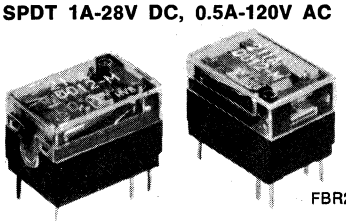
RELAYS

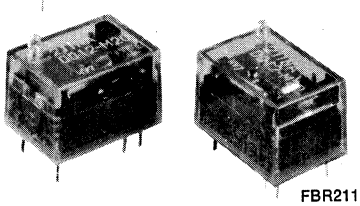
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS

FBR210 SERIES

SPDT 1A-28V DC, 0.5A-120V AC



FBR211



FBR211N

The FBR211 and FBR211N Series of ultra-miniature relays allow high component densities for savings in both equipment size and cost for the printed circuit board. The FBR-211N Series is suitable for immersion cleaning in freon and aqueous systems.

These highly sensitive relays with gold-clad SPDT contact arrangements are ingeniously designed so as to offer flux-contamination-immunity and load handling capabilities of 1A at 28V DC or 0.5A at 120V AC under a resistive load. The 0.1″ grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high density mounting and for use in audio and wireless communications, office and vending machines, automobiles and various control applications.

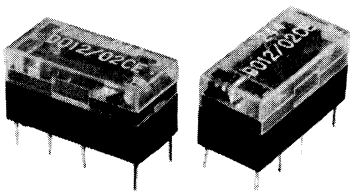
FUJITSU

RELAYS

LOW PROFILE RELAYS FOR P.C. BOARDS

FBR240 SERIES



FBR244 and FBR244N Series Relays are low profile, P.C. board relays with 2 Form C (DPDT) contact arrangements in D.I.P.-compatible plastic housing and have a 2.54mm pinout grid spacing to provide 16-pin-DIP-socket compatibility. Watertight terminal sealing prevents relay from contamination by soldering flux and N type allows automatic wave soldering and board washing without relay damage. Single or bifurcated contacts switch 1A at 28V DC or 0.5A at 120V AC and have a rated-load life-time of 5×10^5 operations. These relays are suitable for telecommunication equipment, audio equipment and business machines.

- High sensitivity versions are available in 200 mw

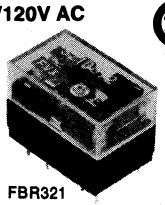
MINIATURE RELAYS FOR P.C. BOARDS

FBR310 (SPDT) AND FBR320 (DPDT) SERIES

3-5A/28V DC, 3-5A/120V AC

FBR311



FBR321

The FBR311 (SPDT) and FBR321 (DPDT) Series miniature relays were designed to provide 3 amps ratings contacts, accommodated in truly compact packages for P.C. boards.

These sensitive miniature relays, featuring high density mounting, flux-contamination immunity, versatile switching performance from signal level to handling 3 amps, are ideally suited for such applications as audio equipment, office machines, vending machines and automotive or other control application. These relays are UL Recognized (E63615) and CSA Certified (add —CSA suffix to P/N).

Initial Contact Resistance	100mΩ max. at 6V DC, 0.5A	SPDT (FBR311) 5A 28V DC, 120V AC
Contact Material	Gold overlay silver	DPDT (FBR321) 4A 28V DC, 120V AC
Rated Coil Voltage	5, 6, 9, 12, 24V DC	
Coil Power Dissipation	0.45W approx. at rated voltage	
Coil Temperature Rise	35°C approx. at rated voltage	
Insulation Resistance	100MΩ min. at 500V DC (initial)	
Dielectric Withstanding Voltage	500V AC for 1 minute	
Operate Time	20 ms max. at rated voltage	
Release Time	10 ms max.	
Life Expectancy — Mechanical	10×10^6 ops. min.	
Electrical	100×10^3 ops. min. at rated load	
Vibration	10 to 55Hz (Dual amplitude: 1.5mm)	
Shock	10G (11ms)	
Temperature Range	−30°C to +50°C	
Weight	12 gr. approx.	

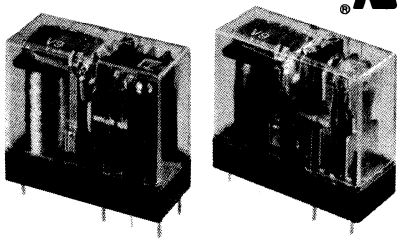
SELECTION TABLE

Contact Arrangement	Rated Voltage in V DC	Coil Resistance in Ω ±15% at 20°C	Pick-Up Voltage at 20°C	Designation	Price
SPDT	5	58	Less Than 80% of Rated Voltage	FBR311D005	$2.28
	6	85		FBR311D006	2.28
	9	180		FBR311D009	2.28
	12	300		FBR311D012	2.28
	24	1250		FBR311D024	2.42
DPDT	5	42	Less Than 80% of Rated Voltage	FBR321D005	$3.68
	6	60		FBR321D006	3.68
	9	135		FBR321D009	3.68
	12	230		FBR321D012	3.68
	24	960		FBR321D024	3.82

Note: Each product bears its own designation on the top of the cover, but initial 'FBR' is omitted.
For 48V relays add $0.28 to prices of 24V relays. -K contacts, add $0.07 to prices.

MINIATURE HIGH-POWER RELAYS

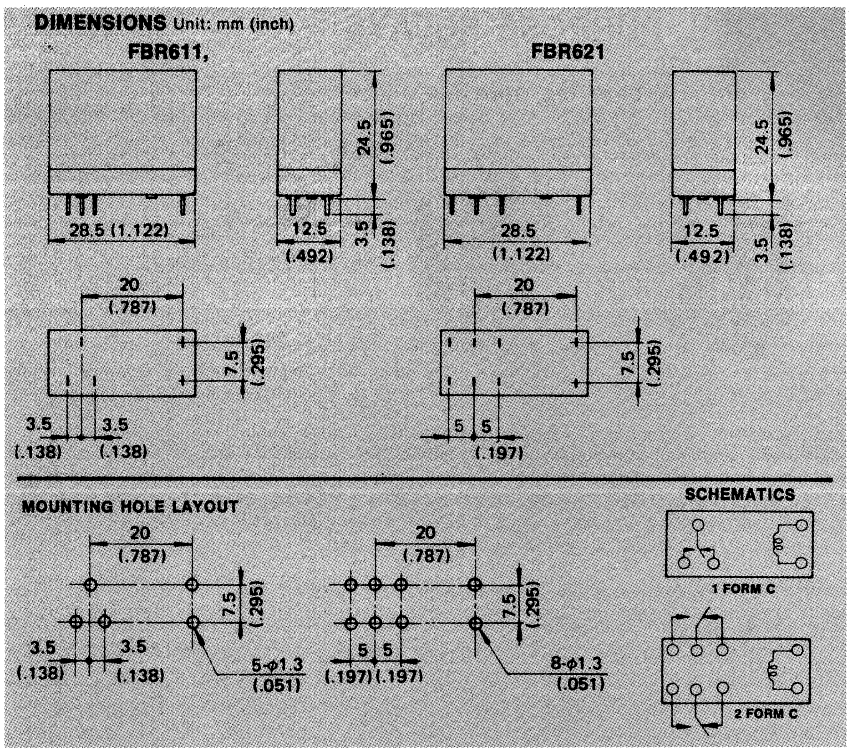
FBR600 SERIES



The FBR600 Series are miniature high-power relays with a switching capability of 10A, 30V DC or 240V AC for 1 Form C contact; and 5A, 30V DC or 240V AC for 2 Form C contacts. These relays, conforming to VDE, UL and CSA standards, are designed for mounting on printed circuit boards. Dielectric withstanding voltage is 500V AC for 1 minute and creeping distance is 8mm. These FBR600 Series relays are ideal for use in audio equipment, TV, vending machines, control machines, etc.

UL recognized (E63615) for industrial control equipment per UL508.

- **Immersion cleaning**
  A sealed type is available for immersion cleaning.



ENGINEERING DATA

Item	Specifications
Contact Arrangement	FBR611, 1 Form C — FBR621, 2 Form C
Contact Ratings	FBR611, 10A at 30V DC or 240V AC — FBR621, 5A at 30V DC or 240V AC
Carrying Current	FBR611, 10A — FBR621, 5A
Contact Material	Silver-alloy
Initial Contact Resistance	100mΩ max. at 6V DC, 1A
Rated Coil Voltage	5, 6, 9, 12, 18, 24, 48, 60V DC
Coil Power Dissipation	FBR611/621, 0.5W at 20°C
Coil Temperature Rise	FBR611/621, 35°C at rated voltage at 20°C
Insulation Resistance	1000Ω min. at 500V DC (initial) at 20°C, 65% RH
Dielectric Withstanding Voltage	
Between Coil and Contact	5000V AC for 1 minute at 20°C, 65% RH
Between Open Contacts	1000V AC for 1 minute at 20°C, 65% RH
Between Adjacent Contacts	FBR621, 3000V AC for 1 minute at 20°C, 65% RH
Lightening (1 x 40μ sec)	
Between Coil and Contact	10,000V min
Between Adjacent Contacts	FBR621, 6000V min.
Operate Time	8 ms approx. at rated voltage at 20°C
Release Time	2.5 ms approx. at 20°C
Life Expectancy — Mechanical	20 x 10^6 ops. min.
Electrical	100 x 10^3 ops. min. at rated voltage
Vibration	10~55 Hz (Dual amplitude: 1.5mm)
Shock	10G (11 ms)
Temperature Range	FBR611/621, −40°C~+70°C
Weight	16 gr. approx.

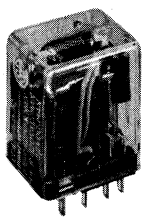
FUJITSU

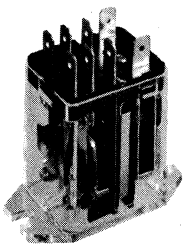
RELAYS

GENERAL PURPOSE RELAYS

FRL260 SERIES

4PDT-5A, 3PDT-5A, DPDT-10A, SPDT-15A





The FRL260 series relays with proven performance and top quality have been designed with emphasis on reliability, safety, cost performance and applicability to a wide range of uses.

These relays provide SPDT to 4PDT contacts, which are offered for contact ratings from 1 amp to 15 amps at 30V DC or 240V AC, resistive. Moreover, they are also available with 4 transfer bifurcated contacts that enable them to meet signal level or other light loads.

The FRL260 series relays are available in both DC- and AC-rated coils, and with a selection of mountings, such as solder, plug-in, P.C. boards and quick connect terminals.

The FRL260 series is UL recognized (File No. 163614/E63615) and C.S.A. certified.

ENGINEERING DATA

Item	Specifications
Contact Ratings (Resistive Load).	As per SELECTION TABLE
Initial Contact Resistance	General (S, K, V Contact): 100mΩ max. (at 6V DC, 1A) Low Level (T, L Contact): 50mΩ max. (at 6V DC, 0.1A)
Operate Time Release Time	25 ms max. (at rated coil voltage) 25 ms max.
Coil Power Dissipation	DC: 0.9W (at rated coil voltage) AC: 1.2 VA (120V max.) at rated coil voltage of 60 Hz 1.4 VA (200V min.) at rated coil voltage of 60 Hz
Coil Temperature Rise	DC: 50° max. AC: 60°C max.
Life Expectancy — Mechanical Electrical	50 x 10^6 ops. min. (at rated load) Medium Load SPDT: 500 x 10^3 ops. min. DPDT: 500 x 10^3 ops. min. 3PDT: 500 x 10^3 ops. min. 4PDT: 200 x 10^3 ops. min. 4PST: 100 x 10^3 ops. min. Heavy Load SPDT: 200 x 10^3 ops. min. SPST: 200 x 10^3 ops. min. DPDT: 500 x 10^3 ops. min.
Insulation Resistance	100MΩ min. (at 500V DC)
Dielectric Withstanding Voltage	1500V AC (1000V AC between open contacts) for 1 minute
Vibration	50 Hz (Dual Amplitude: 0.5mm)
Shock	10G (11 ms)
Temperature Range	−30°C to +55°C
Weight	35 gr. approx.

Relays You Can Rely On.

MINIGLOSSARY TIMERS

Accuracy
The variation of unit performance, i.e., time delay, voltage trip point, etc., over the specified conditions of ambient temperature, input voltage range, and time between operations.

Adjustability
The changing of a unit set point, within the specified range of unit operation, by means of internal or external adjustment mechanism (i.e., changing time delay with potentiometer).

Contact Rating
The electrical power-handling capability of relay contacts under specified environmental conditions and for a prescribed number of operations.

Delayed Interval Timing Function
Input voltage is applied continuously. The timing cycle is started by momentarily actuating the control circuit. The functions of separate Delay-On-Operate and interval type timers are combined in one package providing a single OFF-ON-OFF output cycles

Also called: single shot.

Delay-On-Operate Timing Function
Application of the input voltage starts the time delay. At completion of the time delay, the relay contacts transfer.

Also called: Delay-On-Make, On-Delay, Delay Relay, Delay-On-Pickup.

Delay-On-Release Timing Function
Input voltage must be supplied continuously to timer. Actuation of control circuit causes relay contacts to transfer immediately. Time delay starts when control circuit is released. The relay remains energized for the duration of the time delay—then de-energizes.

Also called: Delay-On-Break, Off-Delay, Delay-On-Dropout, Delay-On-Energization.

Frequency Sensor
A device that monitors a predetermined overfrequency and/or underfrequecy condition, and changes output state when these conditions exist.

Hysteresis
The difference between the response of a unit or system to an increasing and a decreasing signal (example: a voltage sensor).

Interval Timer Timing Function
Application of input voltage causes relay contacts to transfer and time delay to begin. At completion of the time delay, the relay contacts return to de-energized state.

Also called: Delay Interval, One Shot.

Output Control
The switching device, either solid-state or electromechanical, used in the unit to control the load connected to the output terminal(s).

Phase Sensor
A device that monitors for proper phase rotation in 3-phase systems.

Programmability
Ability to modify function, time delay or input voltage of a timer.

Recovery Timer
(Delay-On-Operate/Interval Timer)
The minimum time that input voltage must be interrupted *prior* to time-out to insure a successive timing cycle within the specified limits.

(Delay-On-Release)
The minimum duration of time that control circuit must be re-actuated to insure a new timing cycle when the control circuit is released.

Recycle Time
(Delay-On-Operate or Interval Timer)
The minimum time that input voltage must be interrupted after the timing cycle is completed to assure a successive timing cycle within the repeatability specified.

(Delay-On-Release)
The minimum duration of time that control circuit must be actuated to insure a successive timing cycle within the repeatability specified when the control circuit is released.

Repeat Cycle Timer Timing Function
Application of power automatically initiates continuous off-on cycling of the output relay.
Also called: flasher, intervalometer

Reset Time
The time required for the contacts to return to normal position when power is removed.

Reverse Polarity Protection
Blocking circuitry arrangement within the timer to prevent damage or output actuation if reverse polarity input voltage is applied.

Tolerance
The difference between specified and actual timing or sense point (factory setup tolerance).

Transient Protection
Prevents damage to unit if positive or negative transients are applied to the unit. Insures proper operation of the unit during and after transient occurrence. Max. transients are usually specified as to amplitude and duration, i.e., 1000V for 1 second.

Trip Point
The predetermined point at which a sensing device is set to change the output state.

Voltage Sensor
A device that monitors for a predetermined overvoltage and/or undervoltage condition, and changes output state when these conditions exist.

GlobTek, Inc.

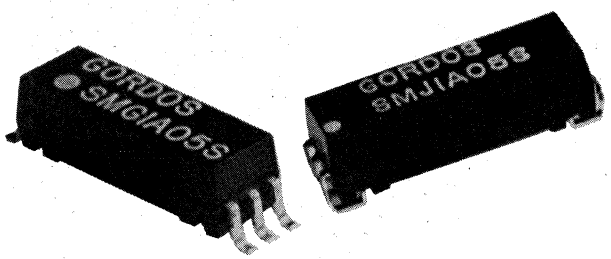
GORDOS

SURFACE MOUNT REED RELAYS



- All Gordos Relays are molded in semiconductor-grade molding compounds that meet Underwriters Laboratories 94V-0 flammability rating
- Withstand continuous exposure for 3 minutes at 215°C
- RF Characteristics
  - Insertion Loss: 0.3 dB max. from 1 to 500 MHz
  - Isolation: 30 dB min. from 1 to 600 MHz
  - Characteristic Impedance: 50, 75, or 93 ohms available

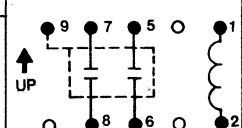
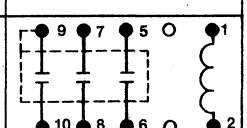
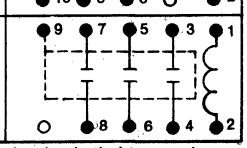
ORIENTATION FOR MERCURY WETTED ONLY (SEE NOTE: 3)







* Thermal offset voltage measured between pins 5 and 7 with pins 6 and 8 shorted

** Capacitance values obtained with all other leads tied to guard.

Notes: All specifications are based on a 25°C ambient temperature.
1. Measured with nominal coil voltage applied.
2. Higher voltages and/or current may be switched with life expectancy reduced.
3. Mercury relays are position-sensitive and must be mounted within 30° from vertical, as indicated by the "up" arrow.

Products and specifications subject to change without notice.

Consult factory for application assistance.

24	1750	No	741C-5	
		Yes	741C-6	

Notes: All specifications are based on a 25°C ambient temperature.

1. Measured with nominal coil voltage applied (except Form B).
2. Higher voltages and/or current may be switched with life expectancy reduced.
3. Excessive voltage (maximum of 6.5 VDC for 5 VDC model, 15 VDC for 12 VDC model, and 28 VDC for 24 VDC model), may cause contact re-closure on Form B models.
4. Mercury relays are position-sensitive and must be mounted within 30° from vertical, as indicated by the "up" arrow.

Consult factory for magnetic shield requirements.
Products and specifications subject to change without notice.

Consult factory for application assistance.

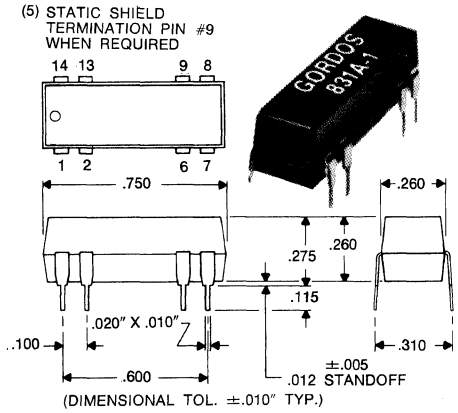
GORDOS

83 SERIES MOLDED DIP DRY AND MERCURY WETTED REED RELAYS



Nominal Coil Voltage DC	5	12	24
Must Operate Voltage DC	3.8	9.0	18.0
Must Release Voltage DC	0.5	1.2	2.4
Maximum Voltage DC (3)	10	20	35

- These Gordos Relays are molded in semiconductor-grade molding compounds that meet Underwriters Laboratories 94V-0 flammability rating
- Compatible with automatic insertion

Contact Arrangement		Form-A		Form-B(3)	Form-C		
Model Type		831A 832A	Mercury Wet (4) 831AH	831B	831C	835C	836C
Max. Switching DC(2)	Watts	10	50	10	3		
	Volts	200	500	200	30		
Max. Current DC (amps)	Switch	0.5	1.0	0.5	0.2		
	Carry	1.5	2.0	1.5	0.5		
Max. Initial Contact Resistance (ohms)(1)		.200	.050	.200	.2Ω		
Min. Breakdown Voltage DC	Across Contacts	300	1000	300	200		
	Contact to Coil	1000	1000	1000	1000		
Capacitance (typical pF)	Across Contacts	1.0	1.0	~	1.5		
	Contact to Coil	2.0	2.0	3.8	2.0		
Insulation Resistance (typical ohms)		10^{10}	10^{12}	10^{10}	10^{9}		
Operate Time (typ. mSec) Including Bounce Except Form-B		0.5	2.0	0.5	1.0		
Release Time (typ. mSec) Diode Suppressed		0.5	1.5	0.5	1.5 Including Bounce on N.C. Pole		

Operating temp range −20°C to 85°C
Storage temp range −20°C to 100°C

GORDOS

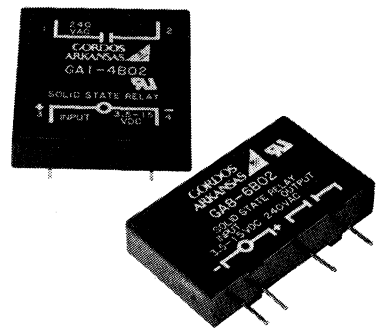
PRINTED CIRCUIT BOARD MOUNTABLE SOLID STATE RELAYS

GA1, GA8 SERIES

- Thick Film Hybrid Construction and Vapor Phase Soldering for Superior Reliability
- Ceramic Substrate for Proper Thermal Management
- Computerized Laser Trimming of Resistors for Optimum Performance
- High Current Thyristor for 100A Surge Capability
- UL Recognized (E46203)/CSA Certified (38595)
- 4KV Optical Isolation
- Zero Voltage Turn-On
- Industry Standard Packaging, SIP or Flat Pack



INPUT SPECIFICATIONS[1]

PARAMETER	ALL DEVICES	UNITS
Minimum Turn-On Voltage	3.0	VDC
Maximum Intput Voltage	24	VDC
Drop Out Voltage	1.0	VDC
Maximum Input Current (3)	25	mADC
Nominal Input Resistance (4)	1K	Ohms

OUTPUT SPECIFICATIONS[1]

Parameter	GA1-2B02 GA8-2B02	GA1-4B02 GA8-4B02	GA1-6B02 GA8-6B02	UNITS
Nominal Line Voltage	120	240	240	Vrms
Minimum Line Voltage	24	24	24	Vrms
Maximum Line Voltage	140	250	280	Vrms
Maximum Peak Off-State Voltage (5)	400	400	600	Vpeak

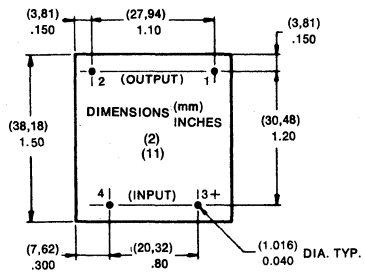
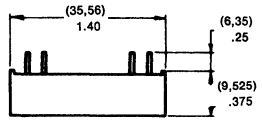
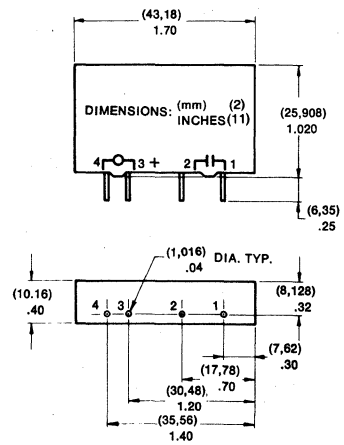
PARAMETER	ALL DEVICES	UNITS
Maximum On-State Current (6)	3.5	Arms
Minimum On-State Current	.05	Arms
Maximum 1-Cycle Surge (7)	100	Apeak
On-State Voltage Drop (8)	1.6	Vpeak
Maximum Off-State Leakage (9)		
(120V Models)	3.0	mArms
(240V Models)	6.0	mArms

GA1





GA8



GENERAL SPECIFICATIONS[1]

PARAMETER	ALL DEVICES	UNITS
Operating Temperature Range	−30 to +80	°C
Storage Temperature Range	−40 to +100	°C
Response Time	.5	Cycle
Input to Output Isolation Voltage (10)	4000	Vrms
Capacitance Input to Output (Max)	8	pF
Line Frequency Range	47 to 63	Hz

FOOTNOTES:
(1) Specifications apply to T_a −30 to +80°C unless otherwise noted.
(2) Tolerance: inches ±.020; millimeters ±0,50.
(3) At maximum input voltage.
(4) Does not include IRED impedance (drop).
(5) One minute maximum duration.
(6) At T_a of 40°C, derate units by 50 mA/C to 80 C. CSA rating is 3.0 A @ 40°C T_a.
(7) At T_a of 25°C, non-repetitive.
(8) At T_a of 25°C and maximum on-state current.
(9) At T_a of 25°C and maximum line voltage.
(10) At T_a of 25°C, for one second, maximum leakage 1mA, VDE compliant versions, meeting VDE specification 0806, and IEC specification 380, are available. Consult factory for details.
(11) Pin Tolerance: inches ±.001, millimeters ±.025.

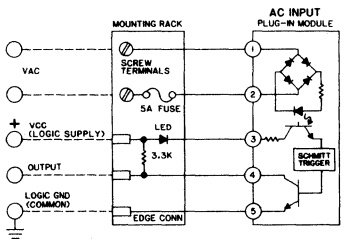
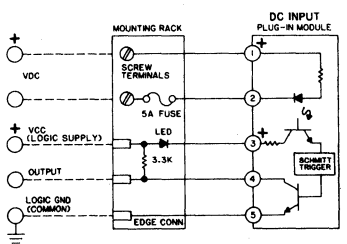
WIRING DIAGRAMS





FOOTNOTES:

(1) Specifications apply to T_a −30 to +80°C unless otherwise noted.
(2) Tolerance: inches ±.020; millimeters ±0,50.
(3) Gordos IAC modules will operate on AC or DC input voltage.
(4) Series operation of models without the suffix "A" is permissable.
(5) With external LED indicator, 18 mADC without external LED.
(6) Breakdown voltage of output transistor.
(7) At nominal V_{logic}, V_{out} of 30V, I_{out} of 25 mA, V_{in} of 120 VAC and T_a of 25°C.
(8) At T_a of 25°C, for one second. VDE versions, complying with VDE specification 0806, and IEC specification 380, are available. Specify by adding the suffix 'V' to the part number (example: IAC5AV).
(9) Pin Tolerance: inches ±.001, millimeters ±.025.
(10) Does not include IRED impedance (drop).
(11) At maximum input voltage.
(12) At nominal V_{logic}, V_{out} 30V, I_{out} 25mA, V_{in} 32 VDC, T_a 25°C.
(13) At T_a of 25°C for one second.
(14) Order "24" suffix for 24 VAC input version of IAC5, IAC15, IAC24, IAC5A, IAC15A or IAC24A. Input specifications for these versions are available from factory upon request.

Products and specifications subject to change without notice.

Consult factory for other configurations and application assistance.

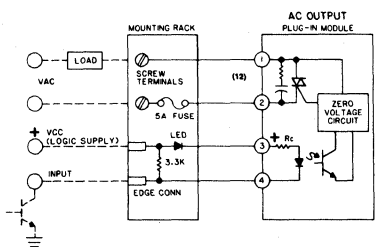
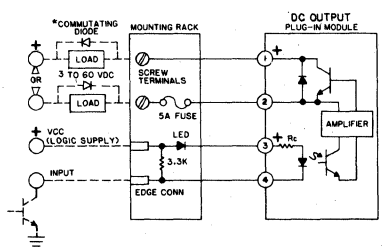
GENERAL SPECIFICATIONS(1)

PARAMETER	AC MODULES	DC MODULES
Operating Temp Range	−30 to +80°C	−30 to +80°C
Storage Temp Range	−40 to +100°C	−40 to +100°C
Response Time	.5 Cycle	—
Maximum Turn-On Time (9)	—	25 µs
Maximum Turn-Off Time (9)	—	50 µs
Input To Output Isolation Voltage (10)	4000V rms	4000V rms
Capacitance Input To Output (Max)	8 pF	8 pF
Line Frequency Range	47 to 63 Hz	—

WIRING DIAGRAMS





*Must be used on inductive loads.

FOOTNOTES:

(1) Specifications apply to T_a −30 to +80°C unless otherwise noted.
(2) Tolerance: inches ±.020; millimeters ±0,50.
(3) At nominal input voltage.
(4) Does not include IRED impedance (Drop).
(5) At T_a of 80°C and maximum line voltage.
(6) At T_a of 40°C, derate 50 mA/°C to 80°C.
(7) At T_a of 25°C, non-repetitive, 1 cycle for AC modules, 1 second for DC.
(8) At T_a of 25°C, and maximum rated current.
(9) At maximum voltage and current, nominal logic supply voltage.
(10) At T_a of 25°C, for one second, maximum leakage 100 µA.
(11) Pin Tolerance: inches ±.001, millimeters ±.025.
(12) Specify suffix "C" for normally closed AC output version of OAC5 and OAC5A.
(13) One minute maximum duration.
(14) At T_A of 25°C and maximum line voltage.
(15) At T_A of 40°C, derate by 58 mA/°C to 80°C.
(16) CSA rating is 3.0 A @ 40°C T_a.
(17) Specify suffix "RN" for random turn-on AC modules.
(18) At T_a of 45°C, derate 18 mA/°C to 80°C.

Products and specifications subject to change without notice.

Consult factory for other configurations and application assistance.

GORDOS

MINIATURE I/O MODULES

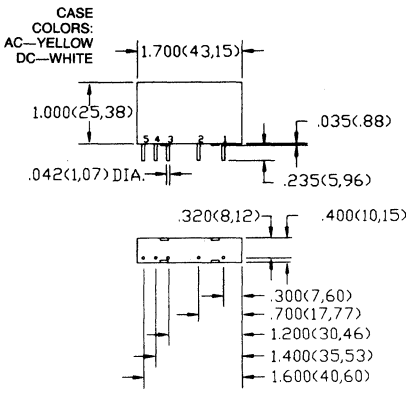
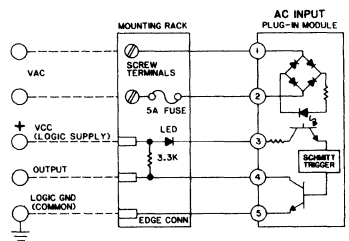
M SERIES

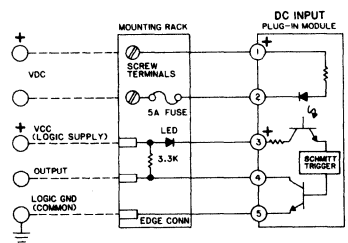
- Thick Film Hybrid Construction, Vapor-Phase Soldering for Superior Reliability
- Ceramic Substrate for Proper Thermal Management
- Computerized Laser Trimming of Resistors for Optimum Performance
- High Current AC Output Thyristor for 100A Surge Capability
- 4KV Optical Isolation
- 33% Thinner than Standard I/O Modules
- UL Recognized/CSA Certified
- Zero AC or Random[15] Turn-on Models

INPUT MODULES

Model	DC Logic Voltage	Input Voltage
M-IAC5	5	90–140 VAC/VDC
M-IAC5A	5	90–280 VAC/VDC
M-IDC5	5	3.3–32 VDC
M-IAC15	15	90–140 VAC/VDC
M-IAC15A	15	90–280 VAC/VDC
M-IDC15	15	3.3–32 VDC
M-IAC24	24	90–140 VAC/VDC
M-IAC24A	24	90–280 VAC/VDC
M-IDC24	24	3.3–32 VDC

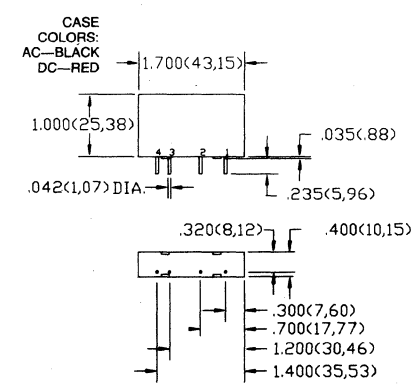


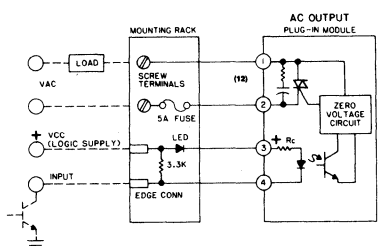


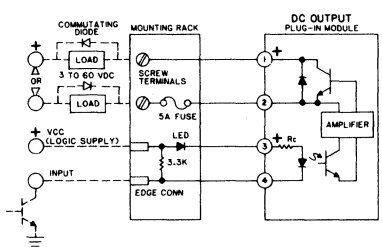


OUTPUT MODULES

Model	DC Logic Voltage	Output Voltage Rating	Current Rating (AMPS)
M-OAC5	5	12–140 VAC	3.5
M-OAC5A	5	24–280 VAC	3.5
M-ODC5	5	3–60 VDC	3.0
M-ODC5A	5	5–200 VDC	1.0
M-OAC15	15	12–140 VAC	3.5
M-OAC15A	15	24–280 VAC	3.5
M-ODC15	15	3–60 VDC	3.0
M-ODC15A	15	5–200 VDC	1.0
M-OAC24	24	12–140 VAC	3.5
M-OAC24A	24	24–280 VAC	3.5
M-ODC24	24	3–60 VDC	3.0
M-ODC24A	24	5–200 VDC	1.0







SPECIFICATIONS

"M Series" I/O modules have the same input, output and general specifications as their equivalents in the "SM Series" of I/O modules, i.e. M-IDC5 = SM-IDC5.

Products and specifications subject to change without notice.

Consult factory for application assistance.

FOOTNOTES

(1) Specifications are per circuit and applicable to T_A of −30 to +80°C unless otherwise noted.
(2) Tolerance: inches ±.020; millimeters ±.050.
(3) At nominal input voltage.
(4) Does not include IRED and internal LED impedance (drop).
(5) One minute maximum duration.
(6) At T_A of 25°C and maximum line voltage.
(7) At T_A of 20°C, derate by 38 mA/°C to 80°C.
(8) 1 Cycle at T_A of 25°C, non-repetitive.
(9) At T_A of 25°C and maximum on-state current.
(10) At T_A of 25°C, for one second.
(11) Pin Tolerance: inches ±.001, millimeters ±.025.
(12) With the exception of 240 Vrms/VDC models, the input of an input module may be used as a series-connected load for an output module.
(13) For AC input modules at nominal V_{logic}, V_{out} of 5V, I_{out} of 25 mA, V_{in} of 120 Vrms and T_A of 25°C.
(14) $V_{logic} = V_{out}$
(15) Input modules: 5 mSec at nominal V_{logic}, V_{out} of 5V, I_{out} of 25 mA, V_{in} of 32 VDC and T_A of 25°C. Output modules: 25 μSec turn-on and 50 μSec turn-off at maximum voltage and current, nominal logic voltage.
(16) At T_A of 80°C and maximum line voltage.
(17) 1 Second at T_A of 25°C, non-repetitive.

Products and specifications subject to change without notice.

Consult factory for other configurations and application assistance.

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

IC MASTER BELONGS ON YOUR BOOKSHELF

If you don't have your own IC MASTER, you can obtain your own copy by ordering now. Write for your own copy or order by telephone as described below.

Everything You Need... To Find The IC You Need... FAST!

The all new IC MASTER is a 3-volume guide to design specifications on every commercially available IC. Over 3,500 pages provide indispensable IC design information organized to help you find the IC you need in minutes. The Alternate Source Directory section puts over 150,000 pin-for-pin replacement device listings at your fingertips.

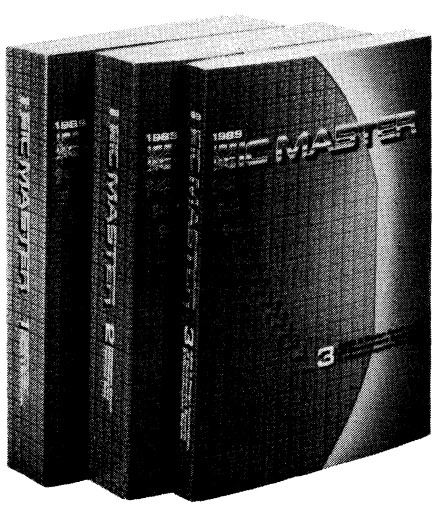
Volume 1 – Over 80,000 standard ICs, including 12,000+ new devices, grouped by function within basic category. Includes Military Parts Directory, Supplier Index, Part Number Index and more.

Volume 2 – Technical Data Pages from the leading IC manufacturers.

Volume 3 – Systems Level Volume covering ASICs, CAE/CAD Design Tools, MPU Development Systems and Microcomputer Boards.

PLUS... **2 Free Semi-Annual Updates**
Money-back Guarantee. If the IC MASTER doesn't help you find the IC you need fast, return it in 10 days for a 100% refund.

Order Your IC MASTER...TODAY!



It's Easy to Order:
You can order IC Master simply by charging it to your Visa or Master Card credit card. To place your order call now: (516) 277-1300 FAX (516) 227-1901
Or mail your purchase order to:

IC MASTER

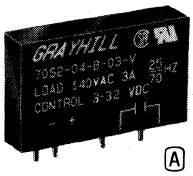
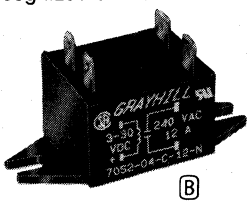
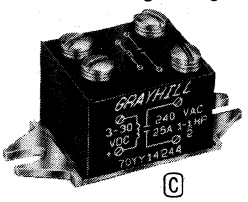
- CMOS and TTL Compatible
- UL Recognized and CSA Certified
- Internal Transient Protection
- High Surge Current and Blocking Voltage



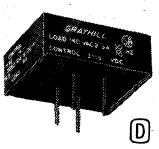
STYLE V



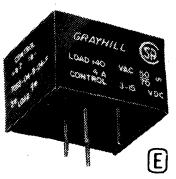
STYLE N



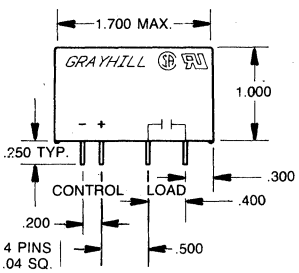
STYLE S

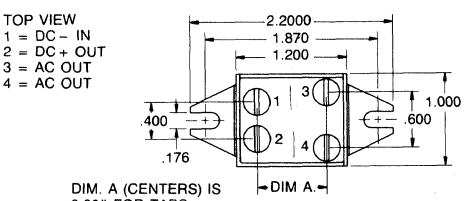


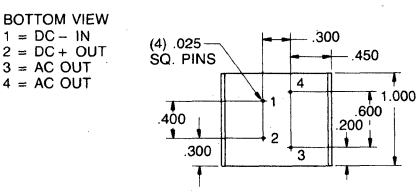
STYLE H



STYLE F







SPECIFICATIONS

Nominal load voltages and currents are in chart. Current is rated at 25°C and derated with increases. Mini Puck relays are rated as mounted on panel 12 x 12 x 1/8 inches.

Control current is 1-17 mA (3-30 Vdc relays), 1-19 mA (3-32 Vdc relays), and 1-6 mA (all others).

Surge current rating at 1 full cycle, non repetitive, is 60A (2.5A, 3A, 4A, and 6A relays); 110A (12A relay); 250A (25A relay).

Blocking voltages are 200V, 400V, and 600V for the 24 Vac, 120 Vac, and 240 Vac relays.

Zero voltage offset is 6V, 8V, and 18V for the 24 Vac, 120 Vac and 240 Vac relays.

Transient protection is 4000 V/μS for 6A and 15A relays, 3000 V/μS for all others.

Average input impedance is 2000 ohms (3-30 & 3-32 Vdc ranges), and 6000 ohms (6-30 & 6-32 Vdc ranges).

Isolation is 10^9 ohms; dielectric strength is 2500 Vac.

Cases are solvent resistant thermoplastic (UL94V-O) potted with high thermal conductive epoxy. Heat sinks are aluminum (copper for the 25A relay), tin plated. Terminal pins are brass, tin plated; tabs are brass, lead-tin plated; screws are steel, tin plated.

STYLE V SINGLE IN-LINE PACKAGE RELAY (FIG. A)

This PC mounted relay requires only .680 inches of board area and is form, fit, and function replacement for industry standard. It is constructed of high performance, surface mount components for high reliability. Package measures .4 inches deep, and line of pins is located .3 inches from label side.

Loads		Control Range	
Load VAC	Max. Amps	VDC	Part Number
24	3	3-32	70S2-04-D-03-V
24	3	6-32	70S2-05-D-03-V

240	3	3-32	70S2-04-C-03-V
240	3	6-32	70S2-05-C-03-V

STYLES N & S MINI PUCK© SOLID STATE RELAYS (FIGS. B & C)

These heavy duty relays are fit, and function replacements for old "hockey puck" style relays, but require only one-half the space. High thermal conductive epoxy and high quality heat sinks provide superior heat transfer. Minimum panel space for heat sink effectiveness is 12 inches by 12 inches by .125 inches thick; mount with silicon grease. Body measures 1.2 inches x 1.0 inches by .85 inches high. Push tabs (Style N) add .30 inches to height. Screws (Style S) add approximately .08 inches.

240	25	3-30	70S2-03-C-25-S

STYLES H & F MICRO CUBE® AND MINI CUBE RELAYS (FIGS. D & E)

Low profile, printed circuit mounted relays allow user to stack PC boards closely together, while switching 24 Vac, 120 Vac, or even 240 Vac loads of up to 4 amperes. These relays do not require additional heat sinks. Style H is only .5 inches high; Style F is only .83 inches high. For a relay with .83 inches height and standard plug-in style termination (Style K, not shown), contact a local authorized distributor. For relays with this footprint for larger loads contact GRAYHILL.

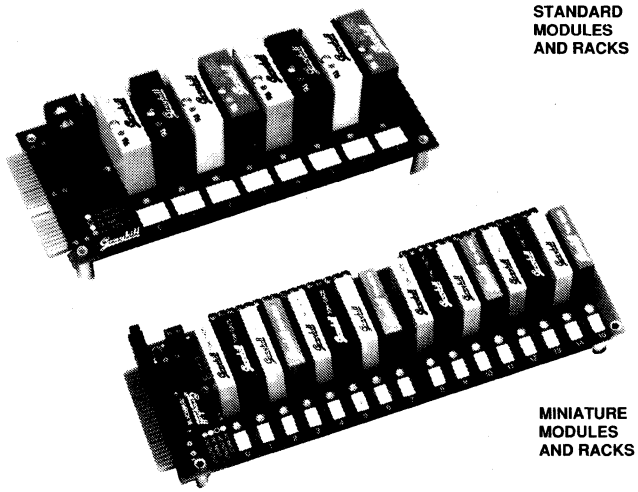
Input/Output Modules



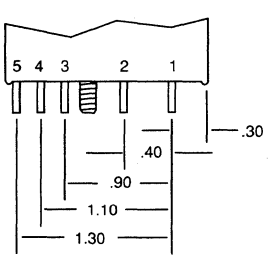
STANDARD MODULES AND RACKS

MINIATURE MODULES AND RACKS

DESCRIPTION - MODULES

I/O Modules provide an optically isolated interface between logic systems and external AC and DC power devices. There are 4 types: AC Output (Black Case); DC Output (Red Case); AC Input (Yellow Case); and DC Input (White Case). UL and CSA certified, all modules are SPST N.O. type and logic compatible. AC types have zero crossing switching. They have standard pinouts, superior noise immunity, transient protection, and high blocking voltages of 400 volts (120VAC) and 600 volts (240 VAC). *All* modules have 4000 volts of isolation, immunity to mechanical shock and vibration, and operate over a wide temperature (–40° to +125°C).

Standard I/O Modules are form, fit function replacements for competitive product; output modules carry up to 3.5 Amps.
Standard modules measure 1.0"L, .6"W, and 1.25" H.



Miniature I/O Modules require only .68 sq inches board area, switch up to 3 Amps, and require only 66% of the power used by standard modules. They meet/pass the following specifications or tests: IEEE 472–1974 and ANSI C37.90 transient withstanding tests, and Electrical Noise Immunity Test per NEMA ICS 2–230.
Mini modules measure 1.0"L, .4"W, and 1.0"H.

TERMINAL NUMBER AND CONNECTION

	•#5	#4	#3	#2	#1
OAC	N/A	DC– In	DC+ In	AC Out	AC Out
ODC	N/A	DC– In	DC+ In	DC- Out	DC+ Out
IAC	Ground	Output	+Vcc	AC In	AC In
IDC	Ground	Output	+Vcc	DC- In	DC+ In

Only input modules have terminal #5.

MOUNTING RACKS

Rack and modules are ordered separately. Standard racks are UL Recognized Miniature; recognition pending for mini racks. Standard and mini racks are CSA certified. Miniature modules fit in standard modules racks, but save space when mounted in mini racks. Miniature rack part numbers include the letter M; styles with Q were designed to replace quad pack racks. Chose 1 of 5 styles: board edge connector (add -EC to mini rack number, use no suffix for standard rack); perpendicular header with short (-HS) or long (-HL) ejector levers; right angle header with short (-RS) or long (-HL) ejector levers.

REED RELAYS

HAMLIN

HAMLIN INC. • 612 East Lake Street • Lake Mills, WI 53551
Phone 414/648-2361 • FAX 414/648-5244

As the largest domestic reed switch maker, Hamlin takes advantage of complete homogeneous process control of both switches and relays. This assures our customers of uniformly high quality relays.

The extensive Hamlin Reed Relay line offers components of various physical forms and electrical operating characteristics, designed to serve a broad range of applications.

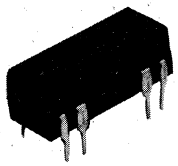
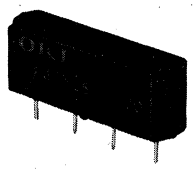
REED RELAYS

DIP AND MINI SIP SERIES

OKI electric industry company, ltd.



DIP SERIES



SIP SERIES

FEATURES

- De-activated rhodium contacts. for stable contact resistance.
- Standard TO-116 Terminal Grid fits all standard DIP sockets.
- Interface directly with RTL, DTL, TTL, HTL logic.
- Molded epoxy package for environmental immunity.
- Automatic insertion compatible.
- Relay testing services test report available.

DIP CHARACTERISTICS

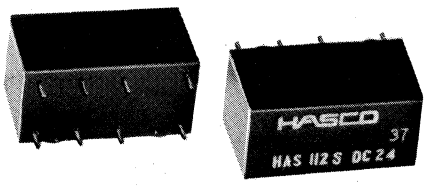
HASCO COMPONENTS INC. SINCE 1976 — RELAYS

DPDT — DIP or PC STANDARD or SENSITIVE HAS 112/HS 212 RELAY(1.25A – 2.5A)

(2 COIL LATCHING AVAILABLE)



FEATURES

- Available fully sealed.
- Employing 16 pin, IC spacing.
- Low profile for tight spacing.
- Coil voltages: 5, 6, 9, 12, 24 & 48 from stock.
- Compatible and competitive!
- FCC Pt 68 available.
- Sensitive available.
- Thinner option available.
- Bifurcated contacts.
- Nitrogen sealing available.
- In stock!

SAMPLES SENT SAME DAY!

Special alloy, silver flash: 10A at 24VDC or 120VAC, 5A at 240VAC, resistive
Max. operating Voltage: 250VAC & 125VDC
Min. permissible load (reference value): Silver contact: 5VDC, 1mA
Other contact: 5VDC, 100mA
Service life: Mechanical: 20 Million operations
Electrical: 100,000 operations min. at rated load

COIL DATA

(See coil data chart)
Voltages: From 3V to 24V
Power (at 20°C): Nominal: 0.45 watt

GENERAL DATA

Contact resistive: 50 m ohm Max.
Operate time: Approx. 6 ms (at nominal voltage)
Operate bounce time: Approx. 2 ms
Release time: Approx. 2 ms
Release bounce time: Approx. 4 ms
Insulation resistance: More than 100 M ohm at DC 500V
Dielectric strength: 750VAC (50/60 Hz), between open contact; 2000VAC (50/60 Hz), between coil & contact
Vibration: 1.5mm double amplitude, 10 to 50 Hz
Shock: 100m/sec² (approx. 10 G's)
Operation frequency: Mechanical: 18,000 operations/hour
Electrical: 1,800 operations/hour (under rated load)
Temperature range: −30°C to +85°C.
Temperature rise: Less than 35 deg.
Humidity: 45° −85% RH
Approximate weight: 10 gr.

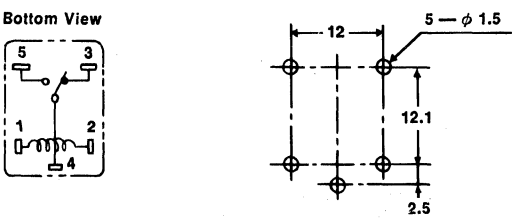
Unit: inch (mm)

(Shorter height available)

CIRCUIT DIAGRAM AND MOUNTING



ORDERING INFORMATION

LT	IC	5	XXV
	C: SPDT	3 = 3 amp	5 = 5V
	B: SPNC	5 = 5 amp	6 = 6V
	A: SPNO	10 = 10 amp	9 = 9V
			12 = 12V
			24 = 24V
			48 = 48V

For lower height model use SLT

FEATURES

- Miniature, lightweight relay which requires less mounting space.
- UL 508/TV-5 available.
- High reliable relay with dielectric strength, 2000V which employs the specific construction.
- Economical and favorable price for simple construction.
- Fully sealed.
- In stock for most voltages and amps!

GENERAL CHARACTERISTICS

Ambient Temperature: −20 to +60°C (not to freeze).
Ambient Humidity: 45 to 85% (not to be dewy).
Operating Time: Less than 20 mS.
Release Time: Less than 20 mS.
Contact Resistance (at initial): Less than 100 milliohms at 6V DC, 1A.
Insulation Resistance: 500V DC, more than 100M Ohms.
Dielectric Strength: Between contacts: 500V AC (50/60 Hz) 1 minute — Between coil and contact; 2,000V AC (50/60 Hz) 1 minute.
Vibration: 6G (10 to 55 Hz).
Shock: 10G.
(The above mentioned values are at normal temperature and humidity.)

CHARACTERISTICS

Power Consumption: Approx. 0.36W to approx. 0.5W.
Temperature Rise: Less than 40 deg. after applied max. continuous voltage.

COIL RATINGS(5V – 48V)

Rated Voltage (V)	DC6	DC9	DC12	DC24
Rated Current (mA)	60	40	30	15
Coil Resistance (Ω)	100	225	400	1600

* Coil rated current tolerance is +15%, −20% at ambient temp. of 20°C.
* DC 5V coil rating also in stock.

MAXIMUM LOAD RATINGS

Type	Load	Voltage	AC 125V	DC 24V
3A	Resistive	(cos ϕ = 1)	3A	3A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	1.2A	1.2A
5A	Resistive	(cos ϕ = 1)	5A	5A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	2A	2A
10A	Resistive	(cos ϕ = 1)	10A	10A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	4A	4A

SPECIFICATIONS

Maximum Continuous Voltage: 115% of rated voltage at 20°C.
Operating Voltage: Less than 80% of rated voltage at 20°C.
Opening Voltage: More than 10% of rated voltage at 20°C.
Coil Temperature Rise: LT 1C 3/LT 1C 5—Less than 50°C at rated voltage. LT 1C 10—Less than 60°C at rated voltage.
Initial Contact Resistance: Less than 100 mΩ (1A 6V DC).
Insulation Resistance: More than 100 MΩ (500V DC).
Dielectric Strength: Between coil and contact — AC 1500V for 1 minute. Between contacts — AC 750V for 1 minute
Electrical Life: More than 100,000 operations at rated voltage.
Mechanical Life: More than 5,000,000 operations.
Contact Material: LT 1C 3 — Gold plated over silver
LT 1C 5 and LT 1C 10 — Silver alloy.
Operating Temperature: LT 1C 3/LT 1C 5 — 30°C ~ +20°C.
LT 1C 10 — 30°C ~ +50°C.

*** Available up to 4000V DC.**

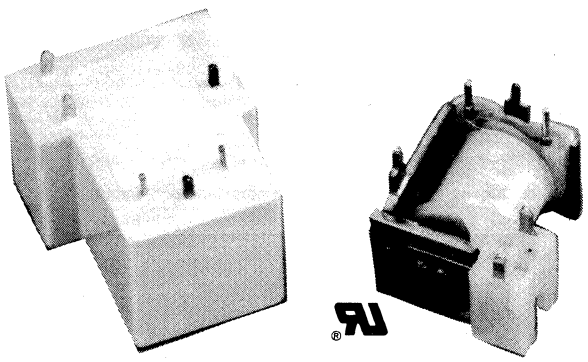
HASCO COMPONENTS INC. SINCE 1976 — RELAYS

HAT-901 SERIES HEAVY DUTY



GENERAL SPECIFICATIONS

Max. continuous rated voltage: 110% of nominal voltage.
Pull-In voltage: 75% of nominal voltage. Max @ 25°C.
Drop-Out voltage: 10% of nominal voltage. Min @ 25°C.
Contact Resistance: 20 mΩ max. (Initial value)
Operating Temp: −55°C to +85°C.
Insulation Resist: DC 500V 10 MΩ min.
Dielectric Strength: AC 1500V between contact and coil, frame and contact, coil and frame one minute. AC 1500V between contacts one minute.
Operate Time: approx 15 ms.
Release Time: approx. 10 ms.
Electrical Life: 10 x 10^3 operation min.
Mechanical Life: 10 x 10^6 operation min.

High Performance Miniature Relays

Hi-G Company is the leading supplier of rugged, hermetically-sealed, military-qualified relays, rated 10 amperes and under. Because all Hi-G Military Qualified relays are designed for extreme environmental conditions, they are also suited for critical commercial and computer applications.

Hi-G Relay Guide

**Descriptions of these relays are not listed here. For additional information, please contact Hi-G Company, 101 Locust St., Hartford, CT 06114 for complete miniature relay catalog. Telephone: (203) 522-8600.

HI-G RELAYS

Hi-G offers the most complete selection of qualified relays, rated 10 amperes and under, of any manufacturer in the world. The following charts list the appropriate military specification, relay configuration, relay contact operating parameters, and the corresponding Hi-G part number. A (J) prefix to the Hi-G part number denotes Qualified Relay; L, M, and P suffixes denote applicable failure rate.

Series (J)MA:
TO-5 Case Relay, DPDT

QUALIFIED:
MIL-R-39016/9
MIL-R-39016/15
MIL-R-39016/20
MIL-R-28776/1

Failure Rate Levels
L, M, P.

These ultra-miniature DPDT relays in transistor-style case are available in **4 types:** basic relay; with diode coil suppression (D); with two diodes for coil suppression and polarity reversal protection (DD); and with integral transistor driver and diode coil suppression (T).

Contacts: 2 Form C
Rating: 1 Amp
Sensitivity: 130 mW

Hi-G Military Relays

Series (J)1MS:
Sensitive TO-5 Case Relay, SPDT

QUALIFIED:
MIL-R-39016/10
MIL-R-39016/25
MIL-R-39016/26
MIL-R-28776/4

Failure Rate Levels L, M, P.

These sensitive ultra-miniature SPDT relays in transistor-style case are available in **4 types:** basic relay; with diode coil suppression (D); with two diodes for coil suppression and polarity reversal protection (DD); with integral transistor driver and coil suppression (T).

Contacts: 1 Form C
Rating: 1 Amp
Sensitivity: 40 mW

Hi-G Military Relays

Series (J) MGAT:

MINIGRID™ Relay, DPDT
CMOS Compatible

QUALIFIED:
MIL-R-28776/6

Failure Rate Levels
L, M

A series of ultra miniature hermetically sealed relays with 0.100 inch grid spaced terminals. The MOSFET MGAT Series construction is similar to HI-G's MA Series TO-5 relays, long recognized for high reliability. The MGAT Relay series incorporates a MOSFET driver and diode coil suppression.

Contacts: 2 Form C
Rating: 1 Amp
Sensitivity: 128 to 216 mw

Series (J) MGST:

Sensitive
MINIGRID™ Relay, DPDT
CMOS Compatible

QUALIFIED:
MIL-R-28776/7

Failure Rate Levels
L, M

A series of ultra miniature hermetically sealed relays with 0.100 inch grid spaced terminals. The MOSFET MGST Series construction is similar to HI-G's MS Series TO-5 relays, long recognized for high reliability. The MGST Relay series incorporates a MOSFET driver and diode coil suppression.

Contacts: 2 Form C
Rating: 1 Amp
Sensitivity: 61 to 84 mw

Hi-G Military Relays

Series G:
1/5 Crystal Can Relay

QUALIFIED:
MIL-R-39016/13

Failure Rate Levels
L, M, P.

These 2-ampere, .150 grid, low-profile DPDT relays allow maximum packaging density under extreme environmental conditions. Relays are available in three terminal styles and in three enclosures.

Contacts: 2 Form C
Rating: 2 Amp
Sensitivity: 135 mW

Series 2B-1506:

Crystal Can Relay

QUALIFIED:
MIL-R-5757/10

These full size crystal can DPDT relays are available with solder lugs, wire leads or pins for printed circuit board mounting. Five mounting styles are available.

Contacts: 2 Form C
Rating: 2 Amp
Sensitivity: 250 mW

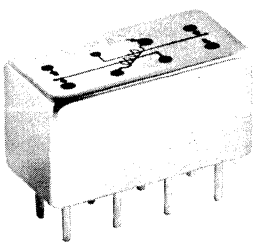
Hi-G Commercial and Computer Relays

The advantages of the hermetically-sealed relay are also available for commercial and computer applications. These versatile, high-quality relays operate reliably under extreme environmental conditions, because they incorporate military design technology.

Series FS2: Flagship™ 2-Ampere Relay

Versatile hermetically-sealed commercial DPDT relay, with 2 form C contacts, switches up to 60 W/100 VA, 2 amperes, maximum. Sensitivity is 350 mW.



Operate Time: 4 ms max. at nominal coil voltage at 25°C.
Release Time: 4 ms max. at nominal coil voltage at 25°C.
Capacitance: Between contacts 2.5 pF.
Dielectric Strength: Between all other mutually insulated points 500 Vrms.
Insulation Resistance: 500 Megohms min.

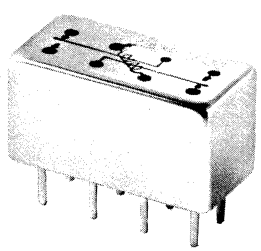
COILS

Resistance: Standard available to 3500 ohms. Standard tolerance ±10%. Other resistances and tolerances available.
Operate Power: 350 milliwatts at 25°C.
Nominal Power Consumption: 660 milliwatts at 25°C.

VOLTAGE CODE	105	106	112	124	136	148
NOMINAL COIL VOLTAGE	5	6	12	24	36	48
MAX. CONTINUOUS VOLTAGE	6	7	14	29	43	57
PICK-UP VOLTAGE (MAX.)	3.7	4.4	8.7	17.5	26.0	35.0
DROP-OUT VOLTAGE (MIN.)	0.3	0.3	0.7	1.4	2.2	2.9
COIL RESISTANCE (OHMS)	39	55	220	870	1960	3480

Series FS3: Flagship™ Sensitive 2-Amp Relay

This sensitive 150 mW hermetically-sealed DPDT relay has 2 form C contacts and switches up to 60 W/100 VA at 2 amperes, maximum.



Operate Time: 6 ms max. at nominal coil voltage at 25°C.
Release Time: 4 ms max. at nominal coil voltage at 25°C.
Capacitance: Between contacts 2.5 pF.
Dielectric Strength: Between all other mutually insulated points 500 Vrms.
Insulation Resistance: 500 Megohms min.

COILS

Resistance: Standard available to 8300 ohms. Standard tolerance ±10%. Other resistances and tolerances available.
Operate Power: 350 milliwatts at 25°C.
Nominal Power Consumption: 280 milliwatts at 25°C.

VOLTAGE CODE	105	106	112	124	136	148
NOMINAL COIL VOLTAGE	5	6	12	24	36	48

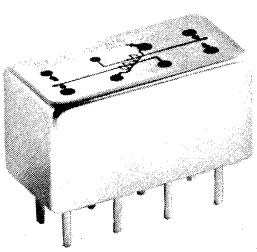
COIL RESISTANCE (OHMS)	90	130	520	2070	4550	8300

Series FS5: Flagship™ 5-Ampere Relay

This 5-ampere DPDT relay has 2 form C contacts and switches up to 150 W/300 VA, 5 amperes, maximum. Sensitivity is 725 mW.



Operate Time: 5 ms max. at nominal coil voltage at 25°C.
Release Time: 3 ms max. at nominal coil voltage at 25°C.
Capacitance: Between contacts 2.5 pF.
Dielectric Strength: Between all other mutually insulated points 500 Vrms.
Insulation Resistance: 500 Megohms min.

COILS

Resistance: Standard available to 1600 ohms. Standard tolerance ±10%. Other resistances and tolerances available.
Operate Power: 725 milliwatts at 25°C.
Nominal Power Consumption: 1.4 Watts at 25°C.

VOLTAGE CODE	105	106	112	124	136	148
NOMINAL COIL VOLTAGE	5	6	12	24	36	48

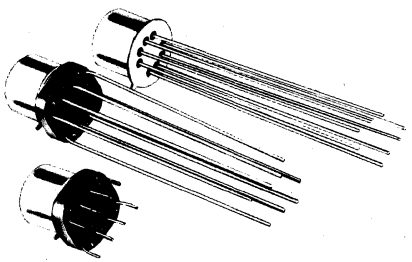
RELAY TYPE	GENERAL CHARACTERISTICS	ELECTRICAL CHARACTERISTICS

Series CA:
Commercial TO-5 Case Relay

These sensitive 185 mW 1-ampere TO-5 case DPDT relays, with 2 form C contacts, are available in 3 types: basic relay; with coil-suppression diode (D); and with integral transistor driver and coil-suppression diode (T).



Coil Data: Standard coil resistance available to 1,560 ohms. Design tolerance ±10%.

Contact Resistance: 200 milliohms max., initial.

Operate Time: 4.0 milliseconds max.

Release Time: 3.0 milliseconds max. basic. 6.0 milliseconds max. suppressed. 6.0 milliseconds max. transistor.

Dielectric Strength: 350 Vrms, 60 Hz, all points at sea level except between transistor terminals.

Insulation Resistance: 1,000 megohms min., all points at 500 Vdc.

Contact Capacitance: 0.7 pF typical, between contacts.

Series: CAW, CAWD, CAWT

Coil Voltage Code	Nominal Coil Voltage (Vdc)	Coil Resistance (ohms) ±10% @25°C	Pick-Up † (Vdc) Max. @25°C	Base Current to †† Turn-on (mAdc) (CAWT only)

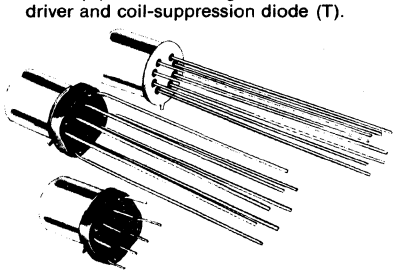
†CAWT — Not Applicable
††Limit Base/Emitter Current to 50 mA max.

Series CS:
Commercial Sensitive TO-5 Case Relay

These ultrasensitive 90 mW 1-ampere DPDT transistor-case relays, with 2 form C contacts, are available in 3 types: basic relay; with coil-suppression diode (D); and with integral transistor driver and coil-suppression diode (T).



Coil Data: Standard coil resistance available to 11,000 ohms. Design tolerance ±10%.

Contact Resistance: 200 milliohms max., initial.

Operate Time: 6.0 milliseconds max.

Release Time: 3.0 milliseconds max. basic. 7.5 milliseconds max. suppressed. 7.5 milliseconds max. transistor.

Dielectric Strength: 250 Vrms, 60 Hz, all points at sea level except between transistor terminals.

Insulation Resistance: 1,000 megohms min., all points at 500 Vdc.

Contact Capacitance: 0.7 pF typical, between contacts.

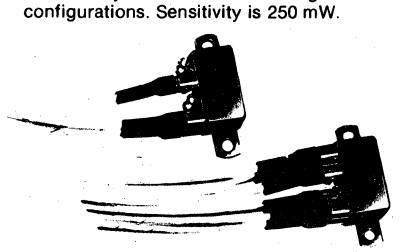
Hi-G Radio Frequency Relays

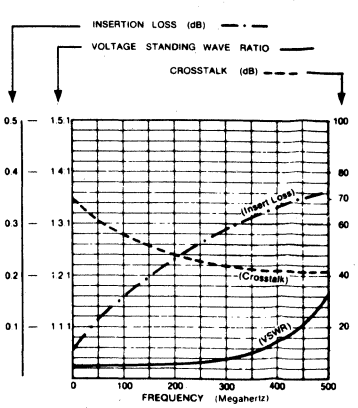
Coaxially terminated and hermetically sealed, these 0-500 MHz relays incorporate a relay design to provide reliable switching functions in the most demanding RF applications. Thousands of testing hours and millions of field operations assure the highest degree of reliability. Two-pole devices are available with either one or both sets of poles cabled. When only one set of poles is cabled, the other set is available for use with pin or hook termination.

RELAY TYPE	OPERATING CHARACTERISTICS	ELECTRICAL CHARACTERISTICS

Series RFK:
75 Watt 1/2 Crystal Can RF Relay

Coaxially-terminated, hermetically-sealed 0 to 500 MHz relays can carry 200 RF watts with low-level to 2 amperes auxiliary switching capability. These relays are available with two terminal styles and three mounting configurations. Sensitivity is 250 mW.





NOTE: Values shown are in a 50 ohm impedance coaxial system.

Voltage Code	106	112	126
Nominal Coil Voltage	6	12	26.5

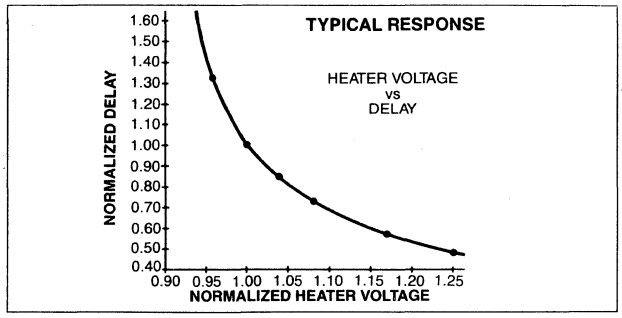
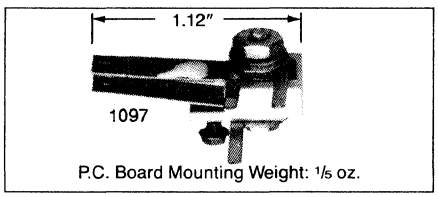
BUSINESS HOURS: 8am-3:30pm
CENTRAL TIME

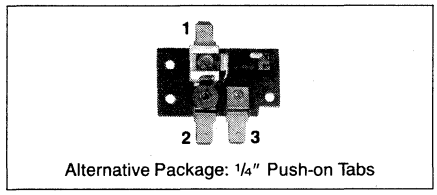
These time delay relays are actuated by heated bi-metallic blade, and thus are
- Immune to transients.
- Independent of wave form.
- Exceptionally low-cost (some models as low as $1.30 in volume).

By using a bi-metallic mating blade, temperature compensation up to −20°F to +150°F can be achieved. All models available with contacts N.O. or N.C. Heater coil can be isolated from contacts, or made common with one contact for greater economy.



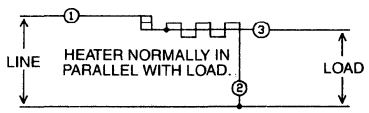


P.C. Board Mounting Weight: 1/5 oz.

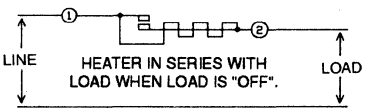


Alternative Package: 1/4" Push-on Tabs

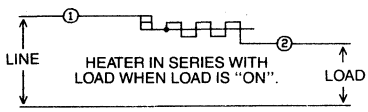
Heater Coil: 4v to 115v AC or DC. 1¼ w. continuous to 5 watts momentary
Contacts: (Non-inductive Loads) AC: 6 to 115v, 35 to 350 ma, 2 to 25 w — DC: 6 to 12v, 35 to 350 ma, 2 to 4 w
Delay: 4 to 90 sec., opening or closing
Alternative Arrangements for use as a Flasher:



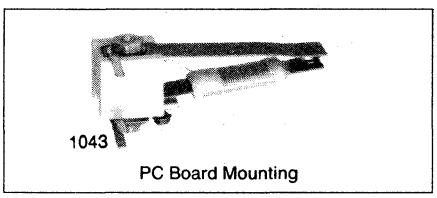
FLASHER OPERATES INDEPENDENT OF LOAD. LOAD IS FULLY "ON" OR "OFF".



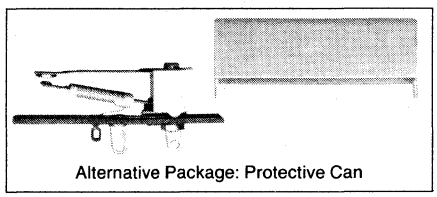
FLASHER IS DEPENDENT ON LOAD. LOAD IS "ON" OR PARTIALLY "OFF".



FLASHER IS DEPENDENT ON LOAD AND MUST BE MATCHED TO IT. LOAD IS "OFF" OR PARTIALLY "ON".

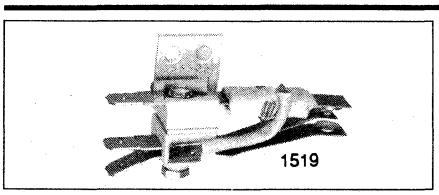


PC Board Mounting

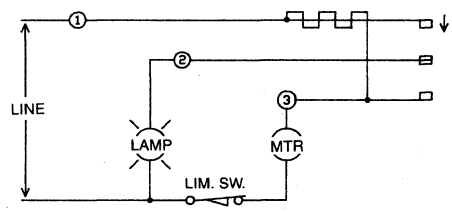


Alternative Package: Protective Can

Heater Coil: 6.3 to 28v AC or DC; 1.5w to 2.25 w. continuous.
Contacts: (Non-inductive Loads) AC: 6 to 115v, 35 to 350 ma, 2 to 40 w — DC: 6 to 12v, 35 to 350 ma, 2 to 4 w
Delay: 20 to 150 seconds, opening or closing



Motor Current Actuated Time Delay



Automatic light time delay switch for use in electric door opener circuits and similar applications. Features include:
- light goes on in a few seconds
- light maintained for 1½ to 2½ minutes
- all 3 blades are same bi-metallic material for good temperature compensation
- shorting blade prevents heater burn-out in case of motor or door malfunction

"Hold-Heet" switches provide service in many applications. Any number of recombinations are possible with component elements. This great versatility can result in tremendous savings over magnetic relays or timing motors. Please direct your technical questions to Gifford Neill, Chief Engineer, at 312/837-7709.

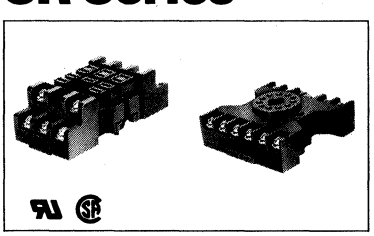
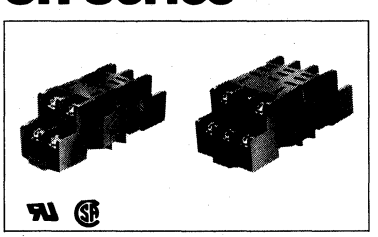
IDEC Selection Guide To Quality "Snap-Mount" Sockets

SR Series



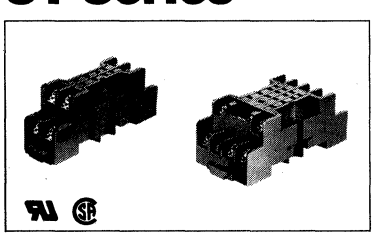
Type: 2-Pole, 8-Pin/Plug-in
3-Pole, 11-Pin/Plug-in
1-3-Pole, 11-Blade/Plug-in
Ratings: 10A 250V-Blade Type
10A 250V-Pin Type
Mounting: DIN Rail, Surface
Compatible IDEC Relay: RR Series

SH Series



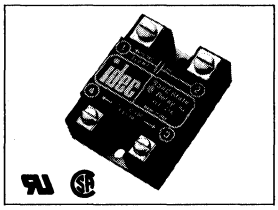
Type: 1-4 Pole, Blade/Plug-in
Ratings: 10A 250V
Mounting: DIN Rail, Surface
Compatible IDEC Relay: RH Series
RH2L Series

SY Series



Type: 2, 4-Pole, Solder/Plug-in
Ratings: 7A 250V
Mounting: DIN Rail, Surface
Compatible IDEC Relay: RM Series
RY Series
RY2L Series

RSS Series Solid State Relays



Input (DC)
Voltage Range: 3–32V DC
Isolation Voltage: 4000V AC (Input to Output)
Output

Current Ratings:	10A	25A	40A
1 Cycle Surge Peak:	100A	250A	650A

Voltage Range: 24–330V AC

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

Argentina (IRAM) Instituto Argentino de Racionalization de Materiales

MICROELECTRONIC POWER IC RELAYS

ChipSwitch® Solid State Relay

UL, CSA, VDE Rated

The ChipSwitch relays utilize power integrated circuits for AC power line switching while maintaining turn-on at zero voltage crossing and turn-off at zero current crossing. They are a compact, low cost, and highly reliable interface for isolating and switching AC loads such as solenoids, valves, lamps, contactors, small motors, and heaters from low level DC signals.

BOSFET® PhotoVoltaic Relay

International Rectifier Photo-Voltaic Relays utilize a unique power integrated circuit termed a BOSFET to form a solid state replacement for signal level electromechanical relays. They feature high speed, zero offset voltage, low pick-up power, miniaturization, and are widely applied in instrumentation, multiplexing, automatic test equipment, thermocouple switching and telecommunications for general purpose switching of AC/DC analog and digital signals.

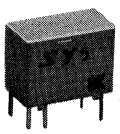
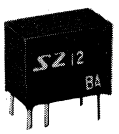
Sub Miniature Printed Circuit Board Relays

SY/SZ RELAYS

1 Amp SPDT
L — 0.492″,
W — 0.291″,
H — 0.374″





CONTACT DATA

Arrangement — 1 Form C

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial value)

Ratings — 0.5A, 120V AC or 1A, 24V DC (resistive) switched
2.0A carrying curent

Life Expectancy — Mechanical: Min. 5 million operations
Electrical: SZ Min. 200,000 operations at rated load
SY Min. 150,000 operations at rated load

COIL DATA

Voltages — 1.5 to 24V DC

Power (at 20°C) —
SZ Operate — 0.15 watt (0.16 watt for 18V coil, 0.18 watt for 24V coil)
Nominal — 0.3 watt (0.32 watt for 18V coil, 0.36 watt for 24V coil)
SY Operate — 0.075 watt
Nominal — 0.15 watt

Operate (at 20°C) — 70% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 100 MΩ minimum at 500V DC

Dielectric Strength — 500V AC (50, 60 Hz), between open contacts
1000V AC between contacts and coil

Temperature Range — SZ −40°C to +70°C (18V coil: −30°C to +65°C, 25V coil; −30°C to +60°C) (at nominal voltage)
SY −40°C to +90°C

Time Values (approx.) — Operate 1.5 mS, Release 1 mS (at nominal voltage)

Vibration Resistance — 20G (10 ~ 300 Hz) amplitude 3 mm

Shock Resistance — 50G

Mounting — For direct printed circuit mounting on grid spacing of 2.54 mm (0.1 in.)

Approximate Weight — 1.7 gr (0.06 oz.)

Enclosure — Polybutylene terephthalate (PBT)

Surge Strength — 1000V

Nominal Coil Voltage	Coil Resistance	Operate Voltage	Type No.	List Price
3	30	2.1	SZ-3W	$2.66
5	**83**	**3.5**	**SZ-5W**	**$2.66**
6	100	3.9	SZ-6W	$2.66

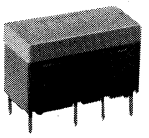
RY RELAY

1 Amp DPDT
L — 0.795″,
W — 0.386″,
H — 0.472″



CONTACT DATA

Arrangement — 2 Form C, 2 Form D

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial)

Ratings — 0.5A 120V AC or 1A 24V DC (resistive)

Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 1A 24V DC
Min. 200,000 operations at 0.5A 120V AC

COIL DATA

Voltages — 4.5 to 48V DC

Power (at 20°C) —
Operate — 0.075 watt (0.098 watt for 18V, 24V coil, 0.138 watt for 48V coil)
Nominal — 0.15 watt (0.2 watt for 18V, 24V coil, 0.3 watt for 48V coil)

Operate (at 20°C) — 68 ~ 71% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ min. at 500V DC

Dielectric Strength — 500V AC between open contact
1000V AC between all other conductors

Temperature Range — −40°C ~ +85°C at nominal voltage

Surge Strength — 1500V between all conductors

Time Values (max.) — Operate 6 ms, Release 3 ms at nominal voltage

Vibration Resistance — 10G (10 ~ 55 Hz)

Shock Resistance — 10G 11 ±1 ms) — Unerror, 100G (6 ±1 ms) — Destruction

Enclosure — Polybutylene terephthalate (PBT)

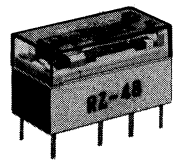
W — 0.386″,
H — 0.457″



CONTACT DATA

Arrangement — DPDT (B-M) — RZ, RZ( )W Type
Material — Gold overlaid silver-palladium alloy
Max. Switching Power —
30W/60VA — Single Contact
30W/50VA — Bifurcated contact at resistive load
Max. Switching Current —
2A AC or DC — Single Contact
1A AC or DC — Bifurcated contact at resistive load
Max. Switching Voltage —
150V DC/125V AC — Single Contact
100V DC/90V AC — Bifurcated contact at resistive load
Contact Resistance (Pin-pin) — 100mΩ Max.
Capacitance — 1.5PF max. between open contact
0.5PF max. between adjacent change-over contact
Life Expectancy —
Mechanical: 20 million operations — Single Contact
15 million operations — Bifurcated contact
Electrical: 0.5 million operations at 1.25A 24V DC or 0.4A 125V AC at resistive load — Single contact
0.5 million operations at 0.7A 24V DC or 0.25A 125V AC at resistive load — Bifurcated contact

COIL DATA

Nominal Voltage — 3 to 48 V DC — RZ, RZ( )W Type,
3 to 24V DC — RZ1, RZ1( )W Type
Power (at 20°C) — Nominal: 515 ~ 560 mW — RZ, RZ( )W Type,
Operate: 200 ~ 324 mW — RZ, RZ( )W Type
Max: 1050 mV
Temperature Range — −40°C ~ +65°C — RZ RZ( )W Type
(at nominal voltage) −40°C ~ +75°C — RZ1 RZ1( ) Type

GENERAL DATA

Dielectric Strength — 500V AC (50/60 Hz) between open contacts, 1000V AC contact-coil
Insulation Resistance — 1000 MΩ min. at 500V DC
Timing — Operate <4 ms, release <2
Bounce Time — Approx. 1 ms on operate
Approx. 4 ms on release
Vibration Resistance — 10 to 60 Hz amplitude 1.5 mm (10G)
Shock Resistance — Destruction shock: 100G (11 ms ±1 ms)
Unerror shock: 10G (11 ms ± 1 ms)
Surge Strength — 1500V AC between all conductors

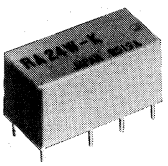
TAKAMISAWA ELECTRIC CO., LTD.

Sub Miniature Printed Circuit Board Relays

RA RELAY



1 Amp DPDT Relay
L — 0.795″
W — 0.394″
H — 0.394″

CONTACT DATA

Arrangement — 2 Form C (DPDT)
Material — Gold overlaid silver palladium alloy vs silver palladium alloy
Resistance — Max. 100 mΩ (Initial)
Rating — 24V DC 1A, or 120V AC 0.5A
Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 24V DC 1A
Min. 200,000 operations at 120V AC 0.5A
Max. Carrying Current — 2A

COIL DATA

Voltages — 1.5 to 48V DC
Power (at 20°C) — Operate: Standard 100—200 mW
Single winding latching 35~100 mW
Double winding latching 75~180 mW
Nominal: Standard 200~400 mW
Single winding latching 75~200 mW
Double winding latching 150~360 mW
Operate (at 20°C) — Less than 70% of nominal voltage
Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ at 500V DC
(Expect between P & S coil)
Dielectric Strength — 1000V AC between open contact
1500V AC between all other conductors
(Expect between P & S coil)
Temperature Range — −40°C~+80°C (RA-W, RA-WN, RAL-W, RAL-DW, RAL-WP, RAL-DWP)
−40°C~+70°C (RA-WM, RAL-DWM), at nominal voltage, Non carring Contact
Surge Strength — 1500V between coil and contact, adjacent contacts
Time Value (Max.) — Operate: (RA-WM, RAL-DWM) 4 mS
(RA-W, RA-WN, RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS
Release: (RA-WM) 3 mS
(RA-W, RA-WN, RAL-DWM) 4 mS
(RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS, at nominal voltage
Vibration Resistance — 30G (10~55 Hz) Unerror
30G (10~55 Hz) Destruction
Shock Resistance — 50G (11 ±1 mS) Unerror
100G (11 ±1 mS) Destruction
Enclosure — Polybutylene terephthalate (PBT)

TAKAMISAWA ELECTRIC CO., LTD.

Sub Miniature Printed Circuit Board Relays

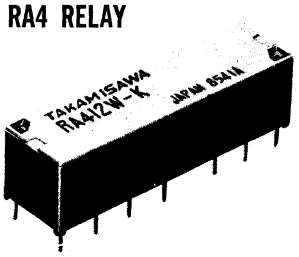
RA4 RELAY

1 Amp 4PDT

L — 1.387″,

W — 0.390″,

H — 0.433″



CONTACT DATA

Arrangement — 4 Form C (4PDT)

Material — Gold overlaid silver palladium alloy vs silver palladium alloy

Resistance — Max. 100 mΩ

Ratings — 120V AC 0.5A, 24V DC 1A (Resistive)

Max. Current — 2A

Life Expectancy Mechanical — Min. 20 million operations

Electrical — Min. 500,000 operations at 24V DC
Min. 200,000 operations at 120V AC 0.5A

COIL DATA

Voltages — 1.5 to 48V DC Power (at 20°C)

Type	RA4, RA4L		RA4-M, RA4L-M	
	Operate	Nominal	Operate	Nominal
Single Winding Non Latching	0.1W	0.2W	0.2W	0.4W
Single Winding Latching	0.045W	0.09W	0.09W	0.18W
Double Winding Latching	0.09W	0.18W	0.18W	0.36W

Operate (at 20°C) 70% of nominal voltage

Pulse Length—20ms min.

GENERAL DATA

Insulation Resistance — 1000 mΩ min. at 500V DC

Dielectric Strength — 1000V AC between open contacts
1500V AC btween all other conductors

Temperature Range — −40°C ~ +80°C (RA4, RA4L),
−40°C ~ +70°C (RA4-M, RA4L-M)

Surge Strength — 1500V between coil and contact, adjacent contacts

Time Value — Operate: 6 msec max.
Release: 4 msec max.

Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring
} reference value

Shock Resistance — 100G (6 ±1 msec) Destructive
30G (11 ±1 msec) Unerring
} reference value

Enclosure — PBT

Notes

- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
  As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

CONTACT DATA
Arrangement — 1 form C (SPDT bifurcated)
Ratings — 24V DC 10 mA, 1W at 900 MHz
Resistance — 100 mΩ max. (initial value)
Max. Current — 100 mA DC
Max. Voltage — 30V DC
Max. Power — 1W DC, 10W at 900 MHz
Life Expectancy — Mechanical: 1,000,000 operations min.
Electrical: 300,000 operating min. at rated load

COIL DATA
Voltage — 1.5 to 48V DC
Power — (at 20°C)

Type	Operate	Nominal
Single Winding Non Latching	0.1W (0.11W for 48V coil)	0.2W (0.22W for 48V coil)
Single Winding Latching	0.1W	0.2W
Double Winding Latching	0.2W	0.4W

Operate wattage less than 70% of nominal voltage

GENERAL DATA
Insulation Resistance — 1000 MΩ min. at 500V DC (UMIL-D, except between P.S. Coil)
Dielectric Strength — 500V AC between open contacts, between contacts and earth
1000V AC between coil and other terminals
Temperature Range — −30°C ~ +80°C at nominal voltage
Time Value — 6 msec max. at nominal voltage (UMI Release Time 5 ms)
Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring
Shock Resistance — 100G (6 msec) Destructive
50G (11 msec) Unerring
} reference value

HIGH FREQUENCY CHARACTERISTICS
Isolation — 60 dB min. at 900 MHz
Insertion Loss — 1 dB max. at 900 MHz
V.S.W.R. — 1.2 max. at 900 MHZ
(Impedance of the measuring devices is 75Ω)

Notes
- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

Notes • If correct polarity is not applied to the coil terminals, relay does not operate properly. • To release latched contact, polarity to be applied to coil terminals should be reversed. • Since this is the polarized relay, Confirm the relays performance in the actual circuit, prior to use. When relays are expected to be mounted very closely together or to be used under strong magnetic fields.

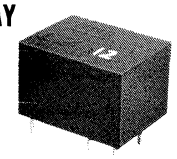
Miniature General Purpose Relays

LZ RELAY



5 Amp SPDT
L — 0.843″
W — 0.646″
H — 0.583″

CONTACT DATA

Arrangement — 1 Form C

Material — 5A type: Gold overlay silver-nickel alloy (single)
3A type: Gold overlay silver (single)
1A type: Gold overlay silver-palladium alloy (bifurcated)

Load — 5A type: 5A @ 30V DC or 120V AC, 4A @ 240V AC resistive, 1/8 HP
3A type: 3A @ 30V DC or 120V AC, 2.5A @ 240V AC resistive, 1/10 HP
1A type: 1A @ 30V DC or 120V AC, resistive

Life — Mechanical: 20 million operations minimum
Electrical: 0.1 x 10^6 operations minimum at rated load

Timing — Operate: < 5 ms (standard type), < 6 ms (high sensitive type)
Release: < 2 ms

COIL DATA (@ 20°C)

Operate Power — 210 mW (standard type), 150 mW (high sensitive type)

Nominal Power — 450 mW (standard type), 330 mW (high sensitive type)

Maximum Power — 1.4W

GENERAL DATA

Insulation Resistance — 250 MΩ at 500V DC

Dielectric Strength — 750V AC between open contacts
2000V AC between all other points

Temperature Range — standard type −40°C to +70°C
sensitive type −40°C to +80°C

Vibration Resistance — 15G (10-55 Hz)

Shock Resistance — 15G (11 ms ±1 ms)

Approximate Weight — 8 gr (0.28 oz.)

Enclosure — Standard — polycarbonate
Washable or sealed — PBT

Surge Strength — 3000V

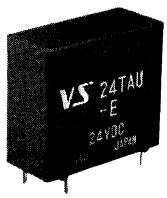
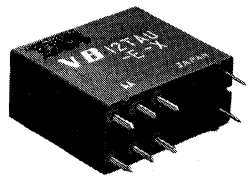
Miniature Power Relays

VB/VS RELAY

L — 1.150″
W — 0.508″
H — 0.996″





CONTACT DATA

Arrangement—1 Form A or C 15/10 Amp (VS)
2 Form C 5 Amp (VB)
Material—Silver Nickel (Standard), silver tin oxide (15A)
Rating—5 10/15 Amp at 24V DC or 240V AC
⅙ or ⅓ HP 120V AC motor load
Inrush Current — 51 or 78A at 120 V AC
Max. Carrying Current — SPDT 14A, DPDT 7A
Life Expectancy — Mechanical 5 million operations
Electrical: 100,000 operations at 5 or 10A 24V DC or 240V AC
200,000 operations at 5 or 10A 120V AC resistive
3.5 or 7A 24V DC or 240V AC
30,000 operations at ⅙ or ⅓ 120V AC motor load

COIL DATA

Nominal Voltage — 3 to 60V DC
Power (at 20°C) — Nominal: 0.72W Standard Type
0.53W High Sensitive Type
Operate: 0.35W Standard Type
0.26W High Sensitive Type
Maximum: 1.4W

GENERAL

Dielectric Strength — Min. 1000V AC between open contact
Min. 5000V AC between all other conductors
Insulation Resistance — Min. 1000MΩ at 500V DC between conductors
Surge Strength — 10,000V.
Temperature Range — (TV types) −40°C to +50°C
Standard types) −40°C to +65°C
(Sensitive types) −40°C to +75°C
Enclosure — Polycarbonate

High Voltage Relays

KILOVAC, THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES.

THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES

For over two decades, Kilovac Corporation has been exclusively dedicated to the design and manufacture of vacuum and gas-filled high voltage relays, switching and power control devices.

Today Kilovac is recognized as the world's leading supplier of proprietary high voltage switching devices for a broad range of critical applications.

Kilovac pioneered the development of special high voltage relays for heart defibrillators and remains the leading supplier for relays in this market. Kilovac relays have been to the moon in the Lunar Rover Vehicle and to the depths of the sea on nuclear submarines.

KILOVAC CAN QUICKLY MEET YOUR REQUIREMENTS

The key to Kilovac's success has been its ability to respond quickly to customer requirements; to develop special relays or modifications to standard relays for unique requirements; and to deliver reliable products promptly.

Major advances in manufacturing technology allow Kilovac to provide high quality vacuum relays at an affordable price.

Kilovac designs and manufactures vacuum and gas-filled switching devices with ratings from 48V to 200,000V, in single, double and 4-pole styles.

A wide variety of special modifications can be made to Kilovac's existing product line allowing you to meet unique requirements at very competitive prices.

YOU CAN RELY ON KILOVAC TO MEET YOUR REQUIREMENTS

Kilovac's vertically integrated manufacturing facility allows it to quickly accommodate special modification and design, build, and test relays and other switching devices for unique applications.

Kilovac offers its customers a full twelve month warranty on all its products.

Engineering samples can frequently be supplied for test and evaluation in your circuits and for your use with your specific applications.

Don't experiment with high voltage switching devices . . . rely on the proven experience of Kilovac Corporation.

Kilovac® Corporation

High Voltage Relays

KILOVAC, THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES.

TYPICAL APPLICATIONS

Typical high voltage relay applications are listed below:

COMMUNICATIONS–H.F. SSB radio, digital antenna couplers and tuners, transmit/receive switching.

TEST EQUIPMENT–Electrostatic discharge testing, dielectric testing, cable and harness testing.

AEROSPACE POWER SWITCHING–Aircraft, space systems, submarine and ground equipment where 48 Vdc, 155 Vdc, 270 Vdc and 20 KHz switching and control is required.

RADAR–Pulse forming networks, modulators/transmitters, TWT and klystron switching.

GENERAL–Safety interlock applications, high voltage power supplies, polarity reversal, nuclear instrumentation, switching in explosive or corrosive atmospheres.

LASERS–Pulse forming network discharge, safety interlock, simmer circuit isolation, Pockels cell isolation.

SEMICONDUCTOR PROCESSING

PLASMA ETCHING–Multiple target switching.

HIGH INTENSITY LIGHTING SYSTEMS

MEDICAL INSTRUMENTS–Heart defibrillators, surgical lasers, magnetic resonance imaging (MRI), Electrophoresis.

Kilovac® Corporation

High Voltage Relays

KILOVAC, THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES.

FEATURES OF VACUUM AND GAS-FILLED RELAYS

- Smaller size for a given voltage/ current rating
- Extremely low and stable contact resistance in vacuum relays
- No contact oxidation due to arcing
- Faster operate times
- High resistance to thermal and mechanical shock
- Capable of switching high inrush currents using gas filled relays
- Safe use in explosive or corrosive atmospheres
- No contact maintenance
- Usable at frequencies above 30 MHz
- Rapid arc extinguishment for power switching in vacuum relays
- Can be mounted in any orientation

VOLTAGE: 10 kV — 12 kV — 15 kV →

Kilovac® Corporation

High Voltage Relays

KILOVAC, THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES.

All Kilovac relays have either a vacuum or gas dielectric. Both have the obvious benefit of providing high voltage isolation in a small package, but each has unique characteristics which should be considered.

VACUUM AS A DIELECTRIC

A vacuum is, in many ways, the ideal dielectric. Since most high voltage arcs are initiated by the ionization of the insulating medium, absence of any such media (i.e., a hard vacuum) produces the greatest possible isolation between contact electrodes. In a vacuum of 10^{-6} mm of mercury, dielectric strengths can be achieved on the order of 2000 V/mil. A vacuum dielectric has the additional advantage of providing an inert, non-oxidizing atmosphere in which high voltage contacts operate.

The chief advantage in using a vacuum relay is that it has low and stable contact resistance over the life of the relay.

GAS AS A DIELECTRIC

Because of the arc suppression characteristics of electronegative gas, gas-filled relays are generally more suitable for power-switching on the "make" or N.O. contacts, as used in the capacitive discharge of heart defibrillator circuits or pulsed lasers.

When the relay is switched, ionization of the gas causes electrical continuity to occur before mechanical continuity is achieved. Thus, contact bounce may occur without interruption of the circuit if circuit voltage is above 3500 volts. This phenomenon contributes to the long life gas-filled relays demonstrate in capacitive discharge circuits.

Kilovac® Corporation

High Voltage Relays

KILOVAC, THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES.

POWER SWITCHING

For proper relay performance in hot switching applications, the consequences of the circuit conditions must be assessed for each unique application. It is therefore essential that Kilovac be as fully informed as possible when recommending relays for hot switching applications. To select the proper relay, the following information should be supplied to the Kilovac Sales Engineer:

a. Type of Load

b. Current and voltage values to be switched. If capacitive discharge, peak current and RC time constant values are needed.

c. Repetition rate or frequency of operation desired

d. Expected life span

Frequently, the only way to determine whether a relay will survive a particular power switching application is to test it in the circuit. These tests ideally can be performed in the customer's circuit or, if that is not possible, in Kilovac's well-equipped test lab.

270 VDC APPLICATIONS

Not all high-voltage relays are used in truly high-voltage applications. Consider, for example, aerospace power distribution systems. Studies have shown that 270-volt dc systems offer improvements in reliability, maintenance cost, reduced fuel consumption, weight and life cycle cost compared to conventional 28 Vdc and 115/200 volt, 400-hertz ac systems.

Conventional switching devices currently used with 28-volt dc or 115/200 volt, 400-hertz ac systems will require major modifications in order to reliably switch 270-volt dc circuits. These modifications will result in undesirably large and heavy units, making them impractical for the intended application. The use of vacuum as an insulating medium to switch 270-volt dc loads provides a significant increase in performance and reliability without the penalty of increased size and weight.

Kilovac® Corporation

High Voltage Relays

KILOVAC, THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES.

KILOVAC MEDICAL RELAYS

Since 1964 Kilovac has produced and delivered thousands of high voltage relays especially designed for heart defibrillators, for use in hospital models as well as portable units.

The small size and high reliability of Kilovac medical relays make them ideally suited for use in portable battery operated equipment.

Kilovac produces several models of patient, safety discharge, and ECG relays as well as multifunction relays capable of performing all of the switching requirements in defibrillators and other types of medical instrumentation. A variety of contact configurations is available: SPST-NO, SPST-NC, SPDT, and DPDT. This flexibility, coupled with Kilovac's extensive application experience and technical support capability, ensures design engineers of a relay suited to their precise requirement.

Kilovac maintains an on-going reliability test program to ensure that all relays continue to perform reliably time after time. Typically, relays are tested using a circuit with a 50 ohm load, an inductor, and discharging 360 joules of energy from a capacitor charged to 5000 volts. Subsequent analysis indicates a reliability of the patient relays of 99.9% at 5000 operations. They are pressurized with an electro-negative gas which provides the arc-quenching characteristics so important in capacative discharge applications.

It is Kilovac's policy to seek customer approval of any proposed changes relating to form, fit or function to a medical relay, as required by the FDA for Critical Components.

VOLTAGE: 28 kV — 30 kV — 35 kV — 50 kV — 100 kV →

LEACH®

SUBMINIATURE RELAYS

Quick Reference Guide

Leach products have been setting the standards in both technology and reliability for 70 years. Our products are aboard virtually every major U.S. airborne and commercial program involving aircraft, missiles, satellites and space launch vehicles as well as submarines, ships, tanks, and ground vehicles. This guide describes our relay product line ranging from 5 amp dry circuit subminiatures to 400 amp power contactors and time delay relays.

Dry Circuit to 12 Amp

M83726/31	TDH-8080/8081	Delay On Release-Adjustable	10A, 2PDT	0.1 to 600 (5)

(1) Slash sheets 1, 2, 3, & 4 to MIL-R-83726 have been officially inactivated for new design. DLA specifies for new design, /28 replaces /1 and /3 and /29 replaces /2 and /4. Replacement units are smaller and lighter but are electrically and physically compatible with inactivated units.
(2) All adjustable timers use external resistor (not supplied) to adjust timing range. See Table II.
(3) Each cycle 50% on, 50% off.
(4) "True" time delay on release requires no external power during timing period.
(5) Timing ranges above 500 second not MIL qualified.

TABLE I. SPECIFYING A FIXED TIME DELAY PERIOD

LEACH and the Military identify the time delay period in the same manner. A four digit dash number specifies the delay period in milliseconds. The first three numbers are significant figures while the fourth indicates the number of zeros to follow the first three.

Examples: —1001 = 1,000 milliseconds (1 second)
—2502 = 25,000 milliseconds (25 seconds)
—5000 = 500 milliseconds (0.5 seconds)

In the case of a repeat cycle timer (flasher), a similar method is used. The dash number indicates the length of each cycle. (Note: each cycle is 50% on, 50% off).

Examples: —2500 = 250 milliseconds cycle or 4 cycles/sec.
—1001 = 1,000 milliseconds cycle or 1 cycle/sec.
—6002 = 60,000 milliseconds cycle or 1 cycle/min.

TABLE II. USE AND SELECTION OF ADJUSTABLE TIMERS

Adjustable timers are useful in system prototyping or breadboard circuits where the precise time delay period is unknown. By the use of an external resistor, these devices are adjustable over a specific DECADE RANGE. Although any decade range within the overall timing range can be supplied, the following ranges are offered as standards:

0.1 to 1 seconds (Specify -1001)
1.0 to 10 seconds (Specify -1002)
5 to 50 seconds (Specify -5002)
50 to 500 seconds (Specify -5003)

Note from the above that in specifying a decade range, the four digit dash number indicates the high or upper limit of the desired decade range.

The formula below provides the proper resistance value to achieve the desired time delay:

$$R_{ext} = \left(\frac{T_1}{T_0} - 1\right) 100{,}000 \text{ Ohms}$$

Where: R_{ext} = External resistance value (Ohms)
T_1 = Desired time in seconds
T_0 = Minimum time (low end of decade range) in seconds.

As an example, if using a 5 to 50 second adjustable timer and a 30 second delay is desired, the calculation is:

$$R_{ext} = \left(\frac{30}{5} - 1\right) 100{,}000 \text{ or } R_{ext} = 500 \text{ K Ohms}$$

Recommended resistors IAW MIL-R-55182 ⅛ WATT, 1% (RNC6OHXXXXFS).

POWER MONITORS/AC & DC VOLTAGE MONITORS

GENERAL INFORMATION

Logitek power monitoring equipment is utilized to monitor incoming power on AC or DC power systems. When the system voltage, frequency or phase characteristics deviate from the predetermined acceptable limits, the relay de-energizes to activate an alarm indicator or system shut-down contactors. Voltage sensing is accomplished with an "RMS" type detector that is relatively insensitive to line distortion.

EQUIPMENT TYPES

Individual units monitor AC or DC voltage and line frequency for both high and low limits, and phase rotation for reversal/loss. Power monitors are also available incorporating any combination of these functions into a single unit. This equipment is available with factory set limits or as field adjustable.

OPERATING CHARACTERISTICS

When the voltage and frequency of the input signal are within prescribed high and low limits, and the phase rotation is ABC, the output relay will energize after the specified "pick-up" time delay. If the high or low voltage limits of any phase are exceeded for a time greater than the specified "drop-out" time delay, the relay de-energizes and remains de-energized until all phase voltages return within limits and remain at normal levels for longer than the specified "pick-up" time delay. If the input frequency exceeds the high or low frequency limits for a time exceeding the "drop-out" time delay, the relay de-energizes and remains de-energized until the frequency returns within limits and remains at normal levels for longer than the "pick-up" time delay. The ouput relay will not energize if the phase rotation is other than ABC or if any phase is disconnected. When the output relay is energized, loss of any phase will cause the relay to drop out immediately, overriding the time delay circuits.

SPECIAL PRODUCTS

Logitek's engineering department is available to discuss your applications of our product or to design special equipment to satisfy your system requirements.

TYPICAL SPECIFICATIONS

ELECTRICAL

Input Voltage	115 VAC/208 VAC/ 230 VAC
Voltage Transients	MIL-STD-704, Limits 1, 2, 3
Input Frequency	50/60/400 Hz
Sense Voltage	As required
Sense Frequency	As required
Accuracy	±1%
Phase Sequence	ABC
Time Delay (Pick-Up and Drop Out)	250 milliseconds to 10 seconds factory set or field adjustable
Relay Contacts	DPDT, 3PDT
Contact Rating	2 amp, 10 amp
Contact Life	50,000 operations min.
Power Dissipation	6 watts maximum

PHYSICAL

Finish	Gloss Blue #15177, in accordance with MIL-F-14072
Connector	Glass to metal seal solder hooks, MS3113H-20-16PN Connector
Enclosure	Steel case, hermetically sealed and encapsulated

ENVIRONMENTAL

Temperature	−55°C to +125°C −40°C to +85°C −10°C to +70°C
Vibration	Per MIL-STD 810C, Method 514.2 Procedure I, 10-2000 Hz, 20g's
Shock	Per MIL-STD 810C, Method 516.2, Procedure I, 50g's 11 ±1 millisecond any axis
Acceleration	Per MIL-STD 810C, Method 513.2, Procedure I & II, 10g's
Humidity	Per MIL-STD 810C, Method 507.1, Procedure I
Altitude	Per MIL-STD 810C, Method 504.1, Category 6 equipment, sea level to 70,000 ft.

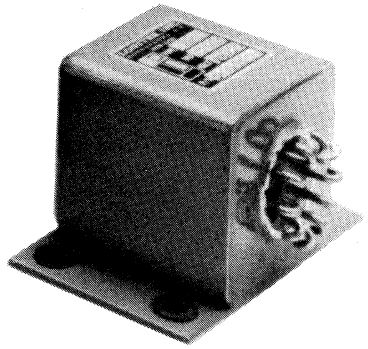
LOGITEK POWER PRODUCTS

THE LOGICAL CHOICE OF THE TECHNICAL MIND

FREQUENCY MONITORS/PHASE MONITORS

GENERAL INFORMATION



Frequency Monitors: Logitek Frequency Monitors are used in applications where electrical systems must be de-energized or alarm devices activated when the power line frequency departs from the predetermined normal range of operations.
Phase Monitors: Logitek Phase Monitors are used to protect three-phase loads, particularly rotating components, from damage resulting from phase reversals or the absence of phase. Contacts may be used to disconnect the load, to operate an alarm, or both.

OPERATING CHARACTERISTICS

Frequency Monitors: Signal voltage from the power line is applied to the designated terminals. If the line frequency is within the specified limits, the output relay energizes. If the frequency deviates from the preset limits for longer than the specified drop-out time delay, the unit de-energizes. After de-energizing, the frequency must return to within the pre-set band for longer than the pick-up time delay to re-energize the output relay.
Phase Monitors: Upon application of power, the output relay energizes if all phases are connected and the phase sequence is ABC. If any phase becomes disconnected, or if the phase rotation is abnormal, the relay immediately de-energizes.

SPECIAL PRODUCTS

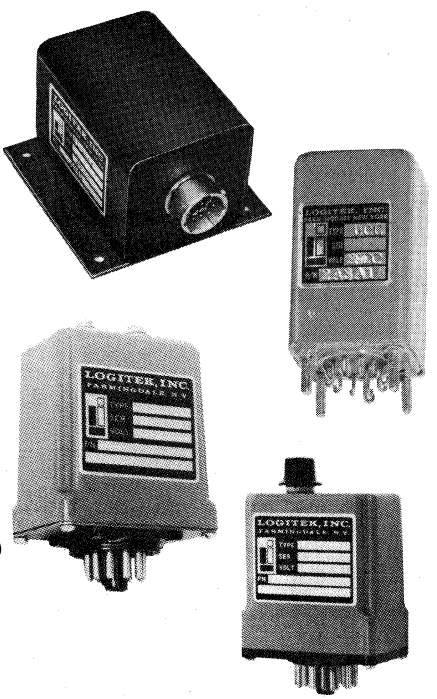
LOGITEK POWER PRODUCTS

THE LOGICAL CHOICE OF THE TECHNICAL MIND

TIME DELAY RELAYS • SOLID STATE FLASHERS REPEAT CYCLE & INTERVAL TIMERS

GENERAL INFORMATION

The design of complex electrical distribution systems often requires that certain operations be delayed or sustained for a precise interval of time from occurrence of a control or initializing signal. Combinations of various timing devices can be used for sequential startup or shutdown programs, load transfer or shedding, or delayed transfer to avoid race conditions. In addition, pulsers, interval timers, and flashers are used in applications, such as operating instrument panel warning lights or other annunciator devices, landing gear, door open indicators and navigation lights.



QUALITY ASSURANCE

Logitek's facilities are qualified under MIL-Q-9858A and maintains a MIL-I-45208 inspection system. These systems, along with Logitek's 100 hour burn-in cycle, contribute substantially to Logitek's uncompromising product integrity.

OPERATING CHARACTERISTICS

Logitek timing devices are generally CMOS integrated circuits appropriately protected from line transients and other line perturbations and either a solid state or electromechanical relay output circuit. Since there are no large capacitive timing or storage elements in these devices, recycle times (the time after control removal that will cause a new timing cycle within specified accuracy) are very short. In addition, the use of CMOS IC digital counting circuits allows the use of very stable timing elements resulting in excellent stability through wide temperature ranges.

APPLICATIONS

- Aircraft, Electrical Systems • Mobile Radar Systems • Equipment Test Stations
- Tanks • Mobile Missile Launchers • Offshore Drilling Rigs • Computer Systems
- Shipboard Electrical Systems • Hospital Auxiliary Power Systems

MINIGLOSSARY TIMERS

Accuracy
The variation of unit performance, i.e., time delay, voltage trip point, etc., over the specified conditions of ambient temperature, input voltage range, and time between operations.

Adjustability
The changing of a unit set point, within the specified range of unit operation, by means of internal or external adjustment mechanism (i.e., changing time delay with potentiometer).

Contact Rating
The electrical power-handling capability of relay contacts under specified environmental conditions and for a prescribed number of operations.

Delayed Interval Timing Function
Input voltage is applied continuously. The timing cycle is started by momentarily actuating the control circuit. The functions of separate Delay-On-Operate and interval type timers are combined in one package providing a single OFF-ON-OFF output cycles

Also called: single shot.

Delay-On-Operate Timing Function
Application of the input voltage starts the time delay. At completion of the time delay, the relay contacts transfer.

Also called: Delay-On-Make, On-Delay, Delay Relay, Delay-On-Pickup.

Delay-On-Release Timing Function
Input voltage must be supplied continuously to timer. Actuation of control circuit causes relay contacts to transfer immediately. Time delay starts when control circuit is released. The relay remains energized for the duration of the time delay—then de-energizes.

Also called: Delay-On-Break, Off-Delay, Delay-On-Dropout, Delay-On-Energization.

Frequency Sensor
A device that monitors a predetermined overfrequency and/or underfrequecy condition, and changes output state when these conditions exist.

Hysteresis
The difference between the response of a unit or system to an increasing and a decreasing signal (example: a voltage sensor).

Interval Timer Timing Function
Application of input voltage causes relay contacts to transfer and time delay to begin. At completion of the time delay, the relay contacts return to de-energized state.

Also called: Delay Interval, One Shot.

Output Control
The switching device, either solid-state or electromechanical, used in the unit to control the load connected to the output terminal(s).

Phase Sensor
A device that monitors for proper phase rotation in 3-phase systems.

Programmability
Ability to modify function, time delay or input voltage of a timer.

Recovery Timer
(Delay-On-Operate/Interval Timer)
The minimum time that input voltage must be interrupted *prior* to time-out to insure a successive timing cycle within the specified limits.

(Delay-On-Release)
The minimum duration of time that control circuit must be re-actuated to insure a new timing cycle when the control circuit is released.

Recycle Time
(Delay-On-Operate or Interval Timer)
The minimum time that input voltage must be interrupted after the timing cycle is completed to assure a successive timing cycle within the repeatability specified.

(Delay-On-Release)
The minimum duration of time that control circuit must be actuated to insure a successive timing cycle within the repeatability specified when the control circuit is released.

Repeat Cycle Timer Timing Function
Application of power automatically initiates continuous off-on cycling of the output relay.
Also called: flasher, intervalometer

Reset Time
The time required for the contacts to return to normal position when power is removed.

Reverse Polarity Protection
Blocking circuitry arrangement within the timer to prevent damage or output actuation if reverse polarity input voltage is applied.

Tolerance
The difference between specified and actual timing or sense point (factory setup tolerance).

Transient Protection
Prevents damage to unit if positive or negative transients are applied to the unit. Insures proper operation of the unit during and after transient occurrence. Max. transients are usually specified as to amplitude and duration, i.e., 1000V for 1 second.

Trip Point
The predetermined point at which a sensing device is set to change the output state.

Voltage Sensor
A device that monitors for a predetermined overvoltage and/or undervoltage condition, and changes output state when these conditions exist.

JENNINGS MINIATURE MICROWAVE RELAYS

The FL Jennings TOH Series microwave relays are designed to operate from DC to 2.5 GHz and higher. They are used in coaxial transmission lines to open, close, and divert signal paths. Applications where stringent impedance matching and isolation are required include antenna switching, radar, communications, radio telephones, and cable TV systems. Our technology represents the latest developments in materials, performance and flexibility. The TOH series microwave relays are available in coil terminal, PCB terminal, flying lead, and solder lug configurations. Operating voltages of 6, 12, 24, and 28 VDC can be specified.

The TOH Series are built using a new patented method that offers efficiency in manufacture. The result provides reliable, proven relays at lower cost.

JENNINGS VACUUM CONTACTORS

Vacuum Contactors are used to control large amounts of DC power and RF currents with ratings up to 50 kv and currents up to 600 Amperes continuous. These contactors are recommended wherever high voltage capability, small size, and high speed operation with a long and low maintenance life are important. Applications include primary control of power supplies, industrial motors, and induction heating equipment, RF system tap changing, and fault protection of high power transmitters. The 18 page catalog provides complete specifications with a variety of specific applications for 3-pole, high voltage AC and DC, RF contactors and overcurrent relays actuated by solenoid, air or motor drives.

JENNINGS VACUUM/GAS RELAYS

Relay Testing

Jennings operates test facilities to provide all environmental, high voltage, and radio frequency (RF) test parameters. All relays are individually tested prior to shipment for pull-in voltage, timing characteristics, contact resistance, and dielectric strength.

Vibration, shock, humidity, salt spray, temperature effects, current load and reliability tests are regularly performed on a sampling basis.

Mechanical life reliability tests are performed on a sample basis with equipment that only passes relays which cycle with proper sequences of contact operation. Some relay types have been checked to more than 10^8 operations.

JENNINGS VACUUM/COAXIAL RELAYS

Applications for these units include high speed switching from omnidirectional to directional antennas, transmit-receive switching, and switching between transmitters for standby control.

Other applications include crossbar matrices and switching trees, CCTV, CATV, and microwave telemetry and data acquisition links, as well as general coaxial instrumentation.

Jennings vacuum coaxial relays have a recorded history of dependable, maintenance free operation. Because of this, they were chosen for ground and airborne applications for the tracking network of the Apollo program and the Atlantic Missile Range Communications.

* Power rating applies when connecting line pressurized 45 PSIA Dry Air or 31 PSIA Dry Nitrogen.
** ± 15%
† All measurements with a characteristic impedance of 50 ohms.
†† faster operate times can be obtained on most units by coil pulse circuits. Information available from factory.

NOTE: This power ratings is for the frequency at which the relay is most commonly used.
The power rating for any point in the frequency range of the unit other than that shown may be obtained by consulting factory.

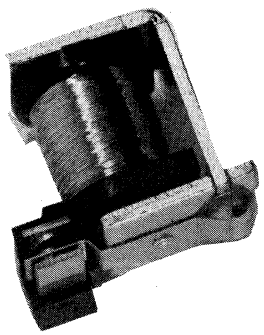
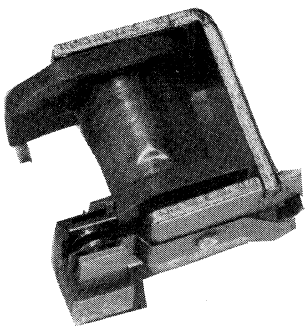
MALLORY

SERIES PCM DC COIL RELAYS

The Mallory DC coil relay is designed for direct printed circuit board mounting. 1 FORM A (SPST-NO), 1 FORM B (SPST-NC) and 1 FORM C (SPDT) circuit arrangements are available in each of two styles. Style A is designed primarily for AC loads up to 30 amps, but can be utilized for DC applications as well. Style D is designed primarily for DC loads up to 30 amps and certain low-voltage AC loads. Each style has a distinct "footprint", shown at right. A snap-on dust cover is available. Mallory relays are suited to a variety of applications including appliances, automotive, load management and heating, ventilating and air-conditioning.





Switch Arrangements - 1 Form A (SPST-NO), 1 Form B (SPST-NC), 1 Form C (SPDT)

SWITCH RATINGS

Voltage	Load Type	Form A NO	Form B NC	Form C	
				NO	NC

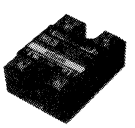
SOLID STATE RELAYS



SS SERIES:
SSA — SCR's back to back with A.C. control.
SSD — SCR's back to back with D.C. control.

ST SERIES:
STA — TRIAC with A.C. control.
STD — TRIAC with D.C. control.

SPECIFICATIONS

1. Current Rating: 8 to 90 Amps.
2. Minimum load current: 50 ma.
3. Temperature Range:
   a. Operating: −30°c to +80°c
   b. Storage: −28°c to +100°c
4. Duty: Continuous
5. Contacts: 1 Form A (SPNO)
6. Input control: A.C. Models
   a. Control voltage range: 90 − 280 VAC
   b. Must operate voltage: 90 VAC Max.
   c. Must release voltage: 10 VAC Min.
   d. Input impedance: 40,000 OHMS Min.
   e. Input current: 2mA max @ 120 VAC
7. Input control: D.C. Models
   a. Control voltage range: 3-32 VDC
   b. Must operate voltage: 3 VDC Max.
   c. Must release voltage: 1 VDC Min.
   d. Input Impedance: 1,500 OHMS Min.
   e. Input current: 4mA max @ 5 VDC
8. Standard: Zero voltage turn on.
9. UL listed and CSA certified.

CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

Coaxial Relay Module 7000 Series

7100 — Standard

7200 — Self-terminating

7300 — High isolation

7400 — Highest isolation

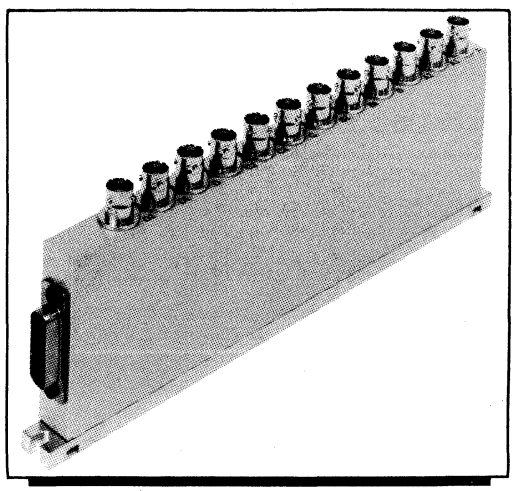
7500 — High power

7600 — Highest isolation self-terminating

7700 — Mercury wetted contacts

7800 — Twinax

7900 — Triax



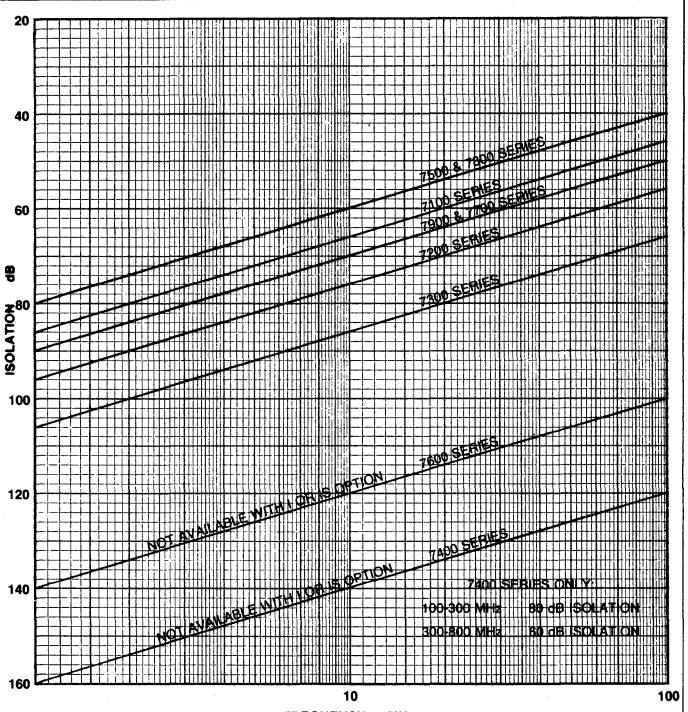
FEATURES:

- DC up to 800 MHz depending on number of throws
- Two to twenty-four throws
- Continuous shield continuity
- Rugged machined aluminum housing
- Crosstalk always lower than isolation
- Switchpoints individually field replaceable
- Extremely low EMI
- Low VSWR
- Matrix configuration easily assembled using 9000 series cross straps
- Signal circuits isolated from control circuitry

MATRIX 7000 Series Relay Modules are designed to maintain coaxial switching continuity over a wider range of critical and high environmental applications. The Relay housings are constructed of precision machined aluminum alloy for structural integrity and hard anodized for durability. All signal shield paths are silver plated with covers gasketed for maximum EMI protection. The basic reed switch elements are hermetically sealed in nitrogen filled gas envelopes and employ rhodium plated contacts to insure non-stick operation. Applications for MATRIX 7000 Series include:

— R.F. and I.F switching where a low VSWR is required.
— CCTV, base band video and pulse switching where low phase distortion and high pulse fidelity are required.
— Applications requiring a high degree of shielding integrity and low contact and induced noise such as pre amp input switching or the switching of high impedance operational amplifier inputs.

Matrix and hybrid switching systems are easily constructed by using Series 9000 (no output), 9100 (one output) or 9200 (two output) push-on cross straps which mate with the BNC connectors on the switch modules. The cross strap output connectors are BNC female type UG 1094/U. The model number of the cross strap is assigned by replacing the two zeros of the series number with the number of inputs desired. For example, a Model 9108 has eight inputs and one output.



MODEL NUMBER ASSIGNMENT

7 X XX — X

Series
Number of throws (N)
Options:
Coil suppression diodes with:
Coil common negative — D
Coil common positive — DR
TNC connectors — T
SMA connectors — S
Self-terminating — Ohms
Insulated shield — I
Insulated and
Switched shield — IS
Expander output — E
Chassis mount — C
Optional voltage — See Factory

SPECIFICATIONS

FREQUENCY RANGE:	(−1dB) 1310 ÷ (N −.13) MHz where N = Number of Throws
FREQUENCY RANGE:	(−3dB) 1760 ÷ (N +.2) MHz where N = Number of Throws
CHARACTERISTIC IMPEDANCE:	50 ohms - 75 ohm optional
SWITCHING CONFIGURATION:	Single or double pole, two thru twenty-four throws
SWITCHING SPEED:	One mS dry contact, three mS mercury wetted
ISOLATION:	See graph See factory for -I or -IS option
CONTROL - CONNECTOR:	28 VDC, 30 mA- D type-mate supplied
SIGNAL CONNECTOR:	BNC, Twinax, Triax, TNC, SMA or F type optional
OPERATING TEMPERATURE AND HUMIDITY RANGE:	−30°F to +150°F, 0 to 98 percent R.H.
OPERATING SHOCK AND VIBRATION:	50 G's - 1 mS, 2 G's p-p 20-2000 Hz
DIMENSIONS:	.625" W × 3.25" H × 1.44" + (.625" × number of throws)
MOUNTING:	Three 6-32 tapped holes in base or option - C

FEATURES	"The Dipper" Low level switching up to 2 amps. 16 pin dip. Sealed for PC board mounting & immersion.	Economical 3 & 5 amp switching. Designed for economy printed circuit board switching. Meets FCC Part 68 1500 VDC surge.	Economical & reliable designed for low cost PCB switching such as industrial, communications, vending or commercial equipment.	Compact & versatile 2&4 pole industrial relay. Low level switching. Available with many options.	Designed for UL Component Recognition for Motor Controllers through 240 VAC in accordance with UL Std 508, Industrial Control Equipment. Available in Octal Plug-in version.	Economical 2PDT, 10 amp rated relay, available with printed circuit terminals or 3/16", .187 quick connect terminals for plug-in socket capability or direct wiring with flange mounting option.

157	157	187	188	297	298	136
UL recognized for motor controllers up to 600 VAC. Magnetic latching version provides switchable core which cannot be falsely latched.	**MAGNETIC LATCHING SERIES** When there is a need to conserve power, retain logic function during power outages, or improve reliability by several order-of-magnitude over outdated mechanical latching relays, the Type 157 magnetic latching state-of-the-art relay is made to order for these applications. All of the superior electrical characteristics available in the standard Type 157 relays, including 1/4" through air and 3/8" over surface spacing, are offered in the magnetic latching version. Magnetic latching is achieved by a specially designed magnet core that makes it possible to maintain a substantial magnetic force of attraction after termination of the electrical pulse that energizes the core. There are no mechanical latches associated with the design, nor permanent magnets that can result in inadvertent operation. To restore the relay to its unoperated position, a short pulse of opposite polarity and lower magnitude than the operate pulse is applied to the coil or a second concentric wound coil. TIMING Latching time: 13 MS nominal with a one second pulse of nominal voltage. Unlatch time: 13 MS nominal with a one second pulse of nominal unlatch voltage after latching with a one second pulse of nominal latch voltage. A latch pulse of 50 MS min. at nominal voltage is recommended to insure positive latching. DESIGN & CONSTRUCTION Insulation material, weight, marking, shock, vibration, dielectric breakdown, insulation resistance and temperature range are identical to the Type 157 relay. UL/CSA	DPDT power relay is rated at 20 amps; DPST-NO and NC contact arrangements are rated at 25 amps. Open stud mounted or dust covered versions with 1/4" quick-connect terminals are available.	30 Ampere relay is an expanded version of the Type 187 20 amp 2PDT relay, utilizing a common coil/mates structure. The 188 is limited to single-pole switching, in order to provide for the 30 amp contact ratings.	A DPST-NO 15 amp economy power relay. Available in PC circuit & quick connect combination version. Recognized under UL #508.	A SPST-NO 15 or 25 amp economy power relay. PC and Quick Connect terminal combination. Recognized under UL #508.	A small power relay that will switch 20 amps for industrial use in multipole configuration and 30 amps in multipole configuration at 120 VAC or 240 VAC for appliance use under UL #508.

TIME DELAY RELAYS

611 SERIES

An amplifier driven relay that allows an input signal as low as 12 microwatts to control a DPDT 10 amp output. This low control sensitivity permits direct interfacing with most types of logic.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
Sensitivity—12 microwatts, 60 microwatts
Operating time (nom voltage & temp.) 15 ms.
Release time (nom. voltage & temp.) 30 ms.
Max. input voltage or current—30 VDC or 1 ma.
Max. negative blocking voltage 50 VDC
Voltage—12, 24, 48 VDC (+10%)
Power—1.2 watts
Polarity protection—YES
Duty—Continuous
Switching action 2PDT
Switching rating
-Fine silver contacts (gold flash) 5 amp, 28 VDC, 120/240VAC 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC, 120/240 VAC 1/3 hp, 120 VAC 1/2 hp, 240 VAC
TEMPERATURE RANGE
-10°C to +55°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)

612 SERIES

Delay-on-release timer which utilizes an R-C solid state trigger circuit to drive a secondary solid state switch, which in turn controls the integral 10 amp output relay.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
Repeatability ±3%
Total timing variation ±10%
Operate time (max.) 100ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits—
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 1.5 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contact (Gold flash) 5 amp, 28 VDC/120,240VAC; 80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC/120,240 VAC; 80% pf, 1/3 hp, 120 VAC 1/2 hp, 240 VAC
Delay types Delay-on-release
Momentary transfer upon timing cycle interruption.....NO
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust

613 SERIES

Economy version **Delay-on-operate** timer, which utilizes a simple R-C solid state trigger circuit, which in turn controls the integral 10 amp output relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset (release) time (max.) 200ms
Recycle time (max.) 200ms
Dial scale Ref. only
Input voltage limits
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 3.0 VA
DC (approx.) 1.5 watts
Switching action 2PDT
Switching rating (max.)
-Fine silver contact (gold flash) 5 amp, 28 VDC/120/VAC, 3 amp, 240 VAC .80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC, 120 VAC, 1/3 hp 120 VAC, 6 amp, 240 VAC .80% pf 1/2 hp, 240 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption.....YES
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust

614 SERIES

Identical to the 612 series, except it functions as a **delay-on-operate.** Available with "fixed", "external resistor" adjust time setting, or "knob adjust", through an overall range of 1 to 300 seconds delay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset (release) time (max.) 50ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 3.0 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contacts (Gold flash) 5 amp, 28 VDC/120 VAC, 3 amp, 240 VAC .80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide (Gold flash) 10 amp, 28 VDC/120 VAC, 1/3 hp, 120 VAC, 6 amp, 240 VAC .80% pf 1/2 hp, 240 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption.....NO
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust

618 SERIES

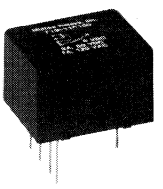
An electronic time delay module that provides a 0.5 or 2 amp SCR output to drive relays, solenoids or lamps. Units are fully encapsulated and are versatile and economic, especially when used in conjunction with power relays in the 30 amp rating category.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset time (max.) 75ms
Recycle time (max.) 25ms
Input voltage limits
+25%. DC must be filtered, max. ripple 5% at nominal voltage
Switching action SPST Solid State Output, 1.5 V voltage drop max. when on
Switching rating (max.)
-Type 1-0.5 amp at +55°C
-Type 2-2.0 amp at +25°C
1.25 amp at +55°C
TEMPERATURE RANGE
-40°C to +55°C

619 SERIES

IMPULSE RELAY
An electronically controlled single input latching relay. Repetitive input pulses cause the relay to latch and unlatch alternately up to 1,200 total pulses per minute.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient
Pulse width 25 ms. min.
Pulse repetition rate 1200 pulses per minute max.
Duty Continuous
Input voltage 12, 24, 48, 110 VDC (±25%)
Power requirements 1.8 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contacts (Gold flash) 5 amp, 28 VDC, 120/240 VAC 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC, 120/240 VAC 1/3 hp, 120 VAC 1/2 hp, 240 VAC
TEMPERATURE RANGE
-10°C to +55°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)



719 SERIES

IMPULSE RELAY
Miniature PC style impulse relay that will alternately change states when pulsed at a common input, without changing polarity.

ELECTRICAL/MECHANICAL CHARACTERISTICS (25°C)
LIFE EXPECTANCY:
Mechanical—100 million operations min.
Electrical—100,000 operations min. at rated load
CONTROL VOLTAGES:
5 to 48 VDC standard
Set & Reset time 3ms typical
DIELECTRIC
1500 VAC input to contacts
1000 VAC across open contacts
TEMPERATURE
-40°C to +70°C
CONTACTS
-Silver/Gold bifurcated Rating
2.0 amp 30 VDC resistive
0.6 amp 110 VDC resistive
1.0 amp 125 VAC resistive

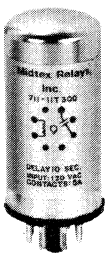
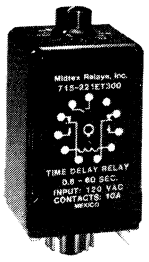
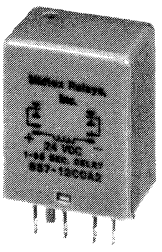
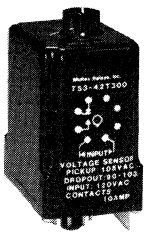
1-800-MIDTEX1 TIME DELAY RELAYS

LINE MONITORING DEVICES/CURRENT VOLTAGE • PHASE









711 SERIES

Superior replacement for plug-in thermal timers. The 711 series offers 5 amp SPST-NO or NC, and SPDT snap action switching, metal enclosure is standard, (encapsulated units available), long life, and solid state type timing performance.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
CONTACTS:
5 amps 120 VAC resistive
5 amps 30 VDC resistive
4 amps 240 VAC resistive
POWER REQUIREMENTS
0.75 watts typ.
TEMPERATURE:
Storage -40°C to +85°C
Operating -25°C to +65°C
(extended ranges available)
DIELECTRIC
1000 VAC min., 750 VAC across open contacts
TIMING
Accuracy: ±10%
Repeatability: ±3%
Reset & Recycle time: 50 ms typical, 100 ms max.
SHOCK 50 g's
(non-operating)
VIBRATION:
10 g's, 10-55 Hz min., without false contact action

715 SERIES

Multi-function time delay relay industry standard 8 and 11 pin octal, side terminal strip for flush mounting, and the 11 pin square base to fit the Midtex Type 157 relay sockets. UL/CSA approval.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±2%
Total timing variation ±10%
Reset time—25 ms typical, 50 ms max. (release of delay-on-operate)
Recycle time—50 ms typical.
100 ms. max. (minimum off time between timing intervals)
Input voltage limits
AC ±10%
DC ±25%
Power requirements
AC 2.5VA
DC 1.5watt
Switching action 2PDT
Switching rating (max.)
-Silver Cadmium Oxide
10 amp, 28 VDC/120 VAC; 1/3 hp, 120/240 VAC
Delay types
Delay-on-operate, Delay-on-release, Cycle, Interval and Interval-momentary start timing.
Momentary transfer upon timing cycle interruption: NO
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave
(non-operating test)
VIBRATION
0.06" DA or 10 g's, 10-55 Hz
(non-operating test)

655 SERIES

Delay-on-operate timers which use solid state timing circuits to control an integral relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset time 50 ms
Recycle time (max.) 100 ms
Input voltage limits
AC ±10%
DC ±25%
Power requirements
AC (approx.) 3VA at 120 VAC
DC (approx.) 1.2 watts
Switching action 1,2,4PDT
Switching rating
5 amp, 28 VDC, 120 VAC
10 amp, 28 VDC, 120 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption .NO
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave
VIBRATION
10 g's; 10 to 55 Hz
TERMINALS-
Solder, PC, Plug-In.

657 SERIES

Delay-on-operate timer which uses solid state timing circuits to control an integral relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±5%
Total timing variation ±10%
Reset time (max.) 100 ms
Recycle time (max.) 100 ms
Input voltage limits
DC ±25
Power requirements
DC (approx.) 0.7 watt
Switching action 2PDT
Switching rating
2 amp, 28 VDC, 120 VAC
Momentary transfer upon timing cycle interruption .NO
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
12 g's, 11 ±1 ms, 1/2 sinewave
VIBRATION
8 g's; 10 to 55 Hz
MAX SIZE IN INCHES
(L × W × H)
1.190 × .859 × 1.281
TERMINALS
Solder, PC, Plug-In

658 SERIES

Extremely accurate long range **delay-on-operate** with timing tolerance and timing variation of plus or minus 2%. Available in either a variable time range or fixed (factory preset) time range.

ELECTRICAL/MECHANICAL CHARACTERISTICS
Timing tolerance ±2%
Repeatability ±.1%
Total timing variation ±2%
Reset time (max.) 50 ms
Recycle time (max.) 150 ms
Timing ranges
*1-102.3 sec.
*1-409.5 sec.
*1-1023 sec.
*1-4095 sec.
*Factory preset
Power requirements (max.) 3VA
Operating temperature -10°C to +55°C
Switching action 2PDT
Delay function
Delay-on-operate
Contact rating
10 amp at 28 VDC, 120 VAC, 80% pf; 7 amp at 240 VAC 80% pf; 1/3 hp at 120/240 VAC
Contacts
5/32" Silver Cadmium Oxide
Expected life at rated load (min.) 100,000 operations
SHOCK
15 g's, 11 ±1ms, 1/2 sinewave (non-operating test, no mechanical damage)
VIBRATION
0.06" DA or 10 g's 10-55 Hz
(non-operating test)

753 SERIES

753 series voltage sensor is designed for use in monitoring voltage fluctuations. It is designed to energize and de-energize at predetermined voltage levels that may be fixed or set with adjusting knobs. Packages are available for either direct plug-in or terminal strip connection.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±1% max.
Response time 15 ms typical 25 ms maximum
Duty cycle is continuous, maximum input limit of 125% of nominal input voltage.
Switching action SPDT
Switching rating
—100 silver/gold flash
3 amps at 24 VDC or 125 VAC resistive;
1 amp at 24 VDC or 125 VAC inductive;
1.5 amps at 250 VAC resistive;
0.5 amps at 250 VAC inductive
—200 Silver Cadmium Oxide
5 amps at 24 VDC or 125 VAC resistive
2 amps at 24 VDC or 125 VAC inductive
2.5 amps at 250 VAC resistive
1 amp at 250 VAC inductive
—300 Silver Cadmium Oxide
10 amps at 24 VDC or 125 VAC resistive
4 amps at 24 VDC or 125 VAC inductive
5 amps at 250 VAC resistive
2 amps at 250 VAC inductive
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave
(non-operating test)
VIBRATION
0.06" DA or 10 g's, 10-55 Hz
(non-operating test)

754 SERIES

3-Phase sequence sensor is designed to detect loss of power on one leg or reverse phase sequence in conventional 3-phase, 4 wire, wye connected or 3-wire Delta connected 60 Hz circuits. The delay will remain energized with power applied unless a loss or reverse is detected. The 654 is ideal for the protection of expensive motors and 3-phase equipment from failure due to phase problems.

FEATURES
—Reliability of solid state sensing
—Power output switching to 10 amps
—Form DPDT contact output
—Flexibility for variety of applications
—Available with plug-in or direct wire termination
—4-wire wye or 3-wire Delta connection
—Responds to line failure in 30MS typical
CONTACTS
—5/32" Silver Cadmium Oxide 10 amp, 28 VDC/120 VAC, 80% pf
LIFE EXPECTANCY
Mechanical—in excess of 50 million operations
Electrical—100,000 operations minimum at rated loads
DIELECTRIC BREAKDOWN
Greater than 500 VAC RMS 60 Hz across open contacts;
Greater than 1500 VAC RMS 60 Hz all other mutually insulated elements
TEMPERATURE RANGE
-10°C to +55°C
DUTY CYCLE
Continuous
RESPONSE TIME
15 MS operate, 30 MS release typical
OPERATE POWER
2 watts max.

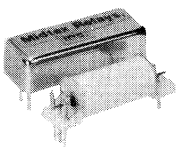
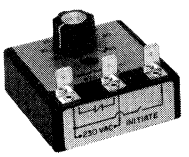
REED RELAYS



The Midtex dry reed relay series offers hermetically sealed, non-position sensitive switching in a small size with rapid response and low actuate power requirements. Available contact forms include A, B, C and D with dry reeds and forms A and B with mercury wetted. Contact arrangements include 1 to 5 Form A, 1 to 4 Form C, and 1 to 3 Form B, or any combination within the 5 pole bobbin. Consult the factory for additional details.

CUSTOM CONTROL PRODUCTS & BOARD ASSEMBLIES



Midtex Relays, Inc. designs and manufactures custom control modules and board assemblies to specific customer applications. A few common applications are listed below:

- True Form D Relay
- 20–25 amp 3/4 hp time delay relay
- 12–96 Hour Timer
- Sequencing Module For Stagger Motor Start Up
- Impulse Relay That Transfers When Voltage Is Removed
- True Off Delay Timers
- Complete Control Systems (Board level, encapsulated & Cabinet)
- Wire Wrapped Relay Control Assemblies
- Interface Modules

Most designs are generated from customers requesting a "Black Box" to solve a system problem, improved performance, lower costs etc. Please call us on our Engineering Hot Line (1-800-MIDTEX1) to discuss your application directly with Midtex Engineering.

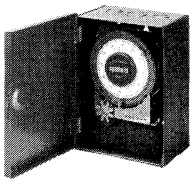
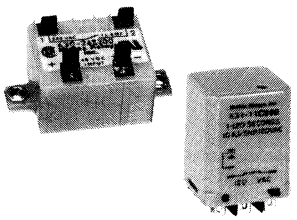
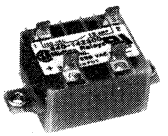
CYCLEMASTER 24-HOUR TIMER



SOLID STATE RELAYS





620 SERIES

Program Time Switch—up to 48 ON-OFF operations per day with timing intervals as low as fifteen minutes. 14-day wheel, with Sunday and Holiday Skipper, provides programming for two full weeks. Eliminates operations on unwanted days.

SWITCHING ACTION
SPDT (usable three ways: SPST open; SPST closed; SP transfer)
LOAD CAPACITY
20 amps at 125, 250, or 480 VAC (1 hp at 125 VAC; 2 hp at 250 VAC) (10 amps at 125 VAC inductive)
TERMINALS
Screw terminals conveniently located
METHOD OF PROGRAMMING
Trip pin (12 supplied)
TEMPERATURE RANGE
−40 F to +140 F
Dimensions
With enclosure 8.188″ H × 6.375″ W × 4.125″ D; without enclosure 6-5/8″ H × 4-1/2″ W × 2-13/16″ D

TIMING APPLICATIONS

- Lawn sprinkling
- Greenhouse misting
- Irrigation
- Program music
- Chime system
- Oil well pumping
- Programmed heating
- Air conditioning
- Traffic systems
- Industrial processing
- Power plant exercising
- Industrial lubrication systems
- Stoker hold-fire
- Battery charging
- Paint and enamel baking
- Laboratory testing
- Oven purging
- Automatic livestock and poultry feeding systems
- Conveyors, material handling systems
- Ventilating fans
- Elevators and stairways
- Pumps and motors
- Water softening control
- Bulk, milk cooler agitation
- Laundry equipment
- Heat treating
- Plastic molding
- Bakery machinery

630/631 SERIES

Solid State Hybrid Industrial Relay Applications are I/O interface, and switching difficult loads such as: solenoids, AC motors, lamps and other heavy industrial loads within device ratings.

Ratings are for both models, unless otherwise specified.
Current
Type 630 4, 7, 10 and 15 amps inductive or resistive.
Type 631 5 amps inductive or resistive.
Voltage drop
1.6 typical at rated current
Leakage current
6 MA max., 120 VAC/12 MA max., 240 VAC
Minimum load current
200 MA, RMS
Life
500 million operations
Contact type
1 Form A
Dielectric
1500 VAC, 60 Hz minimum between all mutually insulated terminals and mounting plate

634 SERIES

Hybrid Non Zero-Crossing Turn On PCB Relay Unit occupies less than one sq. inch of board space. This makes it ideal for applications where board space is at a premium.

Internal transient protection
Available with a snubber network to properly communicate inductive loads.
Excellent I/O isolation
Reed relay input provides input to output isolation in excess of 1500 VAC, 60 Hz dielectric breakdown.
Rapid response time
Relay will turn on in one millisecond. Turn-off occurs at the first zero amplitude current point after input power removal.
Dielectric
1500 VAC, 60 Hz minimum between input/output
Life
500 million operations
Contact type
1 Form A
Options
Input coil suppression diode; Thyristor to prevent false turn-on when transients on the line exceed the forward blocking voltage;
AC input version using an internal bridge and filter capacitor.
UL Approved

640 SERIES

Solid-State Zero-Crossing Industrial Relay Ideally suited for frame or panel mounting, and is assembled in a sturdy, compact package that is sealed against environmental conditions. The design will withstand severe shock and vibration. Applications are I/O interface and switching difficult loads such as: solenoids, AC motors, lamps and other heavy industrial loads within device ratings.

Excellent isolation
The LED input-Triac output circuitry in this pure solid-state device exhibits in excess of 1,000 VAC, 60 Hz dielectric breakdown isolation between input and output terminals.
Rapid response time
Basic circuit used will turn on at the first zero amplitude voltage point after power input (within plus or minus 15 volts).
Turn-off occurs at the first zero amplitude current point after input removal.
Dielectric breakdown
1,000 VAC, 60 Hz minimum between all mutually insulated terminals and mounting plate.
Life
Indefinite
Contact type
1 Form A
Options
Thyristor to prevent false turn-on when transients on the line exceed the forward blocking voltage;
AC input version using an internal bridge and filter capacitor.
UL/CSA approvals.

						0.45″H x 0.61″L x 0.43″W	G2Q-R 0.31″H x 0.51″ L x 0.39″ W G2Q-V 0.39″H x 0.47″L x 0.29″W (not shown)	0.43″H x 0.80″L x 0.40″W	0.31″H x 0.63″L x 0.39″W	0.35″H x 0.81″L x 0.45″W
Features	Small, low-cost relay for signal control and interface applications. High-sensitivity and high dielectric types available. Flux-tight or plastic sealed.	Subminiature relay for interface applications. Choose low-profile or slim-line versions. High-sensitivity type available. Flux-tight or plastic sealed.	Miniature relay for signal circuit and interface applications can be driven by an IC circuit. High sensitivity type available. Flux-tight or plastic sealed.	Subminiature relay with the same footprint as the G6G surface mount relay. Ideal for office automation and test and measurement. Flux-tight or plastic sealed.	Ultra-small RF relay with outstanding typical values for VSWR (1.8 max.), insertion loss (0.5 dB max.) and isolation (60 dB min.) at 900 MHz. Plastic sealed.

Features	Plastic sealed relay with high impulse withstand voltage, ideal for communication equipment. Latching type available. Plastic sealed.	Subminiature low signal switching relay has high sensitivity. Packed in a magazine for automatic insertion and soldering. Latching type available. Plastic sealed.	Surface mount relay maintains stable operating characteristics after being subjected to high heat mass soldering methods (i.e. vapor phase, IR and dual wave). Low profile and small size increase PC board capacity. Sealed construction of high-temperature resistant resins and sealing agents.	Compact, extremely low profile relay ideal for high-density mounting. Bifurcated contacts capable of switching 1A with very little power consumption. Plastic sealed construction.

Features	Power relay has double-break contact arrangement. Class B insulation available.	Compact, general-purpose relay suitable for a wide range of applications up to 15 A. LED indicator, push-to-test button versions.	Exceptionally reliable power relay plugs into convenient octal pin sockets. Mechanical indicator and test button types available.	Versatile relay, ideal for power and sequence control applications, meets many application needs. Latching and hermetically sealed versions available.

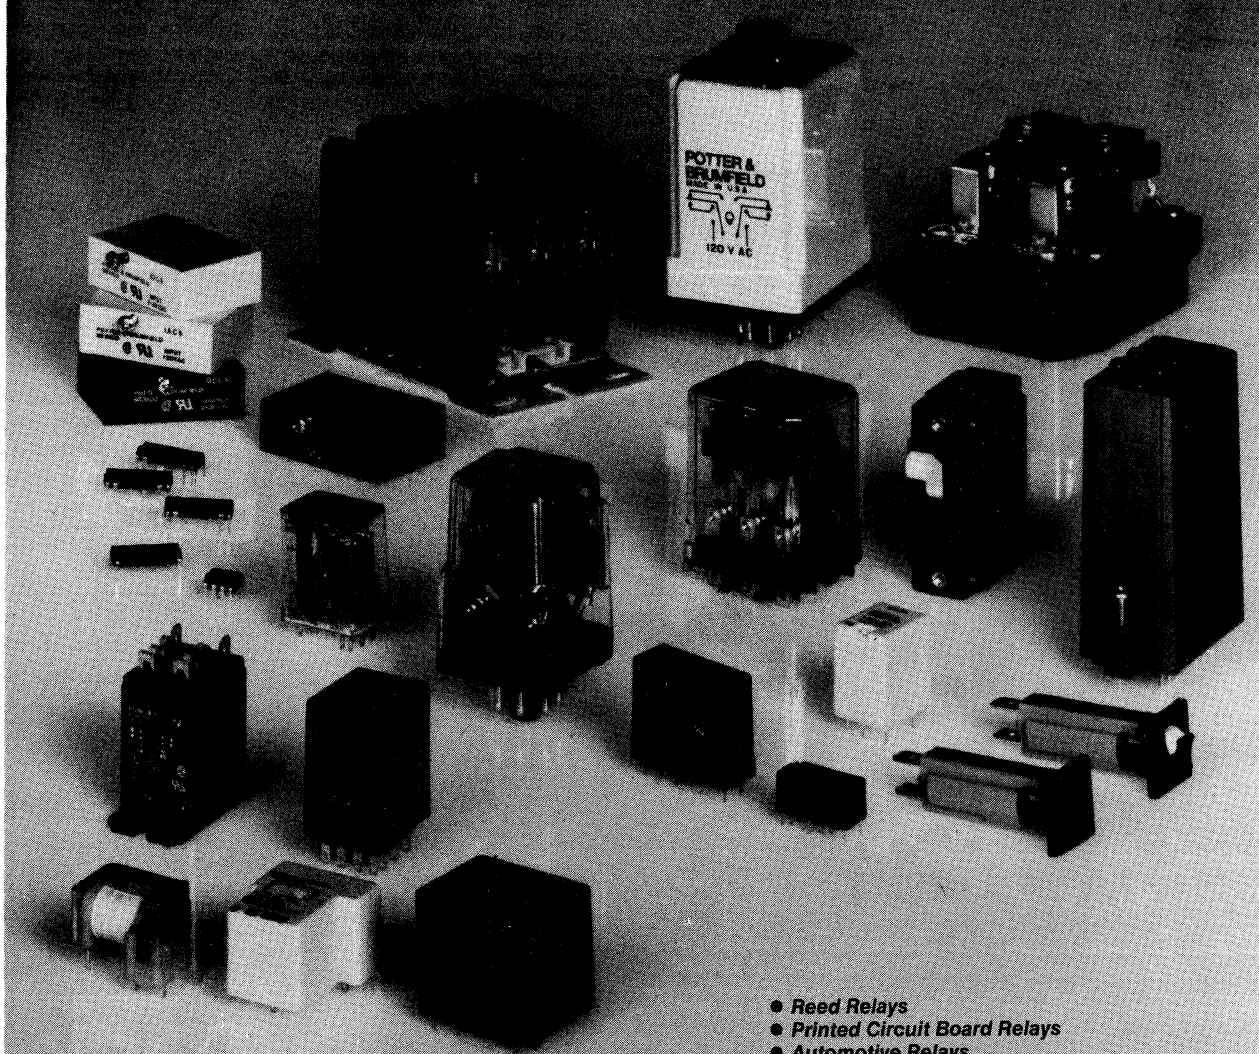
Relays, Contactors and I/O Modules



The following pages provide an overview of stock items in Potter & Brumfield's extensive product line. For more information on any P&B product, contact your nearest authorized P&B distributor or sales representative. Call toll free **800/255-2550** *for the name of one near you. Note: Specifications and/or agency recognitions do not necessarily apply to all models within a particular series. When multiple ratings are listed, no individual rating may be exceeded by the combination of others.*

- *Reed Relays*
- *Printed Circuit Board Relays*
- *Automotive Relays*
- *Sensitive Relay*
- *General Purpose Socket/Panel Mount Relays*
- *Impulse and Latching Relays*
- *Power Relays*
- *Contactors*
- *High Reliability Relays*
- *Time Delay Relays*
- *Solid State Relays*
- *Solid State Input/Output Modules*

Call toll-free 800-255-2550 for the name and telephone number of your nearby P&B sales representative or authorized stocking distributor.

Reed Relays

NEED MORE INFORMATION REGARDING POTTER & BRUMFIELD PRODUCTS?

If you would like more information about any of the Potter & Brumfield products shown on the following pages, ask your authorized P&B distributor or sales representative for a free copy of our 132-page General Stock Catalog.

	JWD-JWS	JHV
Series	**JWD-JWS**	**JHV**
Features	• Low profile reed relay • DIP and SIP terminations • Immersion cleanable • Optional transient suppression diode	• High voltage dry reed relay • High dielectric strength
Approx. Dimensions Inch (mm)	.77 x .30 x .28h (19.6 x 7.6 x 7.0h)	4.5 x .88 x .75h (114 x 22.3 x 19.1h)
Contact Arrangement	1 Form A, 1 Form C 1 Form B, 2 Form A	1 Form A, 1 Form B
Contact Material	Rh	—
Contact Rating	(1A) 10W, 0.5A 200 VDC (1B)10W, 0.5A 100 VDC (1C)5W, 0.5A 100VDC (2A)10W, 0.5A 100 VDC	50W or 50VA, 3A, 5,000 VDC 50W or 50VA, 1A, 10,000 VDC
Minimum Mechanical Life (Operations)	$>10^9$	$>10^9$
Minimum Electrical Life at Rated Load (Operations)	10^6	10^6
Coil Voltage	5-24 VDC	6-24 VDC
Nominal Coil Power	50-480mW	200-1,500mW
Mounting	PC board Socket	Panel mount
Sockets	Fits 14-pin IC socket	Solder terminals

Power Relays

					Series	**K20**	**KUMP**	**KRP-3-H**	**S86R-S89R**	**KUHP**
Features	• Identical to K10 except contacts rated to switch 20A • Plain and bracket mount dust covers • Optional flange-top case for panel mounting • AC and DC coils • Sockets available	• KUP package with 15A contact rating • Plain or bracket mount dust cover • Optional flange-top case for panel mounting • Several socket types • ᵁᴸ ᶜˢᴬ	• 20A switching capacity • Enclosed with octal-type plug • Heavy duty construction • Small space requirement • Optional open version • ᵁᴸ	• Economical • 20A switching capacity in compact package • Optional sensitive DC coil • Two mounting styles • ᵁᴸ ᶜˢᴬ	• 20A and 30A switching in bracket mount KUP package • 3,750 VRMS coil-to-contacts breakdown • Meets VDE and BSI requirements • Optional flange-top case for panel mounting • ᵁᴸ ᶜˢᴬ

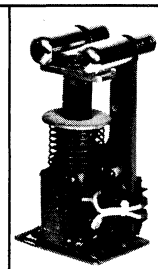
HV SPHERICAL RELAYS

Extra high voltage low corona, Polarity reversing, transfer or grounding relays of the air insulated type. Ratings 70 to 600 KV peak at 100 Amps continuous. Solenoid, motor or air cylinder operated and spring or gravity return. Available in SPST, SPDT, 2PDT.

HIGH CURRENT SWITCHES

Models are available up to 20,000 amps continuous, and over 500,000 amps pluse, with voltage ratings of 6 volts to 300 KV peak test. Many are air cylinder or motor operated for high contact force.



HV RELAYS

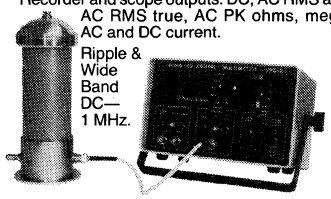
HV relays of the air insulated type both for low and high current. This series has ratings from 1 to 200 amps continuous, 100 to 100,000 amps momentary and capacitor discharge. Peak test voltages from 5 to 300 KV. Single or Multipole. NO, NC, and DT. Auxiliary contacts optional on all types. Extended life and tungsten contacts also available for high current closing. Also usable in oil or insulating gas.

HV ROTARY SWITCHES

Ratings from 5 to 150KV, 1 to 200 amps. Either manual or electrical operators, depending upon requirements. Position detents and interlocks to prevent opening under load.

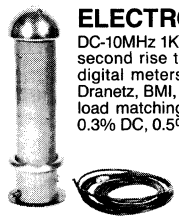
HV DIGITAL MULTIMETERS

Easy to read, 4½-digit display; 0.05% basic accuracy. 0.0001 volt to 900 KV. Battery/AC with charger. Recorder and scope outputs. DC, AC RMS average, AC RMS true, AC PK ohms, megohms, AC and DC current.



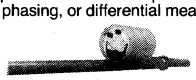
H.V. WIDEBAND VOLTAGE DIVIDERS FOR POWER AND ELECTRONIC USES

DC-10MHz 1KV-900KV PK to 20 nanosecond rise time, for oscilloscopes, digital meters or recorders such as Dranetz, BMI, Le Croy, etc. Ratios and load matching as required 0.01% to 0.3% DC, 0.5% to 3% wide band.



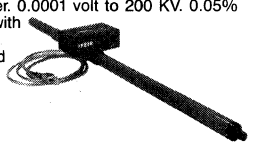
POWER CLASS HV VOLTMETERS SAFE POWER LINE USE AC/DC FOR UTILITIES, CONTRACTORS & EMERGENCY SERVICES

Fully safe portable, all solid state, 2% to 5% accuracy. Taut band shielded high voltage measurement with minimum circuit loading. 0.0001 V to 50 KV AC and DC. Ideal for use with Elbow capacitance tap voltage test points. For cable test point or direct line voltage and phasing, or differential measurement.



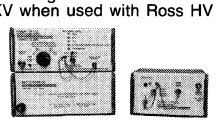
HV DIGITAL PROBES

HV DC, AC & Wideband DC-1 MHz Safety Probes for any scope or digital display or VTVM. Also available complete with large 4½-digit display 0.1% to 5% AC/DC Accuracy, safety handle digital voltmeter. Battery/AC with charger. Removable Digital Display or Multimeter. 0.0001 volt to 200 KV. 0.05% accuracy basic, with DCV, ACV, ohms, megohms, AC and DC current, PK hold.



WIDE BAND FIBER OPTIC TRANSMISSION, ANALOG DC-10 MHz SYSTEMS

AC or rechargeable battery/AC operated. DC-10MHz. System has a maximum output of 10V PK (20V PK to PK) and selectable input of 0.1V to 1,000V PK direct from signal source. Useful from 0.01V to over 900KV when used with Ross HV wideband dividers.

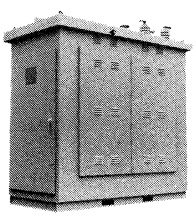


SINGLE POLE HIGH SPEED VACUUM CONTACTORS & ENERGY STORAGE DRIVERS

One Millisecond Contact Opening

For high speed or loss of power automatic circuit breaker trip and for high speed activation of contactor or circuit breaker solenoids. Energy storage up to 400 joules or more at 150 to 700 volts or more, 100 to 4,000 microfarad or more. Instantaneous SCR control available.

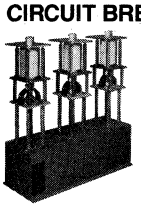
HIGH POWER



HIGH SPEED HIGH VOLTAGE CONTROL AND STEP-START SYSTEMS

½ to 1 cycle sensing and interrupt vacuum circuit breakers. Metal enclosed for indoor or outdoor applications. 5KV-38KV. 50-1200 Amps.

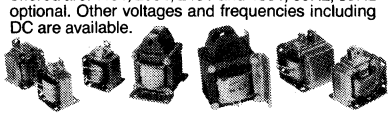
3 PHASE POWER CLASS VACUUM CONTACTORS & 1 CYCLE CIRCUIT BREAKERS



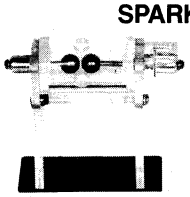
Vacuum switches, single phase, three phase, upright or low profile, for high reliability sealed arc interrupting or crobar shorting. 208V to 200 KV RMS operate. 50 to 4,000 amps continuous, 2,000 to 35,000 amps AC, 10 to 20,000 amps DC interrupt, 5,000 to 100,000 amps momentary and capacitor discharge.

QUIET AC PRECISION SOLENOIDS

To 36 lbs. continuous hold and to 126 lbs. intermittent. Class H coils with 180°C insulation. 1" stroke, or, with special stainless steel guides, extendable to several inches. Corrosion resistant. Coil voltages offered are: 115V, 208V, 240V and 480V, 60Hz, 50Hz optional. Other voltages and frequencies including DC are available.

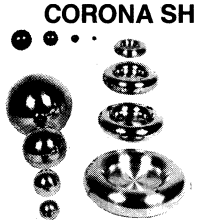


HV ADJUSTABLE SPARK GAPS



Non-melting carbon spheres, 1 cm to 10 cm and heavy wall aluminum spheres, 10 cm and above. Dust tight transparent covers used 1 KV to 88 KV. Open style to 670 KV. Direct reading micrometer type calibrating device.

TOROIDS, SPHERES, CORONA SHIELDS, NUTS



Geometrically designed to avoid excessive voltage gradients at connecting points and other areas needing shielding or balancing of electrostatic fields to increase withstand voltage and minimize corona. Diameters are to international standard metric sizes.

SCHRACK

SCHRACK RELAYS ARE READILY AVAILABLE FROM STOCK THROUGHOUT THE U.S. AND OFFER MANY UNIQUE ADVANTAGES!

Schrack Relays are available off-the-shelf from our U.S. headquarters in New York, as well as through stocking distributors nationwide. Engineering and application assistance is also available locally if needed.

But equally important, when you select a Schrack Relay, you get advantages not found in conventional models. For example, the visual indicator is purely mechanical and does not incorporate any live components that can burn out or fail. It always shows the "real" state (open or closed) of the relay, which may not be the case with a lamp or LED. A lamp or LED only indicates that there is potential at the coil; in fact, the coil may be open or the contacts welded, and a lamp or LED may still light, causing erroneous indication. The visual on/off indicator locates such faults immediately without having to check individual relays and without having to apply an external voltage to the relay coils. A built-in orange flag moves with the relay armature and is seen through a window in the frosted top face of the dust cover. One glance is sufficient to tell you if the relay is working as well as the position of the contacts.

For more information, call or write us:
We'll try to help, and also give you the name of your nearest Schrack distributor.

Schrack Relays are recognized and/or certified by testing laboratories around the world.

SHARP® Optoelectronics

Solid State Relays

Sharp has a wide product line-up, such as multi-channel types suited for high density mounting, DIP type, SIP type, and TO-220 package type as solid state relays for medium power control of on-state current ranging from 0.6 to 16A.

Model No.	Internal connection diagram	Features	Zero cross circuit	Package	Approved by overseas safety standard		Absolute maximum ratings			Electrical characteristics

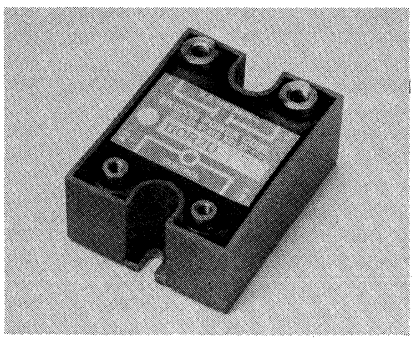
SILICON POWER CUBE

SOLID STATE AC POWER RELAYS

UL Recognized/CSA Certified



FEATURES:

- SPC's Inverse-Parallel SCR Power Hybrid Technology provides highly efficient thermal management for greatly increased cyclic life.
- High performance/low cost circuit design.
- Logic compatible inputs.
- "Zero voltage", phase controllable "random switching", and peak switching versions.
- High voltage (1200 Vpk) versions for 480 V_{RMS} service.
- Industry standard "hockey puck" package.
- 4000 V_{RMS} optical isolation.

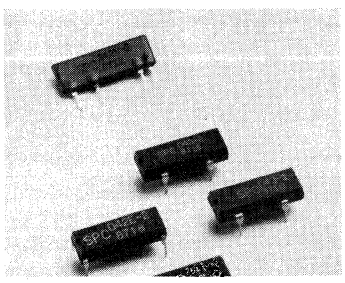
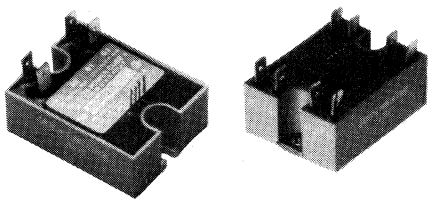
BOARD LEVEL SOLID STATE RELAYS

TO-116 DIP and 4-pin SIP packages employing thick film hybrid circuitry. Includes AC and DC switching versions from signal level to 1 amp output, with switching speeds as low as 1 μsec.

Three industry standard encapsulated PCB mount packages with AC output current ratings of 2.5 to 4 amps. Featuring 4000 Vrms optical isolation, logic compatible 3-32 Vdc input range, and either zero crossing or random phase controllable turn-on.



BOARD LEVEL RELAYS



SPECIAL PURPOSE RELAYS

Part Number	Input Specifications Voltage (VDC)	Input Specifications Current (mA at 5V)	Output/Load Ratings (max.) Current	Voltage	AC/DC

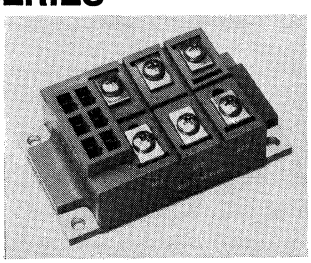
* Add "H" suffix to P/N for 600V pk output voltage rating
** Guaranteed turn-on at 5mA dc. No internal current limiting or regulation.

100-250 AMP POWER SCR/DIODE MODULES—M80 SERIES

FEATURES:

- Seven Standard Circuit Configurations Available.
- High Terminal to Base Isolation of 2500V RMS.
- SCR Output Ratings of up to 180 Amps.
- Rectifier Output Ratings of up to 250 Amps.
- UL Recognized (File No. E 72446)

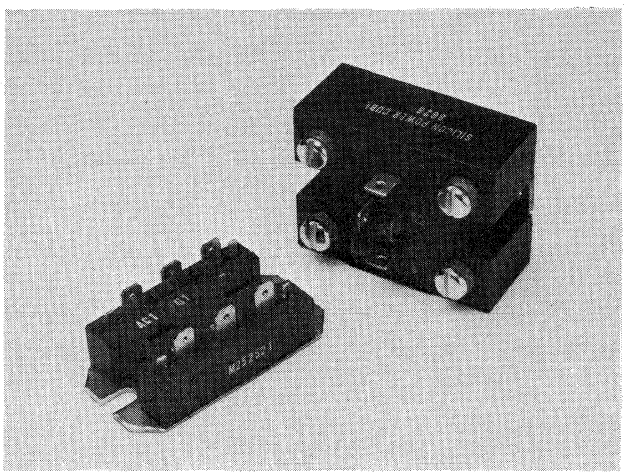


SILICON POWER CUBE CORP.

6015 OBISPO AVE. / LONG BEACH, CA 90805 / TEL: 213-634-9390 / FAX: 213-630-5338

SILICON POWER CUBE

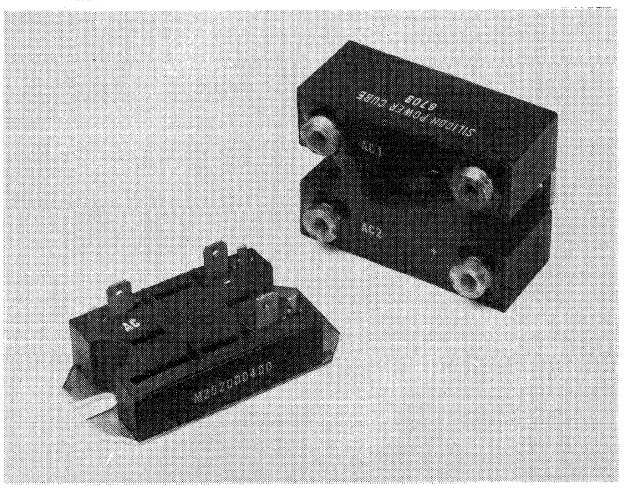
25-100 AMP POWER SCR/DIODE MODULES M25/M50 SERIES



FEATURES

- Eight Standard Circuit Configurations Available.
- Ultra-High Surge Current Capabilities Assures Long Lifetime and Reliable Performance.
- 2500VAC RMS Terminal-to-Base Iisolation.
- Proprietary SPC Unitized Power Circuit Structures Result in Very Efficient Thermal Management for Greatly Extended Cyclic Life.
- UL Component Recognition (File No. E72445).
- Available in standard 120VAC, 240VAC, 320VAC, 440VAC, and 480VAC Ratings (Higher voltages are available. Consult Factory.)

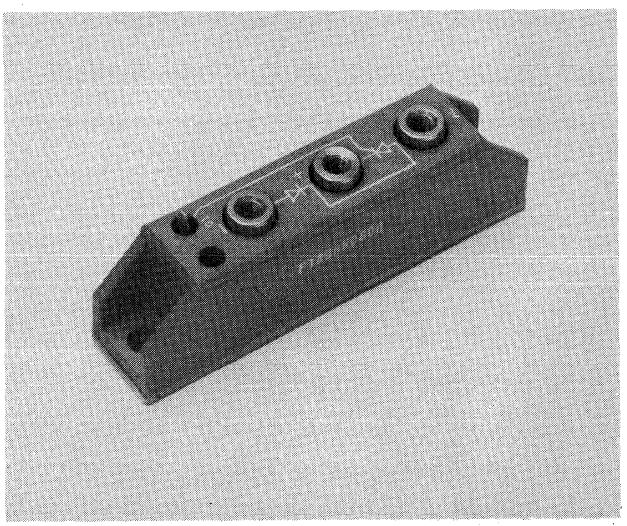
35-100 AMP POWER DIODE MODULES M25/M50 SERIES



FEATURES

- Seven Standard Diode Circuits are Available—Single-Phase Bridge; 3-Phase Bridge; Diode Doubler; Center Tap Common Cathode; Center Tap Common Anode; 3-Phase Common Cathode Half Wave Bridge and 3-Phase Common Anode Half Wave Bridge.
- SPC's Unique Unitized Power Rectifier Structures Provide Highly Efficient Thermal Management for Vastly Expanded Cyclic Lifetime.
- High Terminal-to-Base Isolation of 2500VAC RMS
- UL Component Recognition (File No. E72445).

25-90 AMP POWER SCR/DIODE MODULES F18 SERIES



FEATURES

- Thirteen Standard Module Configurations Available.
- Standard Voltages of 200 Volts to 1400 Volts. Average Device Current Output Ratings of 25 Amps to 90 Amps.
- Ultra-High Surge Current Capabilities.
- SPC's Rugged Unitized Power Circuit Structures Afford Optimally Efficient Thermal Management to Assure Extended Cyclic Life and Reliability.
- UL Component Recognition (File No. E72445).
- 2500VAC RMS Terminal-to-Base Isolation.
- All Units Are 100% Tested at Both 25°C and 125°C Temperature Levels—for Assured Quality.
- Available with Isolation Barriers

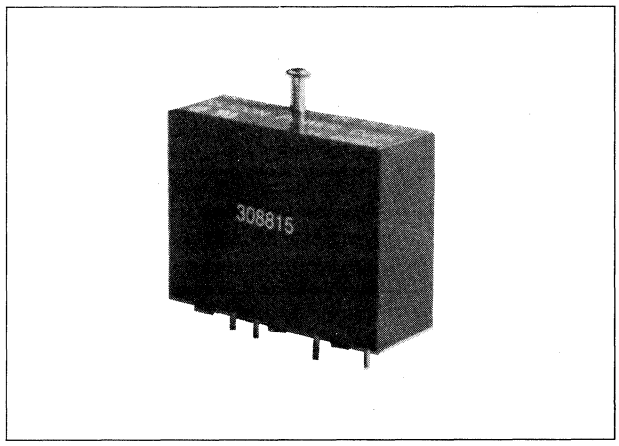
SILICON POWER CUBE CORP.

6015 OBISPO AVE. / LONG BEACH, CA 90805 / TEL: 213-634-9390 / FAX: 213-630-5338

SILICON POWER CUBE

IAC/IDC/OAC/ODC SERIES

Industrial environments can subject sensitive microelectronic circuits to undesirable stresses in the form of voltage transients, electrical noise, shock, vibration, etc. These can result in permanent damage, spurious operations or false indications. SPC'S I/O modules are designed to provide an electrically clean, photo-isolated, noise-free "output" interface from logic level control systems to external loads such as motors, valves, solenoids, etc., or, an "input" interface from the load or sensors to microprocessor or computer-based logic level systems. Used with SPC'S I/O mounting boards, these solid-state modules exhibit long, reliable life in industrial environments.

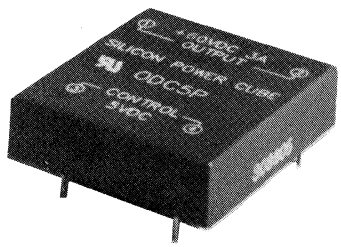


FEATURES

- Color-coded by Function
- 4000 Vrms Optical Isolation
- Industry Standard Package and Pin-out
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified, SEV Approved Types Available

IACP/IDCP/OACP/ODCP SERIES

These flat pack modules offer reliable input-output interfacing in a low profile package outline that permits PC board spacing on half-inch centers.

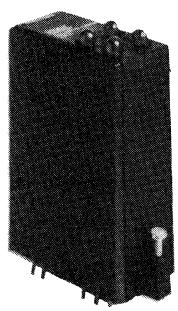


FEATURES

- Low Profile Permits 0.50 inch (12.70mm) PC Board Spacing
- Industry Standard Footprint
- Color-Coded by Function
- 4,000 Vrms Optical Isolation
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified

IACQ/IDCQ/OACQ/ODCQ SERIES

Each quad module has four I/O channels of the same type. They provide a high packaging density means of reliably interfacing logic level control systems with external loads such as motors, valves, solenoids, etc., or as an interface from the load or sensors to microprocessor or computer-based logic level control systems.

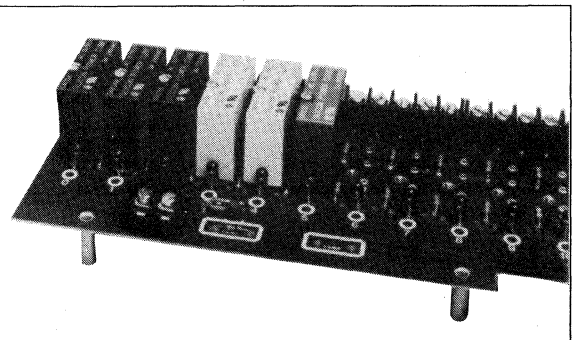


FEATURES

- Industry Standard Plug-in Package
- Input Modules Have Reverse Voltage Feedback Protection
- Output Modules Can Be Controlled By Sinking Logic
- Color-Coded by Function
- 4,000 Vrms Optical Isolation
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified Types Available

PB SERIES

These mounting boards will accept input/output modules in any combination of input or output types of the same style (single or quad channel). Modules can be easily and quickly inserted, without disturbing field wiring. The single channel models provide an LED status indicator, plug-in 5 amp fuse and 3.3 Kohm pull-up resistor for each module.



FEATURES

- LED Status Indicators
- Plug-in Fuses
- Pull-up Resistors
- Barrier Strip Screw Terminals for Field Wiring
- Card Edge Logic Connections Available
- Screw Terminal Logic Connections Available
- UL Recognized Types
- CSA Certified Types

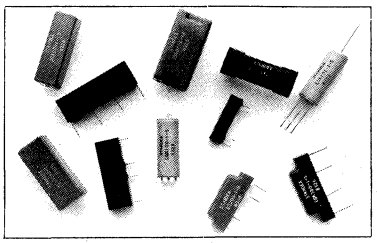
STANDEX REED RELAYS



- ☐ Widest range of pin-outs, contact configurations and contact ratings
- ☐ Versions to meet UL, CSA, FCC and European Standards — up to 5000 VDC contact to coil breakdown voltages
- ☐ Standex relays use our own reed switches with contact ratings for dry circuit and power switching applications
- ☐ Competitive pricing & delivery from stock

a Standex company

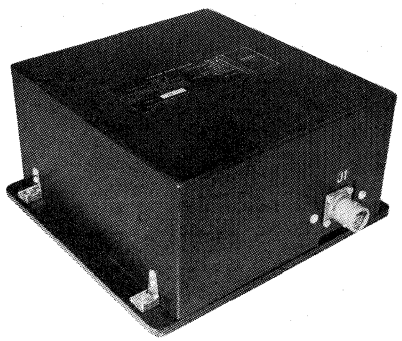
EEM 1989

Standex manufactures over 500 standard reed relays for a broad range of applications including security, instrumentation, ATE, appliance, automotive and telecommunications. Standex reed relays use Standex reed switches (see our ad in the switch section). — A broad range of reed switches for demanding applications.

Call or write for complete information and application assistance.

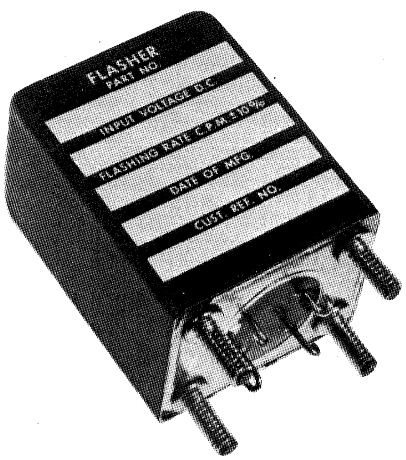
SCIENTIFIC TECHNOLOGIES INCORPORATED

ELECTRIC POWER MONITOR



SPECIFICATIONS
INPUT VOLTAGE: 115 VRMS line to neutral ± 5.8 VRMS, 400 Hz ± 20 Hz, 3 phases plus neutral, phase sequence A-B-C (pins 1, 2, 3 & 8)
NORMAL OUTPUT: 28 VDC ± 2.8V, 4.5 to 5.0 AMP max. (pin 5), voltage regulation and ripple: 10% and 1V peak-to-peak max.
ALARM OUTPUT: 28 VDC nominal, 1.8 to 2.0 AMP max. (pin 7)
RESET SWITCH: Customer will supply a momentary normally open switch to permit normal operation when the switch is activated providing none of the fault conditions exist and the input voltage is applied (switch across pins 6 & 4)
MATERIAL AND FINISH: Housing is aluminum with black anodized finish.
OPERATING TEMP. RANGE: 0°C to +85°C
DIELECTRIC STRENGTH: 1250V, 60 Hz between contacts and case and between isolated circuits
VIBRATION: 5 to 55 CPS with DA of .06 in along any axis.
SHOCK: 20G'S for 11 MS
FAULT CONDITIONS: The monitor will supply the alarm output when any of the following conditions exist:
OVER/UNDER VOLTAGE SENSOR; Voltage is above 126.5 VAC ± 1.5V or below 105.5 VAC ± 1.5V across any one or more of the phases with respect to neutral.
PHASE SENSOR: Improper phase sequence (C-B-A) or if any one phase is open with the remaining phases closed.
FREQUENCY SENSOR: Frequency is above 420 Hz +0 Hz/–5 Hz or below 380 Hz +5 Hz/–0 Hz
VOLTAGE DROP: Any one or more of the phases drop to 95 VAC, the voltage regulation and ripple will be 10% and 1 volt peak-to-peak max. Any one or more of the phases drop to 80 VAC, the voltage regulation and ripple will be 30% and 3 volt peak-to-peak max. Any one phase is open while these conditions exist, the voltage regulation and ripple will be 30% and 6 volt peak-to-peak max.

FLASHERS

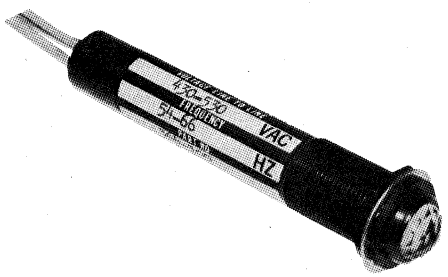


FEATURES:
- High reliability
- Rugged
- Hermetically sealed
- Compact and lightweight
- Solid state and relay outputs
- Long life

SPECIFICATIONS
SOLID STATE FLASHER
INPUT VOLTAGE: 18 to 32 VDC
POWER CONSUMPTION: 3 Watts (Not Including Lamp Power).
FLASHER OUTPUT: 200 ma, 500 ma, 2 AMP, or 5 AMP Lamp or Relay Load.
OUTPUT POLARITY: Positive or Negative Types.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON:OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 10,000 Hours Min.
SHOCK: 100 G's for 11 Milliseconds
VIBRATION: 10 G's at 10 to 500 CPS.
HERMETICALLY SEALED.
MOUNTING: Stud or Flange.
SOLDER HOOK TEMINALS.
WEIGHT: 4 Ounces Nominal.
VOLTAGE DROP: 1.5 Volts Maximum.

RELAY TYPE FLASHER
INPUT VOLTAGE: 18 to 32 VDC.
POWER CONSUMPTION: 4 watts (not including lamp power).
FLASHER OUTPUT: 500 ma, 2 AMP, 5 AMP, lamp or relay load.
CONTACTS ARE S.P.S.T. normally open.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON: OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 500,000 cycles
minimum at rated load.
SHOCK: 15 G's for 11 milliseconds.
VIBRATION: 10 G's at 10 to 500 CPS
UNIT: Hermetically sealed.
MOUNTING: Studs or flange.
SOLDER HOOK TERMINALS.
WEIGHT: 8 ounces nominal.

PHASE SEQUENCE INDICATORS



DESCRIPTION
A unique passive element circuit within the housing allows the indicator to illuminate only when the phase sequence of power being monitored is A-B-C. The phase sequence indicator will not illuminate when any one or more of the power inputs are opened or if the phase sequence is C-B-A.

The indicator will provide trouble-free instantaneous indication with no warm-up time required. The units are potted in an aluminum housing with no moving parts. Designed to meet severe environmental requirements of military applications.

SPECIFICATIONS
POWER CONSUMPTION: 2 watts
OPERATING TEMPERATURE: –55 to +125 C
WEIGHT: 2 ounces
MOUNTING: 5/8 inch dia. hole, panel thickness to 3/4 inch
LEADS: 18 inches long, teflon insulated
HOUSING MATERIAL: aluminum, black anodized
FREQUENCY AND VOLTAGE: per customer specifications
INDICATOR: lights up when all input leads are energized and phase sequence is A-B-C

CONTROL COMPONENTS DIVISION 9520 Black Mountain Road, San Diego, CA 92126-4507 USA
Phone 800/826-5053 (Continental U.S. except CA) 619/566-7680 FAX: 619/549-9691 TELEX: 9105951797 STI IRIN

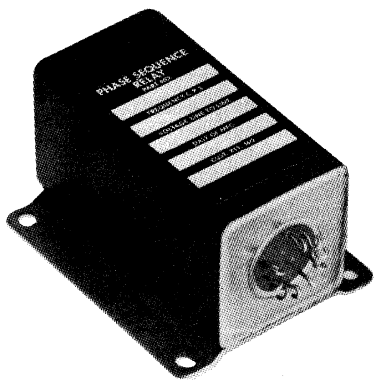
PHASE SEQUENCE RELAYS



FEATURES

- Designed for use in severe environmental conditions
- Automatic monitoring of phase sequence
- Solid state sensing circuit
- Hermetically sealed
- Light weight, small size
- Many voltages and frequency combination available

SPECIFICATIONS

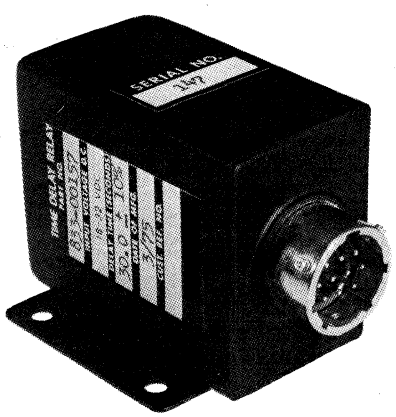
Relay picks up when all input terminals are energized and phase sequence is A-B-C.
Relay drops out if one or more power leads are grounded, opened or if the phase sequence is C-B-A.
POWER CONSUMPTION: 10 watts maximum.
OPERATING TEMPERATURE: –55 C +71 C
CONTACT RATINGS: (Per MIL-C-5757)

28 VDC	Resistive (Form C)	Inductive
2 AMP	2.0 AMPS	1.0 AMPS
3 AMP	3.0 AMPS	1.0 AMPS
10 AMP	10.0 AMPS	5.0 AMPS

115 VAC	Resistive (Form A&B)	Resistive (Form C)
2 AMP	2.0 AMPS	0.2 AMPS
3 AMP	3.0 AMPS	0.2 AMPS
10 AMP	10.0 AMPS	2.0 AMPS

VIBRATION: 10 G's to 500 Hz.
SHOCK: 30 G's for 11 milliseconds stud mount.
100 G's for 11 milliseconds flange mount.
SEAL: Hermetically sealed.
CONTACT RESISTANCE: .08 ohm maximum.
INSULATION RESISTANCE: 100 megohms minimum between terminals and case, between open contacts.
DIELECTRIC STRENGTH: 1000 Vrms 60 Hz, between terminals and **CASE;** 500 Vrms 60 Hz, between open contacts.
LIFE: 100,000 operations minimum.
WEIGHT: 11 ounces maximum.
Relays per MIL-R-5757.
Environmental testing per MIL-E-5272.
Test methods per MIL-STD-202.
Marking per MIL-STD-130.

TIME DELAY RELAYS



FEATURES

- Solid state sensing circuit
- Transient protected
- 2 amp, 3 amp, and 10 amp relay contacts, dpdt.
- Hermetically sealed.
- Light weight (3.5 to 9 oz).
- Choice of 3 operating modes.
- Designed for use in severe environmental conditions.

SPECIFICATIONS

INPUT VOLTAGE: 18 to 32 vdc
POWER REQUIREMENTS AT 28 VDC: 5 watts max, 2 amp relays
6.5 watts max, 10 amp relays
TEMPERATURE RANGE: –65 F to +185 F
VIBRATION: 20 G's, 10 to 2000 Hz
SHOCK: 100 G's for 11 milliseconds
CONTACTS: DPDT
LIFE: 100,000 cycles minimum at rated load
DROP-OUT TIME: 10 milliseconds max.
DROP-OUT VOLTAGE: 1 volt min.
PULL-IN VOLTAGE: 18 volts max.
INSULATION RESISTANCE: 100 megohms min.
DIELECTRIC STRENGTH: 500 volts 60 Hz case to terminals and across open contacts
CONTACT RATING:
2 amp & 3 amp unit: 2 amp & 3 amp resistive at 32 vdc
1 amp inductive at 32 vdc
10 amp unit: 10 amp resistive at 28 vdc or 115 vac
5 amp inductive at 28 vdc or 115 vac
CONTACT RESISTANCE: 0.050 ohms at rated current
RESET-TIME: 0.050 sec. max.
TRANSIENT PROTECTION: Will not be damaged by transients per Mil-Std-704
INTERNAL RELAYS: Per MIL-R-5757

MIL-SPEC SENSORS

- VS, CS, FS Series for Voltage/Current/Frequency

Struthers-Dunn custom designs and manufactures a range of Mil-Spec sensors that monitor AC and DC circuits and detect and signal when the parameters of voltage, current or frequency deviate from the required nominal range. These sensors use Struthers-Dunn Mil-approved relays or timers, and are available in models ranging from 1 PDT low level with reed contacts, to 4-pole 10A or 3-pole 25A. Magnetic latching relays are available for all contact arrangements. Enclosures are hermetically sealed, with terminals for socket plug-in, circuit board mounting or solder hooks. For detailed information, contact Struthers-Dunn.

PRINTED CIRCUIT TERMINAL—LOW LEVEL TO 30 AMP, 1-4 POLE, SEALED AND UNSEALED

SERIES	276	277	232	233	270	272	272L	273	403
									DIMENSIONS (L x W x H)	0.787″ x 0.500″ x 0.394″	1.142″ x 0.512″ x 1.024″	0.630″ x 0.433″ x 0.453″	0.905″ x 0.827″ x 0.768″	0.866″ x 0.630″ x 0.622″	0.787″ x 0.390″ x 0.354″	0.787″ x 0.390″ x 0.354″	0.866″ x 0.630″ x 0.622″	1.156″ x 0.938″ x 0.344″
FEATURES	• 10 Amp Contact • Miniature Size • Polarized for Coil Sensitivity—40 mA@ 5VDC • 4 mm Coil—Contact Spacing • 5KV Surge Withstand • Immersion Cleanable • PBT Materials	• AC or DC Coil Construction • 8 mm Coil—Contact Spacing • 10KV Surge Capability • Sealed Terminals • PBT Materials • 0.1″ Term. Grid	• Subminiature Size • 1 Form C; 1 Amp Contact • Immersion Cleanable • 0.2W Coil Available • 0.1″ Term. Grid	• Automotive Applications • Incandescent Lamp Switching • 30 Amp Switching 15A Continuous • Low Cost • Dust Cover	• General Purpose Relay • 3, 5 or 10 Amp Switching • Immersion-Cleanable • TV-5 Rating	• 0.1″ Grid DIP Relay • Immersion-Cleanable • 1500V FCC Surge Capability • Meets FCC Part 68 • Crossbar Bifurcated Contacts • Polarized For Coil Sensitivity	• 0.1″ Grid DIP Bistable Mag. Latch—2 Coil • Immersion Cleanable • 1500V FCC Surge Capability • Meets FCC Part 68 • Crossbar Bifurcated Contacts	• Very Low Audible Noise Relay • Immersion Cleanable • 10 Amp Switching at 16VDC and 250VAC	• Low Profile—0.5″ Board Spacing • 2 Form C or 4 Form C • Immersion-Cleanable • Low Capacitance Design • 0.1″ Grid Term.

TELEDYNE RELAYS

Centigrid® Military Relays

- **General purpose 114 Series**
- **Sensitive 134 Series**

The Centigrid® 114 Series relays are subminiature, hermetically sealed, armature relays featuring low profile, .275" (6.99mm) high by .370" (9.4mm) square, with .100" grid spaced terminals. The sensitive 134 Series is .375" (9.5mm) high and features ultra-low coil power dissipation. Both Centigrids® feature all-welded construction, hermetic sealing, and high force/mass ratios for excellent resistance to environmental extremes. Gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum. The 114 Series and 134 Series are qualified to L, M and P levels of MIL-R-39016.

CMOS Compatible Centigrid® Military Relays

- **CMOS compatible general purpose 116C Series**
- **CMOS compatible sensitive 136C Series**
- **CMOS compatible magnetic latching 122C Series**

CMOS compatible Centigrid® relays are subminiature, hermetically sealed, armature relays capable of being directly driven by most IC logic families. Their low profile height and .100" grid spaced terminals, which precludes the need for spreader pads, make them ideal for applications where extreme packaging density and/or close PC board spacing are required. The 116C and 136C Series are qualified to L and M levels of MIL-R-28776 and incorporate internal silicon planar epitaxial type diodes for coil suppression, zener diodes to protect the MOSFET gate inputs, and N-channel enhancement-mode MOSFET chips. The 122C, which incorporates the same interface circuitry as the 116C and 136C, is a magnetic latching relay which is actuated by a short duration voltage pulse. The magnetic "memory" of this device precludes the need for constant bias and or battery backup in the event of system power failure.

TELEDYNE RELAYS

Surface Mount Centigrid® Military Style Relays

- **General purpose S114 Series**
- **Sensitive S134 Series**

Teledyne Relays' S114 and S134 Series are subminiature, hermetically sealed, surface mountable relays, which combine the proven reliability of the Centigrid® Series relays with pre-tinned leads specifically formed in compliance with MIL-STD-454 to make them ideal for all types of surface mount reflow processes. The basic design and internal construction are identical to the 114 & 134 Series Centigrid® relays (as described on Page 2) and meet the requirements of MIL-R-39016.

Low Cost 172 Series Centigrid® Commercial/Industrial Relays

Low cost commercial versions of the DPDT MIL qualified Centigrid® relays. Hermetic sealing, all welded construction, and gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum.

	GENERIC PART NUMBERS	172-5 172D-5	172-12 172D-12	172-26 172D-26

TELEDYNE RELAYS

High Environmental Military Style TO-5 Relays

Designed to withstand severe environmental conditions of shock, vibration, or elevated temperature in excess of normal military specification levels. The following versions are available, all of which meet other requirements of MIL-R-39016:

412H Series—High Temperature (200°C)
412K Series—High Shock (4000 g's/0.5ms)
412V Series—High Vibration (380 g's @ 200 Hz)
432H Series—High Temperature (200°C)
432V Series—High Vibration (380 g's @ 200 Hz)
422H Series—High Temperature (200°C)
422K Series—High Shock (2000 g's/0.5ms)

RF Relays

- **RF120 Series Military Style Centigrid® Relays**
- **RF170 Series Commercial Centigrid® Relays**

The RF120 and RF170 Series relays are subminiature, hermetically sealed Centigrid® relays featuring extremely low intercontact capacitance that have been optimized to provide exceptional RF performance over the full UHF spectrum. These Series combine microwave switching capability with Teledyne Relays' superior all-welded construction, proven magnetic-latching design, and high force/mass ratios for ruggedness and performance stability in severe environments. Gold plated precious metal contacts ensure reliable DC switching from low-level to ½ amp, as well as low, stable insertion loss.

TELEDYNE SOLID STATE
Military Solid State Relays

CD Series — Low Cost — Short Circuit Protected
Status Indication — Optically Isolated — DC Power FET Output

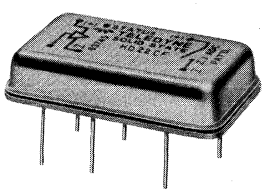
	TELEDYNE PART NUMBER	FEATURES	MAXIMUM LOAD VOLTAGE	MAXIMUM LOAD CURRENT (25°C)
Advance* Information	CD00CD	Basic Solid State Relay (SSR)	60 Vdc	1.75 Adc
	CD01CD	SSR with Status	60 Vdc	1.75 Adc
	CD20CD	SSR with Short Circuit Protection	60 Vdc	1.2 Adc
	CD21CD	SSR with Short Circuit Protection and Status	60 Vdc	1.2 Adc

* Available Early 1990

The CD21CD is the first of a family of low cost military solid state relays with all the features of our standard solid state relays.

- **TTL/CMOS Logic Compatible Control**
- **Integrated Short-Circuit/Current Overload Protection**
- **Status Indication Provides System Built-In-Test Capability**
- **Low Profile Hermetically Sealed Ceramic Package**
- **Meets MIL-STD-704 for 28 Vdc System Surge and Spike Requirements**

HD Series — Short Circuit/Current Overload Protection
True Output Status Feedback — Optically Isolated



TELEDYNE PART NUMBER	FEATURES	MAXIMUM LOAD VOLTAGE	MAXIMUM LOAD CURRENT (25°C)
HD00CF	Basic Solid State Relay (SSR)	60 Vdc	2.1 Adc
HD02CF	SSR with Output Status	60 Vdc	2.1 Adc

‡DESC Selected Item Drawing 85006-001 assigned to M90FS-2Y.
DESC Selected Item Drawing 88061-001 assigned to M85FS-2AY.

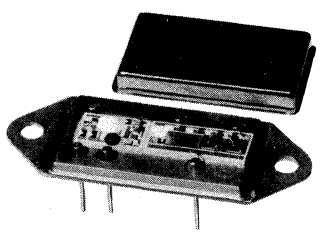
- **Available to DESC Selected Item Drawings**
- **TTL/CMOS Logic Compatible Control**
- **3.8 to 32 Vdc Input Control Range**
- **Meets MIL-STD-704 for 28 Vdc System Surge and Spike Requirements**

These solid state relays provide protection whether switching into a dead short or shorting the output under load.

The M90FS-2 is housed in a low profile Centigrid® package which conserves space in high density packaging applications.

The M85FS series is housed in a metal DIP package which maximizes heat dissipation.

M33 Series — Short Circuit Protected — True Output Status
DC Power FET Output — Up to 10 Amps



TELEDYNE PART NUMBER	FEATURES	MAXIMUM LOAD VOLTAGE	MAXIMUM LOAD CURRENT (25°C)	MOUNTING FLANGES

TELEDYNE SOLID STATE

Commercial/Industrial Solid State Relays

Subminiature Solid State Relays in Standard DIP Packages

Features all solid state circuitry with hybrid microcircuit construction, and high input/output isolation (up to 2500 Volts/10^9 Ohms). Fourteen models available providing choice of output: bi-directional, AC (zero or non-zero switch) and DC. The 640 Series, 643 Series and C46/47 Series are direct pin-for-pin replacements for standard TO-116 DIP reed relays.

- **641/645 Series and 645V-2H are UL recognized (File #55197) and CSA certified (File #31043)**
- **645V-2H is VDE approved to VDE 0883/6.80**
- **645 Series meets VDE and FCC Class A conducted emission limits**
- **C46/C47, and 645 Series are patented**

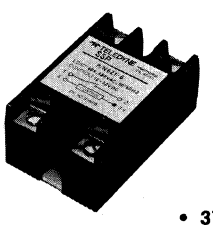
	C15DS-V-AR44-40 (40 A)			440	800

*615V models meet VDE creepage and dielectric strength requirements.

621 Series — High Voltage, Optically Isolated, Zero Voltage Turn-On



- **CSA Certified File #31043 (621-1 thru 621-6)**
- **UL Recognized File #E55197 (621-1 thru 621-6)**
- **3750 Vrms Isolation**
- **High Voltage Output 480 Vrms, 800 Vpk**

Designed to meet safety requirements of UL, CSA, VDE and IEC and dielectric requirements of VDE.

CONTROL VOLTAGE RANGE	MAXIMUM LOAD CURRENT RATING & PART NUMBERS		
	15 A	25 A	40 A

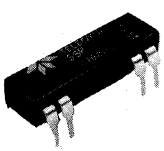
Solid State Computer Input/Output Interface Modules

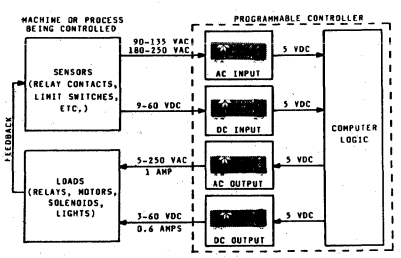
C76 Hybrid DIP I/O™ System
Optically Isolated — TTL/CMOS Logic Compatible Input



- **Enable Function on Inputs**
- **High Noise Immunity**
- **Meets VDE Voltage and Spacing Requirements**
- **TO-116 DIP Package (16 pin)**

PART NUMBER	TYPE	CHARACTERISTICS
C76AO-1	AC Output	3.8-16 Vdc Input 5-250 Vrms, 1 A Output
C76AI-1	AC Input	90-135 Vrms and 180-250 Vrms Inputs
C76DO-1	DC Output	3.8-16 Vdc Input 3-60 Vdc, 0.6 A Output
C76DI-1	DC Input	9-60 Vdc Input

C76 HYBRID I/O INTERFACE SYSTEM



Teledyne Solid State C76 DIP I/O™ Modules are designed for use in computerized control systems for noise-free isolated interfacing of computer logic elements to harsh industrial environments. Modules employ custom microcircuits in a TO-116 DIP. Eliminates mounting tracks for low "per-point" cost. Meets VDE requirements. Features CMOS and TTL compatibility, optical isolation, high noise immunity and an ENABLE function on input modules. For use in robotics, computerized process control, machine tool control, programmable controllers and ATE.

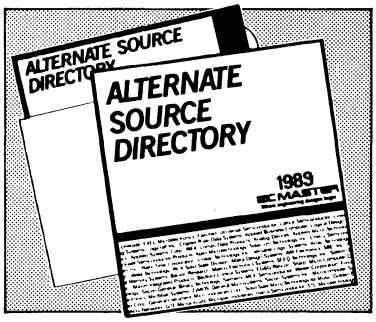
HEARST ENGINEERING SOFTWARE

ICMASD...IC Alternate Source Directory

If you've used the IC MASTER, you know what the Alternate Source Directory is. Engineers tell us that it's one of the most valuable sections of the Master. The Alternate Source Directory...ASD...is now available in floppy disk form.



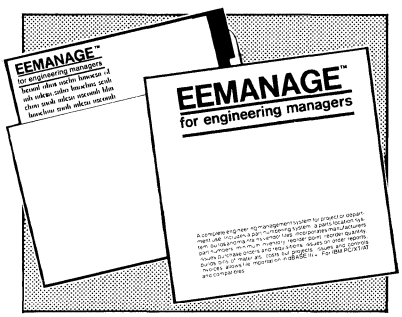
The electronic ASD is FAST! Just ask a question and the answer pops up in a split second.

The electronic ASD is FLEXIBLE! You can add ICs and you can add comments. You can add part numbers, prices, technical notes or anything else you like. You can customize the ASD to fit your needs and the needs of your company.

Order the Alternate Source Directory for your AT, XT or compatible. We'll send you two floppies and a very simple piece of printed documentation. Download the floppies and you're in business. All you need is a hard disk.

EEMANAGE...for engineering managers

Developed by the publishers of EEM/ Electronic Engineers Master, EEMANAGE is a software program designed to make life easier for engineers and engineering managers.



EEMANAGE does many things: 1. Develops Bills of Materials 2. Assigns Part Numbers logically 3. Manages Engineering Inventories 4. Issues Purchase Requisitions 5. Relieves Engineering Inventories 6. Manages a Parts Storage System 7. Issues Engineering Change Notices 8. Interfaces with dBaseIII+ Programs.

EEMANAGE is completely menu driven. It is simple to understand and operate. Any competent secretary can be up and running on EEMANAGE in minutes.

Order EEMANAGE for your AT, XT or compatible. We'll send you one floppy and brief, very user friendly documentation.

The basic price for ICMASD or EEMANAGE is $149.50* each and includes floppy disk(s) and complete program documentation.

For immediate shipment you can order ICMASD or EEMANAGE on your VISA or MasterCard credit card simply by calling Marie Botta at (516) 227-1300.

To order by mail send your purchase order to:

Hearst Business Communications

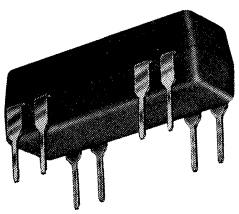
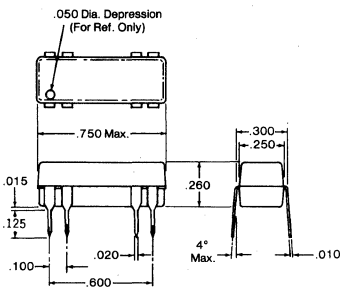
1A SPST NO	5/6	19	500	805-101
	12/15	24	800	805-102

E.S.S. Added for 50 ohm transmission line switching.

815 SERIES





The 815 Series, offers increased versatility while maintaining the DIP package approach to hi-density printed circuit applications. Standard part numbers listed are subject to specifications shown for the 805 Series. The 815 has the capacity to offer dry reed switches to ½ Amp rating plus up to a 200 VDC max. switching voltage. Optional features include diode suppression, magnetic shielding and electrostatic shielding.

True form C also available.

* Spacing not available in 1 pole package.

The relays shown here are just a sampling of the many designs and configurations manufactured by Wabash Magnetics as standard products. We also offer design assistance and custom designed relays through our fully staffed engineering department. Should you require a custom designed relay, here are some parameters to consider:

U.L. and C.S.A. Recognition

Several relay series are recognized under the Component Program of Underwriters' Laboratories. Most of these relays also have C.S.A. recognition. Regardless of which series you are interested in, Wabash can help you obtain the U.L. or C.S.A. recognition your design requires.

Wabash Magnetics
1st & Webster Streets, Wabash, Indiana 46992
(219) 563-2191 TWX: 810-290-2722 FAX: 219-563-1652

Prints and specifications, if available, are the best design tool. The minimum information required for Wabash to design a relay is:

Mechanical Specifications

- Maximum length
- Maximum width
- Maximum height above P.C. board
- Pin configuration
- Open or covered
- Type of environment relay will be exposed to
- End Use

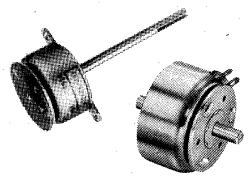
Electrical Specifications

- Switch configuration
- Nominal voltage
- Must operate voltage or current
- Must release voltage or current
- Coil resistance
- Switching current
- Contact resistance
- Carry current
- U.L. recognition required
- Special considerations (ESS, low thermal, high insulation resistance, etc.)

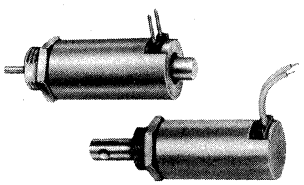
Lucas Ledex

Solenoids

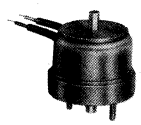
Over 400 choices of standard solenoid designs are available off-the-shelf. But, if none of these meet your unique requirements, we'll provide you with custom engineered prototypes fast. Either way, Lucas Ledex Inc. offers you the widest variety of solenoids for your design. Request solenoid catalog.



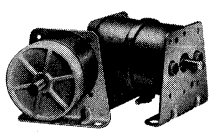
Rotary Solenoids
Step-turn-index-lock-punch-lift. For millisecond-fast, high torque and endurance, specify a Lucas Ledex rotary solenoid. Nine basic sizes, right or lefthand strokes from 10 to 110 degrees. Torque output to 117 pound-inches. Life of over 100 million cycles with endurance engineered models. Four standard sizes of Magton rotary solenoids produce high torque with no axial displacement. Standard angular strokes: 60°, 45°, and 30°, either CW or CCW. Can be modified. Long operating life: 100 million cycles.



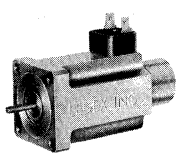
Linear Solenoids
Short-medium-long strokes are all available from one source—Lucas Ledex Inc. Choose our low profile flat face push/pull for high force/short stroke, our low profile conical face push/pull for medium force/stroke, and our tubular solenoids for long strokes. New Series 20 tubular solenoids provide 50 million actuations, quiet operation, push or pull, and economy—available from stock. Rugged construction provides accurate repeatability after long usage. Our tubular solenoids have built-in impact cushions to absorb energy at the end of the stroke and electroless nickel plated plungers for longer life.



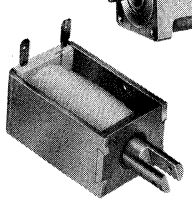
Magnetic Latching Solenoids
Magnetic latching solenoids use permanent magnets coupled with conventional rotary, tubular, low profile, or open frame solenoids, to hold the plunger in an open or closed position without current drain. A momentary pulse releases the latch. Memory is retained during power loss.



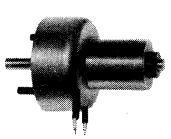
Stepping Solenoids
Step 10-15-20 or 30 degrees with the highest torque in a stepping solenoid—the Series 50-L. Square wave pulse drives either the unidirectional or bidirectional model for 10,000,000 steps with a non-accumulative accuracy of ± 1°. Direct couple for mechanical ease and avoid linkages. Can be manually overridden in case of power failure.



Proportional Solenoids
Open loop/closed loop, variable position sensing is now possible by using our proportional solenoid with our controller for smooth, accurate response. Hydraulic systems can use our wet plunger type which requires no dynamic seals and provides up to 50 pounds force. Do away with pilot stages and expensive servo valves.



Open Frame Solenoids
TDS Series open frame solenoids for large volume OEM applications are available at competitive prices in 34 standard configurations. Lucas Ledex D-Frame solenoids are dependable and reliable. Eight standard models are available from stock with strokes up to 1.25". Quick connect terminals and class "B" coils are standard.



Soft Shift® and Custom Designed Solenoids
Soft Shift solenoids give variable speed control, from snap action to quiet variability. Variable positioning with electronic control.
Typical custom designed solenoids include dot matrix and printhammer models.

Request complete line solenoid catalog.

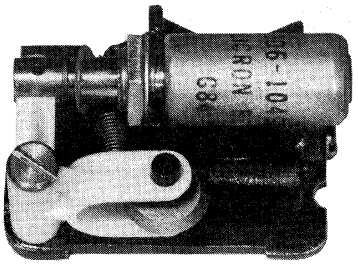
LINEAR MOTION SOLENOIDS

INFORMATION



BICRON™

Working With You—For You

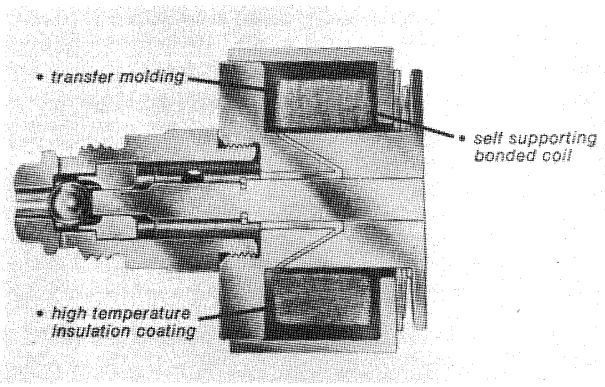
IMPORTANT ADVANTAGES FOR YOUR PRODUCT

- High Performance at High Continuous Duty—Power Levels
- Tough—Durable—Dependable
- Exceptional Force per Size
- Harsh Environment Applications
- Mil-S-4040 Capability
- Value Priced

WITH BICRON

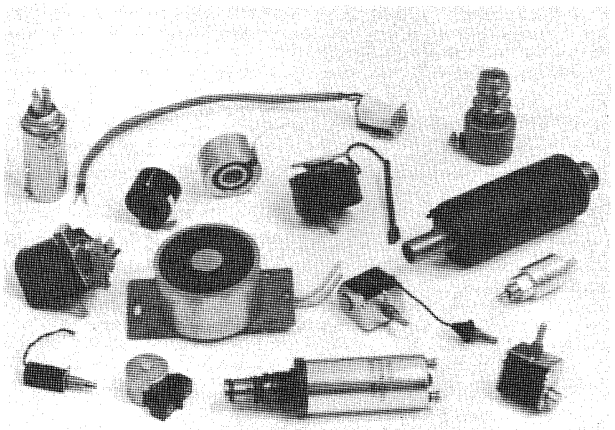
- Custom Designed Products at Standard Product Prices
- Personal Indepth Commitment
- Design Engineer Assigned to Your Project Until Completion
- Fast Prototype Deliveries
- Capacity to Meet Your Most Demanding Production Runs
- Proven Computer Aided Designs
- State of the Art Machining and Tooling Facilities
- 25 Years Solenoid Product Know-How

QUALITY/RELIABILITY DESIGNED INTO BICRON SOLENOIDS:



CUSTOM SOLENOIDS

We provide the expertise you expect and the delivery you require.



A selection of products produced for many of our OEM customers.

FOR YOUR DESIGN

- Custom Designed Configurations to
- Your Requirements
  - Power
  - Envelope
  - Temperature
  - Submersible
- Your Construction
  - Box Frames
  - C Frames
  - Tubular Frames
  - Poppet Valves
- Your Insulation Systems
  - Including Class H

SPECIALS

ELECTRO-MECHANISMS, INC., is completely equipped, both engineering and production wise, to supply you with variations of our solenoids that you might need for your application. We are also capable of designing special types that you might need within the size range of our products. We would appreciate the opportunity to help you solve design and application problems you may have in the area of miniature solenoid actuators.

The force charts below represent three different duty cycles.

Nominal voltage represents continuous duty.

2X Nominal voltage represents a 25%, intermittent duty cycle 4X Nominal voltage represents a 6% intermittent duty cycle.

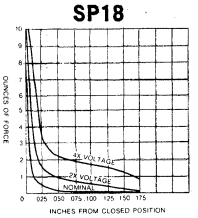
The duty cycle consists of two factors:

1. Percentage of time solenoid is energized in one complete operating cycle.

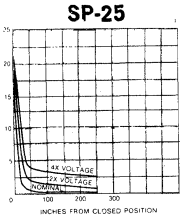
$$\text{(Ref: DUTY CYCLE} = \frac{\text{Time On}}{\text{Time On} + \text{Time Off}} \times 100\text{)}$$

2. Length of time of the longest single energization in one complete operating cycle.

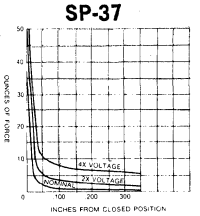
SP18



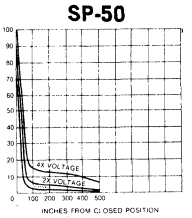
SP-25



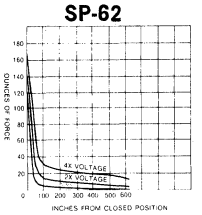
SP-37



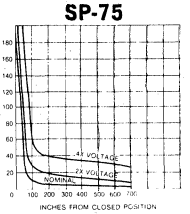
SP-50



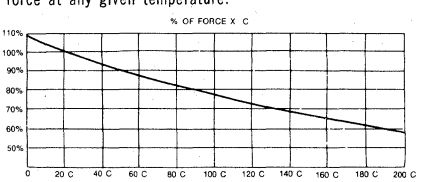
SP-62



SP-75



All forces shown are at 25° ambient. For use at higher ambient temperatures use the chart below to determine force at any given temperature.



FEATURES

ELECTRO-MECHANISMS micro-miniature solenoids offer you static and impact forces equal to standard solenoids 2 to 3 times the size of these units.

Because of their small size, they have extremely fast reaction time. As fast as 2 msec at 4x nominal voltage.

The unique design of PUSH or PULL action, offers many applications beyond the conventional pull type solenoid.

A complete line of 15 solenoids from 3/16″ O.D. to 1.250″ O.D. allows you to choose the correct solenoid with the force you require, from stock items.

The units are highly reliable with life of many millions of operations.

The solenoids are also available with coils in Class F and Class H for high temperature requirements.

Simplicity of design helps keep the costs down and allows us to pass these savings on to you, our customer.

TYPICAL APPLICATIONS

- Hammers for high speed printers
- Camera shutter actuators
- Locking mechanisms for switches, adding machines and typewriters
- Interpossers for card punching and tape perforation
- Cam actuation
- Pen lifters for plotters
- Event markers for chart recorders
- Key actuators for numerical readouts on typewriters and adding machines
- For life testing different devices
- For indicator flags
- Sensing devices
- Remote switching and actuation

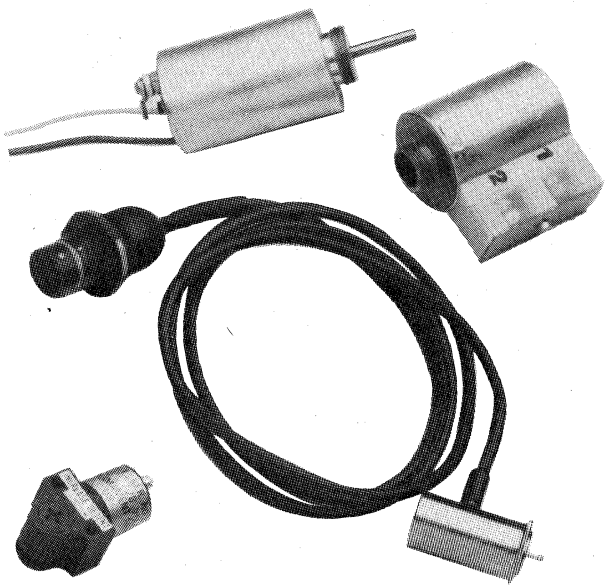
ENGINEERING•QUALITY•DELIVERY
MILITARY GRADE

Hard to find all these in one company?

NOW YOU CAN!



Our engineers design only solenoids and relays. Their years of experience save you money and shorten your manufacturing lead time.

Complete designs from start to finish or slight modifications to existing products. We know our capabilities and if we can't design and build a cost-effective unit, we'll let you know immediately!

Quality: At Electronic Specialty quality is consistent.
Our in-house environmental and dynamic testing lab gives us control of product quality and keeps our lead times to a minimum.

Delivery: Our sale engineers can help you with your particular application. Slight variations, or a totally new design, they give you answers on price and design quickly. Because we've supplied these kinds of components for years we are equipped to build and deliver your order when you need it.

Design capability, fast delivery of quality products with the assurance they are what you need. That's what Electronic Specialty Corporation offers you. Whether your orders are large or small we never forget the customer is what keeps us in business.

Call us, let us give you a competitive quote quickly and accurately.

PHYSICAL CHARACTERISTICS
Push or pull type

CASE SIZE
1/2″ diameter case O.D. to 3″ diameter case O.D.

STROKE RANGE
.01″ to .5″

WEIGHT
4 oz. to 48 oz.

ELECTRICAL CHARACTERISTICS
AC & DC Operation

Coil Voltages	AC	5 VRMs to 240 VRMs from 50 hz to 800 hz
	DC	5 VDC to 600 VDC

Coil resistance-Commensurate with required power and voltage requirements.
Dielectric to 1500 VDC or VRMs
Insulation resistance 100 meg at 5000 VDC

OPERATING CHARACTERISTICS
Force curves matched to customer requirements or use existing designs.
Plunger strokes from .001 to .5 inches.

ENVIRONMENTAL CHARACTERISTICS

Temperature ranges –65F to 300F	Vibration
Pressure range	Shock
Fluid compatibility	Salt Spray

CONNECTIONS

Stud screw terminal	Twist lock
Quick connect	Wire leads
Mil Spec multiple connectors

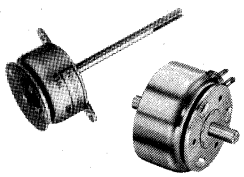
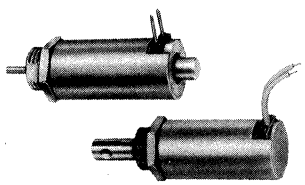
Lucas Ledex

Solenoids

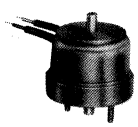
Over 400 choices of standard solenoid designs are available off-the-shelf. But, if none of these meet your unique requirements, we'll provide you with custom engineered prototypes fast. Either way, Lucas Ledex Inc. offers you the widest variety of solenoids for your design. Request solenoid catalog.



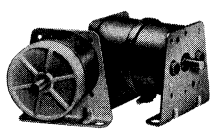
Rotary Solenoids
Step-turn-index-lock-punch-lift. For millisecond-fast, high torque and endurance, specify a Lucas Ledex rotary solenoid. Nine basic sizes, right or lefthand strokes from 10 to 110 degrees. Torque output to 117 pound-inches. Life of over 100 million cycles with endurance engineered models. Four standard sizes of Magton rotary solenoids produce high torque with no axial displacement. Standard angular strokes: 60°, 45°, and 30°, either CW or CCW. Can be modified. Long operating life: 100 million cycles.



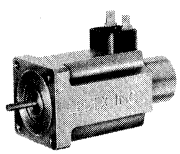
Linear Solenoids
Short-medium-long strokes are all available from one source—Lucas Ledex Inc. Choose our low profile flat face push/pull for high force/short stroke, our low profile conical face push/pull for medium force/stroke, and our tubular solenoids for long strokes. New Series 20 tubular solenoids provide 50 million actuations, quiet operation, push or pull, and economy—available from stock. Rugged construction provides accurate repeatability after long usage. Our tubular solenoids have built-in impact cushions to absorb energy at the end of the stroke and electroless nickel plated plungers for longer life.



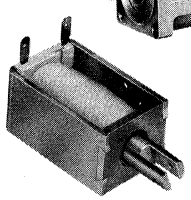
Magnetic Latching Solenoids
Magnetic latching solenoids use permanent magnets coupled with conventional rotary, tubular, low profile, or open frame solenoids, to hold the plunger in an open or closed position without current drain. A momentary pulse releases the latch. Memory is retained during power loss.



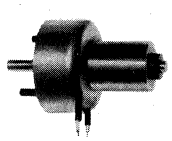
Stepping Solenoids
Step 10-15-20 or 30 degrees with the highest torque in a stepping solenoid—the Series 50-L. Square wave pulse drives either the unidirectional or bidirectional model for 10,000,000 steps with a non-accumulative accuracy of ± 1°. Direct couple for mechanical ease and avoid linkages. Can be manually overridden in case of power failure.



Proportional Solenoids
Open loop/closed loop, variable position sensing is now possible by using our proportional solenoid with our controller for smooth, accurate response. Hydraulic systems can use our wet plunger type which requires no dynamic seals and provides up to 50 pounds force. Do away with pilot stages and expensive servo valves.



Open Frame Solenoids
TDS Series open frame solenoids for large volume OEM applications are available at competitive prices in 34 standard configurations. Lucas Ledex D-Frame solenoids are dependable and reliable. Eight standard models are available from stock with strokes up to 1.25". Quick connect terminals and class "B" coils are standard.



Soft Shift® and Custom Designed Solenoids
Soft Shift solenoids give variable speed control, from snap action to quiet variability. Variable positioning with electronic control.
Typical custom designed solenoids include dot matrix and printhammer models.

Request complete line solenoid catalog.

Lucas Ledex Solenoids & Switches

Solenoids and switches—We have both the products and the people to help you with the quickest and best solutions to your design problems. Our wide selection of stock models lets you get a fast start on your prototype, and our expert engineering staff will work closely with you on custom designs. You'll find helpful solenoid and switch technology.

Rotary solenoids—choose from 250 stock models or custom designs for prototype work. Also Magton® rotary solenoids for high reliability applications. Stock units shipped within 24 hours.

Series 20 tubular push or pull solenoids have life expectancies in excess of 50 million actuations in push models, 100 million in pull models.

Low profile push/pull, flat face, or conical solenoids are built for high force to size, and fast response.

Soft Shift® solenoids—capable of proportional control as well as on-off.

Stepping solenoids—highest torque solenoid available. Extended life up to 10 million cycles minimum on unidirectional models or each direction on bidirectional models.

Open frame solenoids—34 models of TDS Series and 8 models of our D-frame Series solenoids offer economical long term service.

Magnetic latching solenoids—all solenoid configurations maintain energized position without current draw.

Pushbutton switches—All models stocked. Individual pushbuttons, flat panel pushbuttons, low profile rotary, binary selector, keyboard, and keylock switches. Ganged and panel mounted switches with the look and feel of quality.

Rotary manual switches provide economy by simplifying circuitry, eliminating auxiliary circuit components and minimizing wiring. Reliable for military and commercial uses.

Stepping switches operate in −55°C to +80°C and switch 1A @ 120 VAC or 2A @ 28 VDC. More switching—less space.

Packaged switches handle high density transfer switching without relays in extreme environments. Meet relevant MIL specs.

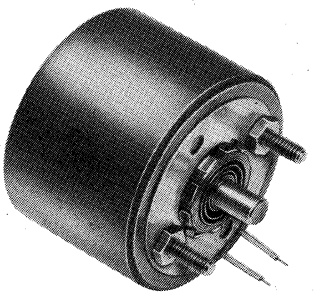
Magton® Rotary Solenoids

Magton solenoids give you hundreds of millions of cycles of life, severe environmental operating capabilities, low noise, and true rotary motion with no axial displacement. They may be what you need to handle shock or vibration in aerospace, or any demanding application where extremely long life is required.

Design uses a balanced armature mounted on ball bearings. Four sizes up to 2.42" dia. provide 30°, 45°, or 60°, (90° optional) at CW or CCW travel stop to stop; wide range of output torques (to 50 in.-oz.) and 5 to 400 VDC available. Request literature.

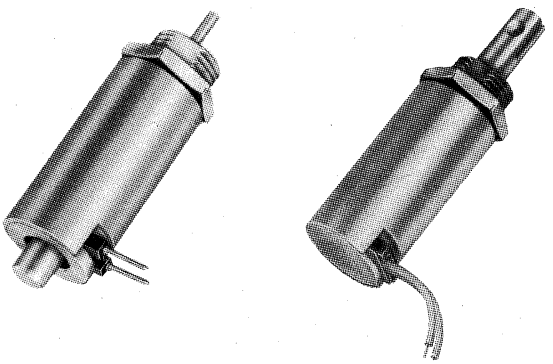


Series 20 Tubular Solenoids

Available push or pull
Typical output, 1/10 duty

Model	½"	¾"	1"
Size	½" dia. x 1"	¾" dia. x 1½"	1" dia. x 2"
Force .25 Stroke	1 oz. to 8½ oz.	¼ to 2½ lb.	¾ to 5½ lb.
Shaft diameter, push	.062"	.094"	.125"
Mounting	Thr'd Bushing	Thr'd Bushing	Thr'd Bushing
Weight	.84 oz.	2.6 oz.	6 oz.

For detailed performance curves, write for our solenoid catalog now.
Stock models available both push and pull, ½", ¾", and 1".



The Series 20 offers the economical solution to your long life actuating needs. A low friction bobbin assembly provides for a life expectancy of millions of actuations. The problem of powdered metal flaking is eliminated through the metal-to-plastic bearing surface construction. The terminal version mates with standard connectors. A special mounting nut is supplied, packed loose.

The Series 20 is ideal for applications where field servicing is prohibitive. Its quietness and high reliability provides definite advantages in applications involving peripheral equipment, business machine mechanisms, door inter-locks, interposers, and gate releases. Request literature.

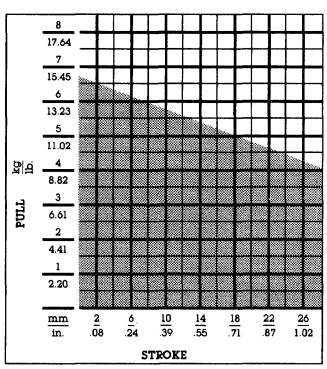
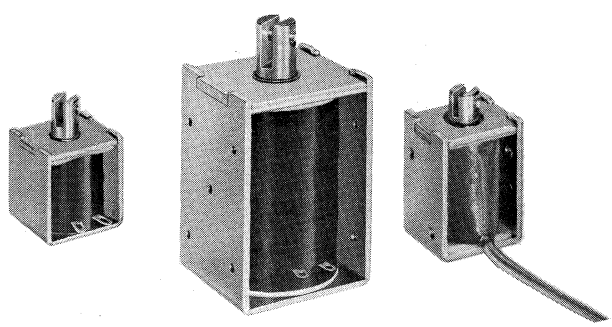
Open Frame Solenoids

TDS Series open frame solenoids feature 34 std. models, hundreds of variations for high-volume OEM applications. Pull-stroke curves fall in shaded range at right. Eight models of our D-frame solenoids also available.

Request Solenoid Catalog now.





Other Solenoids

Magnetic latching—tubular, low profile, and open frame solenoids hold the plunger in the actuated position using no power. Excellent for fail-safe latching mechanisms. Request catalog.

Printer solenoids—dot matrix and printhammer solenoids are examples of custom designs that deliver exceptional reliability over a long life. Call us to discuss your needs.

Omron switches are slightly unconventional

Omron responds to your application needs by adding innovation to even the most basic switch. Automated assembly and 100% quality assurance are just the beginning of our attention to detail; we take pride in designing the "fine points" that distinguish an Omron switch from the others.

Internal Seals Reduce Soldering and Cleaning Time

Our internally-sealed DIP switches, basic switches and mechanical keyswitches are immersible for cleaning without a time-consuming taping operation. Sealed construction also prevents flux entry during automatic flow soldering. Designed for efficiency, our top-actuated DIP switches are also auto-insertable for quick assembly.

Advanced Computer Design Maximizes Performance

Omron's extensive line of pushbutton and lighted pushbutton switches are designed with the operator in mind. Using advanced computer techniques, we've designed a unique "triangle structure" actuator which provides constant force and ideal operating feel for maximum performance. Omron lighted pushbutton switches also feature uniform color illumination to add a quality appearance to your control panels.

Custom Options Accommodate Unique Applications

Omron's snap-action, miniature and subminiature basic switches are available in a wide variety of actuator types and contact configurations to meet your specifications. Switching capacities range from 0.1 to 21 amps, and sealed versions are available for direct soldering to PC boards. In addition, our new A3B lighted pushbutton switches provide water and oil resistance ideal for your machine tool and other harsh industrial applications.

Unconventional Switches for Exceptional Performance

Remember Omron when your switch application requires more than just standard performance. We'll work with you to develop solutions to your specific application problems, if we haven't developed one already. When it comes to photomicrosensors (optical), thumbwheel, basic snap action, keyswitches, DIP, or pushbutton switches, we don't mind being a little unconventional.

Electronic Components. Groupe	B•1733			√			√		√								Miniature
Electroswitch/ Dist.	B•1736									√	√		√				Key lock, Power, Sealed, MIL
Electroswitch Southern Op.	B•1737									√	√						Explosion proof, Key lock, Sealed, Coded
Elma Electronic Corp.	B•1738	√					√			√	√			√			Illuminated, High voltage, Key lock, Sealed, Touch, Coded
Entech Corp.	B•1739		√	√	√	√	√		√	√	√				√		Illuminated, Key lock, Power, Sealed, Leaf switch assemblies, Leaf contact
Fifth Dimension Inc.	B•1740															√	Proximity, Impulse, Tilt
Grayhill Inc.	B•1743	√		√	√				√	√	√	√	√				Power, Sealed, Coded, MIL
Grimes Co.	B•1750	√		√	√								√				Keyboard, MIL

SWITCHES (cont'd)

Manufacturer	Starting EEM Page No.	DIP	Lever	Pushbutton				Reed	Rocker/ Paddle	Rotary		Slide	Snap Action	Thumbwheel	Toggle	Mercury	Features
				Position			Push-on/ Push-off			Single Section	Multi-section						
				Momentary Action	Positive Action	Interlock											
Hamlin Inc.	B•1751							√									
Hasco Components Inc.	B•1752			√	√	√	√										Reed switches, Proximity switches
Hermetic Switch Inc.	B•1753							√									High voltage, Power, Sealed, Hi reliability
IDEC Corp.	B•1754			√													Illuminated, Key lock, Sealed
Illinois Lock Co.	B•1756																Key lock
ITT Schadow	B•1758	√		√	√	√	√		√	√	√	√					Illuminated, Power, Sealed, Coded
ITW Switches	B•1762		√	√	√		√		√	√		√	√				Explosion proof, Illuminated, Sealed
IVO Industries	B•1775													√			Decade, Illuminated, Coded
JAE Electronics Inc.	B•1776	√		√						√				√			Illuminated, Miniature, Low profile, Tactile
Janco Corp.	B•1778			√	√		√			√	√						Sealed, For printed circuits, MIL
Lamb Inds.	B•1780	√		√			√		√	√		√			√		Illuminated, Power, Sealed, Miniature DIP rotary, AC receptacle (IEC connector), Indicators, Lamps
L-Com Inc.	B•1782																IEEE-488
Lucas Ledex Inc.	B•1784						√				√						Decade, Explosion proof, Illuminated, Key lock, Touch, Coded
LZR Electronics Inc.	B•1786	√					√					√					Sealed, Surface mount
Manfacturers Components Inc.	B•1788			√					√								Front panel mounts, Illuminated, Power, Sealed
Marlee Switch Co.	B•1789							√								√	RF, Matrices-switching, Switches-coax, twinax, triax, matrix, systems
Marquardt	B•1791								√			√					
McGill Mfg. Co.	B•1798		√	√			√		√				√		√		Illuminated, Key lock, Power, Sealed
Mechanical Enterprises Inc.	B•1801																Illuminated
Mepcopal	B•1803	√								√	√						Coded, Surface mount
Micro Switch	B•1804	√	√	√	√	√	√		√				√		√		Illuminated, Key lock, Power, Sealed, Coded, UL, CSA, MIL
Molex Inc.	B•1814																Hybrid-constructed control panels
